Week beginning 4 May 2026

AUSTRALIA & NEW ZEALAND WEEKLY

Analysis and forecasts for this week's key releases.

In this week's edition:

Economic Insight: RBA May hike locked in.

The Week That Was: Policy perspectives from across the globe.

Focus on New Zealand: RBNZ's Breman says core inflation stable.

For the week ahead:

Australia: RBA policy decision, household spending indicator, dwelling approvals, goods trade balance.

New Zealand: RBNZ financial stability report, unemployment rate, employment, LCI wage inflation.

Japan: S&P Global services PMI.

China: RatingDog Services PMI.

Euro area: PPI, retail sales, Sentix investor confidence, S&P Global manufacturing PMI.

United States: Unemployment rate, average hourly earnings, trade balance, ADP employment change.

World: S&P Global Services PMI.

Information contained in this report current as at 1 May 2026.

RBA May hike locked in

Luci Ellis
Chief Economist, Westpac Group

We reaffirm our expectation that the RBA Monetary Policy Board (MPB) will raise the cash rate a further 25bps at its May meeting, to 4.35%. Inflation was higher than the MPB was comfortable with prior to the Middle East conflict, spurring it to lift the cash rate in both February and March. The RBA doubled down on its views that the economy was tighter than full employment and needed to be restrained to get inflation back under control.

Those rate hikes were based on data relating to the period before the war. While petrol prices have since reversed much of the 32.8% increase recorded in March, part of this was driven by the cut to excise, due to expire in a few months. Diesel prices – and thus freight costs – remain very elevated. The RBA could look through higher fuel prices if that was all that was happening, but it is not. Pass-through to other (non-fuel) prices is clearly starting, touching everything from building products to takeaway food if the reports we are receiving are any guide. The RBA will be hearing similar stories from firms in its liaison program.

March would have been very early days for much pass-through to be evident in the CPI. For example, many of the price increases for building products we are aware of did not take effect until 1 April. Today's CPI data nonetheless show scattered signs of pass-through to other prices. There were some promising signs in softer monthly prices of appliances and some other household goods. However, home-building and vehicle repair costs, along with downstream insurance inflation, all picked up in the month and quarter. Services related to audio-visual, computing and telecommunications also increased in the month, which for telecommunications went against the run of recent months' results.

This is occurring in the context of a starting point where non-tradables and services inflation are already too high. At 0.8%qtr, the RBA's preferred quarterly trimmed mean measure of inflation is still too high for the RBA to walk past, even though it was a touch lower than our pre-release expectation, a downside risk we had flagged.

Together with the spike in both consumer inflation expectations and business survey measures of costs and prices, the March inflation data will have the RBA's inflation warning lights flashing bright red. The MPB will see an imperative to address high inflation despite the caution expressed by the minority voters in March.

Some observers point to the demand-destruction higher fuel prices can unleash via the hit to real incomes, which will dampen inflation on its own eventually. This is plausible, but it will take too long to assuage an RBA facing an extended period of above-target inflation.

Indeed, based on its communication so far, especially the March minutes, the MPB puts little weight on that argument. The minutes characterised the supply shock as 'further exacerbating existing capacity pressures', and the future demand destruction as just a possibility. This view flows from the RBA's analysis that the economy is already too tight, as inferred from inflation already being above target. It is also taking signal from the income boost from higher LNG prices, but no disinflationary signal from exchange rate appreciation beyond what is already implied by the RBA's own actions on rates.

"We reaffirm our view that the RBA will raise the cash rate 25bps to 4.35% next week."

We also consider significant what the RBA has not communicated in recent weeks. When markets began pricing in multiple policy rate hikes by the ECB, Bank of England and Bank of Canada, senior officials at those central banks pushed back. Indeed, BoE Governor Bailey stated in an interview with Reuters that "markets had gotten ahead of themselves". ECB President Lagarde used a speech on 25 March to highlight that the current shock was likely to be less inflationary than the energy shock in 2022 when Russia invaded Ukraine at a time that other supply chains were still recovering from pandemic disruption. The RBA has not pushed back in the same way. In addition to the higher starting point for inflation here, part of the reason seems to be that Australia is already seeing the pass-through to other prices that other central banks are still at the stage of watching for.

All this adds up to the MPB wanting to tighten policy further. The refreshed forecast in the Statement on Monetary Policy will allow the RBA to set out its views of the inflation impulse from the war, making May a good opportunity to take, and explain, the next step.

The outlook for the cash rate beyond May is necessarily less certain. We hold to our base case that there will be two further rate hikes after May, in June and August. The RBA's experience last year, when underlying inflation popped back up almost immediately after it cut rates, will have nudged some within the RBA to the idea that the cash rate needs to be higher than its previous peak to really get inflation under control (for the technically-minded, their individual estimates of the neutral rate got revised up). While outwardly the RBA continues to characterise its strategy as being willing to be a bit less activist to hold onto the post-pandemic employment gains, most of the original architects of that strategy have left the building and those inclined to be more activist will have more influence.

There is a chance that the RBA ends up doing less than our base case, if the voices on the MPB that counselled caution in March can sway other members, or if pass-through to non-fuel prices turns out to be less than current information suggests. However, we put less weight on this scenario given the starting point for domestically driven inflation.

Cliff Notes: policy perspectives from across the globe

Elliot Clarke, Head of International Economics
Illiana Jain, Economist

In Australia, the Q1 CPI report provided the first official estimate of the impact on local prices of the Middle East conflict. Headline inflation accelerated sharply to 1.4% (4.1%yr) in Q1 on the back of a 33% surge in auto fuel prices in March alone. Fortunately, a large portion of this spike has since unwound following the fuel excise cut, although fuel prices remain materially above the pre-conflict level.

While there were some signs of price pressures across home-building, vehicle repair and insurance, it is too early to detect, let alone accurately assess, evidence of pass-through. That said, underlying trimmed mean inflation still rose 0.8% in Q1, with annual growth at 3.5%yr, a full percentage point above the mid-point of the target. Notably, March's data pre-dates the wide range of price increases reported anecdotally for building products and other items which came into effect in April.

Following the CPI release, Chief Economist Luci Ellis reaffirmed our call for the RBA to increase the cash rate by 25bps to 4.35% at the May policy meeting. The combination of an elevated starting point for inflation and imminent risk of pass-through will compel the RBA to act pre-emptively to contain inflation expectations. Next week's voting split, updated staff forecasts and the tone of communications will be informative on the baseline policy outlook and risks. For now, we retain our base case of another two hikes beyond May, in June and August, taking the cash rate to a peak of 4.85%.

The combination of higher inflation, slower growth and rising unemployment is also fostering a complex macroeconomic backdrop for the 2026/27 Federal Budget, due May 12. A full preview will be published next week, but our preliminary note sets out our central expectation that commodity price windfalls are likely to more than offset spending pressures and result in a net improvement in the budget's bottom line over the forward estimates.

Offshore, at the beginning of the week the Bank of Japan held its policy rate at 0.75% in a 6-3 vote. Updated forecasts highlight the risk of stagflation, with FY26 growth revised sharply lower to 0.5% (from 1.5%) and core inflation now expected to remain above 2% through to FY28. With Japanese firms increasingly willing to pass on costs, the Middle East conflict risks amplifying domestic inflationary pressures.

The BoJ remains focused on restoring the policy rate as an effective policy lever. Further hikes were signalled, but the timing left open. With policy settings still considered accommodative and a weak yen threatening import inflation, we anticipate the next hike to occur in June, though there is a risk it is delayed to July. The Financial Statements Statistics update due on 1 June will be an important release to gauge firms' response to the crisis and the implications for both inflation and activity.

In the US, the FOMC then kept the stance of policy unchanged at its April meeting. The tone of the statement was balanced, with a sanguine view on GDP growth and the labour market and inflation simply characterised as "elevated". The statement also noted that "the Committee is attentive to the risks to both sides of its dual mandate", while Chair Powell remarked in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Governors Hammack, Kashkari and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate and signal that a hike was as likely as a cut on current information.

The Bank of Canada also kept its policy stance unchanged. The conflict in the Middle East and US trade policy were called out as sources of uncertainty for the global economy. But overall, the outlook for Canada's economy was viewed as little changed from January. Assuming a protracted resolution to the Middle East conflict into 2027, GDP growth is expected to strengthen through 2027-2028 and inflation to turn back towards the 2%yr target from 3%yr in the near term, allowing the Bank of Canada to remain on hold.

"The initial consequences of the Middle East conflict for Australian consumer inflation were seen."

Thereafter in Europe, the ECB Governing Council opted to maintain its current policy stance. The ECB acknowledged that "upside risks to inflation and downside risks to growth have intensified" and the merits of a rate hike were discussed, but developments to date were not sufficient to convince the Governing Council to take immediate action – the decision to hold was unanimous. At its previous meeting in March, the ECB presented two downside scenarios alongside its baseline. In the April press conference, President Lagarde was reluctant to discuss the details of those scenarios, noting simply that conditions are diverging from March's baseline and the upcoming six weeks "will be the right time" to assess the economy "in order to make an informed decision". Her comments appeared carefully chosen to signal openness to a rate increase in June. Therefore, barring any major changes in the dynamics of the Middle East conflict, we continue to believe that a 25bp policy rate hike is the most probable outcome at the next meeting.

The Bank of England's April meeting also unfolded broadly as expected, the MPC voting 8-1 to keep the policy rate at 3.75%. Chief Economist Hew Pill was the sole dissenter, preferring "a prompt but modest hike in Bank Rate" to contain the risk of second-round inflationary effects. The policy statement maintained a hawkish bias, however, emphasising the potential impact of the energy price shock – its scale and duration – on UK inflation and the committee's readiness to act to ensure inflation returns to the 2% target. Policy makers also showed concern over economic growth and the labour market, with slack increasing prior to the conflict.

Risks to the economic outlook were illustrated using three alternative scenarios, differentiated by oil and gas price assumptions and the persistence of second-round inflation effects. In the first two scenarios, the Brent oil price averages $108 in Q2 2026 then decreases at different speeds. Both scenarios showed headline inflation peaking above 3.5%yr this year before easing in 2027. Importantly, the Governor emphasised that, if the economy evolves in line with these scenarios, further policy tightening may not be required – the removal of the circa 50bp of easing priced before the conflict potentially sufficient to bring inflation back to the 2% target. The committee judged that the most severe scenario – where Brent averages $127 this quarter and remains above $100 well into 2028 – would likely require "a forceful tightening in monetary policy", however. The Governor declined to specify what interest rate changes this would entail, but noted the need to act quickly to minimise second-round effects. Bank Rate hikes this year are therefore not guaranteed, but with Brent Oil surging as much as 20% this week to a peak around USD126 (now USD114) as the US and Iran remained at an impasse, conditions may eventually become too close to the BoE's most severe scenario for the MPC to ignore. We continue to expect a Bank Rate hike at the next policy meeting in June, with further tightening possible, but dependent on evolving circumstances.

RBNZ's Breman says core inflation stable

Darren Gibbs
Senior Economist

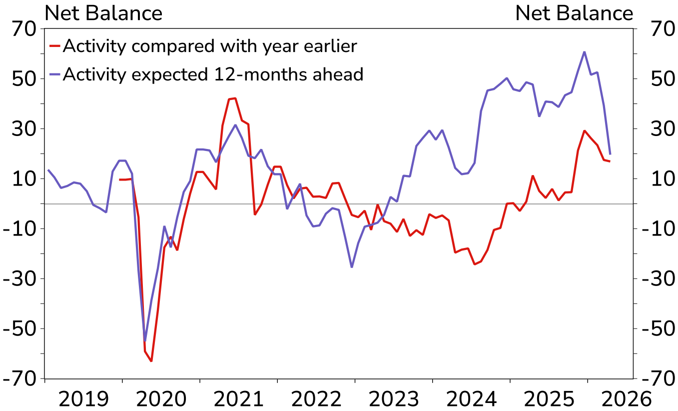
The domestic focus during this past holiday-shortened week has remained on gathering up-to-date information on how the New Zealand economy is being impacted by the ongoing Middle East conflict and assessing the RBNZ's likely response.

Early in the week, RBNZ Governor Breman participated in an event in Hamilton as part of her regional engagement programme. While there were no formal speech notes, the RBNZ issued a press statement outlining the points that she planned to make during a panel discussion, while audio from the session was also made available. In our view, Breman's comments were consistent with those made at the 8 April OCR review. Specifically, Breman stated that "…the Reserve Bank remains focused on balancing inflation control with supporting economic recovery." And she reiterated that "…monetary policy can and should ensure that a temporary increase in inflation does not turn into enduring inflationary pressures."

Perhaps the main news was Breman's reflection on last week's Q1 CPI report. She noted that annual inflation of 3.1% was slightly higher than expected at the time of the April OCR Review. But importantly, she added that "…measures of core inflation, which look through this volatility, have remained stable within the target band." She also emphasised that the Bank was focused on the prospect of second-round inflation effects, specifically transmitted through the labour market, rather than the first-round impact of higher fuel prices. These comments suggest that the RBNZ will take the time necessary to fully understand the nature and implications of the conflict before deciding how it should respond. Breman's comments were the initial catalyst for the repricing of prospects of a rate hike at the RBNZ's 27 May meeting, which the market now views as around 25% (down from 60% at the beginning of the week). Confidence reports released later in the week – discussed below – have contributed to that repricing. For the record, Westpac continues to forecast a first lift in the OCR in September.

Staying with the RBNZ, it was announced this week that the Minister of Finance and the Bank's Monetary Policy Committee (MPC) have agreed changes to the MPC Charter. These changes will provide more transparency and accountability to MPC decision-making. They also are a subset of the reforms we recommended in a note published last year before the new Governor took up her role. While the new Charter continues to encourage the formation of a consensus decision, it requires that the votes of individual members be attributed when a vote takes place. As well as attributing votes, material differences of view or judgement within the Committee will also be attributed in the published Record of Meeting, even when no vote is taken. This will make it easier for MPC members to publicly express differing views on the economic outlook and monetary policy strategy (indeed, it makes clear that members are encouraged to communicate those views externally). The new Charter will be in place for the RBNZ's 27 May meeting so will help elucidate any differences in view amongst the MPC. These reforms are a welcome step in the right direction in our view. Although just how effective the changes will be is still to be assessed in light of just how frequent votes are and the threshold applied when determining if an alternative view is specifically recorded.

Activity past year vs expected year ahead

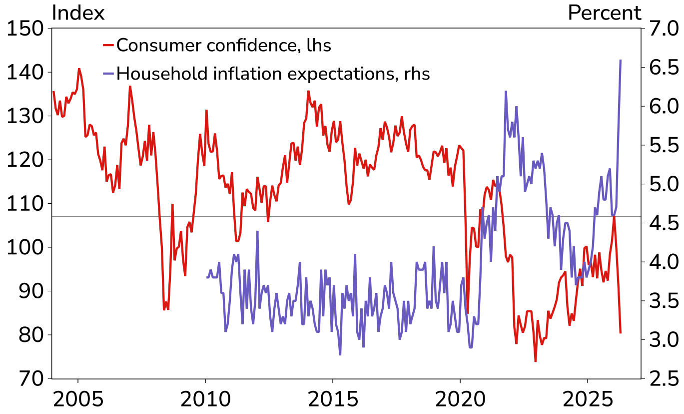


Source: ANZ, Stats NZ, Macrobond, Westpac Economics

On the data front, the focus was the ANZ's Business Outlook Survey for April. Overall, the broad theme of the survey was much as should have been expected based on the late responses to last month's survey and the results of last week's QSBO business survey. Headline business confidence has taken a significant knock, with net optimism declining to -10.6 from 32.5 in April – the first negative reading since 2023. Encouragingly, firms remain more optimistic about their own situation, although the proportion of firms expecting their own trading activity to increase over the next year has halved to 19.6. A similar proportion continue to report an increase in activity levels over the past year, suggesting that demand is holding up for many firms. Uncertainty is curbing firms' willingness to invest in expanding their businesses, however, with net hiring intentions turning modestly negative in April and net investment intentions sliding to barely positive levels. Overall, this survey portrays the picture we expected to see a few weeks ago when we significantly downgraded our view on growth through mid-2026.

Predictably, firms' year-ahead inflation expectation increased to 3.81% from 3.08% previously, even as the net proportion of firms reporting an intention to raise prices fell modestly from March. Firms reported a sharply higher expected increase in their costs over the next three months, whereas expected price increases were little changed from last month's survey. This points to significant pressure on firms' profit margins. Perhaps as a response, firms forecast for year-ahead wage growth fell to just 2.5% - now close to last year's low. The latter is likely to be viewed somewhat encouragingly by the RBNZ given its concern that high near-term headline CPI inflation rate could morph into second-round inflation by driving a wage-price spiral (albeit the current slack in the economy).

Consumer confidence and inflation expectations



Source: ANZ, Westpac New Zealand, Macrobond, Westpac Economics

Turning to the rest of this week's data, the ANZ's consumer confidence index slumped a further 12% to a three-year low of 80.3 in April. This reading is in line with the responses that had been collected in the final week of the March survey, suggesting that confidence may have been broadly stable over the past month. The net proportion of households thinking it's a good time to buy a major household item (the best retail indicator) fell 11ppts to -25, which is the lowest level since September 2024. This appears consistent with some recent anecdotes from the retail sector. Household's two-year ahead inflation jumped 0.9ppts to 6.6%, thus exceeding the levels reached even during the Covid spike.

The final piece of data this week was the building consents report for March. The number of dwelling consents fell a modest 1.3% during the month but were still 8.2% higher than a year earlier. Given that most of the consents issued in March were likely filed in February, it will be another month or two before any impact from the Middle East conflict becomes evident in the building consents figures.

One piece of good news this week was the Government's announcement that it had reached an agreement with one of the largest fuel companies to supply 90m litres of diesel – equivalent to nine days of regular demand – to fill the additional storage space that will become available towards the end of June. This will increase the average level of diesel in the country at any given time by about a third, adding a small but welcome degree of resilience.

Looking ahead to next week, the focus domestically will be on the March quarter labour market surveys. While these surveys will give no insight about the emerging impact of the Middle East conflict, they will still provide important information on the degree of spare capacity and labour cost pressure prior to the oil price shock.

As my colleague Michael Gordon wrote in his preview, [we expect that the unemployment rate likely remained stable at 5.4%] during the March quarter. While the tax-based Monthly Employment Indicator (MEI) points to a modest lift in employment in the quarter – broadly in line with growth in the working age population – we expect the Household Labour Force Survey (HLFS) of measure of employment will post a 0.1%q/q decline. This simply reflects our sense that the 0.5%q/q increase in the HLFS measure in the December quarter was likely overstated, with the MEI failing to validate the HLFS's indication of a sharp rise in employment among the under-25s during that quarter. With the labour force participation rate in the December quarter likely similarly overstated, we expect a modest decline in participation to be recorded in the March quarter.

Turning to labour costs, given the usual lags, spare capacity in the labour market will likely continue to have restrained wage growth in the March quarter. We expect a 0.5%q/q rise in the Labour Cost Index (LCI) for the March quarter, leaving annual growth at around 2%. Our forecast for private sector wage growth is slightly more subdued at 0.4%q/q. The public sector tends to see larger pay increases in March quarters – we've pencilled in a 0.8%q/q rise, though this would still see annual growth slow from 2.2% to 2.0%.

Our picks are a little softer than the RBNZ's February Monetary Policy Statement forecasts, which assumed faster jobs growth and a decline in the unemployment rate by this point. At the margin, a result in line with our forecasts would strengthen the case for caution before lifting the OCR. But the bigger issue for the RBNZ will be what has happened since the MPS: the Middle East oil shock will hinder the economic recovery, potentially leading to delays in hiring, layoffs and business failures. The RBNZ will need to balance what this might mean for medium-term inflation against the risk that high near-term inflation could nonetheless raise medium-term inflation expectations.

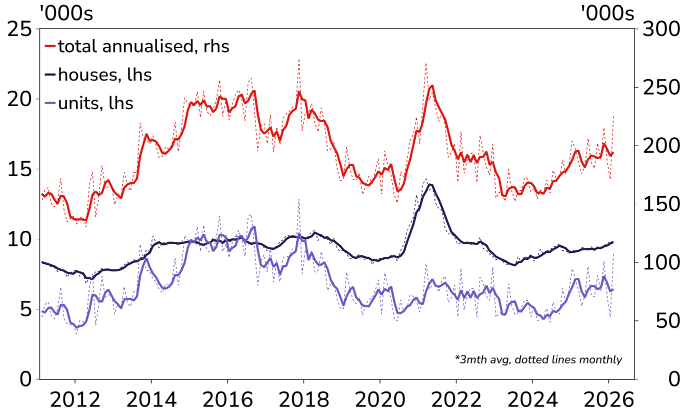
AUS: Mar Dwelling Approvals (%mth)

May 4, Last: 29.7, Westpac f/c: –5.0
Market f/c: –10.0, Range: –29.0 to –4.0

Dwelling approvals rebounded sharply in Feb, up 29.7%mth and 14%yr. The bounce more than retraced a 20% drop through Dec–Jan that followed a choppy run over the previous four months. The volatility has centred on private unit approvals. Private detached house approvals were broadly flat in Feb but have shown positive underlying momentum since the start of the year.

March is likely to show a move lower, the Feb jump taking high rise approvals to an elevated high level that is unlikely to sustain. Detached house and medium density unit approvals should retain some positive momentum. While the mix is uncertain, a 5% decline in total approvals is plausible. Note that it will take a several months for interest rate rises and other developments to impact dwelling approvals.

Approvals ascent re-emerges



Source: ABS, Macrobond, Westpac Economics

AUS: Mar Household Spending Indicator (%mth)

May 5, Last: 0.3, Westpac f/c: 2.0
Mkt f/c: 1.5, Range: –0.5 to 2.4

The Household Spending Indicator rose 0.3%mth in Feb, matching Jan's outcome and in line with its average monthly pace over the past two years. Annual growth edged up to 4.6%yr.

March is expected to show a big jump led by a sharp rise in fuel prices and a pull-forward in fuel purchases. Our **Westpac-DataX Card Tracker** suggests the ABS spending indicator is likely to be up around 2% for the month. That would mark the strongest monthly increase since July 2022 and take annual growth to just above 6.5%yr. Note that the March report will also include estimates for Q1 household spending in real, inflation-adjusted terms. With nominal spend tracking a 1.1% rise in the quarter and the CPI posting a 1.4% rise, real spending may record a small decline for the quarter.

Monthly household spending indicator

AUS: RBA Policy Decision (%)

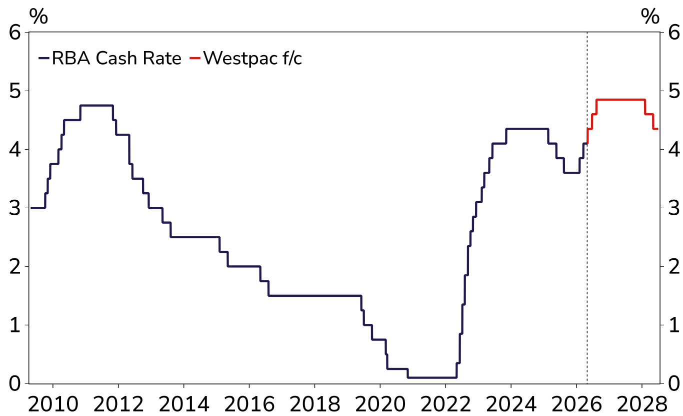
May 5, Last: 4.10, Westpac f/c: 4.35
Market f/c: 4.35, Range: 4.10 to 4.35

Westpac expects the RBA Monetary Policy Board (MPB) will deliver its third consecutive 25bp rate hike at the May meeting, raising the cash rate back to its previous peak of 4.35%.

The Q1 CPI report demonstrated that inflation was higher than the MPB was comfortable with prior to the Middle East conflict. Pass-through of higher fuel costs to other prices throughout the economy is clearly starting. Given the higher starting point and faster pass-through, communications from RBA officials have not pushed back on market's pricing in rate hikes over recent weeks, unlike other central banks.

This round will include a refresh of the staff forecasts which will allow the RBA to set out its views of the inflation impulse from the war. For more detail, see Page 2.

RBA to hike in May



Source: RBA, Macrobond, Westpac Economics

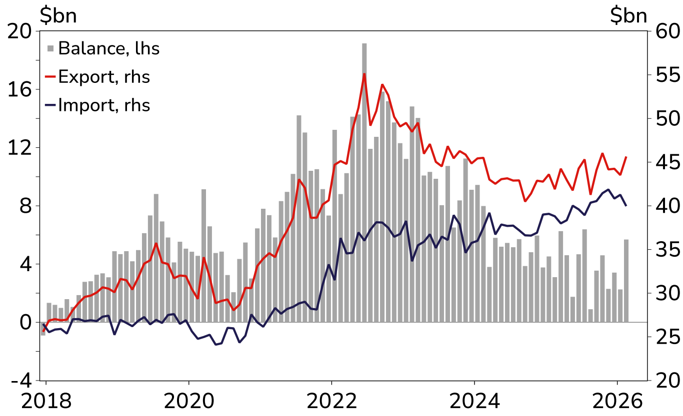
AUS: Mar Goods Trade Balance ($bn)

May 7, Last: 5.7, Westpac f/c: 3.9
Mkt f/c: 4.4, Range: 2.0 to 7.5

A combination of an increase in gold exports, along with a rebound in rural goods outflows, led to an almost 5%mth rise in export values in February. Imports fell by more than 3%mth, primarily due to ongoing volatility in key capital goods imports, leaving the goods trade balance at a seven-month high of $5.7bn.

March is typically a strong month for key commodity exports, but seasonally adjusted data may show lower shipments of the Big 3 commodities. This is despite a significant rise in coal exports, driven by increased demand from Asia. Disruptions from the Middle East conflict could affect Australian imports – although data from ports does not currently indicate a significant impact on oil imports, so we have pencilled in a modest recovery in imports. Overall, we think the headline goods surplus will ease back below $4bn, a level in line with last year's average.

More volatility in goods trade to be expected



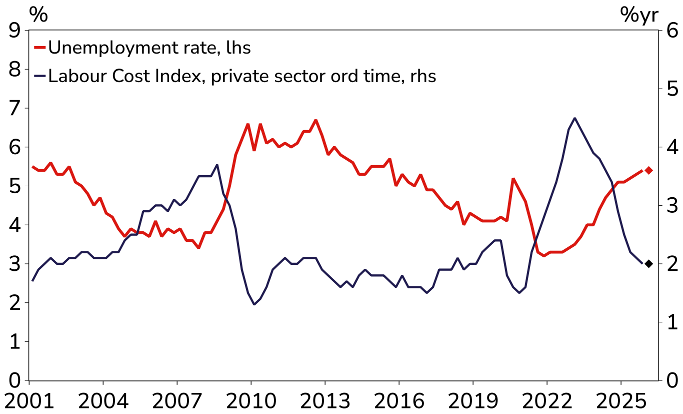
Source: ABS, Macrobond, Westpac Economics

NZ: Q1 Labour Market Surveys (%)

May 6, Unemployment Rate, Last: 5.4, Westpac f/c: 5.4
May 6, LCI Private Sector, Last: 0.5, Westpac f/c: 0.4

We expect the unemployment rate to hold steady at 5.4% for the March quarter. High-frequency indicators have pointed to a modest lift in jobs in recent months, though not outpacing the growth in the working-age population. We do expect to see a small downward correction in the HLFS employment measure, after an overstated 0.5% rise in the December quarter, but this doesn't alter the general picture – we recommend focusing on the unemployment rate, as this is less vulnerable to sampling errors. Given the existing slack in the labour market, wage growth is likely to have remained subdued.

Labour market indicators



Source: Stats NZ, Macrobond, Westpac Economics

US: April employment report

May 8, payrolls, Last: 178k, Mkt f/c: 60k, WBC f/c: 90k
May 8, U/E rate, Last: 4.3%, Mkt f/c: 4.3%, WBC f/c: 4.3%

Nonfarm payrolls rebounded 178k in March, taking the 3-month average to 68k, a material step up from the month-average through the second half of 2025, -8k.
While the unemployment rate is essentially unchanged at 4.3% over the past year, household employment growth has been materially weaker than payrolls. Had the participation rate not declined by around 0.7ppts, the unemployment rate would instead be close to 5.0%.
In April, a robust gain in employment, circa 90k for payrolls, is likely to keep the unemploymen rate unchanged, though risks for employment remain skewed to the downside after a weak period for activity growth.

Household survey suggests risks to linger

Federal Budget: On the upside of the revenue cycle, the challenge is policy timing

#federalbudget #australia #aud #inflation

By Pat Bustamante
Senior Economist, Westpac

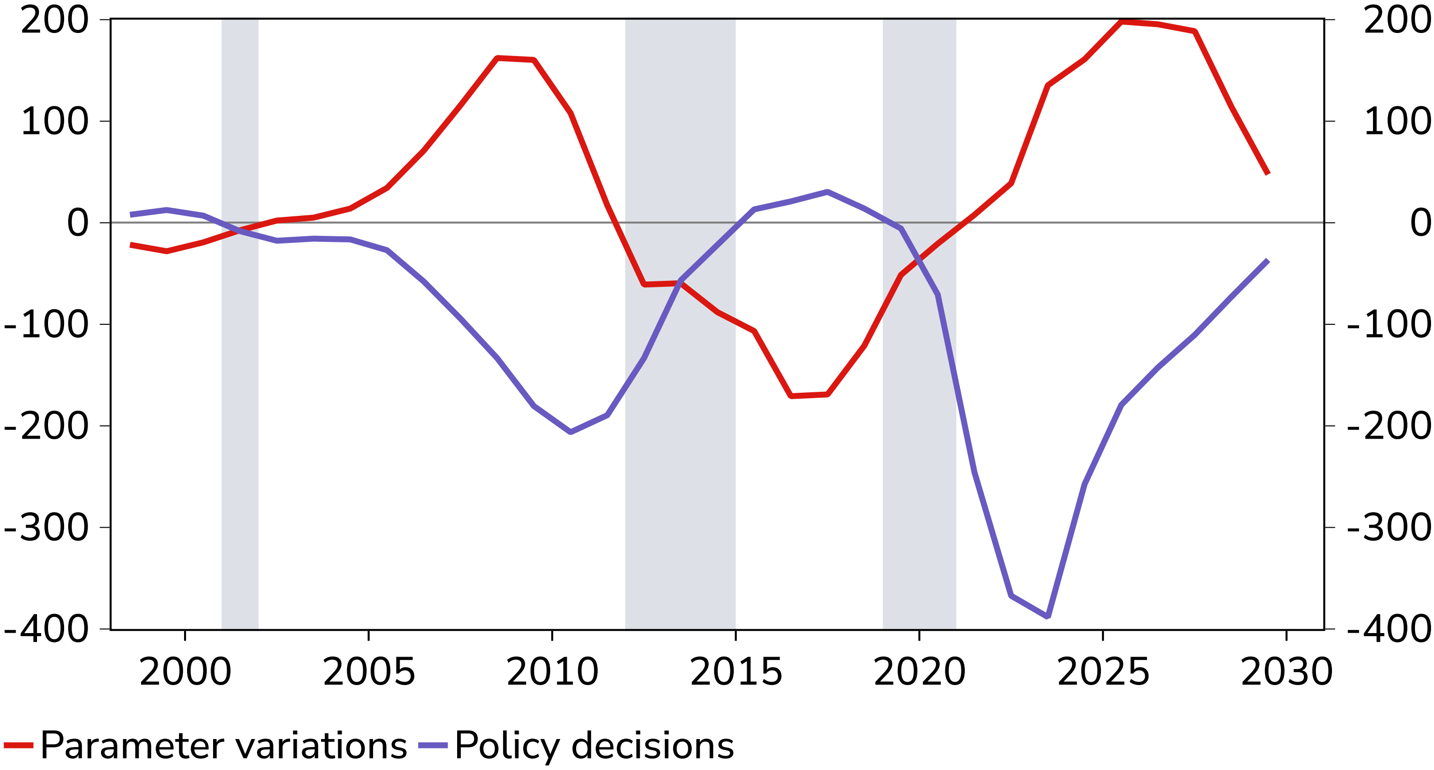
Share

With only a modest budget windfall, changes in the Budget bottom line will hinge on discretionary decisions, which history shows are triggered once labour-market risks become material.

- Higher commodity prices and inflation – among the so-called “parameter variations” that drive government budget outcomes – are expected to deliver a net fiscal windfall, despite higher costs driven by elevated inflation, slower growth, and rising unemployment. Treasury is likely to publish a net improvement of around $23bn across the forward estimates. This is less than the net improvement of $55bn we expect will eventually be published based on our less conservative commodity price (and thus revenue) forecasts.
- Given this relatively small upgrade, the change in the published budget bottom line will largely be determined by discretionary policy decisions. Surprisingly, discretionary fiscal policy has been pro-cyclical over the past 30 years: discretionary measures tending to expand when the nominal economy delivers windfalls and to tighten when there are shortfalls.
- Only during major crises (such as the GFC and COVID) has discretionary fiscal policy played a significant counter-cyclical role. However, fiscal measures have tended to be late and slow to unwind, with the maximum ‘policy impact’ occurring when the recovery was under way and improving economic conditions were delivering revenue windfalls – a lesson perhaps for the current conflict.
- Our analysis also shows that discretionary fiscal policy is highly responsive to labour market risks. Policy has historically become much more activist once employment growth forecasts are downgraded by at least 0.35ppts across the forward estimates. A change of this magnitude is consistent with the economic downgrades we expect this Budget.
- As a result, the scale of any discretionary fiscal response is likely to depend critically on Treasury’s assessment of the labour market fallout from the conflict in the Middle East. **Given the nature of the current oil price shock, a response that is not targeted and temporary risks exacerbating the cycle.**

Economic variations and discretionary policy*

Impact on the UCB, Rolling 3 year sum, $billions.



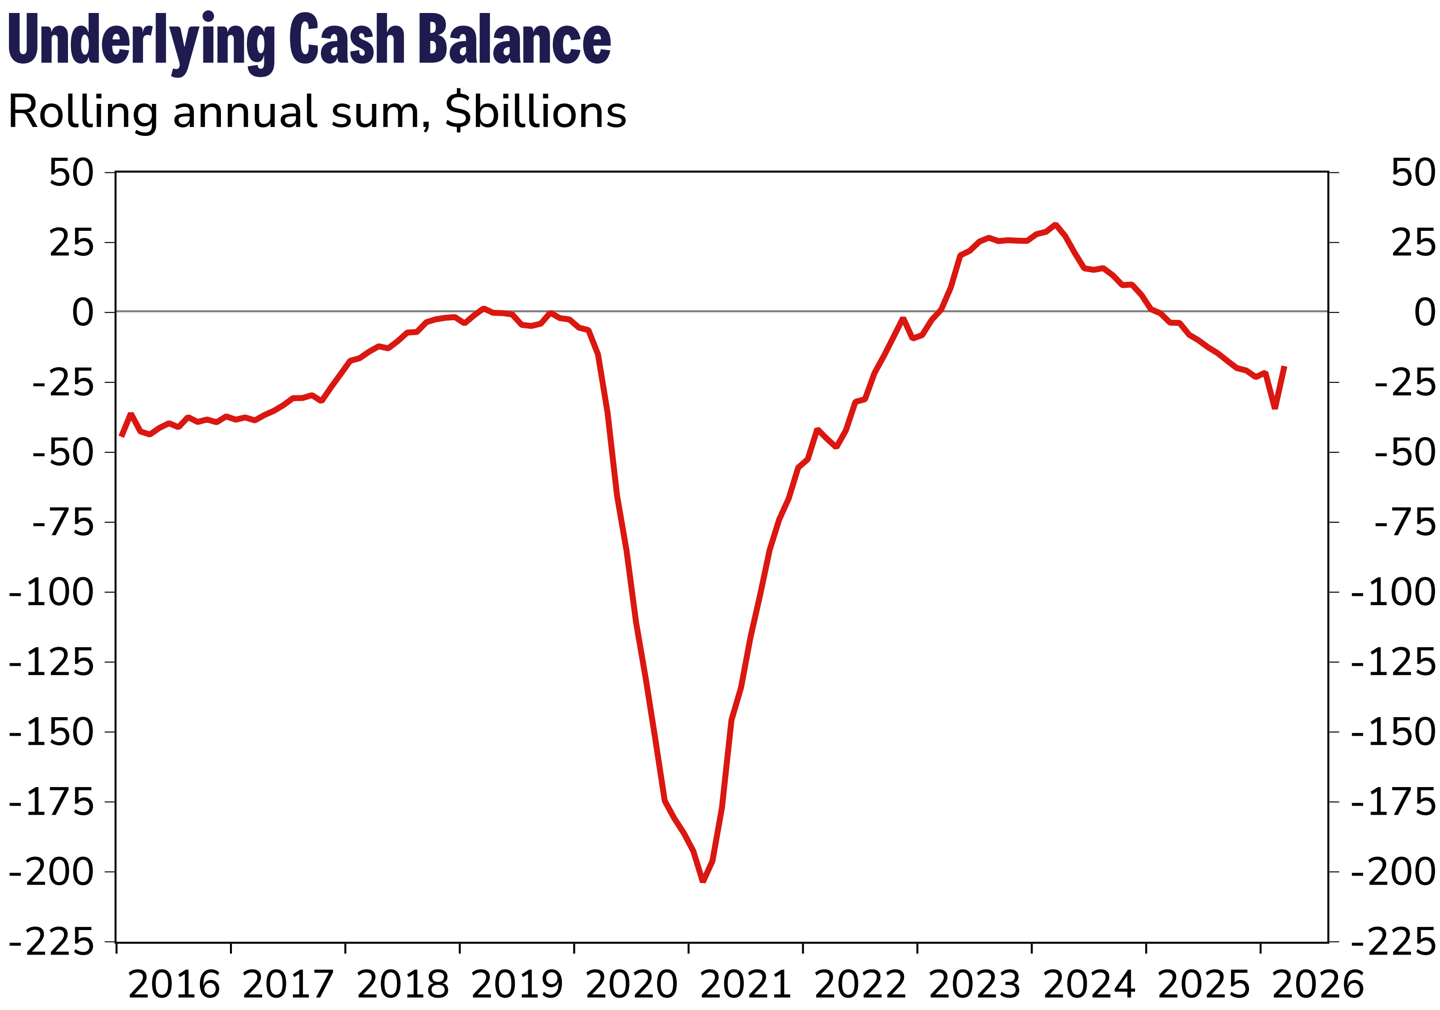
Source: PBO fiscal data, Macrobond, Westpac Economics
*shaded periods denote counter-cyclical policy where variations and discretionary policy work in opposite direction.

The Middle East crisis and associated global energy shock will have a complex and varied impact on Federal government finances. Higher-than-assumed commodity prices and elevated inflation will continue to lift nominal incomes and tax receipts. But the Budget impact of the Middle East conflict does not stop there. **In a shock like the current one, where economic and employment growth slow, unemployment ticks higher and inflation accelerates, welfare payments and the cost of government rise as well.**

We expect economic growth to slow materially through 2026 to just 1%yr, down from 2.6%yr in calendar 2025. The unemployment rate is forecast to drift higher to almost 5% by year-end, around ½ppt above our pre-conflict profile, and remain elevated through 2027. Combined with accelerating inflation, now expected to peak at around 5.4%yr in Q2 2026 (up from around 3.8%yr expected prior to the conflict), this will push government payments onto a permanently higher path in nominal terms.

The Starting Position is Strong

On Friday 24 April the Department of Finance released the final set of monthly financial statements ahead of the May 12 Budget, and they did not disappoint. The underlying cash balance is currently running around $17bn ahead of the profile set out in the December MYEFO, published only a few months ago. This upside has been driven by the cyclical upswing which is boosting tax collections and making it harder for the Government to get capital out the door because of capacity constraints in certain industries (most notably construction). Looking at the rolling 12-month cash balance, the steady deterioration observed since March 2024 has now stabilised, and we expect an improvement from here.



Source: Australian Department of Finance, Macrobond, Westpac Economics

Cash tax collections are running around $7.2bn ahead of profile. This reflects stronger-than-expected personal income tax collections (around $5bn) and company tax receipts (around $2bn). We expect upside surprises to continue once miners make wash-up payments in May, reflecting higher commodity prices across the 2025 calendar year – particularly for gold.

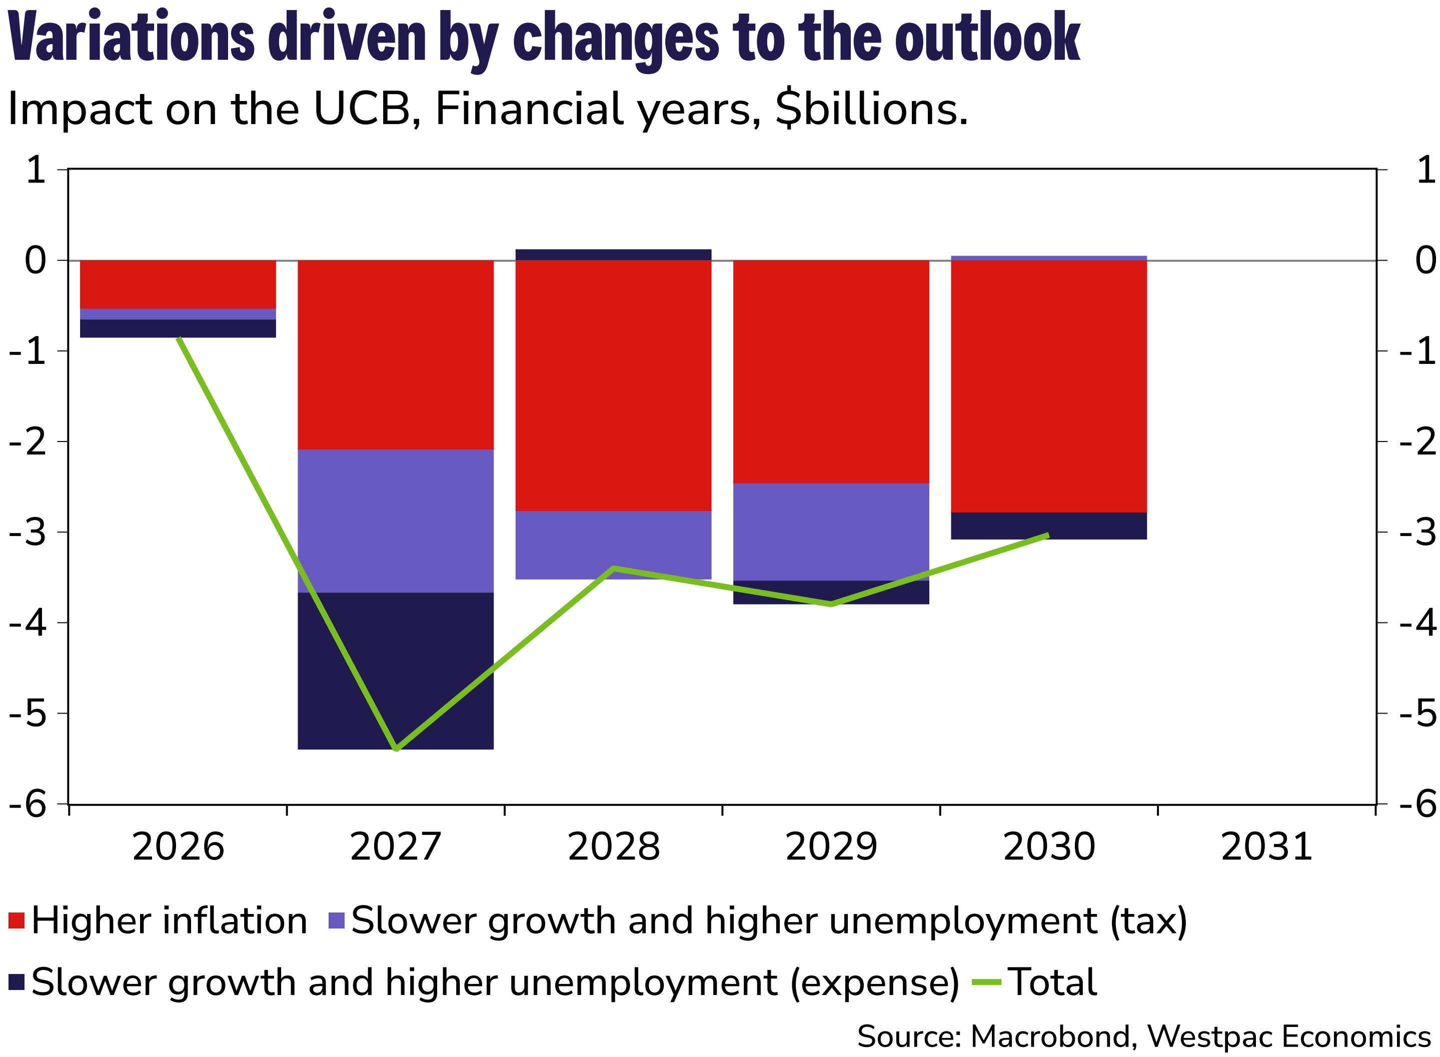
The cyclical upswing is also making it harder for the government to get money out the door. Payments are running around $10bn below forecast, including $2bn in investment in non-financial assets (defence, IT and infrastructure) and $4bn in grants and subsidies to the states, reflecting slower progress payments. In addition, the headline deficit is ahead of profile with off-budget spending (including CEFC and Housing Australia) coming in around $3bn below profile.

Overall, this points to a meaningful improvement in the bottom line, with the deficit now tracking at close to half of what was previously expected.

Payments Pressures Rise in a Stagflationary Environment

But the outlook becomes more challenging from here. Parameter variations will push payments higher mechanically, with inflation lifting both service delivery costs and the indexation of programs such as pensions and income support. **We estimate this will add roughly $11 billion to spending over the five years to FY2030.**

In addition, slower activity and employment growth, alongside a higher unemployment rate, will raise social payments and reduce income-tax collections, at a cost of around $6bn over the same period. **In total, these forces are likely to worsen the budget position by around $17bn.**



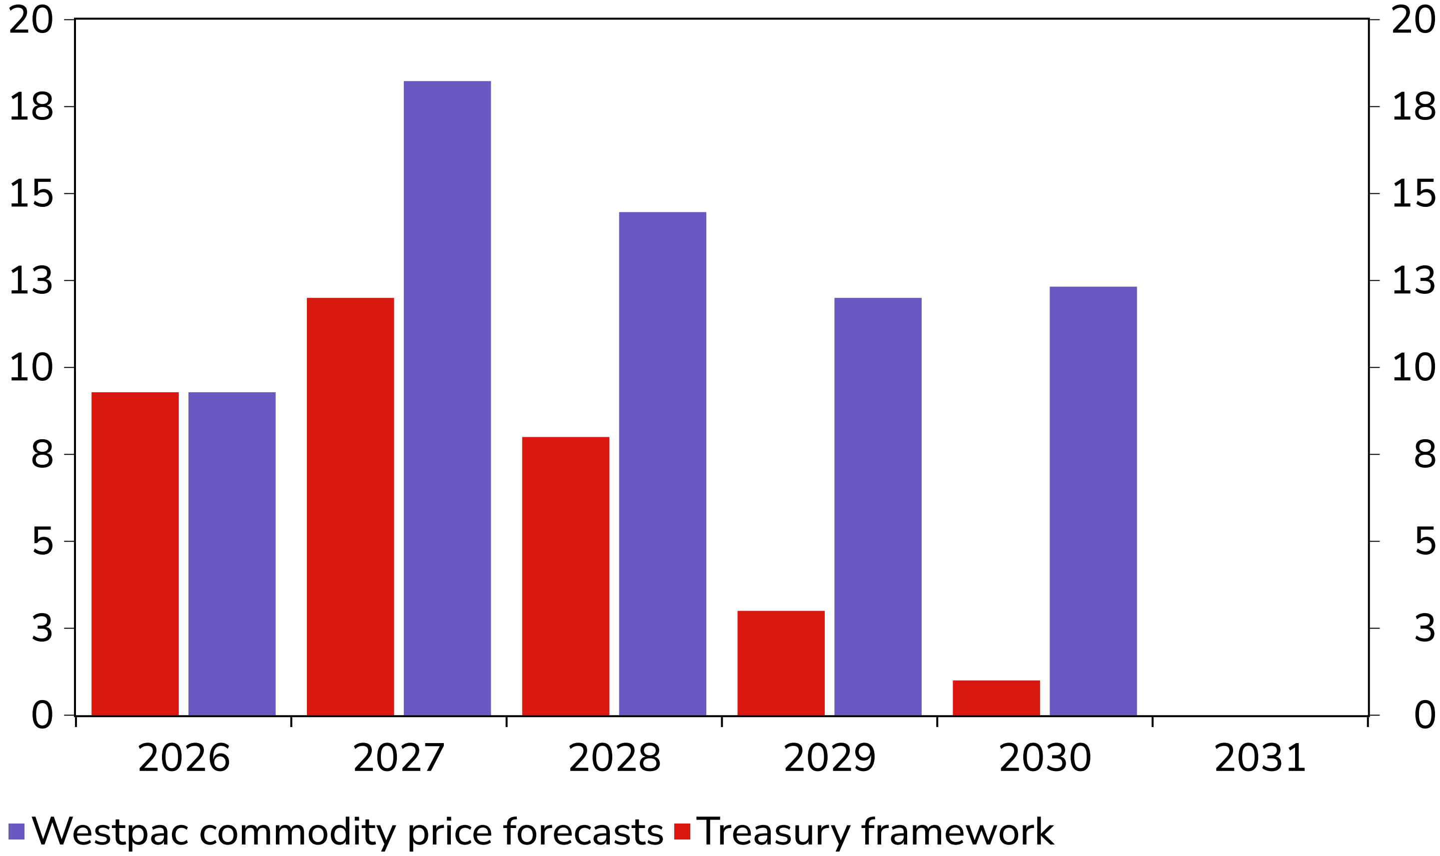
Commodity Revenues More Than Offset Higher Costs

However, these costs are more than offset, at least initially, by higher tax collections. Higher gold prices, elevated inflation and direct spillovers from the Middle East conflict into global commodity markets are set to lift company tax receipts by around **$60bn over the next five years, with roughly $20bn attributable to conflict-driven commodity price gains**.

But much of that uplift is unlikely to appear in full in the 12 May Federal Budget. Treasury's standard approach assumes commodity export prices fall from current spot levels back toward long-run fundamentals, typically over four quarters (and eight quarters for gold). On those more conservative assumptions, the implied windfall is lower at around $29.5bn over five years, with the remainder only materialising in later budgets or final budget outcomes.

Tax upgrades driven by elevated commodity prices

Impact on the UCB, Financial years, $billions.

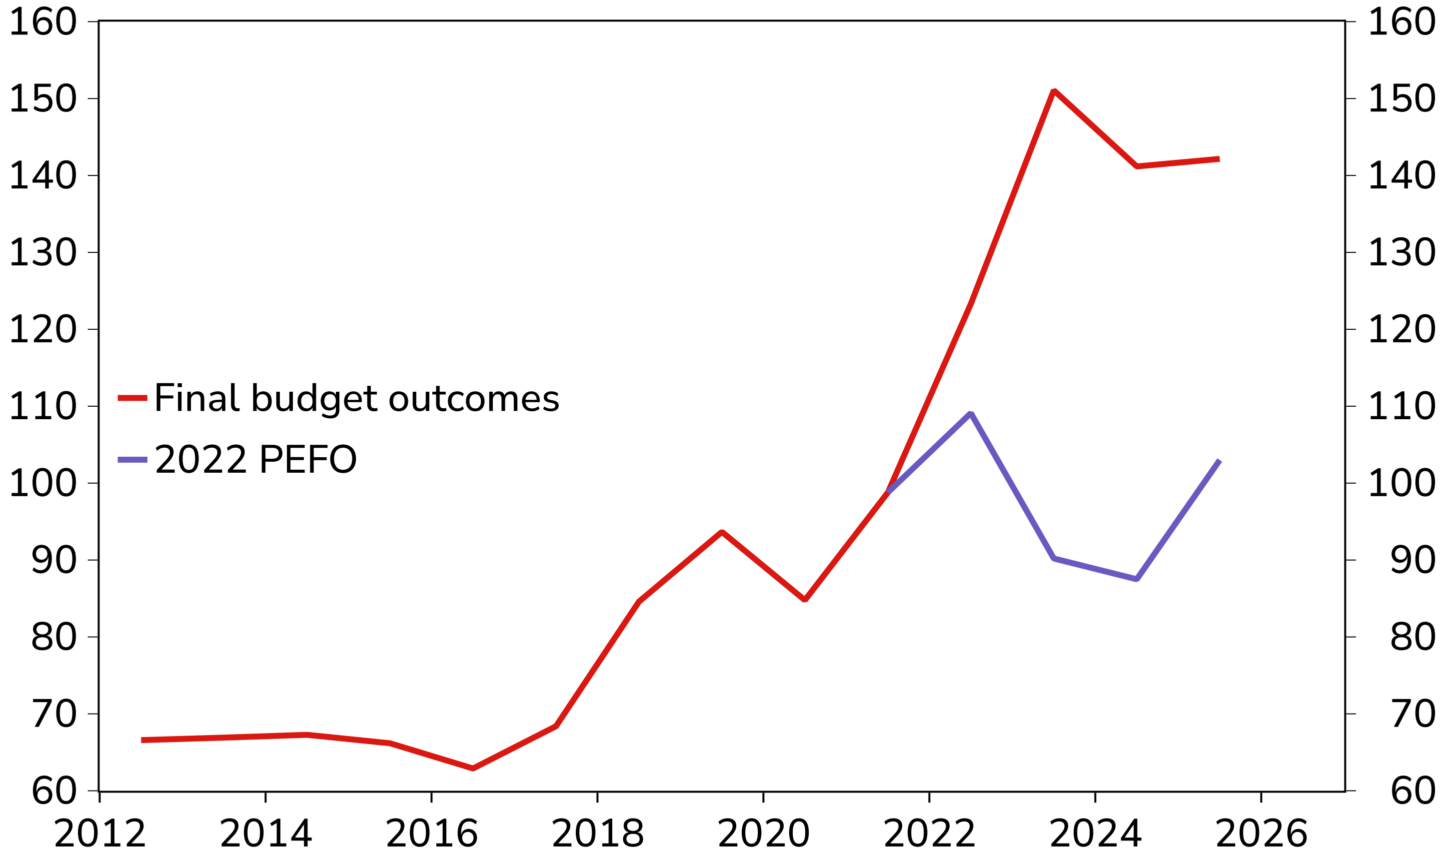


Source: Macrobond, Westpac Economics

This familiar pattern, conservative commodity price assumptions up front followed by stronger-than-expected company tax receipts down the track, has become a defining feature of Australia's recent fiscal narrative. **Over the four years to the end of FY2025, company tax receipts were a staggering $168bn higher than projected in the 2022 Pre-Election Fiscal Outlook (or an average of $42bn higher per year).**

Company tax forecast and outcomes

Financial years, $billions.



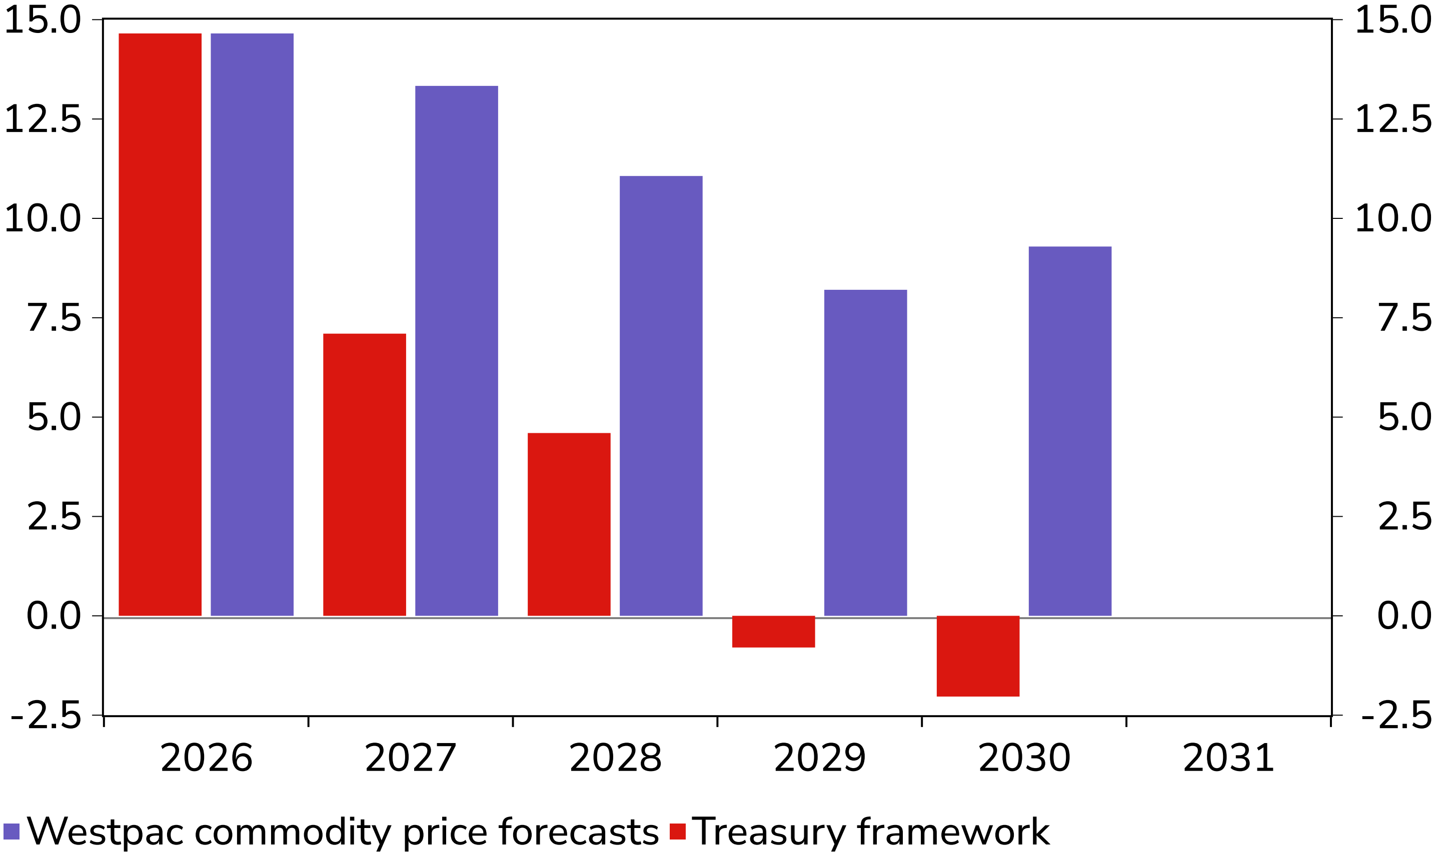
Source: Macrobond, Westpac Economics

Delivering the Budget a Temporary Windfall

Under Treasury's standard assumptions, what will be published on 12 May, the net gain to the Budget is closer to $23bn over the next five years, with net gains frontloaded, shifting to negative over the final two years of the forward estimates. Under our less conservative commodity-price forecast, the windfall is materially larger, closer to $55bn over the same period.

Net impact of changes to the economic outlook

Impact on the UCB, Financial years, $billions.



Source: Macrobond, Westpac Economics

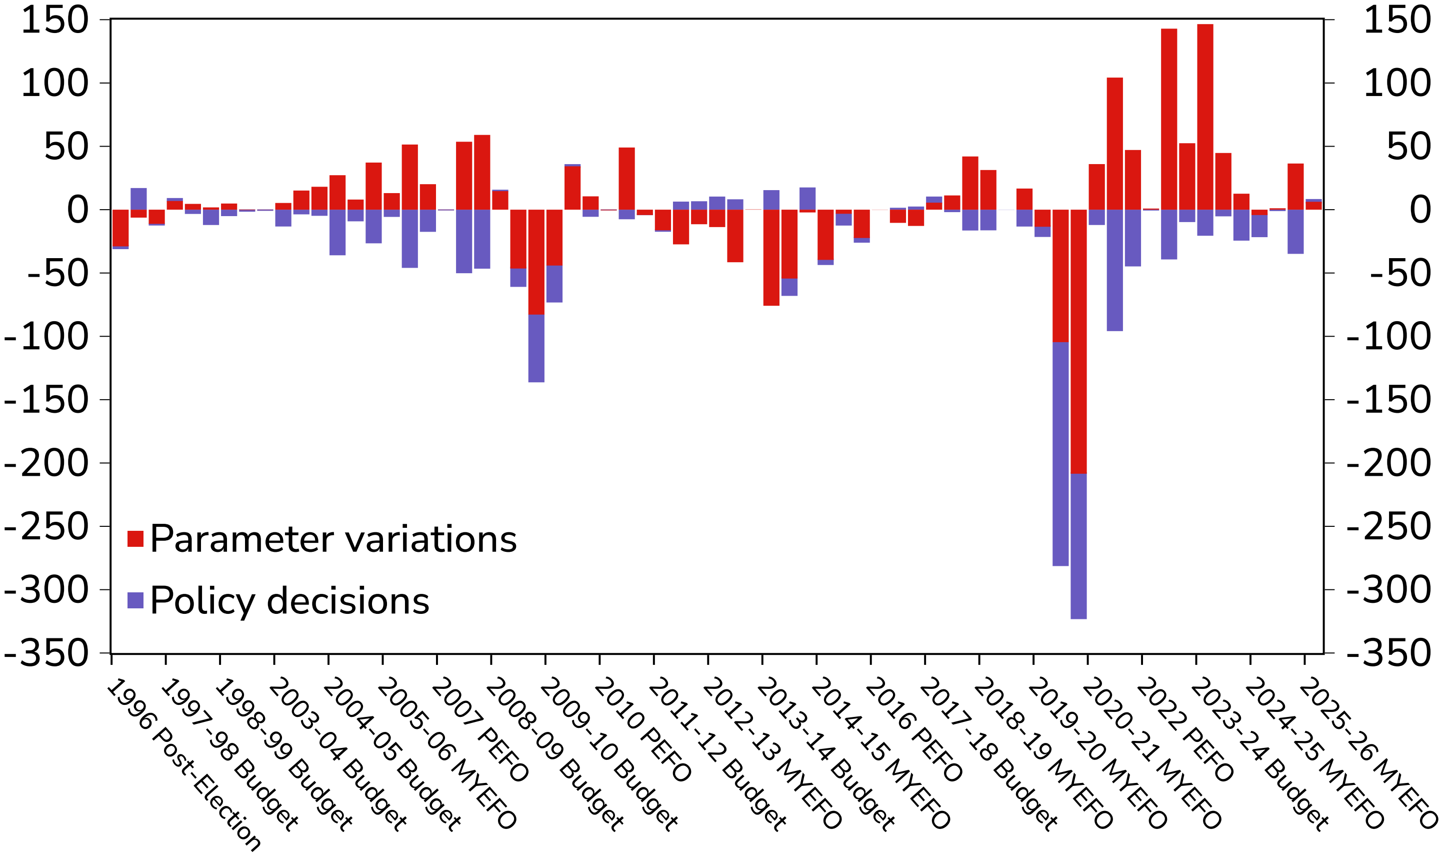
Discretionary Policy: The Key Swing Factor

The big unknown at this stage is how the government chooses to respond to the economic and social fallout from the conflict in the Middle East and how this is balanced against other reforms, most notably those aimed at reining in spending on the NDIS and promoting intergenerational equity. Given relatively small upgrades, **the Federal government will be navigating uncharted waters where policy decisions will determine whether the budget position ultimately improves or deteriorates.**

This is different from the historic norm where the impact of variations driven by changes to the economic outlook (red bars in the chart below) have been significantly larger than the impact of policy changes (purple bars).

Economic variations and discretionary policy by round

Impact on the UCB over relevant forwards, $billions.



Source: PBO fiscal data, Macrobond, Westpac Economics

Looking at government behaviour over the past 30 years, several clear regularities emerge.

First, discretionary fiscal policy has generally been pro-cyclical. That is, discretionary government decisions add to the fiscal impulse when the nominal economy and commodity prices deliver a budget windfall and vice versa. This pattern was especially pronounced in the pre-pandemic decade and in the aftermath of COVID, with discretionary government policy adding materially to the overall fiscal impulse.

For example, immediately prior to the pandemic discretionary policy changes improved the budget while variations driven by the nominal economy were subtracting from the budget – in other words, the nominal economy was surprising on the downside. This combination of tighter policy when the economy and commodity prices underwhelm likely contributed to the period of sluggish growth and below RBA target underlying inflation recorded at the time.

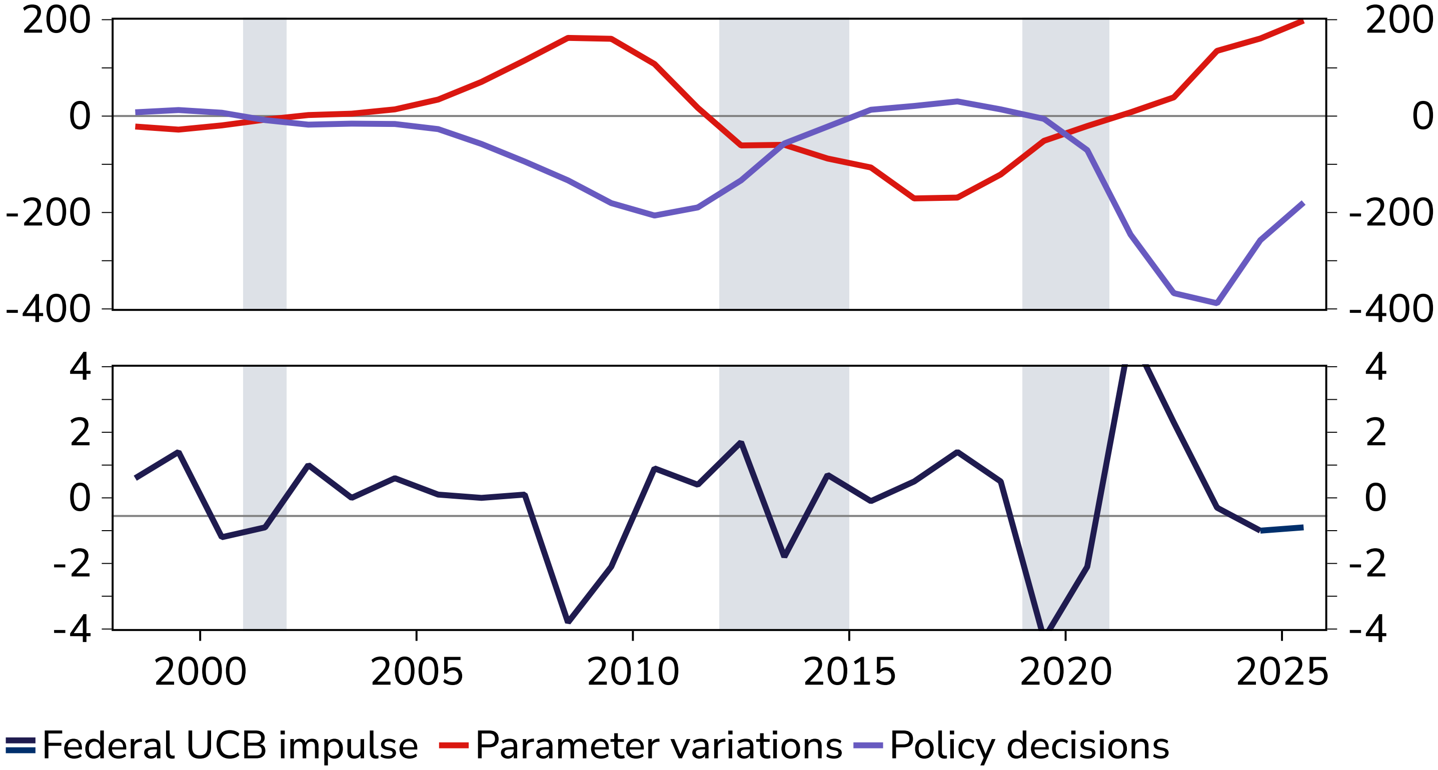
On average across the budget rounds since the 1996 post-election budget, around 75% of the budget windfalls have been spent.

Note that there are instances when the nominal economy could be growing more strongly than the real economy, such as when commodity prices are rising and inflation is elevated. In this world, “pro-cyclical” policy could be more justifiable, only where the real economy is softening.

Secondly, fiscal policy becomes counter-cyclical during crises, such as the GFC and COVID. Importantly, these episodes are typically characterised by a fiscal overshoot, with fiscal expansion persisting even as the shock dissipates and economic conditions improve. For example, peak policy impact around COVID was in the 2023FY, when a recovery was gaining traction and economic variations and nominal income growth were surprising to the upside.

Economic variations and discretionary policy*

Impact on the UCB, Rolling 3 year sum, $billions.



Source: PBO fiscal data, Macrobond, Westpac Economics

*shaded periods denote counter-cyclical policy where variations and discretionary policy work in opposite direction.

Finally, discretionary spending has historically been highly responsive to labour market risks. Our modelling of how fiscal policy responds to changes in economic conditions and forecasts shows that policy is particularly sensitive to expectations for employment growth and unemployment, and that this response is non-linear.

Using historical budget data, we find statistically significant threshold effects. When employment growth is downgraded by at least 0.35ppts in a single budget round, governments have tended to shift into a more activist fiscal regime. A downgrade closer to ½ppt (which is consistent with Westpac Economics' recent downgrades) has, in the past, been associated with discretionary fiscal packages of at least $10bn over the forward estimates.

Taken together, this suggests that at least some of the windfall is likely to be spent, and possibly a large fraction of it. **The scale of any discretionary response will depend critically on Treasury's assessment of the labour-market implications of the conflict in the Middle East. While there is no sense of panic within government, policymakers are clearly alert to the downside risks.**

What next

Before the May 12 budget we will publish our final estimate of the bottom line including announced measures. As noted, unlike the most recent history, overall improvements will hinge on government policy rather than the economy. In addition, we will publish what this means for the national (federal and state) fiscal impulse going forward.

Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

“professional clients” as defined by the rules of the Financial Conduct Authority and is not intended for “retail clients”. Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area (“EEA”): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH (“WEG”) under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority (‘BaFin’) and subject to its regulation. WEG’s supervisory authorities are BaFin and the German Federal Bank (‘Deutsche Bundesbank’). WEG is registered with the commercial register (‘Handelsregister’) of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an ‘investment recommendation’ and/or ‘information recommending or suggesting an investment’, both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) (“MAR”). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

It Depends on What You are Trying to Achieve

Speculation about tax reform in the upcoming federal budget abounds. That presumes a lot about the problems the budget should solve and whether the tax system is the right solution.

- Pre-budget speculation has tended to start from the presumption that more revenue is needed. The justification is sometimes the perceived need to fund spending priorities that are assumed – perhaps erroneously – to be rising. In other quarters, minimising the deficit or government debt appears to be the objective. Whatever the objective, it should be scrutinised not assumed.

- Speculation about changes to the capital gains tax (CGT) regime highlight the potential to increase revenue, but there is no guarantee of this. For example, switching back to the pre-1999 regime or the simplified version of it we have previously suggested will only boost revenue if asset price growth exceeds 5%.
- There are many possible objectives that fiscal systems – tax and spending – can address, often different objectives in different parts of the system. "Boost revenue" is not the only possible goal, and tweaking the tax system is not the only solution to a policy objective.

Speculation is building as budget night approaches. While the government must deal with the immediate issues in front of it stemming from the Middle East conflict, many observers are focused on the maxim "never let a good crisis go to waste" and hoping for broader reforms – usually the same ones they were advocating before the conflict erupted. The question of what the budget should do rests, however, on the deeper question of what problems the government is trying to solve.

For example, recent discussion has been focused on an assumed need for extra revenue. Tax reforms are dissected for how much more they might raise, while revenue windfalls from higher commodity prices are downplayed. Underlying this view are other presumptions – seemingly widespread across different levels of government and the bureaucracy – that "people expect more from government nowadays" and that governments should strive to meet those expectations. Absent from these discussions are the questions of whether the government's effort and resources are being deployed effectively, and whether it can stop doing some things altogether.

A related presumption underlying the search for more revenue is the belief that population ageing is shrinking the workforce, even though this is not true in Australia and most other advanced economies outside North America.

A separate pathway to the search for more revenue comes from a different premise: that the federal fiscal position is weak and large revenue measures (and/or spending cuts) must be found to reduce the deficit significantly. It is good to have strong public finances. It keeps government borrowing costs low and leaves plenty of space to spend in a crisis. Yet the presumption that government finances are parlous and in need of repair sits oddly with Australia's actual federal fiscal position, which is stronger than many of its peers.

Take the recent speculation about removing the CGT discount. It has been touted as a revenue-raising measure, but there is no guarantee of this. One could consider moving back to the pre-1999 system of adjusting the gain for growth in CPI and applying the full marginal rate to the remainder. Alternatively, one could consider the simplified version we suggested in 2023, where the adjustment is 2.5% per year the asset is held – the midpoint of the RBA's inflation target – regardless of actual inflation over the holding period.

Applying a full marginal rate to an adjusted return still taxes mobile capital more lightly than other income, as economic theory would suggest. It has an advantage over the current system of not privileging capital gains-producing assets over income-producing assets at the margin. Because assets that can be leveraged are especially advantaged by the current system, switching back to the pre-1999 system or our simplified alternative would also promote financial stability. It would increase the effective tax rate on capital gains during booms in real asset prices, and our simplified proposal would also lean against periods of high CPI inflation.

What it will not do, though, is necessarily boost revenue. If asset prices rise by less than 5% per year, revenue is lower. For example, a 4% rise, less 2.5% deduction, means tax is paid on 1½% of capital gains. The current system of half the marginal rate on the full gain would be the equivalent of taxing 2% of gains if asset prices rose 4%yr. Revenue is only higher than the current scheme if asset prices rise by more than 5%. And even in that case, the increase in revenue might only be small once people have adjusted to the change and the other possible design decisions associated with it, such as grandfathering and limits on the number and type of assets eligible for the discount.

Absent from the current discourse is any discussion of the proper role and size of government, or the level of government that is best placed to take on the functions required. As Westpac Economics colleague Pat Bustamante has previously shown, the size of government in Australia has increased substantially over the past decade. When private demand indirectly induced by public spending is included (think legal work for construction companies working on public infrastructure projects), the footprint of public demand has risen from 27% to 35% of GDP over the past decade.

Much of this expansion is desirable. We should want to care for disabled and elderly Australians properly and have high-quality childcare available at an affordable price. That takes resources, and private markets alone are unlikely to deliver enough of these services. Likewise, with population growth running around 1½%, both pre-pandemic and currently, we will always need more public infrastructure. Both types of spending also have positive spillovers. Social care spending allows those who were providing informal care to enter paid employment. And done well, infrastructure spending can boost skills and productivity and open up new opportunities through better logistics.

The question of what should or will happen in the budget boils down to which of the many possible objectives government wants to prioritise. Is it addressing the growing income tax burden in a system of fixed tax brackets, or minimising the deficit, or making the tax system more responsive to the economic cycle, or providing more services to meet the public's expectations, or doing so more efficiently? What about national and economic security? The budget is a complex beast and different design decisions can address different objectives. This is not like monetary policy, where there is only one instrument and at most two objectives, inflation and full employment, which are in any case correlated at least some of the time.

Global economic and geopolitical developments pose challenges, while new technology and an expanding, ageing workforce create opportunities. We should not assume that tweaking the tax system is the answer to every issue. Your fiscal priorities should relate to your public policy objectives.

Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

“professional clients” as defined by the rules of the Financial Conduct Authority and is not intended for “retail clients”. Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area (“EEA”): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH (“WEG”) under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority (‘BaFin’) and subject to its regulation. WEG’s supervisory authorities are BaFin and the German Federal Bank (‘Deutsche Bundesbank’). WEG is registered with the commercial register (‘Handelsregister’) of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an ‘investment recommendation’ and/or ‘information recommending or suggesting an investment’, both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) (“MAR”). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

Times are AEDT. All data forecasts are m/m or q/q and seasonally adjusted unless otherwise specified. Forecasts for Australian data are our forecasts and for other countries they are consensus forecasts.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

The words “believe”, “anticipate”, “expect”, “intend”, “plan”, “predict”, “continue”, “assume”, “positioned”, “may”, “will”, “should”, “shall”, “risk” and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author’s knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac’s Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac (“WNZL”). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

Times are AEDT. All data forecasts are m/m or q/q and seasonally adjusted unless otherwise specified. Forecasts for Australian data are our forecasts and for other countries they are consensus forecasts.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

Times are AEDT. All data forecasts are m/m or q/q and seasonally adjusted unless otherwise specified. Forecasts for Australian data are our forecasts and for other countries they are consensus forecasts.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

This information may contain or incorporate by reference forward looking statements. The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Disclaimer continues overleaf ▸

Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

This information has been prepared by Westpac and is intended for information purposes only. It is not intended to reflect any recommendation or financial advice and investment decisions should not be based on it. This information does not constitute an offer, a solicitation of an offer, or an inducement to subscribe for, purchase or sell any financial instrument or to enter into a legally binding contract. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice. Certain types of transactions, including those involving futures, options and high yield securities give rise to substantial risk and are not suitable for all investors. We recommend that you seek your own independent legal or financial advice before proceeding with any investment decision.

This information may contain material provided by third parties. While such material is published with the necessary permission none of Westpac or its related entities accepts any responsibility for the accuracy or completeness of any such material. Although we have made every effort to ensure this information is free from error, none of Westpac or its related entities warrants the accuracy, adequacy or completeness of this information, or otherwise endorses it in any way. Except where contrary to law, Westpac Group intend by this notice to exclude liability for this information. This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia. Westpac is represented in Papua New Guinea by Westpac Bank - PNG - Limited. The liability of its members is limited.

U.S: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission ("CFTC") as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation ("FDIC"). Westpac Capital Markets, LLC ('WCM'), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 ('the Exchange Act') and member of the Financial Industry Regulatory Authority ('FINRA'). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Key insights from the week that was.

In Australia, the Q1 CPI report provided the first official estimate of the impact on local prices of the Middle East conflict. Headline inflation accelerated sharply to 1.4% (4.1%yr) in Q1 on the back of a 33% surge in auto fuel prices in March alone. Fortunately, a large portion of this spike has since unwound following the fuel excise cut, although fuel prices remain materially above the pre-conflict level.

While there were some signs of price pressures across home-building, vehicle repair and insurance, it is too early to detect, let alone accurately assess, evidence of pass-through. That said, underlying trimmed mean inflation still rose 0.8% in Q1, with annual growth at 3.5%yr, a full percentage point above the mid-point of the target. Notably, March's data pre-dates the wide range of price increases reported anecdotally for building products and other items which came into effect in April.

Following the CPI release, Chief Economist Luci Ellis reaffirmed our call for the RBA to increase the cash rate by 25bps to 4.35% at the May policy meeting. The combination of an elevated starting point for inflation and imminent risk of pass-through will compel the RBA to act pre-emptively to contain inflation expectations. Next week's voting split, updated staff forecasts and the tone of communications will be informative on the baseline policy outlook and risks. For now, we retain our base case of another two hikes beyond May, in June and August, taking the cash rate to a peak of 4.85%.

The combination of higher inflation, slower growth and rising unemployment is also fostering a complex macroeconomic backdrop for the 2026/27 Federal Budget, due May 12. A full preview will be published next week, but our preliminary note sets out our central expectation that commodity price windfalls are likely to more than offset spending pressures and result in a net improvement in the budget's bottom line over the forward estimates.

Offshore, at the beginning of the week the Bank of Japan held its policy rate at 0.75% in a 6-3 vote. Updated forecasts highlight the risk of stagflation, with FY26 growth revised sharply lower to 0.5% (from 1.5%) and core inflation now expected to remain above 2% through to FY28. With Japanese firms increasingly willing to pass on costs, the Middle East conflict risks amplifying domestic inflationary pressures.

The BoJ remains focused on restoring the policy rate as an effective policy lever. Further hikes were signalled, but the timing left open. With policy settings still considered accommodative and a weak yen threatening import inflation, we anticipate the next hike to occur in June, though there is a risk it is delayed to July. The Financial Statements Statistics update due on 1 June will be an important release to gauge firms' response to the crisis and the implications for both inflation and activity.

In the US, the FOMC then kept the stance of policy unchanged at its April meeting. The tone of the statement was balanced, with a sanguine view on GDP growth and the labour market and inflation simply characterised as "elevated". The statement also noted that "the Committee is attentive to the risks to both sides of its dual mandate", while Chair Powell remarked in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Governors Hammack, Kashkari and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate and signal that a hike was as likely as a cut on current information.

The Bank of Canada also kept its policy stance unchanged. The conflict in the Middle East and US trade policy were called out as sources of uncertainty for the global economy. But overall, the outlook for Canada's economy was viewed as little changed from January. Assuming a protracted resolution to the Middle East conflict into 2027, GDP growth is expected to strengthen through 2027-2028 and inflation to turn back towards the 2%yr target from 3%yr in the near term, allowing the Bank of Canada to remain on hold.

Thereafter in Europe, the ECB Governing Council opted to maintain its current policy stance. The ECB acknowledged that “upside risks to inflation and downside risks to growth have intensified” and the merits of a rate hike were discussed, but developments to date were not sufficient to convince the Governing Council to take immediate action – the decision to hold was unanimous. At its previous meeting in March, the ECB presented two downside scenarios alongside its baseline. In the April press conference, President Lagarde was reluctant to discuss the details of those scenarios, noting simply that conditions are diverging from March’s baseline and the upcoming six weeks “will be the right time” to assess the economy “in order to make an informed decision”. Her comments appeared carefully chosen to signal openness to a rate increase in June. Therefore, barring any major changes in the dynamics of the Middle East conflict, we continue to believe that a 25bp policy rate hike is the most probable outcome at the next meeting.

The Bank of England’s April meeting also unfolded broadly as expected, the MPC voting 8-1 to keep the policy rate at 3.75%. Chief Economist Hew Pill was the sole dissenter, preferring “a prompt but modest hike in Bank Rate” to contain the risk of second-round inflationary effects. The policy statement maintained a hawkish bias, however, emphasising the potential impact of the energy price shock – its scale and duration – on UK inflation and the committee’s readiness to act to ensure inflation returns to the 2% target. Policy makers also showed concern over economic growth and the labour market, with slack increasing prior to the conflict.

Risks to the economic outlook were illustrated using three alternative scenarios, differentiated by oil and gas price assumptions and the persistence of second-round inflation effects. In the first two scenarios, the Brent oil price averages $108 in Q2 2026 then decreases at different speeds. Both scenarios showed headline inflation peaking above 3.5%yr this year before easing in 2027. Importantly, the Governor emphasised that, if the economy evolves in line with these scenarios, further policy tightening may not be required – the removal of the circa 50bp of easing priced before the conflict potentially sufficient to bring inflation back to the 2% target. The committee judged that the most severe scenario – where Brent averages $127 this quarter and remains above $100 well into 2028 – would likely require “a forceful tightening in monetary policy”, however. The Governor declined to specify what interest rate changes this would entail, but noted the need to act quickly to minimise second-round effects. Bank Rate hikes this year are therefore not guaranteed, but with Brent Oil surging as much as 20% this week to a peak around USD126 (now USD114) as the US and Iran remained at an impasse, conditions may eventually become too close to the BoE’s most severe scenario for the MPC to ignore. We continue to expect a Bank Rate hike at the next policy meeting in June, with further tightening possible, but dependent on evolving circumstances.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

10 April 2026

HORMUZ HIT

CPI & CORE INFLATION

The magnitude of the shock has significant implications

Key points

- The Iran conflict is the largest energy shock since the oil crises of the 1970s/80s. For more details on the scenario underpinning these projections please refer to Middle East Crisis Update.
- Westpac is forecasting a 1.5%qtr/4.2%yr gain in the March quarter CPI. The Trimmed Mean is forecast to lift 0.9%qtr/3.5%yr.
- Headline inflation is now peaking at 5.4%yr in the June quarter before easing back to 4.6%yr by end 2026.
- Core inflation peaks around 4%yr in the second half of 2026 and does not return to 3%yr till the end of 2027.
- The monthly CPI to rise 1.3% in March and April with the annual pace peaking at 5.8%yr in May.
- The Trimmed Mean is set to rise 0.2% in March followed by 0.5% increase in April; the annual pace peaks around 4%yr in June and holds this pace till year end.

- Pass-through to construction inputs has been reported by Tradelinks to be greater than usual.

A crude shock, surcharges may change expectations

Justin Smirk
Senior Economist

A materially bigger and more persistent shock …

As noted in our Middle East Crisis Update, a prolonged disruption in the Gulf is sustaining higher energy prices. We now have Brent averaging around US$120/bbl in the June quarter. This is based on our assessment of unfolding infrastructure damage and a slow recovery in shipping traffic through the Strait of Hormuz.

So despite the announced cut in fuel excise, we expect CPI inflation to peak at 5.4%yr in the June quarter, while the monthly measure, which the ABS highlights as the main indicator and can be significantly more volatile that the quarterly series, may peak close to 6%yr in May.

Westpac expects core inflation, as measured by the quarterly Trimmed Mean, peaking around 4% in the second half of year; food, household services and even new dwelling prices, alongside broader non-energy pass-through, are key risks to our estimates. We also note that the monthly TM spikes a bit faster hitting a 4.0%yr pace by June.

In response, the RBA is now expected to deliver three rate hikes (May, June, August), taking the cash rate to a peak of 4.85%. As the combined supply shock and tighter policy weigh on demand, GDP growth is expected to trough at 1%yr in 2027 while unemployment peaks around 5% at end 2026. A deeper dive into these issue are summarised in the video by the Westpac Economics Team led by Luci Ellis "Longer conflict, higher inflation and cash rate"

This was, of course, before the announcement of a two-week ceasefire on the 8th of April (Asian time). This is obviously welcome and a positive risk scenario relative to the baseline we outlined last week and underpins our current inflation forecasts. Should the ceasefire hold – and that is a big if – a faster opening up of the Strait of Hormuz would result in energy prices tracking between the profile we currently have and the one underpinning the forecasts in the March

Market Outlook (which was based on a one-month closure of the Strait with little infrastructure damage). For further background on the unfolding risks to our current scenario see Luci Ellis's note "On hoping you are wrong".

In this bulletin we are also release a forward profile of the Monthly CPI. This process is still at a preliminary stage but given the extreme surge we expect to see in the Monthly CPI, we thought it would be timely to provide some guidance out to December 2026.

March and April headline CPI set to surge

The Israel/US assault on Iran began in the morning of the 28th of February. We expect the resulting surge in oil prices to have the largest hit to the CPI in the months of March and April before flattening out in May and June. Auto fuel is set to increase again in July but this is due to the expiration of the recent temporary reduction in fuel excise.

Westpac is forecasting a 1.3% increase in March on the back of a 35% increase in auto fuel. At two decimal points the increase is 1.26% but we warn that given the current volatility in prices, there is a greater than usual degree of uncertainty so these finer estimates should be used with even more caution than usual.

The annual pace lifts from 3.7%yr to 4.7%yr in March.

Our current scenario has auto fuel lifting a further 2% and 6% respectively in April and May. The April CPI will also be boosted by a seasonal bounce in clothing & footwear and holiday travel & accommodation plus the annual increase in health insurance premiums. The annual pace of CPI inflation is expected to peak at 5.8%yr in May (so there is a risk it could peak as high as 6%yr) and then slowly moderate to 4.7%yr by December 2026.

Core inflation is higher for longer

We estimate a 0.23%mth rise in the Monthly Trimmed Mean (TM) in March holding the annual pace steady at 3.3%yr. The six-month annualised pace is also steady at 3.3%yr which down from a 3.7%yr pace in December. We were expecting the pace of core inflation to moderate from here but with the conflict in Iran disrupting shipping out of the Gulf, and the resulting surge in fuel prices, we now see fuel prices remaining higher for longer resulting in a greater degree of pass-through to core inflation.

The TM is set to lift 0.5%mth/3.6%yr in April, 0.4%mth/3.8%yr in May and 0.3%mth/4.0%yr in June. The forecast peak in the annual TM inflation is 4.0%yr in June then holding between 3.9%yr and 4.0%yr to year end; in six-month annualised terms the peak pace is 4.6%yr in September.

Quarterly inflation less volatile

The Monthly CPI is the focus of the ABS CPI release, and as such, it gains the most media attention. However, at least for now given the short history of the complete Monthly CPI, the quarterly measures of inflation will remain the focus of both the RBA and the Australian government when setting both monetary and fiscal policy, particularly when it comes to core inflation as measured by the Trimmed Mean.

Middle East conflict forecast revisions

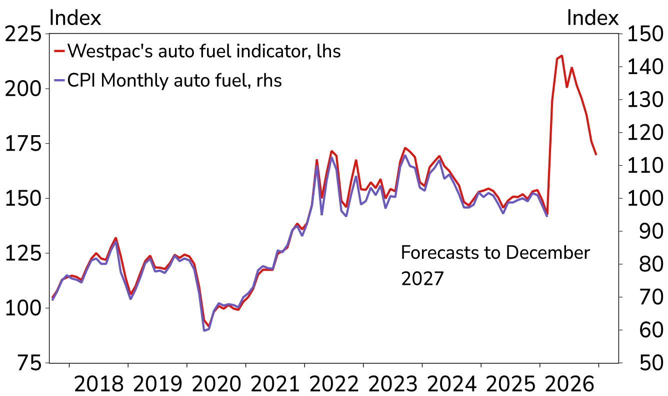
Auto fuel prices

Pump price average for unleaded and diesel



Source: ABS, Macrobond, Westpac Economics

Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

As the current conflict started in the last week of February, we have only see one month of higher fuel prices so the auto fuel is expected to rise just 5.9% in the March quarter. However, starting from a high base in the June quarter means fuel prices to continue to rise solidly and we estimate a 24% surge in the fuel prices component in the June quarter.

Overall, we estimate a 1.5% increase in the March quarter taking the annual pace from 3.6%yr to 4.7%yr. As noted earlier, we expect this momentum to continue into the June quarter with a further 1.9% surge in the CPI taking the annual pace to 5.4%yr. While we think this should be the peak in the annual pace, it is nevertheless the fastest pace since June 2023 when it was reported to be 6.0%.

Core inflation is not immune to this boost as we are forecasting a 0.93% increase in the March quarter, matching the 0.9% increase in the December quarter and it is a prelude to the step up to a 1.0% increase in both the June and September quarters. This will see the annual pace peak at 4.0%yr in the second half of the year.

The Trimmed Mean estimate starts from a low of 0.2% to a high of 2.2%. Significant expenditure items trimmed off the bottom includes vegetables (–1.2%), international travel & accommodation (–0.7%) and other non-durable household products (–0.7%). Trimmed off the top are secondary education (2.3%), tobacco (2.4%), furniture (3.3%), women's garments (3.5%), auto fuel (5.9%), electricity (118.3%).

As we have noted in earlier bulletins, until the ABS has a better understanding of the seasonality of the new monthly CPI, they will continue publishing quarterly underlying inflation measures in a manner consistent with the history of price collection frequency. We have replicated this process and found it represents a small downside risk to our March quarter estimate but it still rounds to 0.9%qtr. As such we just note the risk and do not adjust our overall forecast.

Signs of faster pass-through

We have received many anecdotal reports of increases in input costs, often as a fuel surcharge or levy. Some of these were adjusted downwards when the Australian government cut the fuel excise but remain significant. We have also heard of restaurants, cafés and even hairdressers adding a fuel levy to prices but these are yet to be confirmed.

It has also been reported that rising input costs could add as much as 10%, or $50,000, to the cost of building an average detached home. Using input price increases as reported by Tradelink this estimate seems fair. Tradelink data suggests an average increase of 16% in April, the largest increase in the data we have back to January 2020; not all products will see price increases in any given month, but the number of notifications of price increases on the Tradeline website has also risen. The proposed average increase for May increases to 17% before easing back to around 7% in June and July so it will be interesting to see how these estimates are adjusted as actual prices are posted.

Things you should know

We respect your privacy: You can view the New Zealand Privacy Policy here, or the Australian Group Privacy Statement here. Each time someone visits our site, data is captured so that we can accurately evaluate the quality of our content and make improvements for you. We may at times use technology to capture data about you to help us to better understand you and your needs, including potentially for the purposes of assessing your individual reading habits and interests to allow us to provide suggestions regarding other reading material which may be suitable for you.

Disclaimer

This information has been prepared by Westpac and is intended for information purposes only. It is not intended to reflect any recommendation or financial advice and investment decisions should not be based on it. This information does not constitute an offer, a solicitation of an offer, or an inducement to subscribe for, purchase or sell any financial instrument or to enter into a legally binding contract. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice. Certain types of transactions, including those involving futures, options and high yield securities give rise to substantial risk and are not suitable for all investors. We recommend that you seek your own independent legal or financial advice before proceeding with any investment decision.

This information may contain material provided by third parties. While such material is published with the necessary permission none of Westpac or its related entities accepts any responsibility for the accuracy or completeness of any such material. Although we have made every effort to ensure this information is free from error, none of Westpac or its related entities warrants the accuracy, adequacy or completeness of this information, or otherwise endorses it in any way. Except where contrary to law, Westpac Group intend by this notice to exclude liability for this information. This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

U.S: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission ("CFTC") as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation ("FDIC"). Westpac Capital Markets, LLC ('WCM'), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 ('the Exchange Act') and member of the Financial Industry Regulatory Authority ('FINRA'). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Cliff Notes: Middle East conflict seemingly at an impasse

#cliffnotes #rba #australia #inflation #us #fomc #ecb #aud #usd

By Elliot Clarke & Illiana Jain

10:56 April 24 2026

Share

Key insights from the week that was.

Regarding the Middle East conflict, the week began with the expectation of a second round of in-person talks between the US and Iran. The start of the negotiations was initially pushed from Tuesday to Wednesday; but President Trump then announced on Truth Social that the meeting had been postponed at the request of Pakistani and Iranian officials to allow time for a "unified proposal" to be developed to be put to the US. Thankfully, having been stretched by both sides at the weekend, the expiring two-week ceasefire was extended indefinitely.

Since Wednesday, there has been no concrete evidence of progress towards a deal, the Iranians seemingly refusing to come to the table while the US' blockade remains in place, and the US refusing to end the blockade until a deal is agreed. Both sides have halted and seized ships within their area of operations, but this has not triggered a ceasefire breach – although it must be noted that President Trump overnight ordered the US Navy to strike any vessel laying mines in the Strait of Hormuz, making clear the risk of further military conflict.

With no clear way out of the stalemate, or timeline for formal talks, the price of Brent oil has rebounded back to around USD106 having (very briefly) fallen as low as USD86 late last week. The longer the impasse persists, the greater the chance of a sustained period of high oil prices and refinery margins, with all costs eventually met by businesses and households across the world.

Central banks remain focused on the degree and persistence of price passthrough to domestic consumer inflation, the risk being that inflation persists well above target into 2027 on second-round effects and an uplift in inflation expectations. ECB President Lagarde this week noted that the staff currently view conditions in the Euro Area as between their baseline and adverse projections from the last meeting, and will act "as the situation demands" ahead. Next week's run of central bank meetings across the northern hemisphere will provide a more detailed view on the balance of risks and the implications for monetary policy across the developed world.

In the US meanwhile, President Trump's pick for the next FOMC Chair, Kevin Warsh, appeared before the Senate Banking Committee as part of the confirmation process. Warsh again made clear he believes several aspects of the FOMC's communications and processes should change, but also showed a clear commitment to central bank independence. The next steps in Warsh's confirmation remains highly uncertain, with Republican Senator Tillis refusing to approve the appointment at the Committee stage until the Department of Justice close their investigation into the Federal Reserve and Chair Powell. If Senator Tillis holds out until year end, the Administration may face an additional challenge in 2027 as their Senate majority is at risk in the mid-term election. Chair Powell will remain in place in the interim, giving the FOMC continuity and capacity to manage the US economy.

On data front this week, US retail sales rose 1.7% in March, beating expectations. The control group, which feeds into GDP, also surprised to the upside, 0.7%. For the quarter overall, however, the consumer pulse has been weak, and record-low confidence points to downside risks for Q2. The outlook for US business investment is also increasingly uncertain. Across the pond, the UK unemployment rate fell from 5.2% in January to 4.9% in February, though this reflected a decline in participation. Despite the softer labour market print, wages still rose 3.8%yr in February. A spike in energy prices also saw inflation rise 0.7% in March and 3.3% over the year. While the headlines focus on energy prices, sticky services inflation also remains an issue for the UK, 4.5%yr.

Our latest Market Outlook provides an in-depth view of the outlook for the US, Europe, China and global financial markets.

“professional clients” as defined by the rules of the Financial Conduct Authority and is not intended for “retail clients”. Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area (“EEA”): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH (“WEG”) under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority (‘BaFin’) and subject to its regulation. WEG’s supervisory authorities are BaFin and the German Federal Bank (‘Deutsche Bundesbank’). WEG is registered with the commercial register (‘Handelsregister’) of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an ‘investment recommendation’ and/or ‘information recommending or suggesting an investment’, both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) (“MAR”). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

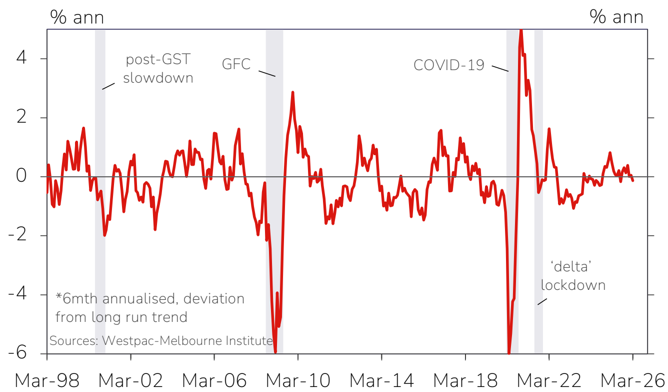
WESTPAC-MI LEADING INDEX BULLETIN

Latest insights into economic momentum

Key points

- Leading Index growth rate declines to –0.13% in March.
- First below-trend pace since August last year.
- Interest rates and global energy shock clearly impacting.

Westpac-MI Leading Index



Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

Leading Index momentum dips back below trend

Matthew Hassan
Head of Australian Macro-Forecasting

The six-month annualised growth rate in the Westpac–Melbourne Institute Leading Index, which indicates the likely pace of economic activity relative to trend three to nine months into the future, declined to –0.13% in March from +0.05% in February.

The Australian economy has lost momentum over the first few months of the year with more weakness likely to emerge in the months ahead. The March Index already points to a period of below-trend growth over the remainder of 2026. While the growth pulse is not overly weak, it is the first below-trend read since August last year and, prior to that, since the extended period of weakness during the 'cost-of-living' crisis of 2022–2024.

The Leading Index growth rate has now swung from +0.31% in October last year to –0.15% currently, a 0.44ppt deterioration. The detail shows clear drags from the shifting interest rate backdrop and the global energy shock associated with the conflict in the Middle East.

Component-wise, the biggest negative shifts have come from: the Westpac–Melbourne Institute Consumer Expectations Index (a 20% drop over the last six months effectively taking 0.27ppts off the headline growth rate); a sharp sell-off in the Australian sharemarket in the March month (–0.24ppts); and a flattening yield spread as short-term interest rates have moved higher (–0.15ppts). Some of these declines may not be sustained though, with a notable recovery in sharemarket in the first three weeks of April. If it sustains, the move will be reflected in next month's index.

Roughly speaking, about 60% of the drag on the six month growth rate coming from these three components looks to be due to the conflict in the Middle East. All of sharemarket fall and about half of the sentiment decline since October has occurred after the conflict began. Most of the yield gap shift however can be attributed to monetary policy developments prior to the war.

Other components have provided partial offsets. Most notably, higher commodity prices (up 11.9% in Australian dollar terms over the last six months) have added 0.09ppts to the Index growth rate over the same period. Dwelling approvals have added a further 0.11ppts although this is likely being exaggerated by a very choppy monthly profile (approvals jumped 30% in February after dropping 20% through December–January). The contribution from the remaining three components has seen no net change since October.

The Westpac-Melbourne Institute Leading Index of Economic Activity is designed to assist in identifying turning points in the economy. The index combines variables that reflect different aspects of the economy into a single index that generally produces a more reliable cyclical indicator than any single component taken individually. The Leading Index of Economic Activity provides advance information on the state of the economy and gives early warnings of cyclical turning points.

The Reserve Bank Monetary Policy Board (MPB) next meets on May 4–5. The latest Leading Index update confirms that higher interest rates and the spike in fuel prices associated with the conflict in the Middle East are starting to weigh on growth momentum, albeit fairly mildly. However, the MPB's main concerns are likely to be around inflation with underlying measures already above the RBA's 2–3% target range and set to move higher as the effects of energy price rises come through. On balance we expect the risk of this feeding into a lift in inflation expectations will over-ride the downside risks to growth. As such, we expect the MPB to raise the cash rate by another 25bps in May with further moves likely in subsequent months.

WESTPAC NOWCAST Q1 2026: SECOND ESTIMATE

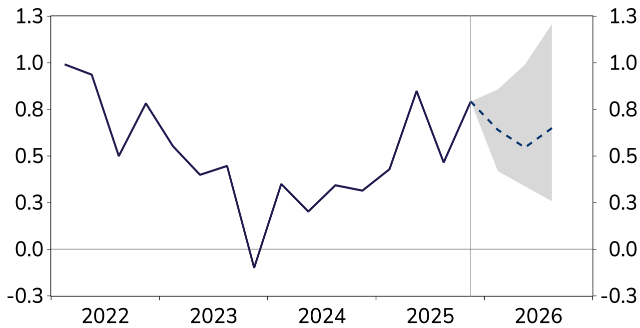
The cyclical upswing is maturing

Key points

- Consistent with our first estimate, Westpac Now points to GDP growth of around 0.6%qtr in Q1 2026 (range: 0.55–0.75%qtr), lifting year ended growth to 2.8%yr.
- Our monthly activity index edged lower in March after moving sideways through January and February. Overall, activity was flat across the March quarter, ending an upswing that began in May 2025 even before the recent tightening in monetary policy could take effect.
- Recent sharp falls in consumer and business confidence were largely ‘looked through’; our framework would take more signal from a sustained drop.
- While growth appear to have remained resilient in Q1, a prolonged Middle East conflict increases the risk that weak confidence spills over into a broader set of indicators (many of which have already softened), exacerbating supply chain dislocations and lower real incomes.

Quarterly GDP Growth*

Quarterly % growth. Axis truncated for covid.



Source: ABS, Macrobond, Westpac Economics

*Dotted line show Westpac-Now central estimates. Quarter ahead (or Q1 2026) relies on the actual Westpac monthly activity index to March 2026. Beyond the quarter ahead, estimates rely on projections of the Westpac monthly activity index generated using internal model dynamics. Confidence intervals reflect empirical out of sample forecasting errors.

- Our framework suggests growth will ease to around 0.5%qtr in Q2, before returning to 0.6%qtr in Q3 2026, but these estimates by design do not allow for the wider effect of the conflict and differ from our actual GDP forecasts.
- Westpac Now updates are released monthly, with details in Appendix A.

The Upswing Is Maturing, Even Before Rate Hikes Bite

Pat Bustamante
Senior Economist

In November 2025, we introduced Westpac-Now, a real time measure of current activity in the Australian economy. Westpac-Now draws on more than 60 high frequency economic and financial variables, using advanced statistical techniques to provide a timely pulse check on economic momentum. It is the first Australian model to incorporate internal banking data, enhancing its predictive power.

This note provides the second estimate of growth for the March quarter 2026, using domestic and international data released up to and including the March Labour Force Survey (released 16 April 2026). Future updates will be published monthly (see Appendix A for the release schedule).

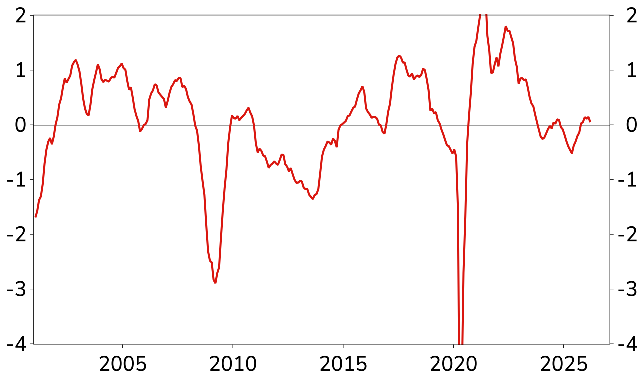
Monthly activity index declines over March

Our monthly activity index edged lower in March after moving sideways through January and February. Overall, activity was flat across the March quarter, ending a steady upswing that began in May 2025 even before the recent tightening in monetary policy could take effect. The monthly activity index is now sitting around the levels recorded in September 2025.

Importantly, there is greater than usual uncertainty around the monthly activity estimate amid heightened inflationary pressures. Faster price growth can cause nominal indicators, such as consumer spending, to rise strongly even though 'real', inflation adjusted spending may be soft. The inclusion of 'real' indicators, such as employment and banking transaction volumes, helps manage some of this uncertainty but it remains higher than usual given above average inflationary pressures.

Westpac Monthly Activity Index

Index. Axis truncated for covid.



Source: ABS, Macrobond, Westpac Economics

Confidence: More noise than signal for now

At this stage, our framework largely looks through the recent sharp falls in consumer and business confidence. Historically, these measures can be volatile, and other indicators have not yet moved in the same direction. In that sense, the decline in confidence is inconsistent with broader domestic economic conditions.

This interpretation is intuitive: the shock triggering the confidence response appears exogenous, or linked to the conflict in the Middle East, rather than arising from domestic economic fundamentals. As such, the declines are currently treated as large idiosyncratic shocks.

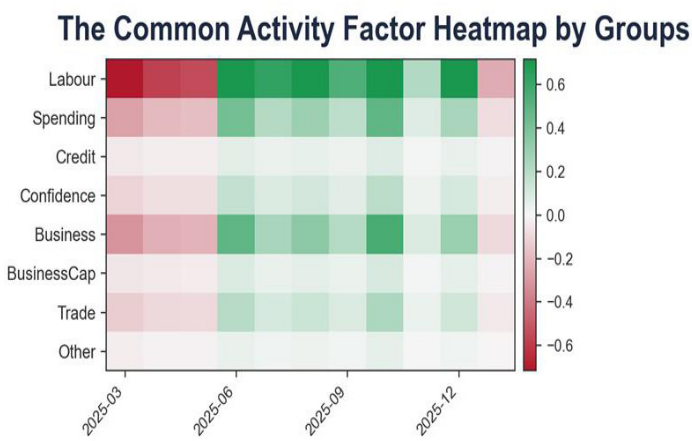
That assessment would change if the fall in confidence were sustained or if other high frequency indicators, such as banking transaction data, began to corroborate the signal. In that scenario, the model would revise its treatment and place greater weight on the information coming from confidence measures.

But there are risks with key indicators shifting to neutral

While growth remained resilient in Q1, the longer the Middle East conflict persists, the greater the risk that the weakness evident in confidence starts to show up in a broader set of indicators, such as investment and consumer spending.

Our indicator heatmap decomposes changes in the monthly activity index into group level contributions, allowing us to assess which components drove the recent moderation. For ease of interpretation, indicators are grouped into broad categories. For example, the labour market category includes both official ABS Labour Force Survey outcomes and more timely survey based measures of labour demand and job advertisements.

The heatmap shows that labour market conditions, consumer spending and credit growth lost momentum and shifted to neutral in March, after ending 2025 strongly.



Westpac Now: Growth moderating even before the recent tightening in monetary policy take effects

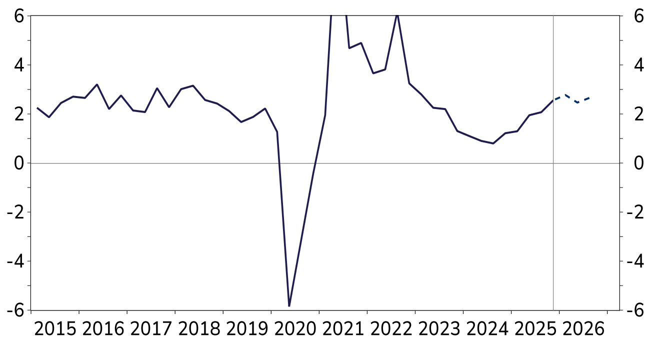
Recall that the Westpac-Now estimate is a more refined indicator that combines our monthly activity indicator using advanced econometric techniques to produce point estimates of GDP growth. As previously noted, the fit is not expected to be exact, as measured GDP includes components that are not well captured by other activity measures, such as imputed rents for owner occupiers, public and business inventories, and the depreciation of buildings and equipment. To bridge monthly and quarterly data, we employ a MIDAS framework, which allows us to combine mixed frequency data and incorporate partial information for the current quarter when producing GDP forecasts.

Based on our current forecast equations, the Westpac-Now Q1 2026 second estimate points to GDP growth of 0.6%qtr (range: 0.55–0.75% qtr), lifting year ended growth to 2.8% yr.

Projections further out, based on the indicator's internal dynamics, suggest growth will ease to 0.5%qtr in Q2, before returning to 0.6%qtr in Q3 2026. However, these projections should be treated as tentative, with heightened uncertainty given the reliance on projected inputs rather than realised data. The potential impact of the Midde East conflict implies that these forward projections are even more uncertain than usual.

Westpac-Now Estimates and Projections*

Year-ended % growth. Axis truncated for covid.



Source: ABS, Macrobond, Westpac Economics

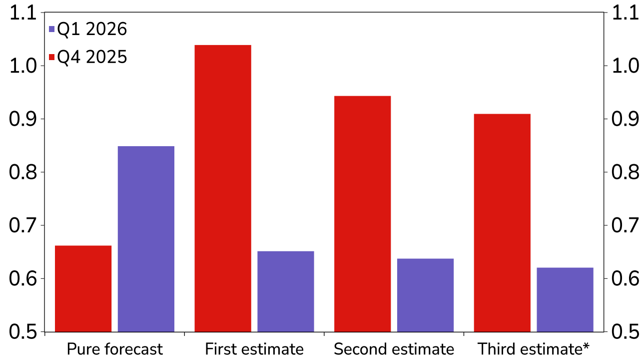
*Dotted line show Westpac-Now central estimates. Quarter ahead (or Q1 2026) relies on the actual Westpac monthly activity index to March 2026. Beyond the quarter ahead, estimates rely on projections of the Westpac monthly activity index generated using internal model dynamics. Confidence intervals reflect empirical out of sample forecasting errors.

March quarter data signal a moderation in growth

Data released over the March quarter point to growth moderating from the previous quarter. Once data released through the quarter are incorporated, our nowcast estimates Q1 growth at 0.6%qtr. This contrasts with the 0.8%qtr 'pure forecast' estimate that we obtain using only data available up to and including December. The pattern of softer estimates once actual data for the quarter begin to be included in the nowcast also contrasts with Q4 in that the nowcast for that quarter remained higher than the 'pure forecast' estimate as more data were included in successive estimates.

Evolution of Westpac-Now

Within quarter changes to Westpac-Now, quarterly % change



Source: ABS, Macrobond, Westpac Economics

*Preliminary third estimate, to be updated when the full suite of monthly March data becomes available

Bottom line

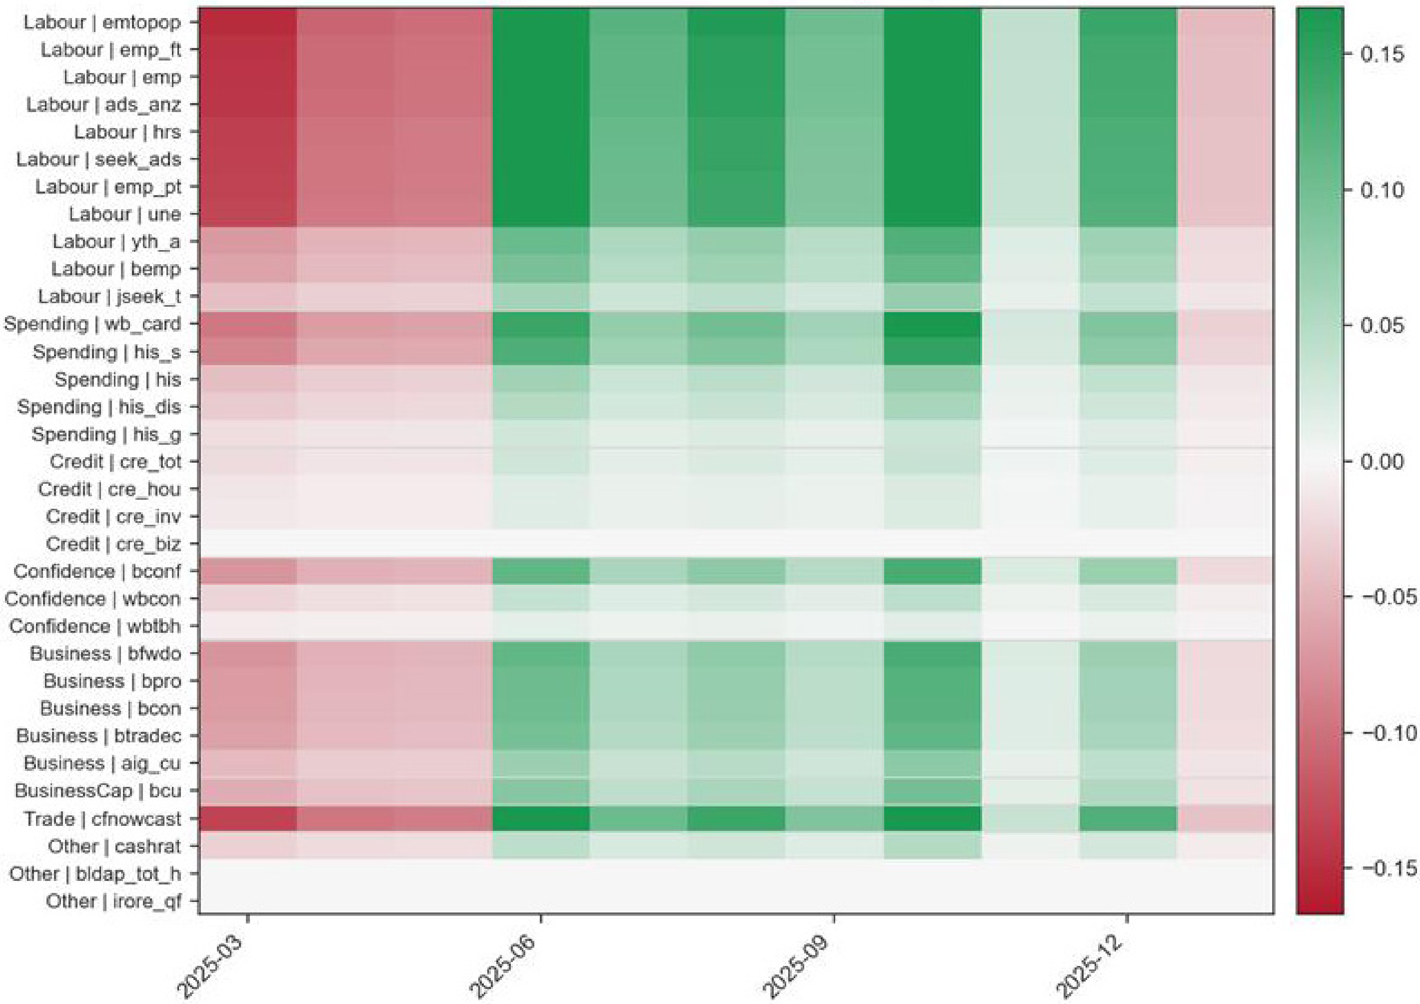
Westpac Now points to moderating growth, with GDP tracking at around 0.6%qtr in Q1 2026. While recent sharp declines in confidence are currently being 'looked through', momentum has softened across key indicators, including labour market conditions, consumer spending and credit growth, even before the RBA's rate hikes took effect on the economy. Growth remains resilient for now, but a prolonged Middle East conflict raises the risk that weak confidence and supply chain disruptions reinforce each other, posing a more material downside risk over coming quarters.

Appendix A: Westpac Now Release Schedule (2026)

Going forward, Westpac Now will be published on the Friday following each ABS Labour Force Survey (LFS) release, at 11:30am AEDT/AEST (Canberra time). Each release incorporates the latest labour market data alongside other high frequency indicators and provides an updated nowcast for quarterly GDP growth. As the quarter progresses, each update should be interpreted as a progressively more complete estimate of that quarter's economic performance.

Release date (Friday)	LFS reference month	Quarter focus	Interpretation
22 May 2026	April 2026	Q1 2026 – final estimate	Near complete read on Q1 activity
19 June 2026	May 2026	Q2 2026 – first estimate	Initial assessment of Q2 momentum
17 July 2026	June 2026	Q2 2026 – second estimate	Refined Q2 signal as activity data accumulate
21 August 2026	July 2026	Q2 2026 – final estimate	Near complete read on Q2 activity
18 September 2026	August 2026	Q3 2026 – first estimate	Initial assessment of Q3 momentum
16 October 2026	September 2026	Q3 2026 – second estimate	Refined Q3 signal as activity data accumulate
20 November 2026	October 2026	Q3 2026 – final estimate	Near complete read on Q3 activity
18 December 2026	November 2026	Q4 2026 – first estimate	Initial assessment of Q4 momentum

Appendix B: The common activity factor heatmap by indicators



Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

U.S: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission ("CFTC") as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation ("FDIC"). Westpac Capital Markets, LLC ('WCM'), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 ('the Exchange Act') and member of the Financial Industry Regulatory Authority ('FINRA'). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

Times are AEDT. All data forecasts are m/m or q/q and seasonally adjusted unless otherwise specified. Forecasts for Australian data are our forecasts and for other countries they are consensus forecasts.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

The words “believe”, “anticipate”, “expect”, “intend”, “plan”, “predict”, “continue”, “assume”, “positioned”, “may”, “will”, “should”, “shall”, “risk” and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author’s knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

Times are AEDT. All data forecasts are m/m or q/q and seasonally adjusted unless otherwise specified. Forecasts for Australian data are our forecasts and for other countries they are consensus forecasts.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

March CPI – all about fuel, too early for pass through

#inflation #australia #rba #economicbulletinsaustralia

By Justin Smirk
Senior Economist, Westpac

15:30 April 29 2026

Share

Headline March Quarter CPI 1.4%qtr/4.1%yr; Trimmed Mean 0.8%qtr/3.5%yr. Monthly March CPI 1.1%mth/4.6%yr, Trimmed Mean 0.3%mth/3.3%yr.

- Headline inflation being boosted by surging fuel prices.
- Core inflation was moderating before the Gulf Crisis and, at this stage, there is very limited sign of any passthrough to from higher fuel costs to broader price pressures.

- Today’s inflation update locks in a May rate increase and while we expect to see two more after this, a lot will depend on just how much demand destruction we see because of higher prices.

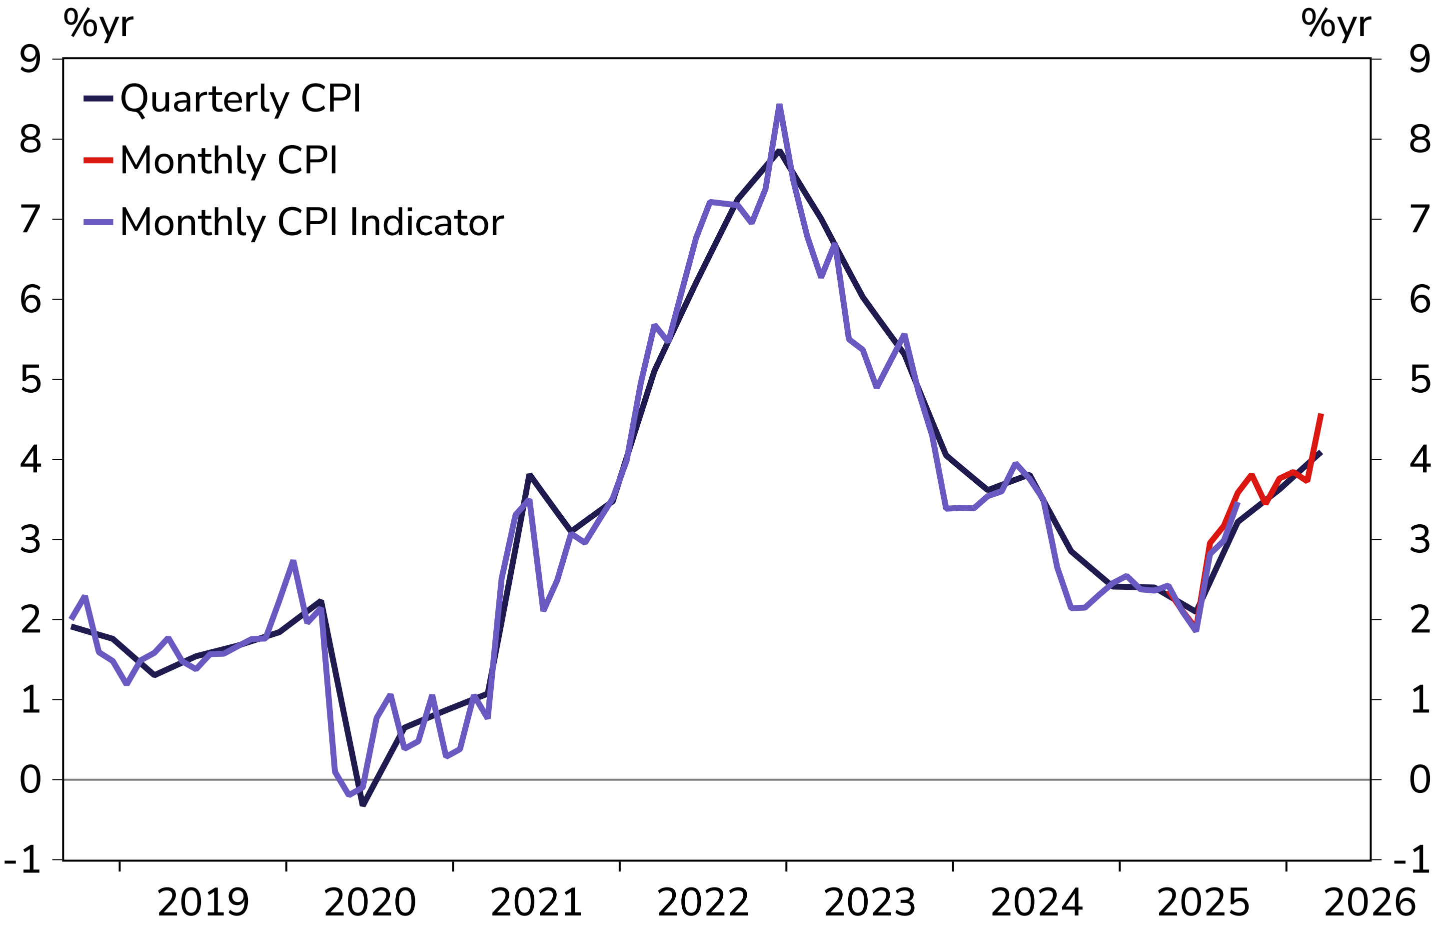
The CPI gained 1.4% in the March quarter, on par with market consensus and close to Westpac’s expectation of 1.46%. The annual pace of headline inflation, at 4.1%yr, is accelerating again; it was 2.1%yr in mid-2025 lifting to 3.6%yr in December. The acceleration through 2025 was mainly the unwinding of energy rebates but in early 2026 it is the crisis in the Gulf, and resulting surge in auto fuel prices, that is driving the acceleration. However, the cost-of-living assistance and surge in auto fuel has a limited impact on core inflation and so these measures take on more critical role in assessing the current pace of inflation.

The Trimmed Mean (TM) lifted 0.8% in the March quarter. Westpac and the market expected 0.9% (Westpac 0.93%). However, in our preview we highlighted that calculating the quarterly TM based on historical survey timing, which the ABS is doing given the short history for a number of series, pointed to a small downside risk to our estimate. The annual pace lifted very modestly from 3.4%yr to 3.5%yr.

The monthly trimmed mean increased 0.3%mth, which held the annual pace flat at 3.3%yr for the fourth consecutive month; the six-month annualised pace eased back a touch to 3.5%yr from 3.9%yr in December. It is worth noting that at this point in time the annual pace of the monthly CPI is tracking under that of the quarterly CPI.

Prior to the Gulf Crisis, the momentum in core inflation had been moderating.

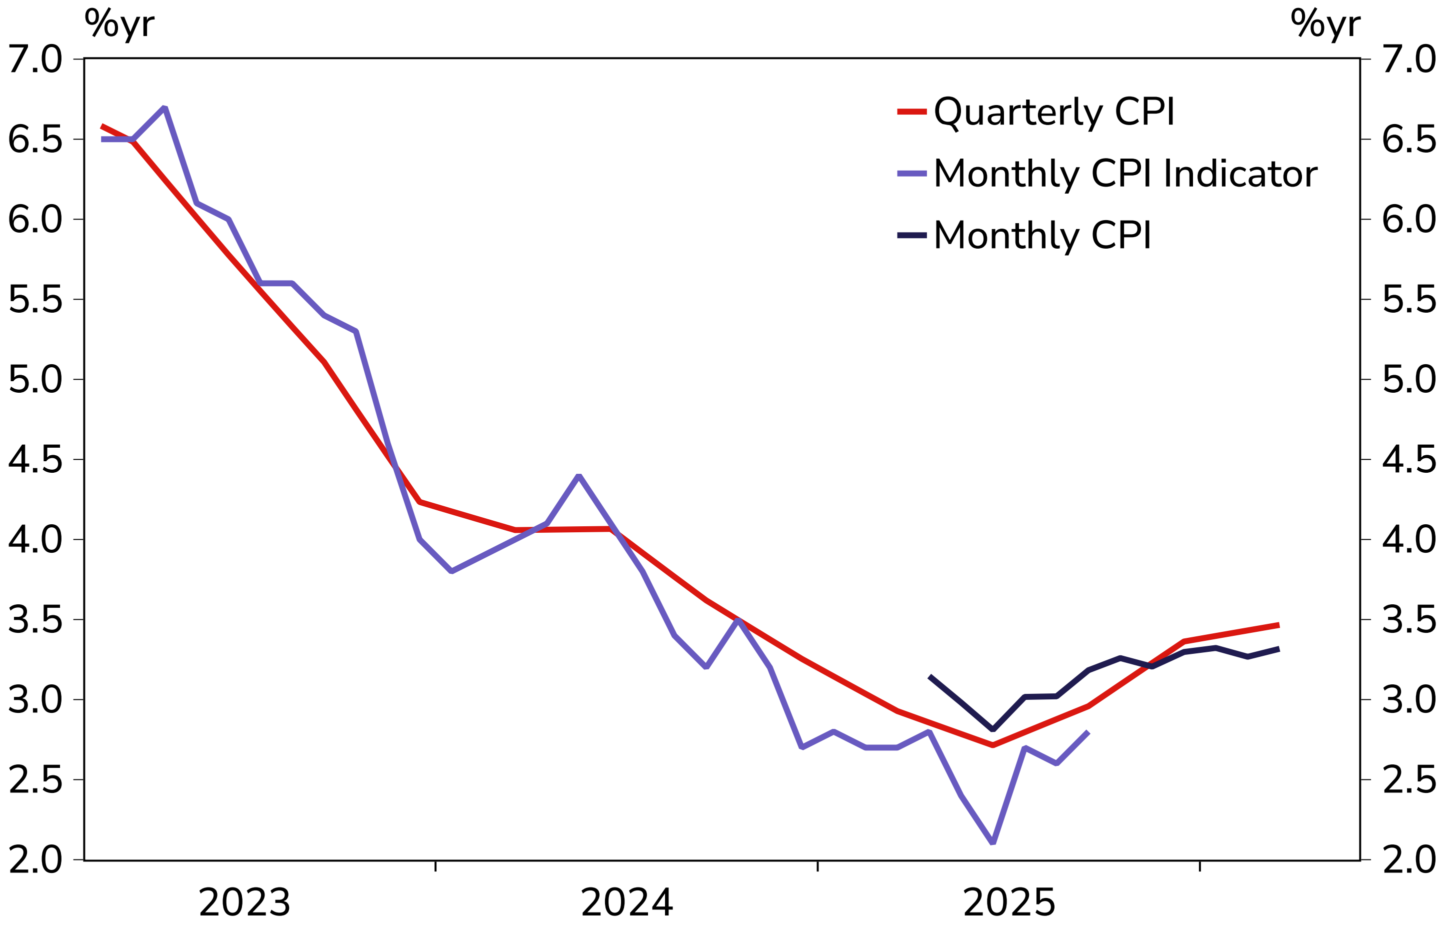
Headline Inflation



Source: ABS, Macrobond, Westpac Economics

The headline Monthly CPI lifted 1.1% in March to be up 4.6% in the year. This was quite a bit softer than our estimate of 1.3%mth/4.7%yr. Worthy of note was that auto fuel was softer than expected, lifting 32.8% vs. 36.4% expected. More concerning to the outlook for core inflation was that dwelling prices lifted 0.5% in the month compared to our expectation for a more modest 0.2% increase. The ABS did note this increase in the annual pace was due to project home builders raising base prices to pass through higher labour and materials costs over the year but made no comment on the monthly increase.

Trimmed Mean Inflation

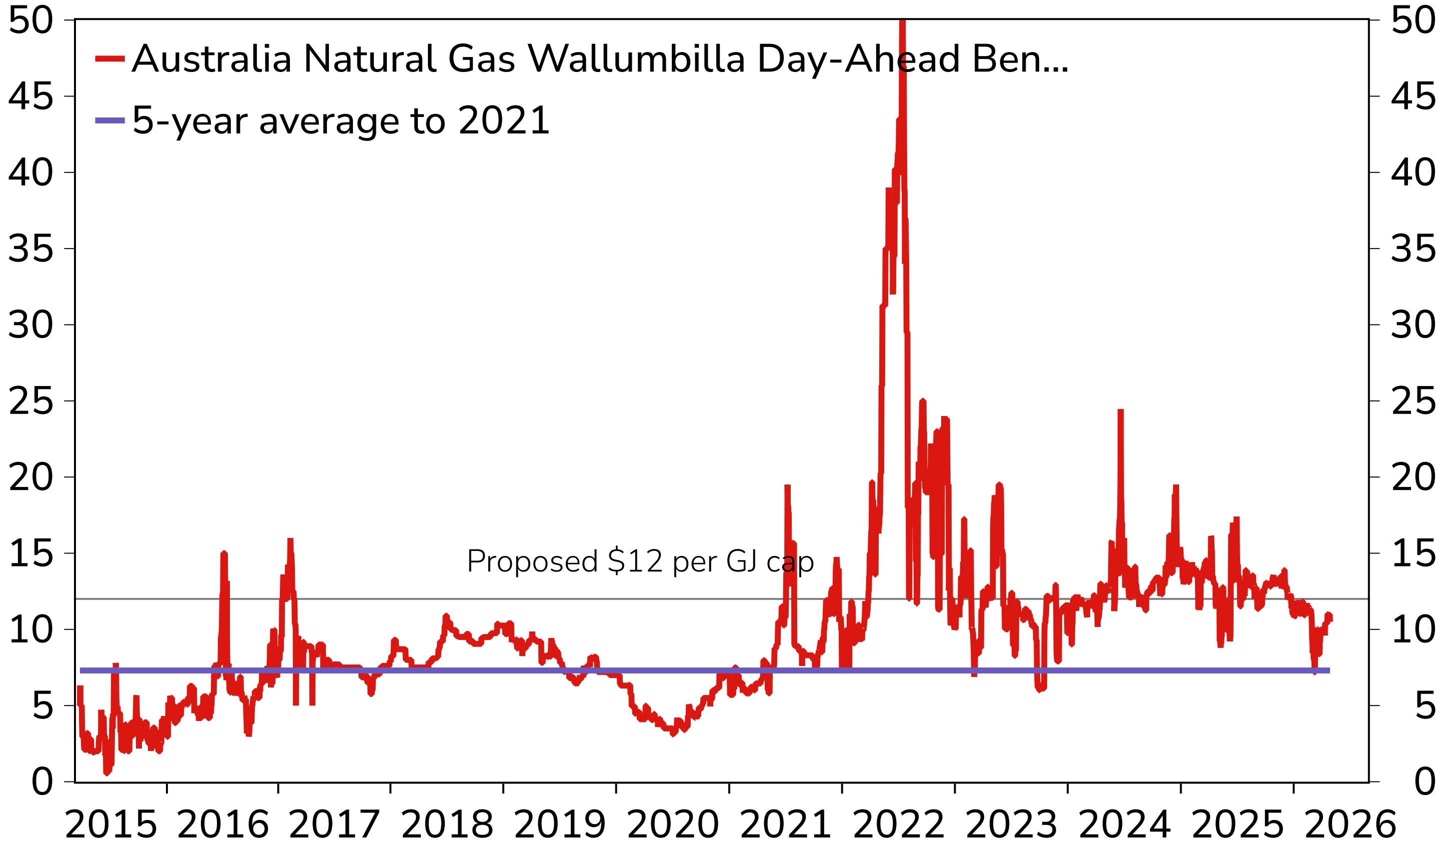


Source: ABS, Macrobond, Westpac Economics

For the RBA, as noted by Westpac's Chief Economist Luci Ellis in "**RBA May hike locked in**", there was some scattered signs of pass-through to other prices, even though March was very early days for this to be evident and most likely it is business taking the opportunity to raise prices in front of looming cost increases. However, it was not widespread and as we covered before, electricity prices have benefited from Australian local gas prices separating themselves from global LNG prices (the local price is currently around $10/GJ so under the government's proposed $12/GJ cap) and the rising share of renewables supported by storage which has seen lower than average summer electricity prices.

Wholesale Natural Gas

Wallumbilla Benchmark Price, $/GJ



Source: , Macrobond, Westpac Economics

Nevertheless, we still expect the RBA to raise the cash rate at their May meeting. Given recent communication from the Bank has characterised the supply shock as ‘further exacerbating existing capacity pressures’ with future demand destruction just a possibility, we see two further interest rate hikes after May. It is true that the Trimmed Mean for the March quarter was on the RBA forecast of 3.5%yr but to achieve their estimate of 3.7%yr for the June quarter we will have to see a step down in the quarterly pace of 0.8%, a bridge too far we think given the current shock we are experiencing. Our current forecast for the June quarter Trimmed Mean is 1.0%qtr.

We are preparing a more detailed bulletin outlining any revisions to our inflation profile once we have processed all the quarterly and monthly data. But we can note that for the March quarter market services ex volatile inflation surprised with a flat print in the quarter with only a very modest lift in the annual pace to 3.4%yr from 3.3%yr. We are expecting it to pick up from here but due to modest wage outcomes, and better productivity in the market sector, we see this acceleration being capped around 4%yr in the second half of 2026, tracking the lift in Trimmed Mean inflation.

Below is the table comparing the quarterly details with our published estimates. We will cover the reasons for the small variations in our review of the monthly CPI as that is where the differences lie.

Monthly March CPI in more detail.

The Israel/US assault on Iran began in the morning of the 28th of February with most of the price and the resulting jump in auto fuel prices above $2/l occurred in the week ending the 8th of March. As such the March CPI would have been very early days for much pass-through to be evident. As noted in earlier bulletins we have recorded price increases for building products, but these did not take effect until 1st April.

Nevertheless, the March CPI did show some scattered signs of pass-through to other prices. Home building and vehicle repair costs, along with downstream insurance inflation, all picked up in the month. Services related to audio-visual, computing and telecommunications also increased in the month, which for telecommunications went against the run we have seen in recent months. There were some promising signs in softer monthly prices of appliances and some other household goods which we will be closely watching to see if they are reversed in the months ahead.

In terms of downside surprises in March, the largest was for auto fuel at 32.8% vs 36.4% expected. We expect fuel to be flat in April with prices falling through May due to the delayed impact of the excise cut and lower crude oil prices in monthly averages. If the excise cut is reversed on July 1, as currently planned, then auto fuel is set to surge 17% through the month of July.

Also, holiday travel was softer, –1.4% vs. 0.7% expected, on the back of a –2.2% decline in domestic travel.

Most other item outcomes were either close to our estimates or stronger. Housing overall was on par with our 0.2% estimate with a more modest than expected 0.2% increase in rents being offset by a 0.5% increase in dwelling costs. With rising inputs cost for construction this may be an earlier sign we should be expecting a stronger lift in dwelling prices in the months ahead.

Clothing & footwear (–1.9%) did not fall as much as expected (–4.2%) with garments having a smaller than expected seasonal fall (–2.5%) while footwear fell –1.9% and accessories & clothing services fell –0.6%. It does appear that the gold boost to accessories through jewellery may have come to an end with a reported –0.6% in March.

We also did not see the usual seasonal fall in alcohol (0.7% vs. –0.2%expected) which offset a softer than expected rise in tobacco (1.1% vs. 1.4%).

Communication prices lifted 0.5% in the month when we expected a small fall (–0.1%) due to an outsized 3.6% increase in postal services, the largest monthly increase since the 4.2% increase in July 2024.

With the rise in construction costs we will be keeping a close eye on insurance premiums. Insurance surprised us with a 0.7% increase in March following hot on the heels of a 1.4% increase in January and a 0.4% increase in February. Combined with a 0.9% increase in deposit & loan facilities and a 0.8% increase in other financial services, insurance & other financial services lifted 0.8% vs. 0.4% expected.

These small but reasonably broad upside surprises is something we will be watching closely in the months ahead to see if they are early signs of pass-through from higher fuel costs as well as opportunistic price increases give the current backdrop.

Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

"professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

Each time someone visits our site, data is captured so that we can accurately evaluate the quality of our content and make improvements for you. We may at times use technology to capture data about you to help us to better understand you and your needs, including potentially for the purposes of assessing your individual reading habits and interests to allow us to provide suggestions regarding other reading material which may be suitable for you.

Disclaimer

This information has been prepared by Westpac and is intended for information purposes only. It is not intended to reflect any recommendation or financial advice and investment decisions should not be based on it. This information does not constitute an offer, a solicitation of an offer, or an inducement to subscribe for, purchase or sell any financial instrument or to enter into a legally binding contract. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice. Certain types of transactions, including those involving futures, options and high yield securities give rise to substantial risk and are not suitable for all investors. We recommend that you seek your own independent legal or financial advice before proceeding with any investment decision.

This information may contain material provided by third parties. While such material is published with the necessary permission none of Westpac or its related entities accepts any responsibility for the accuracy or completeness of any such material. Although we have made every effort to ensure this information is free from error, none of Westpac or its related entities warrants the accuracy, adequacy or completeness of this information, or otherwise endorses it in any way. Except where contrary to law, Westpac Group intend by this notice to exclude liability for this information. This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

Times are AEDT. All data forecasts are m/m or q/q and seasonally adjusted unless otherwise specified. Forecasts for Australian data are our forecasts and for other countries they are consensus forecasts.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia. Westpac is represented in Papua New Guinea by Westpac Bank - PNG - Limited. The liability of its members is limited.

U.S: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission ("CFTC") as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation ("FDIC"). Westpac Capital Markets, LLC ('WCM'), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 ('the Exchange Act') and member of the Financial Industry Regulatory Authority ('FINRA'). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

23 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed following President Trump's announcement of an indefinite ceasefire extension with Iran, with stalled talks and continued military posturing highlighting the fragility of the diplomatic backdrop.

US equities rose to fresh record highs on strong earnings and optimism around the ceasefire extension, although other markets were more varied.

Bond yields moved higher amid ongoing inflation concerns linked to energy supply risks.

The USD firmed modestly, supported by risk sentiment and comments on increased demand for US FX swap lines, while the AUD outperformed most peers.

Oil prices surged as supply risks remained elevated despite the ceasefire extension, with metals firmer and iron ore edging higher with gains capped by a resolution to the month's long dispute between BHP and CMRG.

Financial Markets

Markets were mixed overnight following President Trump's announcement of an indefinite extension to the ceasefire with Iran, despite planned talks between the two countries breaking down. Vice President Vance had been scheduled to travel to Islamabad this week but withdrew as the US awaits submission of a new proposal, with Iran's semi official Tasnim news agency stating there is no prospect of Iran participating in negotiations. Iran later reported it had received "some sign" the US may be willing to end its blockade, with Iran's UN envoy indicating negotiations would resume once the US blockade is lifted. These developments came as a third US aircraft carrier is expected to arrive in the Middle East within the next 3 to 5 days, underscoring ongoing tensions.

- Equities diverged across regions. In the US, strong corporate earnings and optimism around the ceasefire extension revived risk appetite, with the S&P 500 rising 1.0% to a fresh record high of 7,138 and the NASDAQ 100 gaining 1.6%. The Dow Jones posted a more moderate gain of 0.7%, while the VIX fell -3.0% to 18.9.
- European equities were less convinced, with the Euro Stoxx 50 down -0.4% and the FTSE 100 lower by -0.2%. Asian markets were mixed, with Korea's KOSPI up 0.5% and Japan's Nikkei 225 gaining 0.4%, while the Hang Seng fell -1.2%. Locally, the ASX 200 underperformed, declining -1.2%.
- Bond markets sold off modestly, with US yields moving higher across the curve. The 2 year Treasury yield rose 2bps, while the 10 year increased 1bp. Futures pricing for the terminal Fed funds rate edged lower, now implying a 29% probability of an additional rate cut by year end.
- Australian government bonds also retreated amid renewed inflation concerns linked to energy supply risks, with the Strait of Hormuz remaining closed. The yield curve shifted higher, with both 3 year and 10 year yields rising 5bps. Swap markets now fully price two additional rate hikes by year end, implying a terminal cash rate of around 4.65%.
- FX markets saw modest USD strength, with the DXY up 0.2%, while Treasury Secretary Scott Bessent noted that several Persian Gulf and Asian allies have requested FX swap lines with the US. The Australian dollar edged higher against the USD, rising 0.1% to 0.7160, and also appreciated against the Euro (+0.4%), Sterling (+0.2%) and the Yen (+0.2%). Other major currencies underperformed the USD, with the Euro down -0.3% and sterling marginally lower.
- Commodity markets were volatile but finished firmer. Oil initially eased on signs the US may be willing to lift its blockade, before rebounding strongly, with Brent rising 3.4% to US$102/bbl and WTI also up 3.4% to US$92.8/bbl. Dated Brent ended the session around US$108/bbl. Gold responded positively to the extension of the ceasefire, gaining 0.4%, with copper following suit, up 1.5%. Iron ore edged 0.4% higher, with gains capped after BHP reached an agreement with China Mineral Resources Group following a month's long standoff.

Times are AEDT. All data forecasts are m/m or q/q and seasonally adjusted unless otherwise specified. Forecasts for Australian data are our forecasts and for other countries they are consensus forecasts.

International Data

The **Euro Area consumer confidence index** deteriorated from -16.4 in March to -20.6 in April, according to the preliminary reading. Still, that suggest households in Europe remain more confident than most across the developed world, with the index only 6pts below its 5-year average.

UK consumer prices rose 0.7% in March to be 3.3% higher over the year, broadly in line with expectations. Annual core inflation edged lower from 3.2%yr to 3.1%yr, but services inflation strengthened from 4.3%yr to 4.5%yr.

ECB President Lagarde highlighted the immense uncertainty the Euro Area and world are facing. Currently the ECB believe conditions in the Euro Area are between their baseline and adverse projections. The duration of the conflict and evidence of price passthrough are the staff's focus. Lagarde's conclusion was open ended, stating the ECB will "act as the situation demands". ECB member Simkus also noted: "I am of the opinion that we really shouldn't increase interest rates at the next monetary-policy meeting".

Local Data

The **Westpac-MI Leading Index** fell to -0.13% in March from +0.05% in February, marking its first below-trend reading since August last year, with higher interest rates and the global energy shock weighing on momentum (see here).

The words “believe”, “anticipate”, “expect”, “intend”, “plan”, “predict”, “continue”, “assume”, “positioned”, “may”, “will”, “should”, “shall”, “risk” and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author’s knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac’s Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac (“WNZL”). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Draw a line on just drawing a line

Share

Scenario analysis is essential in uncertain times, but it must be well-grounded, not just drawing an arbitrary line on a graph.

- You know times are uncertain when institutions start publishing scenarios alongside their normal forecasts. Two principles underlie good scenarios. First, the narrative underlying the scenario must hang together – no assuming people do things that are either individually irrational or infeasible.

Second, the scenario must allow people to respond to the initial shock – avoid just drawing a price line on a graph and assuming people cannot adjust their behaviour.

- There is a tension, though, between the need to be realistic and a desire to highlight vulnerabilities or contemplate worst-case scenarios. There is a legitimate role for worst-case thinking, but it must be handled with care. Recall that even though our forecasts last year were less alarmist than many in the wake of Liberation Day, actual outcomes were even better than we had expected.
- The real value of scenarios is teasing out downstream effects and delayed responses. Sometimes the responses to temporary shocks can have lasting effects. From EV purchases to defence budgets, these could be especially important coming out of the current conflict. All the more reason to avoid just drawing a line and assuming that is the outcome.

In times as uncertain as these, you want to be able to articulate more than one possible future state of the world. That is where scenario analysis comes in. Indeed, when institutions start publishing scenarios, you can take it as a sign that things are unusually uncertain. The RBA used scenarios extensively during the pandemic. And while the IMF did not give scenarios any prominence in its previous full *World Economic Outlook* report in October, it did this week. Similarly, we have published several scenario iterations over the past six weeks and will provide an update later today in our *Market Outlook* report.

Using scenarios rather than simple uncertainty ranges or a description of risks is especially useful when the possible future states of the world are qualitatively different from the base case, and when the level of conviction about that base case is low. There is nothing wrong with a scenario that is only a little different from the base case, but it is not that interesting or informative.

Two key principles underlie good scenario analysis. First, the premise of the scenario needs to be well-grounded. The narrative motivating the initial impetus must hang together. It must be logically consistent and represent both the interests and the constraints of the actors within the system. In other words, scenarios should not assume that people do things that are either bonkers or infeasible. Individually rational behaviour that is harmful in aggregate, such as panic-buying toilet paper or conducting fire-sales of loss-making assets, should of course be allowed for, but make sure the action is indeed individually rational.

Second, the methods used in developing the scenario need to go beyond first-round thinking. You need to allow for other people to react. A good scenario cannot be just a one-off shock where nothing else changes. Sometimes it takes time for people to adjust to the new situation, so the reaction occurs with a lag. Teasing these reactions out is the value-add of the scenario.

There is a tension, though, between the need to be realistic and a desire to highlight vulnerabilities or contemplate worst-case scenarios. Sometimes a lack of realism is used to guard against a potential failure of imagination. There is a legitimate role for this approach when stress testing, for example. However, unrealistic assumptions in forecast-flavoured scenarios leave your forecasts open to misinterpretation. We have seen an example of this issue this week, where the IMF's worst-case 'severe' scenario, which implies a global recession, has sparked unhelpful talk of recession here in Australia.

Part of the issue is that the IMF's less-bad 'adverse' scenario (which assumes oil prices average USD100/bbl this year before moderating to USD75 next year) and worst-case 'severe' scenario (which assumes oil prices stay around USD125/bbl from the outbreak of the conflict all the way through to end-2027) are both 'top-down' scenarios that appear to start from an assumed path for oil prices. Unlike our own scenario work, they do not explicitly model loss of supply from the Middle East and work out what prices need to do to clear the global market. By effectively just drawing a line on a graph for oil prices, the scenarios assume away any scope for other producers to respond. This is not an issue in the near term, but the longer the assumption is maintained, the less realistic it is. High prices will spur non-OPEC producers such as the US and Canada to boost production. It takes time to get that expansion running, but eventually prices will start to ease.

Because it assumes high prices right through 2027, the 'severe' scenario is most challenged by this issue. This is not to say that the IMF should not have published that scenario, but it is important to understand the context and what it was trying to achieve in doing so.

When developing scenarios, you also need to avoid the trap of thinking only of downside risks. Part of the problem is that downside risks usually come from identifiable events. It is easy to construct a plausible narrative for a scenario starting from "this particular bad thing happened". But as one of my old bosses used to remind us, sometimes you should also consider the risk everything just turns out a little bit better than expected.

As our April *Market Outlook* goes to publication later today, it is helpful to recall last April's edition. The 'Liberation Day' tariffs had been announced a fortnight previously, and many voices in the market were predicting global or US recessions. At the time we took a more moderate view, based on the principles noted above. Firstly, continuing with very high tariff rates would have been an act of economic self-harm. While it was hard to bet on the Trump administration acting rationally in a context of 'flood the zone' headlines and intemperate social media posts, self-interest is still the best assumption. If there is nothing preventing someone from stopping punching themselves in the face, they will stop punching.

Secondly – and this was a key judgement in our forecast last year – other countries had agency and could respond. In particular, China had scope to stimulate, and this would also cushion growth in Australia. In that context, we note that the latest Chinese GDP growth has again surprised on the upside relative to market expectations.

It turns out that even we were too bearish a year ago: the global economy did much better than expected, and global trade kept expanding with barely a hiccup. Other factors, including a tech boom, turned out to be more important than expected. Trade patterns were also re-routed around the highest tariffs, and of course the US government de-escalated, as is proving to be its pattern.

These principles also hold for other kinds of scenarios. Whenever you read a prediction of doom concerning, say, adoption of a new technology, ask yourself what is preventing people from responding to ameliorate the bad thing. What prevents macroeconomic policymakers from easing, for example, or the tax system from redistributing unequal gains? While occasionally decision-makers decide that a bad thing is good actually, holding that position is itself fragile.

Where scenarios can really add value is when they highlight a lasting effect from a temporary shock. Whether it is the person who buys an EV in response to current high petrol prices and reduces their petrol consumption permanently, or the government that reassesses its defence spending, behavioural responses can change longer-term demand trends, and so the prices that prevail further out. Normalisation after a shock does not always take you back to where you were. That is another reason why it is so important to avoid just drawing a line on a graph and calling it a scenario, ignoring system-wide effects.

First impressions: NZ Consumer Price Inflation, March quarter 2026

#inflation #newzealand

By Satish Ranchhod
Senior Economist, Westpac NZ

08:45 April 21 2026

Share

NZ consumer prices were up 0.9% in Q1, with annual inflation unchanged at 3.1% The result was stronger than expected with firm underlying inflation.

Consumers Price Index, March quarter 2026

Headline inflation

Quarterly change: +0.9% (prev: +0.6%)

Westpac forecast: +0.7%

Market median: +0.8%, range +0.7% to. +1.1%

Annual change: +3.1% (prev: +3.1%)

Westpac forecast: +2.8%, RBNZ: +3.0%, Market: +2.9%

Non-tradables

Quarterly change: +1.1% (prev: +0.6%)

Westpac forecast: +0.8%

Annual change: +3.5% (prev: +3.5%)

Tradables

Quarterly change: +0.7% (prev: +0.7%)

Westpac forecast: +0.2%

Annual change: +2.5% (prev: +2.6%)

Consumer prices rose 0.9% in the March quarter. That saw the annual inflation rate remaining unchanged at 3.1%.

The March quarter inflation result was above the 0.7% rise we were expecting, with surprises spread across tradable and non-tradable categories.

The result was also above the RBNZ's updated forecast from their April policy update for 3% annual inflation.

Importantly, many measures of core inflation have continued to run at levels close to or above the top of the target band. For the RBNZ, that highlights the firm starting point for inflation even before the recent oil price shock.

What contributed to inflation in the March quarter?

Underpinning the March quarter rise in consumer prices were large increases in some specific areas.

- Food prices were up 1.5% over the quarter, underpinned by the usual seasonal increases in the price of fruit, as well as higher prices for confectionary (especially chocolates).
- Unsurprisingly, the other big category that has boosted inflation this quarter were transport costs. The sharp rise in oil prices over the past few weeks has left petrol prices up 3.5% over the quarter, with diesel prices up 11%. Notably, we also saw the early stages of spillovers from high fuel prices into other costs, with domestic airfares up 9% over the quarter.
- In addition to those factors, the March quarter also saw continued increases in electricity charges and the annual increase in the tobacco excise tax. There has also been a big rise in vehicle registration costs and health care costs (the later related to the annual roll-over in the subscription subsidy).

On the downside, we saw a fall in overseas holiday accommodation costs (-4%) and international airfares (-7%). Both of those declines are seasonal, and in the case of international airfares, we are likely to see large increases over the coming months.

On the housing front, rents were flat over the quarter. That was the weakest result since 2001. It’s particularly notable as the start of the year typically sees many rental agreements rolling over and larger increases in rents. This softness comes against a backdrop of low population growth and increases in housing supply, with particularly weak growth in areas like Wellington. We expect housing rental growth will remain muted for some time.

The March quarter also saw a modest 0.5% rise in the cost of a newly built home. Construction cost inflation has been muted for some time. However, there is growing pressure on materials costs, and that’s likely to flow through to larger increases in building costs later in the year.

Annual and core inflation

The annual inflation rate was unchanged at 3.1% in the year to March.

Looking under the surface, prices in the domestically oriented non-tradables group rose 1.1% over the quarter (above expectations). That saw annual non-tradables inflation remaining unchanged at 3.5%.

Non-tradables inflation has been lingering above historic averages. In part, that’s due to the continued large increases in administered prices, like electricity charges which rose 12.5% over the past year. However, prices in other areas have also been firm. Non-tradables excluding housing and utilities costs (which also omits rates) was 3.5% for the year (up from 3.4% at the end of last year). In seasonally adjusted terms, quarterly non-tradables inflation has been running at a rate 0.9% for most of the past year.

Tradables inflation was also hotter than expected in the March quarter (+0.7 qtr, +2.5% yr), with increases seen across a range of discretionary spending categories. That saw annual tradables inflation excluding food and fuel rising to 1.8% (up from 1.7% at the end of last year and the highest it's been since September 2023).

And over the coming quarters, tradable price inflation is set to accelerate sharply. As well as increase global fuel and transport charges, supply chain disruptions are already pushing up the prices for many imported goods.

While the past quarter did see large moves in a few specific areas like food and fuel prices, these aren’t the only areas where we’ve seen firmness in inflation. Despite dropping back over the past year, key measures of core inflation remain in the upper part of the RBNZ’s target band, and several have taken a step higher. (Note: core inflation measures smooth through the quarter-to-quarter swings in inflation and track the underlying trend in prices).

In terms of specifics:

- CPI ex-fuel inflation: +3.2% yr (vs +3.2% previously)
- CPI ex-fuel and food: +3.0% yr (vs +2.9% previously)
- 30% trimmed mean: +2.3%yr (vs +2.5% previously)
- Weighted median +1.6%yr (vs 1.7% previously)

That resilience in core inflation will be important for the RBNZ, highlighting the firm starting point for inflation even before the recent oil price shock

Outlook

This quarter's result was really just the curtain raiser. Both we and the RBNZ now expect inflation will rise to over 4% in the June quarter. We've recently updated our forecasts and had assumed annual inflation would peak at 4.3% in the June quarter, before dropping back to 3.9% by the end of this year. Today's result suggests upside risk to those forecasts

The middle part of the year will see the full brunt of the recent rise in oil prices, as well as related increases in transport and other costs. There will also be a big focus the various survey gauges of forward cost and pricing pressures over the next few months, which will be closely watch for signs of a more enduring lift in inflation.

The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability-related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the

appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at the internet address www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Fiji: Unless otherwise specified, the products and services for Westpac Fiji are available from www.westpac.com.fj © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia and registered as a branch in Fiji. The liability of its members is limited.

Papua New Guinea: Unless otherwise specified, the products and services for Westpac PNG are available from www.westpac.com.pg © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia. Westpac is represented in Papua New Guinea by Westpac Bank - PNG - Limited. The liability of its members is limited.

U.S.: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission (“CFTC”) as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation (“FDIC”). Westpac Capital Markets, LLC (‘WCM’), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 (‘the Exchange Act’) and member of the Financial Industry Regulatory Authority (‘FINRA’). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent

liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

"professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

For the US, an adverse turn is in the making

Head of International Economics, Westpac

11:00 April 20 2026

Share

The US economy is facing a very uncertain future with inflation up and consumer sentiment at record lows.

Headlines tied to the US economy continue to focus on President Trump's Middle East actions and the consequences for global energy prices. Abstracting from this news storm, however, the message from available economic data is the US economy slowed below trend ahead of the conflict, leaving the economy at risk of stalling, at least briefly.

In understanding the US' current state and outlook, it is best to assess recent data chronologically. First estimated at 1.4% annualised, Q4 GDP growth has since been revised to just 0.5%. Underlying the headline revisions, personal consumption growth throttled back from a near-trend 2.4% to a sub-par 1.9%, and business investment from an already-weak 3.7% annualised to 2.4%, as residential investment contracted 1.7% annualised.

Come January and February 2026, personal consumption expenditure was essentially flat and core goods order growth slowed to less than a third of Q4's pace. We do not have reliable data to back the assertion, but it is hard to believe the recent rise in the US 10-year yield and pass-through to the 30-year mortgage rate won't put additional pressure on residential construction. The current Atlanta Fed GDPNow estimate of 1.3% annualised therefore seems likely to slip through April before the formal Q1 GDP result is released by the BEA.

Another step down in momentum, perhaps into outright contraction, come Q2 is clearly a risk. The only data to hand for April is the University of Michigan's consumer sentiment survey. Worryingly, the headline index fell to its weakest read on record at 47.6 – an impressive feat considering the survey dates back to 1978 and has averaged 83.8 since, 43% above April's read. Notably, both current conditions and expectations are at all-time lows, and this is despite nonfarm payrolls having bounced back in March and equity markets, in aggregate, showing resilience.

While nonfarm payrolls have averaged a gain of 68k the past three months, this follows the average loss of 8k jobs per month through the second half of 2025 and material downward revisions to historical estimates prior to that. Household employment outcomes have also been materially weaker over the period. The unemployment rate is essentially unchanged since Q2 2025, but the participation rate has fallen almost 0.7ppts over the period, implying an unemployment rate of 5.0% on a constant participation basis. While not an alarming level historically, relative to the average of the past five years, it implies a marked turn in job creation and building downside risks for activity. This is corroborated by the 1.5ppt decline in the household savings rate since April 2025.

Providing a potential offset is record household wealth. Still, with sentiment as it is, and wealth needing to be liquidated or leveraged to be spent, any wealth effect for consumption is likely to take considerable time to materialise. Furthermore, whereas in the past, the use of wealth by higher-income households could have been complemented by tax breaks and/or cash support for those on lower-incomes, US fiscal authorities no longer have capacity outside of recession.

Taken together, current income and wealth dynamics in the US not only suggest growth is at risk of stalling out mid-year, but also that it could remain weak for an extended period. Thankfully, the FOMC remains equipped with the capacity to support the economy should risks to activity become dominant.

As such, it will be important to assess how the FOMC incorporates upcoming inflation detail into their risk calculations. We expect they will be heartened that the Middle East conflict only impacted headline inflation in March, a 10.9% increase in energy prices tripling the total monthly CPI gain to 0.9%, while core inflation printed at a benign 0.2% (core goods prices up 0.1%, and services 0.2%). Although we still believe capacity constraints across the US economy are likely to hold annual core inflation around the 2.6%yr registered in March throughout 2026, this deviation from target is not material enough to preclude further easing if downside risks for the labour market crystallise come Q2 or Q3.

In contrast to the UK and Europe (and Australia and New Zealand), the chance of a policy rate increase is also slim to non-existent in the US. The outlook for short-end rates should therefore limit gains in term yields to a modest upward drift, a function of gradual portfolio reallocation away from US dollar assets and the edging higher of the US fiscal deficit and government debt.

This analysis was initially released in the April edition of Westpac Market Outlook.

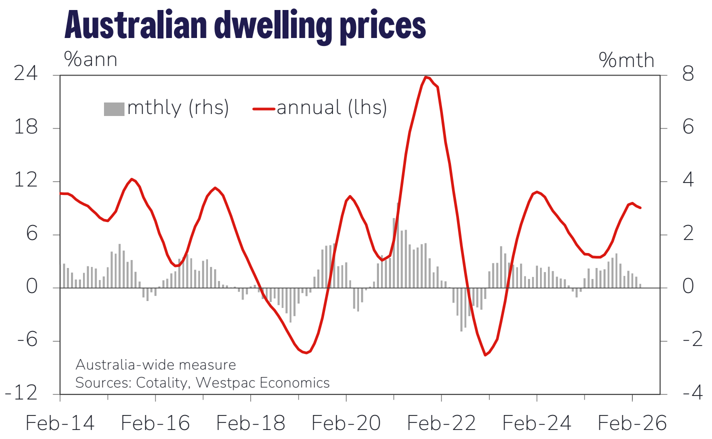
AUSTRALIAN DWELLING PRICES BULLETIN

Price growth slows across all capital cities

Key points

- The Cotality home value index rose 0.2% in April - the weakest monthly outcome since January 2025 - following revised gains of 0.4%mth in March and 0.5%mth in February. Annual growth eased to 9.1%yr.
- The April update points to early signs of weakness linked to tighter monetary policy and a more uncertain global backdrop.
- The slowdown remains most pronounced in Sydney and Melbourne, where price declines have persisted and turnover has fallen sharply. In contrast, price growth across other capital cities has eased only modestly and remains robust.
- With further interest rate increases expected over coming months, alongside heightened global uncertainty, additional headwinds are likely, and the risk of a further deceleration in dwelling price growth has increased.



April Cotality home value index: +0.2%mth; +9.1%yr

Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

Price growth slows, sales retreat further

Luka Belobrajdic
Economist

The Cotality home value index, covering the eight major capital cities, rose 0.2% in April - the weakest result since January 2025. This follows a revised down 0.4%mth in March and 0.5%mth in February, marking a period of lower growth after the stronger outcomes recorded late last year, when prices rose 0.9–1.2%mth over August–November. Annual growth softened to 9.1%yr in April.

The April data suggests that the housing market may be beginning to feel the brunt of higher interest rates and a more uncertain global outlook. That said, divergence across markets remains evident: price declines have continued in Sydney and Melbourne, while monthly price growth in other capitals has seen a mild deceleration but remains robust.

Note that, unless specified, figures in titles, tables and the commentary below are in non-seasonally adjusted terms, consistent with the 'headline' figures reported by Cotality. Figures shown in charts are in seasonally adjusted terms.

While still early days, the April read provides clearer insight into the initial impact of tighter monetary policy and uncertainty arising from the Middle East conflict. Prices rose 0.2%mth in non seasonally adjusted terms, with the seasonally adjusted measure matching this outcome.

Turnover continued to trend lower, with preliminary estimates suggesting a quarterly decline of 5.3% - led by Sydney and Melbourne. The ongoing decline likely reflects increased pessimism following recent RBA policy rate hikes and weaker consumer confidence, with the unemployment expectations sub-index falling sharply, likely translating into increased hesitation in committing to a property purchase (see here). At the margin, prospective changes to capital gains tax may also be influencing purchasing decisions. Despite the weakness, sales continue to outpace new listings, indicating supply remains tight, although listings are closing the gap - rising to their highest level since 2024 at 22,900.

Auction clearance rates remained below long run averages in Sydney and Melbourne. Clearance rates in both cities reached recent lows in April, consistent with the pronounced slowing in price growth observed in these markets. Note that clearance rates are only meaningful indicators for Sydney and Melbourne.

By dwelling type, the slowdown since late last year has remained more pronounced for houses than units, although in April unit price growth (0.1%mth) was slightly softer than for houses (0.2%mth). The slowdown continues to be most evident in top-tier properties, which recorded a 0.5%mth decline in April, while lower-priced tiers continued to gain.

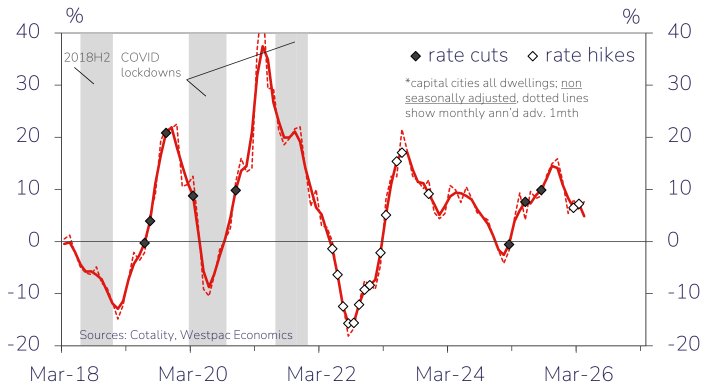
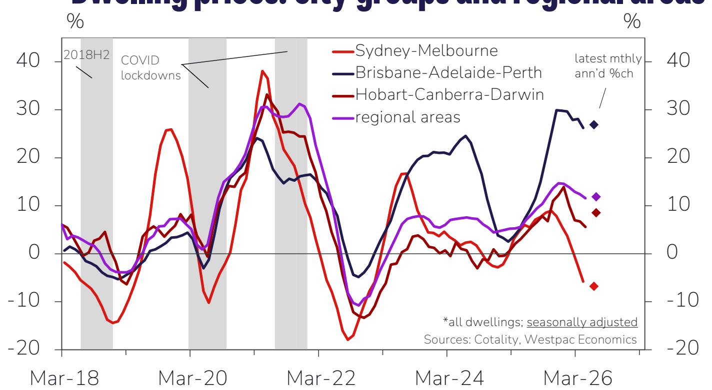
Australian dwelling prices: 3mth ann'd



Dwelling prices: city groups and regional areas



The April price results by capital city were as follows:

- **Sydney:** Prices extended their decline, falling 0.6%mth in non seasonally adjusted terms - the largest monthly fall since December 2024. House prices declined a further 0.7%, while unit prices also fell (-0.4%mth). Weakness was concentrated in the top 25% of dwellings, which declined 1.2%mth. Annual growth slowed to 4.2%yr.
- **Melbourne:** Prices again recorded the sharpest decline among the capitals, falling 0.6%mth. Both houses (-0.8%mth) and units (-0.1%mth) contributed to the decline. As in Sydney, weakness was concentrated in the top quartile, which fell -1.2%mth. Annual growth was 2.0%yr.
- **Brisbane:** Price growth slowed modestly, to 1.2%mth, down from 1.8%mth in March. Both houses and units recorded more subdued gains of 1.2%mth and 1.4%mth respectively. Growth was supported primarily by the bottom 25% of dwellings, which rose 1.7%mth. Annual growth remains very strong at 19.7%yr.
- **Adelaide:** Prices rose 1.1%mth, slightly softer than the March outcome. Annual growth lifted further to 12.2%yr.
- **Perth:** Price growth, although having slowed, continued to outperform all other capitals, increasing 2.1%mth. Annual growth accelerated further to 26%yr, the strongest result since January 2007. Both houses and units contributed, rising 2.1%mth and 2.2%mth respectively, with the bottom quartile recording the strongest growth (2.4%mth).
- Outcomes across the smaller capitals were more subdued. Price growth softened in Darwin (1.3%mth, 19.6%yr), edged modestly higher in Hobart (0.2%mth, 2.6%yr), and was flat in Canberra (5.6%yr).
- **Regional markets,** as has been the recent pattern, continue to outperform their respective capitals in NSW and Victoria, while lagging the pace of growth seen in the mid sized capitals. Annual growth ranges from 7.9%yr in regional Victoria, to 9.1%yr in regional NSW, and 15%yr in regional Queensland (which includes the Gold and Sunshine Coasts).

Overall, the April results confirm that price growth is slowing across all capital cities, with Sydney and Melbourne acting as a material drag, while Brisbane, Adelaide and Perth continue to power ahead. Turnover has continued to decline through 2026, although it remains early in the adjustment process. It often takes several months for the full effects of interest rate changes to become apparent in housing market conditions, particularly given the labour market so far has remained relatively firm despite growing global headwinds (see here).

Looking ahead, we expect three further RBA cash rate hikes this year, and the Middle East conflict appears increasingly prolonged continuing to weigh on global energy markets and the Australian economy. In this context, the outlook for the housing market has become more uncertain, with a further price growth deceleration looking increasingly likely.

WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

First Impressions: NZIER Quarterly Survey of Business Opinion, March quarter 2026

#businessconditions #newzealand

By Michael Gordon
Senior Economist, Westpac NZ

08:15 April 21 2026

Share

Business confidence fell sharply after the Iran conflict, with the gloom deepening over the course of March.

Key results (seasonally adjusted)

General business situation: +1 (Prev: +39)

Trading activity, past three months: 0 (Prev: -3)

Trading activity, next three months: +13 (Prev: +22)

Average selling prices, past three months: +22 (Prev: +13)

Average selling prices, next three months: +43 (Prev: +25)

Business confidence has unsurprisingly taken a knock since the Iran war kicked off at the end of February. Indeed, given the fast-moving situation, the headline results of the Quarterly Survey of Business Opinion understate the degree of the shock. Firms noted ongoing cost pressures, and a growing number of them are intending to raise their prices, but their ability to do so remains mixed. Overall, today's survey probably underscores rather than deepens the dilemma that the RBNZ will be facing in the coming months.

Sentiment about the general business situation fell from +39 to +1, the lowest reading since September 2024 – and that doesn't come close to telling the full story. Surveying began on 6 March, and the initial batch of responses was a net 34% positive. After the first reminder in mid-March, the next batch was a net 7% negative, and the last batch at the end of March was a whopping net 57% negative. NZIER didn't provide this breakdown for the other survey questions, but we can reasonably assume that there was a similar deterioration over the course of the month.

The own-activity measure for the last quarter actually picked up a little compared to the December survey, emphasising that the economy was regaining some momentum before the Iran war. Expectations for the next quarter fell from +22 to +13, though again the picture is likely to have looked significantly worse by the end of the survey period.

A net 37% of firms reported a rise in their costs, unchanged from last quarter. Expected costs for the next quarter were a net 45%, up from 39% in December – not a big increase, but this measure was already at elevated levels.

A net 22% of firms increased their prices last quarter, compared to 13% in December. More notably, a net 43% plan to raise their prices in the next quarter, the highest reading since September 2023. Firms' ability to raise their prices remained mixed across sectors though: for instance, builders reported a sharp rise in costs but a net 25% lowered their own prices last quarter.

Employment was down a net 5% past quarter, after a brief pickup in December, and hiring intentions also turned negative again. That said, there is evidence of labour shortages emerging again for skilled roles, though not for unskilled ones.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac’s London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as “relevant persons”). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for “eligible counterparties” and

“professional clients” as defined by the rules of the Financial Conduct Authority and is not intended for “retail clients”. Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area (“EEA”): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH (“WEG”) under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority (‘BaFin’) and subject to its regulation. WEG’s supervisory authorities are BaFin and the German Federal Bank (‘Deutsche Bundesbank’). WEG is registered with the commercial register (‘Handelsregister’) of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an ‘investment recommendation’ and/or ‘information recommending or suggesting an investment’, both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) (“MAR”). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

China is set to benefit from global energy unrest

#china #asia #aud

By Elliot Clarke
Head of International Economics, Westpac

10:48 April 20 2026

Share

Chinese exports will receive a material boost from high oil prices. The consumer remains a risk to GDP growth, however.

China's economy has begun 2026 in good health despite the conflict in the Middle East, registering annual GDP growth of 5.0% in Q1. In time, recent developments are likely to prove a net positive for China, spurring greater demand for green technology across developed and developing markets.

Not only were the March readings for the official NBS manufacturing and services PMI's favourable, registering increases to 50.4 and 50.1, but the partial data through February and March showed the beginning of a long-awaited stabilisation in consumer demand and turn for housing investment, retail sales growth beating estimates in February at 2.8%ytd (although growth slowed again in March to 2.4%ytd) and the decline in property investment almost halving from –17.2%ytd in December to –11.2%ytd in March. The latter result is particularly welcome given construction activity has declined almost 40% since end-2021.

In the short term, an end to the sharp decline in property investment will add meaningfully to economic growth given the sector still makes up circa 15% of the aggregate economy. In the medium to long-term though, not only will investment activity need to expand sustainably, but wealth must follow. As yet, there is no evidence of price growth, with new and existing home prices falling a further 0.2% in March.

We remain circumspect on the rate at which retail sales growth will accelerate from here near term, anticipating it is unlikely to return to trend, let alone outperform, until pro-active fiscal policy comes into effect. Authorities signalled an intention to act at the March NPC, but detail has been scarce since.

It is potentially the case that the Government wants clean air for reforms, which the Middle East conflict and the upcoming May meeting between President Xi and President Trump precludes for now. Though authorities may also feel the domestic economy has been given additional time to find its own path without intervention. The response of consumers and businesses across developed and developing markets to the current surge in energy prices will almost surely be an acceleration in demand for renewable energy products and electric vehicles, which China is globally dominant in and has ample spare capacity to produce and ship.

Even without a further material improvement in domestic demand, the short-term downside risks for Chinese GDP growth are receding thanks to this catalyst. Note too, the positive impulse is likely to prove lasting as geopolitical uncertainty over energy supply produces a national imperative to reduce reliance on the Middle East, particularly amongst south-east Asia, Latin America and Africa, where Chinese firms are experiencing particularly rapid demand growth.

Indeed, the learnings from this crisis, and what is expected to be a favourable result from the May meeting between President Xi and President Trump, could also skew long-term risks for Chinese growth and sentiment to the upside. This is not to say that 5.0% growth is probable for 2026–2028, but rather that growth is increasingly likely to stabilise around 4.5% instead of 4.0%.

Attaining annual growth of 5.0% over successive years would require material gains for trade, industrial investment, property construction and household consumption. The latter would necessitate a dramatic turn in actual and expected wealth and sentiment, however. While not impossible, given the poor starting point on both fronts, this is best considered a low probability and long-coming upside risk.

Sooner than later though, the favourable shift in global opportunities and risks for China is likely to support stronger demand in Chinese financial instruments. Yields and credit spreads will remain compressed, enticing additional real economy investment, and equities should see sustained inflows of new capital.

Paired with continued strength in the trade balance and the returns from offshore investments currently being made by Chinese firms, demand for the renminbi will grow in depth and breadth. Given the diversity of Chinese interests across the globe, currency gains are expected on a trade-weighted basis but will be most acute bilaterally versus the US dollar – the only currency Chinese entities look to be reducing their exposure to. Importantly, trade-weighted currency gains are likely to be proportional to China's competitiveness opportunities, and so should not materially narrow the current account.

This analysis was initially released in the April edition of Westpac Market Outlook.

ECONOMIC BULLETIN

Preview of Q1 labour market surveys: 6 May, 10:45am.

29 Apr 2026 | **Michael Gordon**, Senior Economist | +64 9 336 5670 | michael.gordon@westpac.co.nz

Steady for now

- **We expect the unemployment rate to hold steady at 5.4% for the March quarter.**
- **Higher-frequency indicators have pointed to a modest lift in jobs in recent months, though not outpacing the growth in the working-age population.**
- **While we expect to see a small downward correction in the HLFS employment measure, this doesn't alter the general picture.**
- **Wage growth is likely to have remained subdued, given the existing slack in the labour market.**
- **Our forecasts are a little softer than what the RBNZ expected in its February statement. However, the fast-moving developments in the Middle East mean that the RBNZ's forward view on the labour market will likely have shifted since then.**

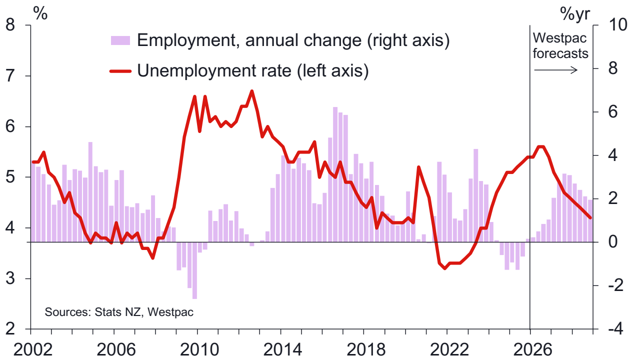
	Q4 actual	Q1 forecast	
	Quarter	Westpac	RBNZ
Household Labour Force Survey			
Unemployment rate	5.4	5.4	5.3
Employment growth	0.5	-0.1	0.4
Participation rate	70.5	70.3	70.5
Labour Cost Index			
All sectors, ordinary time	0.4	0.5	-
Private sector, ordinary time	0.5	0.4	0.4

We expect next Wednesday's labour market surveys to show a steadying in the jobs market over the March quarter. There's a growing range of evidence that the economy was starting to find its footing again in the early part of this year, at least up until the Iran conflict. But with the labour market tending to lag the broader economic cycle, we should expect jobs growth and wage demands to remain muted at this stage.

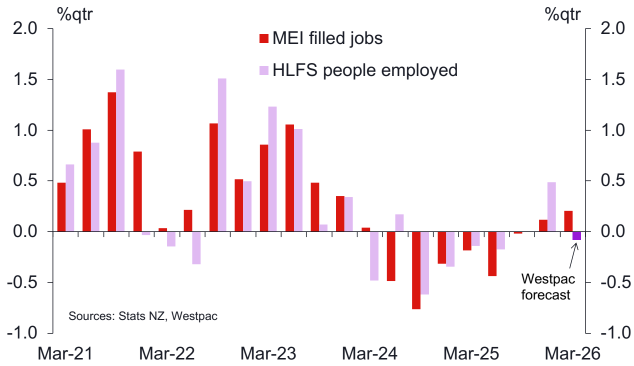
We're forecasting the unemployment rate to hold steady at 5.4% for the March quarter. We do expect a small drop in employment and participation this time, reversing a surprising jump in the previous quarter, but we're less wedded to that part of the forecast; the unemployment rate is the key variable to watch. We expect wage growth to continue running at about 2% annualised, reflecting the degree of slack in the jobs market and the moderation in inflation in recent years.

Our picks are a little softer than the Reserve Bank's February *Monetary Policy Statement* forecasts, which assumed faster jobs growth and a decline in the unemployment rate by this point. At the margin, a result in line with our forecasts would strengthen the case for caution before lifting the OCR. But the bigger issue for the RBNZ will be what has happened since the *MPS*: the Middle East oil shock will hinder the economic recovery, potentially leading to delays in hiring, layoffs and business failures. We've moved away from our pre-conflict view that 5.4% would mark the peak in the unemployment rate for this cycle.

Employment growth and unemployment rate



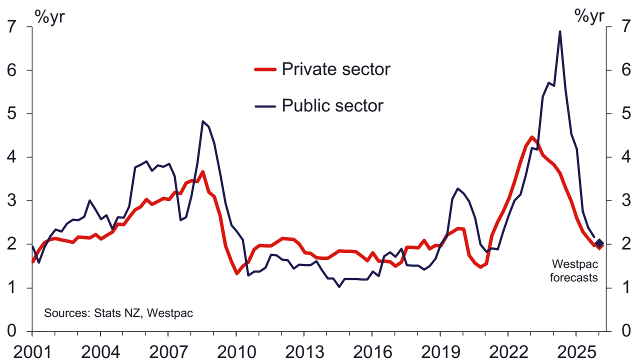
Quarterly employment change



While cost-of-living pressures are rearing up again as a concern for households, the existing degree of slack in the labour market means there's little room to negotiate larger pay increases. Business surveys have suggested that skilled workers are getting harder to find again, which may reflect the more subdued net migration trends in recent times. But unlike in the post-Covid boom, there's little evidence that employers have been willing to bid up to attract or retain workers.

We expect a 0.5% rise in the Labour Cost Index (LCI) for the March quarter, leaving annual growth at around 2%. Our forecast for private sector wage growth is slightly more subdued at 0.4%, in line with the RBNZ's forecast. The public sector tends to see larger pay increases in March quarters – we've pencilled in a 0.8% rise, though this would still see it slowing from 2.2% to 2.0% on an annual basis.

Labour Cost Index wage growth forecasts



The fast-moving developments in the Middle East mean that the labour market surveys will already be somewhat dated on their release. We'll be looking to higher-frequency data in the coming months, such as the MEI (and the weekly snapshots provided by Stats NZ) to gauge whether the conflict is affecting firms' hiring decisions. Unfortunately there's no equivalent high-frequency data on wages; while workers would no doubt like to see cost-of-living adjustments, it may be difficult to secure them in the current environment.

Details.

A range of indicators have pointed to the labour market stabilising in recent months:

- The Westpac-McDermott Miller Employment Confidence Index improved in the March quarter.
- Jobseeker benefit recipients were broadly stable in seasonally adjusted terms.
- Job advertisements have been ticking up and are around 10% higher than a year ago, although they remain well below their pre-Covid levels.

The best evidence comes from the Monthly Employment Indicator (MEI), which is drawn from income tax data and provides a comprehensive record of the number of jobs. There are some conceptual differences between the MEI and the quarterly HLFS, but in most cases any gap between the two is likely to reflect sampling error.

The MEI on its own suggests around a 0.2% rise in employment over the March quarter, which would be about in line with the growth in the working-age population. However, we're expecting to see a small dip in employment in the HLFS, accompanied by a drop in the participation rate. The reason is that the December quarter HLFS showed a surprisingly strong 0.5% rise in employment and a lift in participation, even as the unemployment rate also rose. Looking closer, most of the surprise was driven by a sharp rise in employment among the under-25s, which wasn't apparent in the MEI. We suspect that the HLFS captured an unusually large number of students who were working during the summer holidays, which should then return to normal as the new academic year begins. We generally recommend focusing on the unemployment rate as the key metric from the HLFS, as it's less vulnerable to sampling errors.

The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability-related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access **Westpac's Financial Services Guide** here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at **www.westpac.co.nz**.

WESTPAC WAVE

FIJI ECONOMIC UPDATE AND OUTLOOK

April 2026

Fiji will get through this crisis

Shamal Chand
Senior Economist, Westpac Pacific Economics

The Strait of Hormuz remains closed as the Middle East conflict enters its 53rd day. At the time of this publication, prospects for a second round of US–Iran negotiations appear to be fading in Pakistan, as Iran declines to attend. On 22 April, Trump said the US would extend the ceasefire indefinitely until a new proposal is submitted and talks conclude, while maintaining the blockade over the Strait.

Fiji finds itself in a difficult position through no action of its own. The energy market crisis triggered by the conflict is widely regarded as the largest since the 1970s oil shock, with its effects already reverberating through the Fijian economy.

Domestic fuel prices rose sharply in April, following panic buying and hoarding ahead of the official price announcement. Further fuel price increases are likely in coming months as the Fiji Competition and Consumer Commission (FCCC) reassesses global refined fuel prices, shipping/insurance costs and exchange-rate movements. Given fuel remains price-controlled, the pass-through to consumers has so far been partially muted, though pressures are clearly building.

If the conflict is prolonged, Fiji could face significant challenges to economic activity and foreign-reserve holdings, stemming from both higher import costs and potential disruptions to tourism export earnings. Airline route consolidation, driven by rising operating and jet fuel costs, poses a particular risk. Despite tourism performing strongly in the first three months of 2026, with visitor arrivals rising 7.0%y/y, we expect a flatter tourism profile for the remainder of the year in our baseline scenario, given its high exposure to the fuel-dependent transport sector. Elevated jet fuel prices and the risk of supply disruptions present downside risks, especially from the perspective of high intermediate costs. Fiji Airways has already begun consolidating operations, explicitly citing high jet fuel prices as a key driver.

Accordingly, we have downgraded Fiji's 2026 growth forecast to 2.0%, from a pre-conflict projection of 3.3%. Even if the conflict ends soon, our baseline scenario suggests a stalling recovery, with full normalisation unlikely before mid-2027. Headline inflation could rise to around 6.4% by Sept-2026.

While no physical disruptions to Fiji's fuel imports have been observed so far, cost pressures are already being felt, particularly by Energy Fiji Limited (EFL), which still relies on thermal generation for around half of national electricity demand. EFL is now urging consumers to conserve electricity amid rising fuel costs. Electricity rationing is on card now for if diesel supply is disrupted.

Fiji received a major fuel shipment on 4 April, according to IMF ports data, with another major tanker arriving on 21 April, followed by a further shipment expected in early May, based on live shipping-tracking data. On 19 April, Singapore's Foreign Minister assured Fiji that fuel shipments would not be affected.

Beyond energy, the industrial sector, including mining, faces rising input costs that will dampen real output. Manufacturers are expected to pass higher costs on to consumers over time, while agriculture is expected to see declining value addition due to higher fuel and fertiliser costs. These developments are reflected in our downgraded growth outlook. We continue to monitor and assess the ongoing conflict and will update our forecast accordingly.

The Fiji Government has repeatedly confirmed that fuel stocks remain adequate. More recently, the Government activated the four-phase Fiji National Fuel Emergency Action Plan to manage fuel and cost-of-living risks linked to the conflict. In a nationwide address, Prime Minister Rabuka announced parallel fiscal and household measures under consideration, including a proposed 20% salary cut for Ministers and MPs subject to approval, an immediate halt to overseas travel, a freeze on new civil service hiring, diesel subsidies for EFL, relief measures for bus operators, and potential temporary reductions in FNPF contribution rates to support take-home pay. With the national budget due in June, further support measures may be announced, dependent on fiscal space.

Crisis is an opportunity

History shows crises often force economies to reassess systems, behaviour and policy choices. While short-term shocks are painful, the medium- to long-term outcome often includes greater efficiency, stronger institutions and enhanced resilience. For Fiji, the conflict underscores long-recognised vulnerabilities, most notably dependence on imported fossil fuels. The COVID-19 experience offers a useful parallel: while deeply disruptive, it accelerated digital payments and improved financial inclusion.

Energy security is therefore likely to move higher on the policy agenda with this conflict. Renewable investment may accelerate, electric vehicles and plug-in hybrids could gain traction, and businesses may diversify suppliers, hold larger inventories and invest in more fuel-efficient capital. Even if this conflict proves shorter than feared, another shock will eventually emerge. For Fiji, this episode is both a warning about fuel dependence and an opportunity to build lasting energy resilience before the next crisis strikes.

Finally, expectations of a structurally weaker US dollar could provide some relief under Fiji's fixed exchange-rate regime. A firmer FJD against the USD could help contain imported inflation, particularly fuel. The FJD is expected to remain broadly stable versus the AUD, supporting tourism competitiveness, while weakening modestly against the NZD, EUR and JPY and slightly reducing export competitiveness to the US.

The fragile ceasefire extended indefinitely...

It is now 53 days since the Middle East conflict began, leading to the complete closure of the Strait of Hormuz and causing significant disruption to energy markets. The global economy has been extremely volatile since then.

The Strait of Hormuz sits at the centre of these concerns. Before the conflict intensified, more than 100 vessels transited the Strait each day. Recent data suggest that traffic has dropped to only a handful of ships. Given that close to one-fifth of the world's oil and LNG supply passes through this single chokepoint, the impact on global markets has been severe. The Strait remained closed at the time of publication.

On 22 April, President Trump said the United States had indefinitely extended the ceasefire, maintaining its naval blockade of Iranian port traffic until Iran agrees to US terms and submits a new proposal. The ceasefire, initially agreed for two weeks from 7–8 April, has come under increasing strain as military blockades persist. While large-scale air and missile strikes have paused, both sides continue to accuse each other of violating the spirit of the ceasefire.

Despite US reassurances and the formal ceasefire, insurance coverage for transit through the Strait of Hormuz remains difficult to obtain, and major shipping companies remain reluctant to resume normal passage. A 10-day Israel–Lebanon ceasefire began on 16 April, easing fighting in southern Lebanon, but this has not resolved broader US–Iran conflict dynamics or maritime tensions. The US naval blockade of Iranian ports remains in place.

After Iran briefly stated that the Strait of Hormuz was fully open to commercial vessels, restrictions were re-imposed over the weekend of 18–19 April, with Tehran citing continued US violations of the ceasefire through its blockade of Iranian ports. Iran has stated that access through the Strait will remain constrained until the blockade is lifted. The US maintains that it is blockading Iranian port traffic rather than the Strait itself, but overlapping instructions and operational uncertainty have sharply reduced transit volumes.

US–Iran talks remain ongoing but inconclusive, with Pakistan acting as the main intermediary after earlier negotiations in Islamabad failed to secure a longer-term ceasefire. Reportedly, progress has stalled over three key issues: Iran's uranium enrichment and stockpiles, the US naval blockade, and rules governing Hormuz shipping access and coordination.

Oil prices remain extremely volatile, falling sharply following ceasefire announcements and rebounding after renewed Hormuz closures. Physical markets remain tight due to tanker congestion, re-routing, and insurance constraints. Since the onset of the conflict, tanker freight costs have surged, with Baltic Exchange dirty and clean tanker indices rising sharply. On average, global refined product prices have increased sharply, with Singapore gasoline up 169%, gasoil up 244%, and jet fuel also up 244% from pre-conflict levels.

… keeping Fiji's economy at risk

Fiji's economy faces significant downside risks from the ongoing Middle East conflict, leading to higher fuel prices, transport and shipping costs plus a higher import bill. Any potential disruptions to fuel supply could meaningfully hamper domestic economic activity, which is already facing significant strain from higher prices. The tourism sector faces elevated risks from higher jet fuel prices and, in a more severe scenario, the unavailability of jet fuel that could ground long-haul flights. High fuel prices, and their second-round effects transmitted through other channels, are expected to add materially to intermediate costs across all economic sectors.

Westpac's baseline assumption is that the Strait of Hormuz will be effectively closed for around 8 weeks, through to late April, followed by a slow and incomplete reopening. Full normalisation is not expected until late-2026 to mid-2027. The two-week ceasefire announced on 7 April reduced the risk of escalation, but did not materially alter near-term oil or shipping flows. Tanker traffic remains severely constrained, and Iranian exports (around 1.6 mb/d) remain largely offline. Even under a relatively optimistic ceasefire scenario, initial reopening would lift shipping capacity to only around 20–30% of pre-conflict levels, with both production and shipping recovering only gradually.

Brent oil is expected to average around US$105 per barrel in Q2 2026, easing to approximately US$75 per barrel by end-2026. However, physical oil and refined product prices are expected to remain elevated for longer due to logistics, insurance, and refinery constraints. Even if the conflict were to end in April under an optimistic scenario, the recovery is expected to be slow.

After factoring in these risks, we have downgraded Fiji's growth forecast for 2026 to 2.0%, from our pre-conflict outlook of 3.3%. Growth is expected to rebound to 3.2% in 2027. Higher input costs are expected to erode value-addition across key sectors, resulting in a broadly flatter growth profile for industries heavily reliant on fuel and transport inputs. We expect visitor arrivals to be flat this year, despite a very strong Q1 outcome, reflecting downside risks from higher fuel prices and the likelihood of jet fuel supply disruptions affecting flights. The primary sector, especially agriculture is at risk from higher fuel and fertiliser prices. Government spending is expected to provide some support in 2026. We expect cost-of-living support measures to be announced in the upcoming June Budget ahead of the General Election later this year.

Further, these domestic risks are compounded by the threat of a broader slowdown, or recession, across Fiji's major trading and tourism markets, particularly Australia, New Zealand, and the US. Higher inflation and weaker growth in these economies could constrain their household budgets, reducing outbound travel and dampening tourist arrivals to Fiji.

Westpac Economics, in its latest April Market Outlook, expects the Middle East conflict to remain a major global shock in 2026 with Australia expected to experience a slight slowdown, with GDP growth averaging around 1.8% in 2026, trimmed-mean inflation peaking near 4%, and unemployment rising towards 5%. The Reserve Bank of Australia is expected to deliver three further 25bp rate hikes (in May, June, and August) to contain second-round inflation pressures.

New Zealand is also entering a period of slower growth of 1.5% and elevated inflation, with higher oil prices acting as a negative terms-of-trade shock. In the US, growth had already slowed prior to the conflict. The Federal Reserve is expected to remain on hold, tolerating energy-driven headline inflation while closely monitoring labour-market risks.

Asia remains highly exposed given its reliance on energy and food imports. Inflation pressures are expected to keep policy settings tighter for longer, though outcomes remain uneven. China is relatively insulated, with Q1 2026 growth at 5.0%y/y and longer-term support from rising global demand for green technologies.

Overall, there is an upside risk to our growth outlook if the tourism sector sees minimal impact from the conflict, beating our underlying assumption. However, this would depend on flights continuing to operate as normal and the national airline being able to absorb higher operating costs through efficiency gains, without any disruptions.

Medium-term economic growth forecast

Sectors	2020	2021	2022	2023	2024	2025	2026	2027	2028

Fuel prices will rise further

Fuel prices rose sharply nationwide from 1 April, with motor spirit increasing to $2.93 per litre (from $2.44), diesel to $2.89 per litre (from $2.14), and kerosene to $2.40 per litre (from $1.69). These increases were broadly in line with our expectations. As expected, gas prices saw no major change due to their contractual pricing arrangements. However, rising shipping costs could place upward pressure on LPG prices in the near-term.

So far, the full impact of global energy price increases has not yet been fully felt domestically in Fiji, largely due to fuel price controls.

Fuel prices are expected to rise further in May, with additional adjustments likely to be announced by the FCCC in the coming days, adding to the price increases experienced in April. Our fuel price forecasts are presented in the table below.

Fuel prices are expected to exceed levels experienced during the Russia–Ukraine war in upcoming months, reflecting much wider refinery margins, damage to oil and gas infrastructure in the Middle East, and the prolonged closure of a major global chokepoint.

Even before the March price adjustments took effect, there were early signs of panic buying and fuel hoarding locally, placing additional pressure on logistics and supply chains.

Higher fuel prices are expected to feed through into input costs across all sectors. Given Fiji's heavy reliance on imports and shipping for food supply, higher fuel and insurance costs have raised shipping costs, placing upward pressure on the prices of food and other essentials.

Headline inflation is expected to peak at around 6.4% by September 2026, averaging 3.4% for the year, with upside risks should the conflict extend beyond April under our baseline scenario and the Strait of Hormuz remain closed.

The Fiji Government imposes a 46c per litre fiscal duty on motor spirit and around 20c per litre on diesel, together with 12.5% VAT. FCCC accommodates a retail margin of 10c per litre on motor spirit and 9.5c on diesel. The Fiji Government's fiscal space to respond to incoming inflationary pressures is extremely limited. While reducing fiscal duties could be considered, this would not be best practice.

As with the VAT cut in the last budget, fuel duty reductions are unlikely to be fully passed through to consumers. Targeted income support for vulnerable households would be a more effective option.

Fiji's fuel supply remains unaffected

Global oil market

The Energy Information Administration (EIA), in its April report, estimates that around 7.5 mb/d of crude oil production was shut in during March, rising to about 9.1 mb/d in April, largely across Iraq, Saudi Arabia, Kuwait, the UAE, Qatar and Bahrain. These shut-ins have forced consuming regions to draw down inventories rapidly.

Global observed oil inventories fell by 85 mb in March. Outside the Middle East Gulf, stocks declined by 205 mb, while oil on water fell sharply by 107 mb. Meanwhile, inventories have been building in the Middle East, with around 100 mb added to floating storage and about 20 mb added to onshore crude stocks. China added 40 mb of crude in March, acting as a partial buffer for the global system, with some of these barrels supplying Singapore refineries. The EIA has downgraded its near-term global oil demand outlook. Even after the conflict ends, demand destruction from sustained high prices and the continued structural shift away from oil are expected to remain a constraint on the global oil market over the long-term.

Robert Rennie, Westpac's Head of Commodities and Carbon Strategy, notes in a recent Energy Market Report that the market is materially under-pricing the physical impact of the US–Iran conflict. He estimates that around 12 mb/d of crude and refined product exports have been disrupted, implying roughly over 550 million barrels removed from global supply.

Fiji's fuel supply

At present, fuel shipments are en route to Fiji, with the Shan Gang Fa Xian vessel (45,841 DWT) arriving on 2 May. The Morning Glory tanker vessel (50,322 DWT) arrived on 21 April. Importantly, deliveries scheduled for both April and May remain secured, and no disruptions to fuel shipments to Fiji have been observed to date.

On 19 April, Singapore's Foreign Minister also assured Fiji that Singapore will not impose restrictions on fuel exports and will continue to ensure the free flow of energy supplies through diversification, resilience and open international trade routes.

In March, Fiji imported approximately 85,861 tonnes of fuel, of which about 11,585 tonnes were re-exported to other Pacific Island countries. This left roughly 74,276 tonnes available for domestic use, adding an estimated 26 days of fuel cover to national reserves. According to IMF port data, Fiji imported 56,085 tonnes of fuel as of 17 April, while re-exported 19,410 tonnes of fuel, resulting in a net import of 36,675 tonnes Comparatively, Fiji imported over 100,000 metric tonnes of fuel in April last year. In 2025, Fiji imported about 1.3 million tonnes of fuel, with around 170,000 tonnes re-exported to neighbouring Pacific economies.

The domestic fuel market is supplied by Mobil, Pacific Energy and TotalEnergies Fiji, with bulk storage terminals located at Walu Bay in Suva and Vuda Point in Lautoka. Dedicated LPG facilities are located in Lami and Malau. Nationwide fuel storage capacity exceeds 100 million litres, while average daily fuel consumption is close to 2.5 million litres, placing Fiji's standalone fuel cover at roughly 40 days under normal operating conditions. When scheduled deliveries are incorporated, effective fuel cover typically extends to two to three months.

Fiji imports 100% of its refined fuels, including petrol, diesel, Jet A-1 and kerosene, predominantly from Singapore, while LPG is sourced from Australia under longer-term supply arrangements.

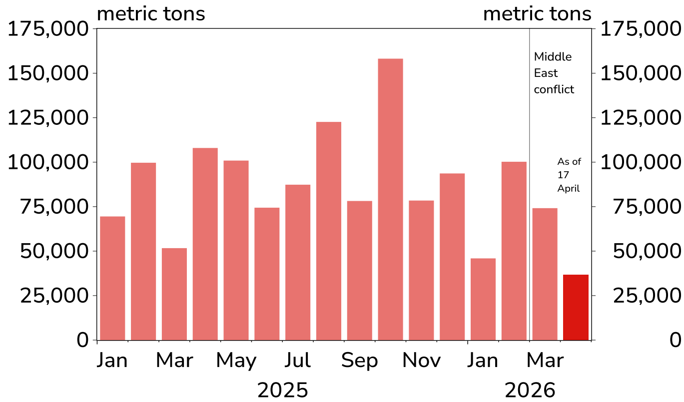
Why is the diesel price so high?

Historically, the price of diesel has been below that of unleaded petrol. However, this trend is now changing. The key reason lies in tightness within refined fuel markets, particularly for diesel and jet fuel. The EIA highlights that refining systems are globally less flexible than crude supply, and refinery operations have been disrupted by both crude availability constraints and direct infrastructure risks.

Diesel is also a globally traded fuel, critical for shipping, trucking and industrial activity worldwide. Diesel powers freight transport, heavy machinery, power generators and military vehicles. Even in war-driven price spikes, trucks must continue hauling goods, ships must keep sailing, and backup generators must remain operational. Refineries cannot instantly shift production to increase diesel output. Diesel is derived from specific crude fractions, which are particularly exposed during geopolitical disruptions. This is why diesel prices have gone up quickly.

Elevated diesel prices have significant implications for electricity generation in Fiji, where Energy Fiji Limited (EFL) continues to rely on thermal generation to meet around half of total electricity demand.

Fiji's net fuel import



Source: IMF, Macrobond, Westpac Economics

Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

Tourism is still the X-factor

We expect visitor arrivals to remain broadly flat in 2026, despite a strong start to the year. Visitor arrivals in Q1 2026 increased by 7.0%y/y, supported by robust outcomes across all three months. Arrivals totalled 70,993 in January, dipped seasonally to 54,219 in February, before rebounding sharply to a record 71,765 in March. This lifted total Q1 arrivals to 196,977 visitors, compared to 184,119 in 2025.

Monthly growth strengthened through the quarter, rising from 0.3%y/y in January to 9.6% in February and 12.4% in March. March recorded the highest visitor arrivals ever for the month, suggesting demand regained momentum following the seasonal slowdown in February.

While tourism sector momentum was strong in early 2026, the outlook for the remainder of the year is becoming more challenging. Elevated jet fuel prices, coupled with risks of fuel supply disruptions linked to the ongoing Middle East conflict, present significant headwinds for airline operations and the wider tourism sector.

These pressures have already begun to affect flight capacity. Fiji Airways has announced the temporary suspension of four services across two international routes, including selected services on the Nadi–Brisbane route from late April and Tuesday services on the Dallas–Nadi route between May and mid-June. With fuel remaining its single largest cost, the airline is preparing for a prolonged period of elevated operating expenses. Management has signalled a cautious approach, focusing on efficiency gains, route optimisation, and prioritising core Australia and New Zealand markets, while seeking to limit fare increases where possible. The national airline is expected to face higher operating costs, which will weigh on its margins. The national airline may pursue further route consolidation if access to jet fuel at offshore airports becomes constrained, as countries increasingly prioritise domestic supply.

Australia remained Fiji's largest source market in Q1 2026, with arrivals totalling 86,445 visitors, up 8.5%y/y, although its share of arrivals softened in February before recovering in March. New Zealand arrivals rose 5.1%y/y to 33,506 visitors, providing steady support across the quarter. Arrivals from the US continued to perform strongly, increasing 5.2%y/y to 26,189 visitors, with the US share of arrivals rising steadily through the quarter. Visitor arrivals from China spiked in February before easing in March, pointing to early signs of a gradual recovery from Asian markets, albeit still below pre-pandemic levels. Overall, Fiji's major source markets continued to account for around 82–90% of total arrivals.

Working-age travellers remained the dominant visitor cohort, with 65.2% aged 25–64, while holiday travel continued to account for around 75-80% of arrivals each month. Under our baseline scenario, these factors point to flat visitor arrivals for 2026, with upside risk should fuel prices ease and operational disruptions prove limited.

March visitor arrivals up 12.4%

Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

Fiji dollar risks contained

Westpac Economics, in the latest April Market Outlook, expects the US dollar to weaken structurally over the medium term as its safe-haven appeal fades, despite ongoing Middle East risks. USD gains have remained capped during the conflict, with markets increasingly willing to look through geopolitical shocks amid expectations of a gradual reopening of the Strait of Hormuz and improving global growth prospects outside the US. The DXY index is expected to fall from around 98 to 96.8 by end-2026 and to 94.0 by end-2027.

The Australian dollar is expected to outperform, supported by Australia's relatively tighter policy stance. The RBA is set to deliver three additional rate hikes, lifting AUD back to multi-year highs. AUD strength is described as being rate-driven, assisted by a positive terms of trade shock, rather than purely risk-on sentiment, with AUD/USD forecast to trade around 0.73–0.74 through 2027.

The New Zealand dollar is also projected to recover gradually as the USD weakens, though energy-related income shocks and slightly later RBNZ tightening cash rate. NZD/USD is forecast to rise toward 0.62 by end-2026 and 0.67 by end-2027.

The Euro is identified as a key beneficiary of USD depreciation as the ECB shifts from expected cuts to rate hikes in response to higher energy-driven inflation. Westpac projects EUR/USD to rise toward 1.20–1.22 by 2027.

The Japanese yen, starting from very weak levels, is forecast to strengthen materially as Japanese policy normalises and global risk conditions stabilise, with USD/JPY falling toward the low-140s by 2028.

As such, under Fiji's basket-peg exchange rate regime, the RBF target stability in the trade-weighted FJD. The projected path implies the FJD strengthens against the USD, remains broadly stable versus the AUD, and weakens modestly against the EUR, JPY and NZD over time.

This aligns with our expectation that the US dollar increasingly lacks support, even amid Middle East tensions, A firmer Fiji dollar against the US dollar could help contain imported inflation pressures, particularly for USD-invoiced imports such as fuel and freight-intensive goods. This means Fiji exports to the United States, especially mineral water could become slightly more expensive for US consumers.

From a tourism competitiveness perspective, the largely stable FJD/AUD relationship implies Fiji's price competitiveness for Australian visitors remains broadly unchanged. However, a weaker FJD against the NZD suggests Fiji becomes marginally more affordable for New Zealand visitors.

FJD weakness against the Japanese yen raises the local currency cost of Japan-sourced goods and services, like Japanese vehicles.

Energy investment is critical for Fiji's future

There was considerable discussion around the Fijian Competition and Consumer Commission's (FCCC) proposed electricity tariff changes in late December 2025. The announcement attracted country-wide criticism from households and businesses concerned about the potential economic impact, prompting a 21-day public consultation period in January.

Now that the initial reaction has eased, it is timely to revisit this issue. This discussion has become even more relevant in the context of the ongoing Middle East conflict, which has once again exposed Fiji's vulnerability to global energy price shocks and supply disruptions. The Minister for Finance, Esrom Immanuel had indicated that the final increase in electricity tariffs is expected to be lower than the initially proposed 24.2%, following public consultation feedback. Even so, tariff rates are still expected to rise.

Revisiting the proposed changes, under the FCCC's 2025 tariff determination Fiji was set to transition from a single flat tariff to an inclining block (tiered) structure for domestic customers, although this has since been put on hold.

More than half of residential customers were to fall within the 0–100 unit band and would therefore see no change in their electricity bills. For commercial customers, the had FCCC approved a move from a flat tariff to a stepped inclining block structure, with rates ranging from around 43c to 63c per unit and an average increase of 24.2%. As with households, higher consumption attracts higher marginal tariffs. Notably, electricity tariffs were last revised in October 2019.

This note outlines why an eventual increase in electricity tariffs remains justified and important for Fiji's future, despite short-term inflationary pressures, especially in a world where geopolitical risks are once again driving fuel price volatility.

The global AI revolution is driving large-scale investment into energy supply, grid systems and supporting infrastructure to meet electricity-intensive digital demand. In larger economies, deep capital markets and competitive pricing frameworks support this transition.

Fiji, however, faces different realities. Electricity supply in Fiji is a natural monopoly. Generation and grid systems require large, long-lived upfront investments that cannot be efficiently duplicated in a small market. When tariffs are held below the cost of reliable supply, investment is delayed, outage risks rise, and the system becomes increasingly reliant on ad-hoc public support, an approach that becomes more problematic when fiscal pressures are rising due to higher global fuel and import costs linked to conflicts such as those in the Middle East.

For Fiji to position itself as a regional trade and digital connectivity hub, sustained investment in energy infrastructure is essential. Electricity demand has already risen to the point where additional diesel generators are required during peak periods, exposing Fiji directly to global fuel price movements. At the same time, Google has begun constructing a major ICT facility in Natadola, including a new subsea cable landing station. This strengthens Fiji's role in regional digital connectivity but also raises the importance of a reliable, expandable and modernised power system. Fiji still relies heavily on fossil-fuel generation, and meeting rising demand sustainably will require an accelerated shift toward renewable energy.

Stronger grid investment and renewable energy development are also critical for Fiji's core economic sectors. Tourism, which accounts for nearly 70% of services activity, depends on stable electricity for hotels, airports and transport systems. Agriculture (13.5% of GDP) relies on electricity for irrigation, cooling, milling and packaging, while manufacturing (17.4% of GDP) depends on reliable power to remain competitive. In an environment of global energy uncertainty, a weak grid would amplify economic shocks rather than absorb them.

Energy Fiji Limited (EFL) has outlined more than FJ$1.7 billion in planned investment over the next decade, aligned with Fiji's target of achieving 100% renewable electricity by 2035. EFL has reported electricity demand growth of around 9% in 2024 and expects annual demand growth of about 5%. At current tariff levels, EFL has indicated it would be unable to adequately fund new generation capacity, transmission upgrades and system-wide resilience, increasing the risk of future power disruptions.

Financing these investments cannot rely on syndicated banking alone. Small Island Developing States face high capital costs, limited economies of scale and long payback periods, making energy projects less attractive to private financiers, particularly when tariffs are tightly constrained. EFL has stated that tariff revenue is the only stable and predictable cash flow available to service debt and unlock long-term financing.

While higher electricity tariffs will have a measurable short-term impact on inflation, the effect is likely to be smaller than feared and should ease over time. The longer-term benefits including reduced diesel imports, lower exposure to global energy price shocks, and stronger energy security are especially valuable during periods of geopolitical instability. Higher tariffs may also encourage greater uptake of rooftop solar, strengthening energy independence further.

The experience of the Water Authority of Fiji offers a cautionary lesson. Persistently low tariffs, chronic under-investment and reliance on public support have led to frequent service disruptions. Fiji cannot afford to repeat this mistake in the energy sector.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

The US dollar increasingly lacks support

#usd #usd #us

By Elliot Clarke
Head of International Economics, Westpac

11:10 April 21 2026

Share

Key themes for the US dollar and global FX markets.

Last month we highlighted that US dollar gains in the lead-up to March Market Outlook had been narrow and capped around 100 for the DXY index. Since then, despite a material escalation in the Middle East conflict, the ceasefire being threatened by a complete breakdown of the first round of in-person negotiations between the US and Iran, and the US subsequently blockading Iranian ports, the

US dollar has continued to struggle for upward momentum. On rumours of a resumption of negotiations, the past few days have seen it edge lower against numerous currencies across developed and developing markets.

In our view, there is a degree of hope in current market pricing. That said, typically the market impact of a crisis such as this begins to unwind long before a formal peace agreement is disclosed. And, in this particular instance, the short-term workarounds for supply and the intent shown by world leaders excluding the US to restore shipping capacity are also helping alleviate anxiety.

While certainly not a panacea for the conflict's ill effects, if we are right in expecting a slow-but-steady resumption of shipping through the Strait of Hormuz in coming weeks, which continues to year end, then the US dollar is likely to weaken further, to the benefit of currencies most affected by the crisis – Euro and Sterling being developed world examples – and of nations set to benefit from improving global growth opportunities – China being the obvious example, particularly given their market share for equipment related to renewable energy and the green transition more broadly.

Our base case to June 2028 is largely unchanged from last month for the US dollar, the DXY index projected to fall from 98.1 today to 96.8 at end-2026, then 94.0 come end-2027, where it is forecast to settle. Gains for Euro and Sterling are key contributors, respectively rising from USD1.18 and USD1.35 at present up to USD1.22 and USD1.41 by end-2027.

Starting from such weak levels, the anticipated gains for Japan's Yen and Canada's dollar are also powerful supports for the US dollar downtrend. We expect USD/JPY to fall from JPY159 currently to JPY142 by mid-2028, as USD/CAD declines from CAD1.36 to CAD1.30.

If second-round inflation risks can be managed effectively without a material hit to economic growth or the labour market, further out, these currencies could experience sustained opportunities to outperform our base expectation.

It is not just core developed world currencies that are set to benefit from this turn, however. China's Renminbi has been remarkably resilient during the crisis, only edging up from around CNY6.85 at end-February to a high of CNY6.91 during March, then steadily moving lower to CNY6.82. This makes sense given China's strategic energy reserves and access to Russian and Iranian oil, among other relationships. But, once the scale and depth of China's manufacturing base across green technologies is taken into consideration, and the acute need for these goods recognised by the world ex-US, this appreciation seems likely to only be the start. To mid-2028, we therefore look for USD/CNY to fall to CNY6.35, and suspect the risks are skewed in one direction – in the Renminbi's favour.

While China's Renminbi is likely to outperform many other US dollar bilaterals over the period, seeing a rise in the currency on a trade-weighted basis, this appreciation is unlikely to upset the nation's competitive advantage. The rest of Asia in particular are likely to use the technology and know-how imported from China to improve their own capacity and lower production costs, aiding their economic performance and attractiveness to foreign capital. Each of the currencies of the region have their own starting points – Singapore's dollar is strong, Indonesia's Rupiah weak as examples – and domestic narratives to play out. But, over the course of two years, all are likely to gain against the US dollar and, to a lesser extent, other cornerstone currencies of the global system, such as Euro and Sterling.

While the uncertainty created by the Middle East conflict leaves us unsure as to when, we increasingly believe that historic safe-havens could find themselves under growing pressure over the forecast period as investors and businesses recognise the scale and breadth of developing market opportunities. These are broad across both manufacturing and service industries – along with core and technological infrastructure – and have very long runways ahead.

For the US dollar in particular, we see a heightened susceptibility, with this global outturn to follow an extended period of US' outperformance and as US geopolitical and fiscal decision making is debated at length across the globe.

Our current baseline forecast takes the US dollar DXY index near its 20-year average of 90.6, and so we will wait to see how developments break over coming weeks before considering the scale of further downward pressure the US dollar may face. For now we merely highlight that the average of the past 20 years muddies two eras, early-2015 to now when the DXY oscillated around today's level, and mid-2006 to mid-2014 when it instead averaged 80.2, 18% below spot. Coming years may well see a very different FX environment to that experienced post-pandemic.

This analysis was initially released in the April edition of Westpac Market Outlook.

Further important information regarding sustainability-related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac’s Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the

appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at the internet address www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Fiji: Unless otherwise specified, the products and services for Westpac Fiji are available from www.westpac.com.fj © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia and registered as a branch in Fiji. The liability of its members is limited.

Papua New Guinea: Unless otherwise specified, the products and services for Westpac PNG are available from www.westpac.com.pg © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia. Westpac is represented in Papua New Guinea by Westpac Bank - PNG - Limited. The liability of its members is limited.

U.S.: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission (“CFTC”) as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation (“FDIC”). Westpac Capital Markets, LLC (‘WCM’), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 (‘the Exchange Act’) and member of the Financial Industry Regulatory Authority (‘FINRA’). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent

liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

"professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found **here.** Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Week beginning 27 April 2026

AUSTRALIA & NEW ZEALAND WEEKLY

Analysis and forecasts for this week's key releases.

In this week's edition:

Economic Insight: It Depends on What You are Trying to Achieve.

The Week That Was: Middle East conflict seemingly at an impasse.

Focus on New Zealand: A matter of balance.

For the week ahead:

Australia: ANZAC Day public holiday, Q1 CPI, Cotality home value index, private credit.

New Zealand: ANZAC Day public holiday, employment indicator, ANZ business and consumer confidence.

Japan: BoJ policy decision, industrial production, jobless rate.

Euro area: ECB policy decision, CPI, GDP, unemployment rate.

UK: BoE policy decision.

United States: FOMC policy decision, PCE deflator, personal income and spending, ISM manufacturing.

Canada: BoC Policy decision.

Information contained in this report current as at 24 April 2026.

It Depends on What You are Trying to Achieve

Luci Ellis
Chief Economist, Westpac Group

- **Pre-budget speculation has tended to start from the presumption that more revenue is needed. The justification is sometimes the perceived need to fund spending priorities that are assumed – perhaps erroneously – to be rising. In other quarters, minimising the deficit or government debt appears to be the objective. Whatever the objective, it should be scrutinised not assumed.**
- **Speculation about changes to the capital gains tax (CGT) regime highlight the potential to increase revenue, but there is no guarantee of this. For example, switching back to the pre-1999 regime or the simplified version of it we have previously suggested will only boost revenue if asset price growth exceeds 5%.**
- **There are many possible objectives that fiscal systems – tax and spending – can address, often different objectives in different parts of the system. "Boost revenue" is not the only possible goal, and tweaking the tax system is not the only solution to a policy objective.**

Speculation is building as budget night approaches. While the government must deal with the immediate issues in front of it stemming from the Middle East conflict, many observers are focused on the maxim "never let a good crisis go to waste" and hoping for broader reforms – usually the same ones they were advocating before the conflict erupted. The question of what the budget should do rests, however, on the deeper question of what problems the government is trying to solve.

For example, recent discussion has been focused on an assumed need for extra revenue. Tax reforms are dissected for how much more they might raise, while revenue windfalls from higher commodity prices are downplayed. Underlying this view are other presumptions – seemingly widespread across different levels of government and the bureaucracy – that "people expect more from government nowadays" and that governments should strive to meet those expectations. Absent from these discussions are the questions of whether the government's effort and resources are being deployed effectively, and whether it can stop doing some things altogether.

A related presumption underlying the search for more revenue is the belief that population ageing is shrinking the workforce, even though this is not true in Australia and most other advanced economies outside North America.

A separate pathway to the search for more revenue comes from a different premise: that the federal fiscal position is weak and large revenue measures (and/or spending cuts) must be found to reduce the deficit significantly. It is good to have strong public finances. It keeps government borrowing costs low and leaves plenty of space to spend in a crisis. Yet the presumption that government finances are parlous and in need of repair sits oddly with Australia's actual federal fiscal position, which is stronger than many of its peers.

Take the recent speculation about removing the CGT discount. It has been touted as a revenue-raising measure, but there is no guarantee of this. One could consider moving back to the pre-1999 system of adjusting the gain for growth in CPI and applying the full marginal rate to the remainder. Alternatively, one could consider the simplified version we suggested in 2023, where the adjustment is 2.5% per year the asset is held – the midpoint of the RBA's inflation target – regardless of actual inflation over the holding period.

> **"Speculation about tax reform in the upcoming federal budget abounds."**

Applying a full marginal rate to an adjusted return still taxes mobile capital more lightly than other income, as economic theory would suggest. It has an advantage over the current system of not privileging capital gains-producing assets over income-producing assets at the margin. Because assets that can be leveraged are especially advantaged by the current system, switching back to the pre-1999 system or our simplified alternative would also promote financial stability. It would increase the effective tax rate on capital gains during booms in real asset prices, and our simplified proposal would also lean against periods of high CPI inflation.

What it will not do, though, is necessarily boost revenue. If asset prices rise by less than 5% per year, revenue is lower. For example, a 4% rise, less 2.5% deduction, means tax is paid on 1½% of capital gains. The current system of half the marginal rate on the full gain would be the equivalent of taxing 2% of gains if asset prices rose 4%yr. Revenue is only higher than the current scheme if asset prices rise by more than 5%. And even in that case, the increase in revenue might only be small once people have adjusted to the change and the other possible design decisions associated with it, such as grandfathering and limits on the number and type of assets eligible for the discount.

Absent from the current discourse is any discussion of the proper role and size of government, or the level of government that is best placed to take on the functions required. As Westpac Economics colleague Pat Bustamante has previously shown, the size of government in Australia has increased substantially over the past decade. When private demand indirectly induced by public spending is included (think legal work for construction companies working on public infrastructure projects), the footprint of public demand has risen from 27% to 35% of GDP over the past decade.

Much of this expansion is desirable. We should want to care for disabled and elderly Australians properly and have high-quality childcare available at an affordable price. That takes resources, and private markets alone are unlikely to deliver enough of these services. Likewise, with population growth running around 1½%, both pre-pandemic and currently, we will always need more public infrastructure. Both types of spending also have positive spillovers. Social care spending allows those who were providing informal care to enter paid employment. And done well, infrastructure spending can boost skills and productivity and open up new opportunities through better logistics.

The question of what should or will happen in the budget boils down to which of the many possible objectives government wants to prioritise. Is it addressing the growing income tax burden in a system of fixed tax brackets, or minimising the deficit, or making the tax system more responsive to the economic cycle, or providing more services to meet the public's expectations, or doing so more efficiently? What about national and economic security? The budget is a complex beast and different design decisions can address different objectives. This is not like monetary policy, where there is only one instrument and at most two objectives, inflation and full employment, which are in any case correlated at least some of the time.

Global economic and geopolitical developments pose challenges, while new technology and an expanding, ageing workforce create opportunities. We should not assume that tweaking the tax system is the answer to every issue. Your fiscal priorities should relate to your public policy objectives.

Forecast changes

- **A full update to our forecasts was published in our Market Oulook publication on April 17.**

Cliff Notes: Middle East conflict seemingly at an impasse

Elliot Clarke, Head of International Economics
Illiana Jain, Economist

Regarding the Middle East conflict, the week began with the expectation of a second round of in-person talks between the US and Iran. The start of the negotiations was initially pushed from Tuesday to Wednesday; but President Trump then announced on Truth Social that the meeting had been postponed at the request of Pakistani and Iranian officials to allow time for a "unified proposal" to be developed to be put to the US. Thankfully, having been stretched by both sides at the weekend, the expiring two-week ceasefire was extended indefinitely.

Since Wednesday, there has been no concrete evidence of progress towards a deal, the Iranians seemingly refusing to come to the table while the US' blockade remains in place, and the US refusing to end the blockade until a deal is agreed. Both sides have halted and seized ships within their area of operations, but this has not triggered a ceasefire breach – although it must be noted that President Trump overnight ordered the US Navy to strike any vessel laying mines in the Strait of Hormuz, making clear the risk of further military conflict.

With no clear way out of the stalemate, or timeline for formal talks, the price of Brent oil has rebounded back to around USD106 having (very briefly) fallen as low as USD86 late last week. The longer the impasse persists, the greater the chance of a sustained period of high oil prices and refinery margins, with all costs eventually met by businesses and households across the world.

Central banks remain focused on the degree and persistence of price passthrough to domestic consumer inflation, the risk being that inflation persists well above target into 2027 on second-round effects and an uplift in inflation expectations. ECB President Lagarde this week noted that the staff currently view conditions in the Euro Area as between their baseline and adverse projections from the last meeting, and will act "as the situation demands" ahead. Next week's run of central bank meetings across the northern hemisphere will provide a more detailed view on the balance of risks and the implications for monetary policy across the developed world.

In the US meanwhile, President Trump's pick for the next FOMC Chair, Kevin Warsh, appeared before the Senate Banking Committee as part of the confirmation process. Warsh again made clear he believes several aspects of the FOMC's communications and processes should change, but also showed a clear commitment to central bank independence. The next steps in Warsh's confirmation remains highly uncertain, with Republican Senator Tillis refusing to approve the appointment at the Committee stage until the Department of Justice close their investigation into the Federal Reserve and Chair Powell. If Senator Tillis holds out until year end, the Administration may face an additional challenge in 2027 as their Senate majority is at risk in the mid-term election. Chair Powell will remain in place in the interim, giving the FOMC continuity and capacity to manage the US economy.

On data front this week, US retail sales rose 1.7% in March, beating expectations. The control group, which feeds into GDP, also surprised to the upside, 0.7%. For the quarter overall, however, the consumer pulse has been weak, and record-low confidence points to downside risks for Q2. The outlook for US business investment is also increasingly uncertain.

Across the pond, the UK unemployment rate fell from 5.2% in January to 4.9% in February, though this reflected a decline in participation. Despite the softer labour market print, wages still rose 3.8%yr in February. A spike in energy prices also saw inflation rise 0.7% in March and 3.3% over the year. While the headlines focus on energy prices, sticky services inflation also remains an issue for the UK, 4.5%yr.

Our latest Market Outlook provides an in-depth view of the outlook for the US, Europe, China and global financial markets.

A matter of balance

Satish Ranchhod
Senior Economist

The conflict in the Middle East has cast a long shadow across the New Zealand economy, with a softening in demand, rising costs and winding back of plans for hiring. Inflation is already at elevated levels and it's set to take a large step higher over the next few months. All of this leaves the RBNZ with a particularly challenging balancing act. But while there are questions about how quickly the RBNZ will adjust the OCR, the direction of those movements will be upwards.

Curtain raiser

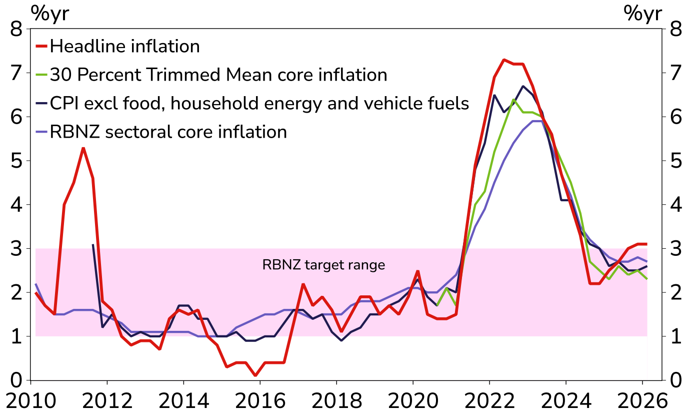
The latest CPI report showed that, even before the full impact of the recent oil price shock has been felt, New Zealand inflation was running hotter than we or the RBNZ expected. Consumer prices rose 0.9% in the March quarter. That saw the annual inflation rate remaining unchanged at 3.1%, above both our forecast and the RBNZ's April expectations.

The March quarter did see a large seasonal increase in food prices (1.5%). More important, however, were the large increases in transport costs. The sharp rise in global oil prices since late February left petrol prices up 3.5% over the quarter, with diesel prices up 11%. Notably, we also saw the early stages of spillovers from those high fuel prices into other costs, with domestic airfares up 9% over the quarter.

Looking under the surface, the various measures of core inflation provided some mixed messages on how strong the underlying inflation pulse has been. Some closely-watched measures of core inflation remain elevated. For instance, CPI ex-fuel and food came in at 3.0%yr (vs 2.9% previously). Similarly, the RBNZ's sectoral measure of core inflation held firm at 2.7%yr in the March quarter. However, other measures of core inflation, such as the trimmed mean and weighted median measures or those measures that exclude government charges, have been softer.

While not every measure of core inflation is running red hot, what stands out is that inflation in New Zealand hasn't fallen to 'low' levels over the past year. That's despite weak growth and a soft labour market. Part of the reason for that is because we have continued to see large increases in administered costs (like council rates and electricity charges) that aren't very responsive to changes in interest rates. But we are also seeing pressures in some other areas. This lingering firmness in overall inflation is significant for the RBNZ, highlighting the limited headroom they had even before the recent oil price shock.

Consumer prices and core inflation



Source: Stats NZ, RBNZ, Macrobond, Westpac Economics

The worst is yet to come

The March quarter inflation result was really just the curtain raiser. Inflation is set to rise sharply through the middle part of this year as the full impact of recent oil price rises ripples through the economy. We also expect to see continued firmness in administered prices, like council rates and electricity charges.

However, the outlook for inflation is much cloudier when we look at price pressures in more cyclical parts of the economy. That was highlighted in the latest Quarterly Survey of Business Opinion, and in our own recent discussions with businesses across the country.

Businesses have highlighted significant pressure on operating costs. And that pressure has not been limited to fuel and transport prices, with more widespread disruptions to supply chains. In some cases, like in the building sector, the reported increases in materials costs have been large.

At the same time, businesses have reported that much of the firming in economic momentum that we saw in the early part of the year has now been derailed. Economic confidence has dropped sharply over the past month, and the dampening impacts of the Middle East conflict on demand are becoming more visible. We've already seen tourist operators reporting an increase in cancelled bookings, and businesses across the country are reporting softness in discretionary spending as households grapple with rising costs for essentials.

Looking ahead, businesses across the economy are bracing themselves for softer trading conditions over the next few months. That's seen them winding back their plans for capex and hiring.

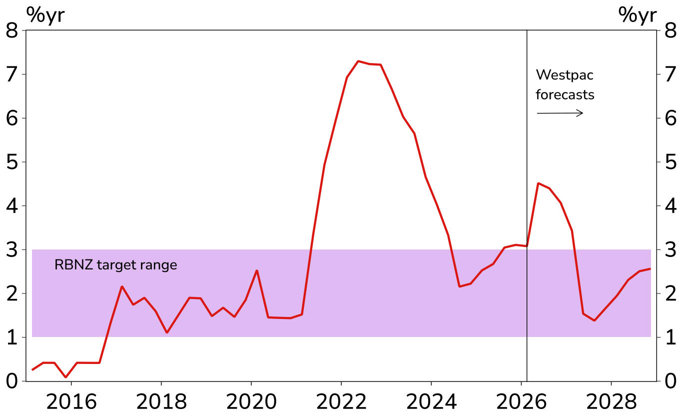
That softness in demand is raising questions about whether businesses can pass increases in operating costs through to output prices. At this stage, that passthrough has not been complete, with many businesses reporting increased pressure on margins. But that can't continue indefinitely. Many businesses have already seen their margins being squeezed for several years now, and they are now facing further (and in some cases very large) increases in operating costs. Against that backdrop, while softness in demand might limit the extent of output price rises over the coming months, inflation still looks set to take a sizeable step higher.

Putting that mix of soft demand and significant increases in operating costs together, we now expect that inflation will rise to 4.5% in mid-2026 (up from our previous forecast for 4.3%yr). Further ahead, inflation is expected to ease only gradually, slowing to 4.1% by the end of this year.

Headline inflation is expected to slow materially over 2027 as the impact of earlier oil price increases dissipates. However, core inflation is expected to remain elevated this year, and is expected to ease back towards the mid-point of the RBNZ's target band only gradually over 2027, rather than falling to low levels.

The outlook for inflation remains murky, particularly beyond the current quarter. Crucially, the outlook will be highly dependent on the evolution of tensions in the Middle East and the related (potentially large) moves in oil prices. But even if tensions in the Middle East were to dissipate quickly, the associated disruptions to supply chains and pressure on operating costs would still take some time to ease.

CPI inflation forecasts



Source: , Macrobond, Westpac Economics

Balancing act

All of this leaves the RBNZ with a particularly challenging balancing act. The RBNZ can't offset the rise in oil prices that's already occurred by hiking the OCR now. However, business surveys are pointing to a broadening lift in price pressures, and the RBNZ can't ignore the risk that the current oil-related rise in operating costs evolves into a more widespread and protracted lift in inflation. The past few years have shown just how corrosive and long-lasting the effects of high inflation can be for the economy, and the RBNZ is loath to see those sorts of pressures taking hold again.

Earlier interest rate hikes might help limit the risk that we see a more sustained rise in inflation. However, the RBNZ is also very mindful that higher interest rates now would weigh on economic activity at a time when the labour market is already soft.

This isn't an easy trade-off for the RBNZ. Balancing those concerns, we expect that the RBNZ will begin a series of increases in the Official Cash Rate from September, earlier than they previously signalled in their last published forecasts from February (which pre-dated the Middle East conflict). We expect the OCR will rise from the current low of 2.25% to 3.50% in early 2027. While that would be a relatively fast rise in the OCR, it would only take the OCR back around 'neutral' levels from the RBNZ's perspective at a time when inflation has been persistently above 3%.

Further ahead, the outlook is less certain. As a result, we expect that interest rates will continue to rise, but at a more gradual pace.

Market pricing for the OCR has been pulled forward in recent weeks and is now consistent with the first hike coming in July. We certainly wouldn't rule out an earlier start to the tightening cycle, given the significant rise in cost pressures. However, we think the RBNZ will prefer to wait to see how pricing behaviour in the economy is shaping up. While we will have a number of business surveys and monthly prices updates by the time of the July policy meeting, we won't have the full June quarter CPI report until after that meeting. (In contrast to the monthly price updates from Stats NZ, the quarterly CPI report has broader coverage including a range of discretionary spending categories. That update will help to illustrate how the balance between higher costs and softer demand is evolving in terms of overall pricing pressures.) The RBNZ will also want to see how spending and the labour market are evolving, both of which will be important for determining how persistent the strength in inflation will be.

Fiscal pressures

The other news of note this week was Moody's decision to attach a negative outlook to New Zealand's sovereign credit rating. The current top-tier "Aaa" rating – shared with just ten other countries – has been in place since October 2002 and is a notch higher than the rating currently assigned by both Standard and Poor's and Fitch (the latter also moved its rating to a negative outlook last month). It is worth noting that Moody's base model assigns a rating one notch lower, with the current Aaa rating reflecting a one-notch uplift based on an assessment that the recent weakening of fiscal metrics would improve over time. This week's action clearly indicates that Moody's are considering removing that uplift. Specifically, Moody's stated: "The negative outlook reflects our assessment that risks to New Zealand's fiscal trajectory have increased..." due to "...the potential for a combination of tighter monetary policy, slower short-term growth and increased debt servicing costs".

Following this ratings action, the Minister of Finance, Nicola Willis, held a press briefing at which she also outlined some economic scenarios that the Treasury had produced during its preparations for the upcoming Budget on 28 May. Willis stated that the ratings action reinforced the Government's decision to resist the temptation to "splash the cash" in reaction to the current oil shock. Importantly, she reaffirmed that the operating allowance for new initiatives in the upcoming Budget will be held at a relatively frugal $2.4bn. This will necessitate savings and reprioritisations to fund the targeted relief that the Government has already provided to lower income workers and some other groups, as well as the other pressures on operating spending that flow from higher fuel prices.

Unsurprisingly, the information presented by Willis showed that an upgrade to the outlook for growth and employment had been the base case prior to the Middle East conflict. More surprisingly, the least severe post-war scenario presented – one based on crude oil remaining around $110/bbl in the near-term – was associated with a growth outlook that was similar to that presented in the Half-Year update in December. This scenario, which Willis seemed to indicate might be most representative of the current outlook, would likely still lead to a modest deterioration in the near-term fiscal outlook due to increases in spending that sit outside the spending allowance, such as benefit costs (which are indexed to the CPI) and debt servicing. However, it would probably not generate a repeat of the very large upgrades to the borrowing programme that have been seen at various times in recent years.

We will publish our preview of Budget 2026 after we have seen the Government's financial accounts for April (released 12 May). Willis indicated that the Treasury had finalised its economic forecasts this week and that Cabinet would make final Budget decisions in around a fortnight.

AUS: Q1 Headline CPI (%qtr)

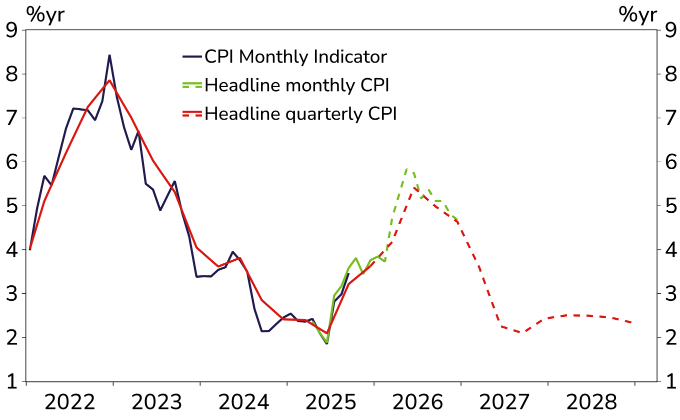
Apr 29, Last: 0.6, Westpac f/c: 1.5
Market f/c: 1.4, Range: 1.1 to 1.6

Westpac is estimating a 1.5%qtr/4.2%yr gain in the March quarter CPI. At two decimal places our estimate is a solid 1.48% so we see the risks as balanced.

The Middle East conflict is the largest energy shock since the oil crises of the 1970s/80s. It started Febuary 28 so its impact was only felt through March, mostly via auto fuel. As such we expect a much broader impact in the June quarter and through the second half of the year. For more details on the scenario underpinning these projections, and our latest thoughts on the risks, please refer to the [April Market Outlook](#).

For a detailed breakdown of our June quarter estimates, and the monthly estimates to May, see our [Inflation Outlook Bulletin](#).

Headline inflation in three series



Source: ABS, Macrobond, Westpac Economics

AUS: Q1 Trimmed Mean CPI (%qtr)

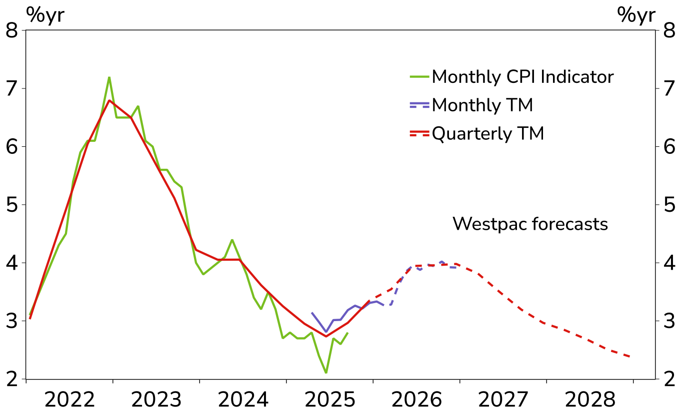
Apr 29, Last: 0.9, Westpac f/c: 0.9
Market f/c: 0.9, Range: 0.8 to 1.0

Core inflation is not immune to the Middle East Crisis. While the impact is likely to be more significant through the second half of the year we are expecting a 0.93% increase in the March quarter, matching the 0.90% December quarter gain. The annual pace is expected to lift modestly to 3.5%yr from 3.4%yr.

The March quarter is a prelude to the step up in the pace with a 1.0% increase in the June and September quarters and the annual pace peaking at 4.0%yr in the second half of the year.

The ABS are [publishing](#) the quarterly underlying inflation measures consistent with the historical price collection frequency. Replicating this process represents a small downside risk to our estimate.

Trimmed Mean inflation in three series



Source: ABS, Macrobond, Westpac Economics

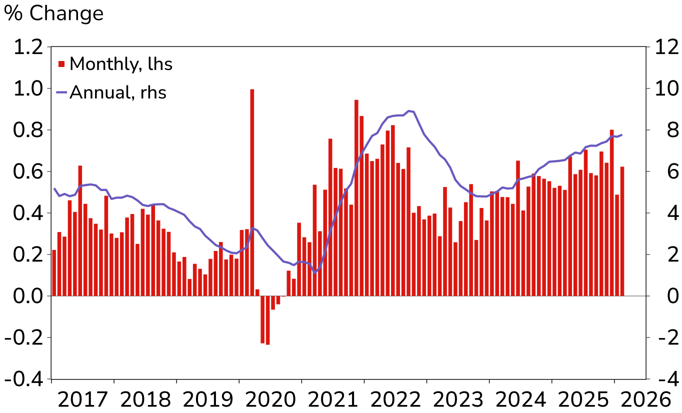
AUS: Mar Private Sector Credit (%mth)

Apr 30, Last: 0.6 Westpac f/c: 0.5
Market f/c: 0.6, Range: 0.5 to 0.7

Private sector credit rose 0.8%mth in December, eased to 0.5%mth in January, and then steadied at 0.6%mth in February, in line with the two-year average.

For March, headline growth is expected to moderate to 0.5%mth. The effects of the RBA's cash rate increases in February and March are likely to emerge with a lag, although interest rate expectations rose earlier. In addition, the global energy price shock associated with the war in the Middle East is placing further pressure on household budgets and disrupting business activity. With both consumer sentiment and business confidence falling sharply in March, credit growth is likely to face increasing downward pressure, amid heightened economic uncertainty.

Private Sector Credit Growth



Source: RBA, Macrobond, Westpac Economics

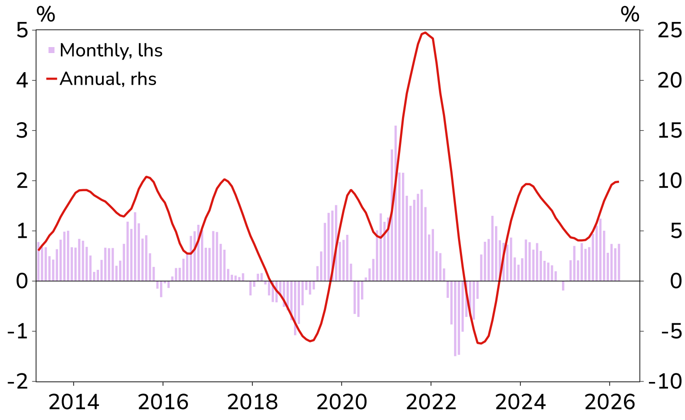
AUS: Apr Cotality Home Value Index (%mth)

May 1, Last: 0.6, Westpac f/c: 0.3

The Cotality home value index rose 0.6% in March, following similar gains over the previous three months, annual growth holding broadly steady at 9.3%yr. The detail continued to show slight price declines in Sydney and Melbourne, where turnover also looks to be pulling back, but relatively strong price gains in Brisbane, Adelaide and Perth where turnover remains firmer.

The daily measure points to a slower 0.3% rise for the April month with slightly more pronounced declines in Sydney and Melbourne and price gains moderating a touch in the mid-sized capitals.

Cotality home value index



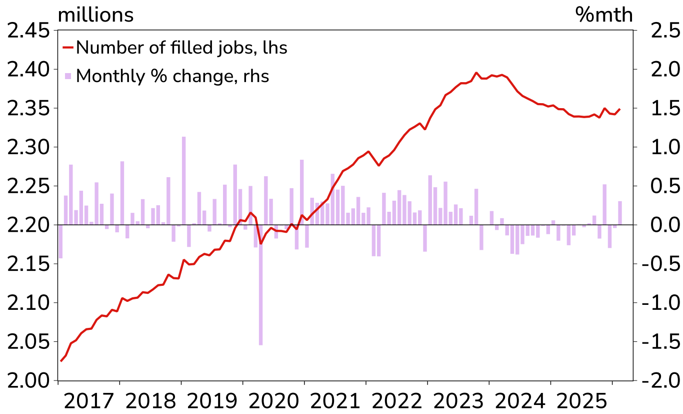
Source: Cotality Australia, Macrobond, Westpac Economics

NZ: Mar Monthly Employment Indicator (%mth)

Apr 28, Last: 0.3, Westpac f/c: flat

The February MEI added to the evidence that the New Zealand economy was regaining momentum prior to the Iran war. The number of filled jobs rose by 0.3%, although this is likely to be revised down a little in subsequent releases; the broader picture is one of a stabilisation in jobs in recent months after declining through 2024-25. The weekly snapshots provided by Stats NZ are now running about in line with a year ago, which suggests a flattish outcome for the March month. We'll be watching these figures closely for any signs that the uncertainty stemming from the Iran war is prompting businesses to put off hiring decisions.

Monthly Employment Indicator



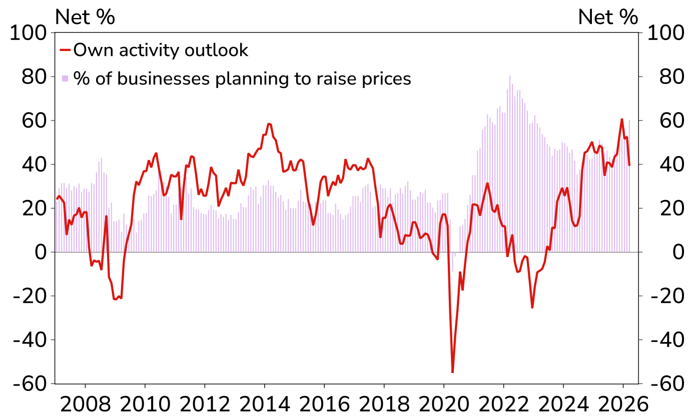
Source: Stats NZ, Macrobond, Westpac Economics

NZ: Apr ANZ Business Confidence (index)

Apr 30, Last: 32.5

The first business survey since the beginning of the Iran war saw a sharp drop in confidence, with late-March responses turning significantly weaker than earlier ones as the gravity of the situation became clearer. That sets the stage for an April survey that's likely to look quite ugly on the whole, even if there is some improvement within the month as the 8 April ceasefire helped to bring fuel prices down from their highs. Firms' inflation expectations and pricing intentions are likely to take a further step up, but the measures of wage growth and hiring intentions will also be an important consideration as to whether we see a sustained rise in inflation beyond the initial spike.

Business confidence high prior to Iran conflict



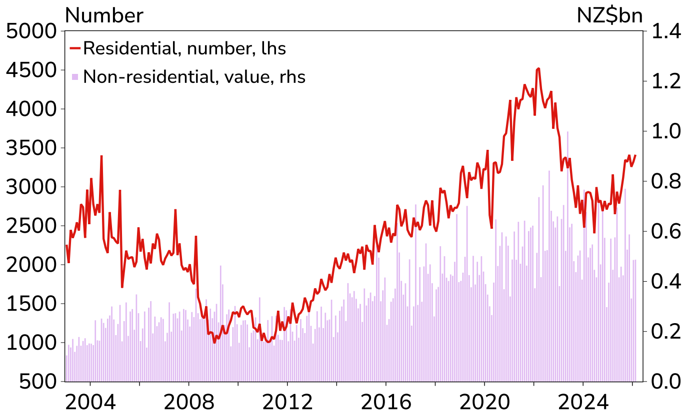
Source: ANZ, Macrobond, Westpac Economics

NZ: Mar Building Consents (%mth)

May 1, Last: 2.7, Westpac f/c: flat

Since late 2025, dwelling consent numbers have taken a step higher, and we expect that issuance will remain firm in March. That would see annual consent numbers climbing to around 37,800 – its highest level since 2023. Developers have been bringing new projects to market, supported by last year's reductions in interest costs and the earlier easing in cost pressures. However, those gains pre-date the recent conflict in the Middle East. Builders are now reporting significant increases in materials costs and pressure on interest rates is mounting. That's likely to see fewer new projects coming to market over the coming months, and some planned work may not proceed. Commercial consent numbers have been mixed across segments to date. But across all segments, the risks are now tilted towards greater caution in businesses' plans for capex in the near term.

Building consents picking up



Source: Stats NZ, Macrobond, Westpac Economics

US: FOMC Policy Decision (%)

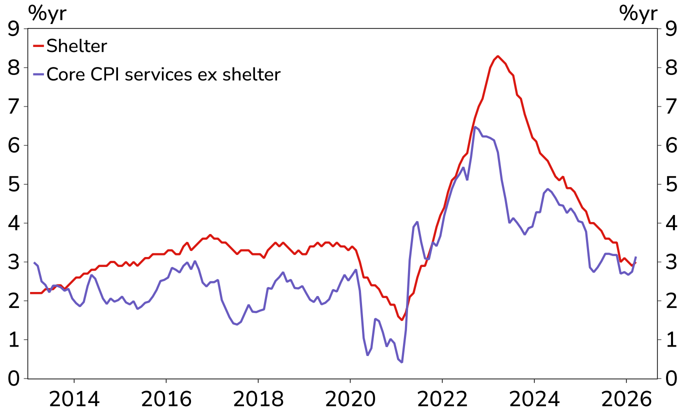
Apr 28-29, Last: 3.625, Market f/c: 3.625, Westpac f/c: 3.625

The FOMC received a reprieve from downside risks to the economy over the past month as nonfarm payrolls growth turned up after an extended period of weakness.

The deceleration in GDP growth evident in Q4 and expected in Q1 notwithstanding (see below), the focus of FOMC risk analysis is likely to be the threat of elevated inflation. The latest CPI report was favourable, with inflationary pressures concentrated in energy prices and core inflation benign. However, if a deal between the US and Iran is not forthcoming, this situation could change rapidly.

We expect the Committee to note concerns over passthrough, but to hold a balanced view overall, waiting for data to show the evolution of risks in coming months.

Passthrough risk the near-term concern



Source: BLS, Macrobond, Westpac Economics

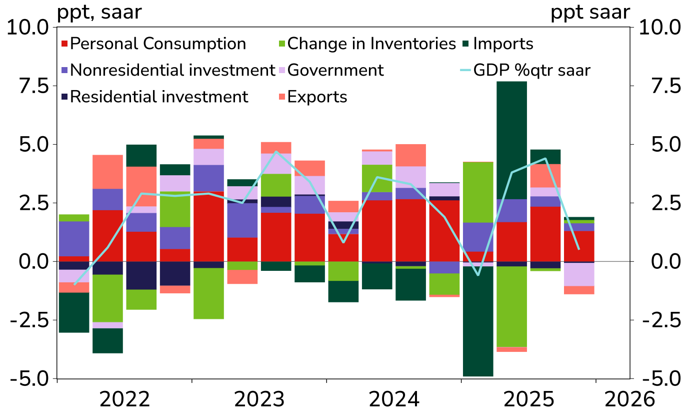
US: Q1 GDP (%ann'd)

Apr 30, Last: 0.5, Market f/c: 2.0, Westpac f/c: 1.0

US GDP decelerated abruptly at the end of 2025 following strong growth through mid year, and under the weight of the Federal Government shutdown and tariff uncertainty. Partials available for Q1 2026 point to another poor result as the new year begins.

In part this looks to be due to net exports subtracting materially from growth in the three months to March. Though housing investment seems to be contracting, and household consumption and business investment growth is below trend. With consumer sentiment at record lows, US GDP growth is susceptible to remaining below trend through Q2 and Q3, potentially seeing additional slack build in the labour market.

United States contributions to GDP



Source: BEA, Macrobond, Westpac Economics

Japan: BoJ Policy Decision (%)

Apr 27, Last: 0.75, Market f/c: 0.75, Westpac f/c: 0.75

We anticipate the Bank of Japan will remain on hold at its April meeting but signal that further rate rises are on the horizon. A fresh set of forecasts should show inflation is on track to be higher given higher costs of energy and still elevated food prices.

The Policy Board is focused on creating the right conditions for domestically-driven inflation. They will want to be patient to ensure financial conditions remain sufficiently accomodative for the corporate sector to continue to raise wages and invest while balancing the impact a weak yen has on domestic inflation. We continue to anticipate a June hike.

Real wage gains still key for BoJ

The words “believe”, “anticipate”, “expect”, “intend”, “plan”, “predict”, “continue”, “assume”, “positioned”, “may”, “will”, “should”, “shall”, “risk” and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author’s knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac’s Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac (“WNZL”). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Week beginning 20 April 2026

AUSTRALIA & NEW ZEALAND WEEKLY

Analysis and forecasts for this week's key releases.

In this week's edition:

Economic Insight: Drawing a line on just drawing a line.

The Week That Was: Conflict in the Middle East to cast a long shadow.

Focus on New Zealand: Oil shock begins to surface in data.

Forecast Update: Our latest forecast updates are detailed in our April Market Outlook.

For the week ahead:

Australia: Westpac-MI Leading Index.

New Zealand: Q1 CPI, NZIER Survey of Business Opinion and Q1 trade balance.

United States: Retail sales, initial jobless claims, University of Michigan Sentiment.

Euro area: ZEW Survey of Expectations, consumer confidence, President Lagarde speaks.

UK: Unemployment rate, CPI, GfK consumer sentiment.

Japan: CPI.

World: Manufacturing and services PMI.

Information contained in this report current as at 17 April 2026.

Draw a line on just drawing a line

Luci Ellis
Chief Economist, Westpac Group

- **You know times are uncertain when institutions start publishing scenarios alongside their normal forecasts. Two principles underlie good scenarios. First, the narrative underlying the scenario must hang together – no assuming people do things that are either individually irrational or infeasible. Second, the scenario must allow people to respond to the initial shock – avoid just drawing a price line on a graph and assuming people cannot adjust their behaviour.**
- **There is a tension, though, between the need to be realistic and a desire to highlight vulnerabilities or contemplate worst-case scenarios. There is a legitimate role for worst-case thinking, but it must be handled with care. Recall that even though our forecasts last year were less alarmist than many in the wake of Liberation Day, actual outcomes were even better than we had expected.**
- **The real value of scenarios is teasing out downstream effects and delayed responses. Sometimes the responses to temporary shocks can have lasting effects. From EV purchases to defence budgets, these could be especially important coming out of the current conflict. All the more reason to avoid just drawing a line and assuming that is the outcome.**

In times as uncertain as these, you want to be able to articulate more than one possible future state of the world. That is where scenario analysis comes in. Indeed, when institutions start publishing scenarios, you can take it as a sign that things are unusually uncertain. The RBA used scenarios extensively during the pandemic. And while the IMF did not give scenarios any prominence in its previous full *World Economic Outlook* report in October, it did this week. Similarly, we have published several scenario iterations over the past six weeks and will provide an update later today in our Market Outlook report.

Using scenarios rather than simple uncertainty ranges or a description of risks is especially useful when the possible future states of the world are qualitatively different from the base case, and when the level of conviction about that base case is low. There is nothing wrong with a scenario that is only a little different from the base case, but it is not that interesting or informative.

Two key principles underlie good scenario analysis. First, the premise of the scenario needs to be well-grounded. The narrative motivating the initial impetus must hang together. It must be logically consistent and represent both the interests and the constraints of the actors within the system. In other words, scenarios should not assume that people do things that are either bonkers or infeasible. Individually rational behaviour that is harmful in aggregate, such as panic-buying toilet paper or conducting fire-sales of loss-making assets, should of course be allowed for, but make sure the action is indeed individually rational.

Second, the methods used in developing the scenario need to go beyond first-round thinking. You need to allow for other people to react. A good scenario cannot be just a one-off shock where nothing else changes. Sometimes it takes time for people to adjust to the new situation, so the reaction occurs with a lag. Teasing these reactions out is the value-add of the scenario.

There is a tension, though, between the need to be realistic and a desire to highlight vulnerabilities or contemplate worst-case scenarios. Sometimes a lack of realism is used to guard against a potential failure of imagination. There is a legitimate role for this approach when stress testing, for example. However, unrealistic assumptions in forecast-flavoured scenarios leave your forecasts open to misinterpretation. We have seen an example of this issue this week, where the IMF's worst-case 'severe' scenario, which implies a global recession, has sparked unhelpful talk of recession here in Australia.

"Scenario analysis is essential in uncertain times, but it must be well-grounded, not just drawing an arbitrary line on a graph."

Part of the issue is that the IMF's less-bad 'adverse' scenario (which assumes oil prices average USD100/bbl this year before moderating to USD75 next year) and worst-case 'severe' scenario (which assumes oil prices stay around USD125/bbl from the outbreak of the conflict all the way through to end-2027) are both 'top-down' scenarios that appear to start from an assumed path for oil prices. Unlike our own scenario work, they do not explicitly model loss of supply from the Middle East and work out what prices need to do to clear the global market. By effectively just drawing a line on a graph for oil prices, the scenarios assume away any scope for other producers to respond. This is not an issue in the near term, but the longer the assumption is maintained, the less realistic it is. High prices will spur non-OPEC producers such as the US and Canada to boost production. It takes time to get that expansion running, but eventually prices will start to ease.

Because it assumes high prices right through 2027, the 'severe' scenario is most challenged by this issue. This is not to say that the IMF should not have published that scenario, but it is important to understand the context and what it was trying to achieve in doing so.

When developing scenarios, you also need to avoid the trap of thinking only of downside risks. Part of the problem is that downside risks usually come from identifiable events. It is easy to construct a plausible narrative for a scenario starting from "this particular bad thing happened". But as one of my old bosses used to remind us, sometimes you should also consider the risk everything just turns out a little bit better than expected.

As our April Market Outlook goes to publication later today, it is helpful to recall last April's edition. The 'Liberation Day' tariffs had been announced a fortnight previously, and many voices in the market were predicting global or US recessions. At the time we took a more moderate view, based on the principles noted above. Firstly, continuing with very high tariff rates would have been an act of economic self-harm. While it was hard to bet on the Trump administration acting rationally in a context of 'flood the zone' headlines and intemperate social media posts, self-interest is still the best assumption. If there is nothing preventing someone from stopping punching themselves in the face, they will stop punching.

Secondly – and this was a key judgement in our forecast last year – other countries had agency and could respond. In particular, China had scope to stimulate, and this would also cushion growth in Australia. In that context, we note that the latest Chinese GDP growth has again surprised on the upside relative to market expectations.

It turns out that even we were too bearish a year ago: the global economy did much better than expected, and global trade kept expanding with barely a hiccup. Other factors, including a tech boom, turned out to be more important than expected. Trade patterns were also re-routed around the highest tariffs, and of course the US government de-escalated, as is proving to be its pattern.

These principles also hold for other kinds of scenarios. Whenever you read a prediction of doom concerning, say, adoption of a new technology, ask yourself what is preventing people from responding to ameliorate the bad thing. What prevents macroeconomic policymakers from easing, for example, or the tax system from redistributing unequal gains? While occasionally decision-makers decide that a bad thing is good actually, holding that position is itself fragile.

Where scenarios can really add value is when they highlight a lasting effect from a temporary shock. Whether it is the person who buys an EV in response to current high petrol prices and reduces their petrol consumption permanently, or the government that reassesses its defence spending, behavioural responses can change longer-term demand trends, and so the prices that prevail further out. Normalisation after a shock does not always take you back to where you were. That is another reason why it is so important to avoid just drawing a line on a graph and calling it a scenario, ignoring system-wide effects.

Forecast changes

- **A full update to our forecasts was published in our Market Oulook publication on April 17.**

Cliff Notes: conflict in the Middle East to cast a long shadow

Elliot Clarke, Head of International Economics
Ryan Wells, Economist

Our Westpac-MI Consumer Sentiment Index posted its largest fall since COVID-19, down 12.5% to a deeply pessimistic reading of 80.1. The impact from the surge in fuel prices was acute, leading to a more pronounced deterioration in the sub-indexes tracking current conditions – namely 'family finances vs a year ago' (–16.7%) and 'time to buy a major household item' (–15.0%). There were also significant hits to the year-ahead outlook for family finances (–13.9%) and the economy (–12.4%), suggesting households are bracing for enduring pressure.

The tone of the March NAB business survey was no better, business confidence collapsing 29pts from a neutral reading in February. This came alongside a notable lift in purchase cost pressures, up 1.7ppts to a quarterly pace of 3.0%. That final producer prices lifted +0.4ppts emphasises the rapid pass-through of surging fuel costs, but also that businesses are currently absorbing most of the increase in costs via margins, impacting profitability. The readings for current trading conditions and employment were positive, enabling business conditions to hold around its long-run average. This suggests the underlying health of the economy can be maintained if risks subside quickly.

This week we also received the March Labour Force Survey. It showed the Australian labour market was in good health prior to the Middle East conflict and the RBA's most recent rate hike. Employment growth continued to strengthen from its trough in March, from 1.0%yr to 1.5%yr on a three-month average basis, reflecting the economy's momentum through the second half of 2025 and into 2026. The unemployment rate has also held at 4.3% over the past two months, a similar level to the second half of last year. It now looks increasingly like the 4.1% prints at the turn of the year were due to temporary weakness in participation, not a sustained re-tightening.

However, given the hit to business confidence and the expectation of further policy tightening, the Middle East conflict looks set to cast a long shadow over the labour market. We expect a combination of lower average hours worked and slower employment growth, seeing the unemployment rate lift to 5.0% in early 2027. Tracking industries most exposed to the fuel shock will provide an initial take on the scale of the impact. Manufacturing, construction, transport/logistics and travel/tourism are the sectors to watch.

Offshore, an abrupt end to the first round of in-person talks between the US and Iran and the US' Navy's subsequent blockade of Iranian ports and associated vessels was the main point of conversation for markets this week. The market's take has been sanguine, the price of Brent oil retreating below US$100 and global equities rallying back to historic highs during the week. Comments made by both sides imply negotiations are ongoing and another round of in-person talks will occur before the two-week ceasefire ends in coming days. There is also the option to extend the ceasefire, if necessary.

Effectively cut off from global shipping, Iran's need for a deal is clear. But this is also the case for the US economy, University of Michigan consumer sentiment fell to a record low this week, 43% below the average of the survey since 1978. Price pressures are currently limited to first-order effects, headline CPI inflation printing at 0.9% against a core reading of just 0.2% in March. Should the conflict persist, it is highly likely second-round effects will permeate through the US economy, materially increasing the likelihood of inflation holding well above target and term interest rates trending higher. FOMC members who spoke this week all showed confidence in the underlying health of the US economy but also concern over the potential for an lasting imbalance between growth and inflation.

In contrast, China's economy showed strength this week, annual GDP growth accelerated from 4.5%yr in Q4 2025 to 5.0%yr in Q1, matching the full-year outcome for 2025. From the monthly partial data, China's Q1 momentum was principally due to the strength of exporters and associated investment, both of which are likely to receive a lasting boost from increased demand for green technology given the Middle East's impact on energy prices and supply. There is reason for guarded optimism over the outlook for property investment as well, the year-to-date decline having moderated from -17%ytd at December to -11%ytd in February and March. Still equivalent to circa 15% of GDP, an end to the sharp construction declines of recent years would provide a material boost to aggregate growth through 2026.

External demand and investment's support for GDP masks the still-troubled state of consumer demand. Having surprised to the upside in February at 2.8%ytd, in March retail sales growth slowed once again to 2.4%ytd. While not a disastrous outcome by any means, it is less than half the average pace of the past five years post pandemic, a historically weak period for household demand growth. Policy makers have been clear in their intent to provide additional support to households but are yet to action plans. And, while equities have risen through the year, house prices continue to decline, weighing on wealth and sentiment. Without broadening the growth pulse, aggregate momentum will remain susceptible to slipping towards, or through, 4.0% in coming years, even with a significant benefit from global demand for green technology.

A full update of our expectations and assessment of risks for the global economy and markets will be made available today in the April edition of Market Outlook on Westpac IQ.

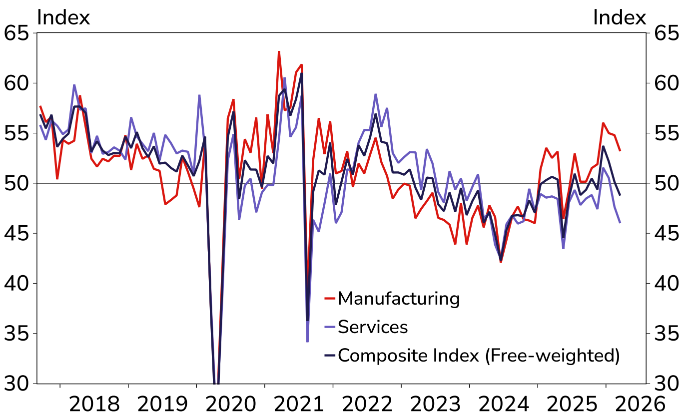
Oil shock begins to surface in data

Darren Gibbs
Senior Economist

The past week has delivered some further insight on the early impact of the Middle East conflict on the New Zealand economy. Unsurprisingly, that data points to some marked changes in spending patterns and clear upward pressure on prices for energy products. Even greater impacts are certain to be evident over coming months as the shock transmits through the economy.

On Monday, BusinessNZ reported that its Performance of Services Index had declined 1.6pts in March to a 10-month low of 46.0. All five subindexes fell below 50, with the activity/sales index falling to 44.6 and the new orders/business index falling to 45.7. The employment index also fell to the lowest level since October 2024. Separately, MBIE reported a modest decline in job ads in March. However, for now, the level of advertising remains more than 10% higher than a year earlier, and we are also yet to see any sign of labour shedding in the weekly filled jobs data collected from tax records. Meanwhile, more than two-thirds of the comments submitted by respondents to the BusinessNZ survey were said to be negative, with many – especially in industries dealing with discretionary spending – unsurprisingly citing the impacts of the Middle East crisis.

BusinessNZ PMIs

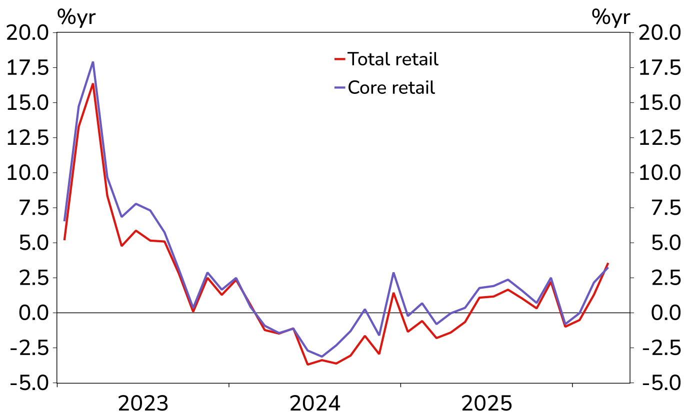


Source: BusinessNZ, Stats NZ, Macrobond, Westpac Economics

Later in the week news from the retail sector provided no major surprises. Consumer spending, as measured by electronic card payments, increased 0.7%m/m in March. Unsurprisingly, with petrol prices surging almost 19% during the month, spending on fuel increased over 17%. By contrast, core spending – which excludes spending on fuel and vehicles – fell a modest 0.1%m/m. Within the core measure, while spending on consumables (groceries) and durables grew, this was more than offset by a decline in spending on apparel and hospitality. These data were broadly in line with the trends that were evident in Westpac's own card spending data, which we had published earlier in the week.

Given the outcome for March, retail spending over the March quarter grew 1.0%. This was the strongest quarter since the December 2024 quarter, consistent with our view that the economy's forward momentum had improved at the start of this year. But looking ahead, high fuel prices will continue to siphon money out of households' pockets. At the same time, they will add to costs of production for a variety of other goods and services and will continue to significantly undermine consumer confidence. Overtime, these costs will also weigh on the strong growth in tourist arrivals that has helped retailers to weather a time of relatively subdued domestic spending. We continue to anticipate that consumer spending volumes will decline slightly in the current quarter, even as the value of spending is sustained by higher prices.

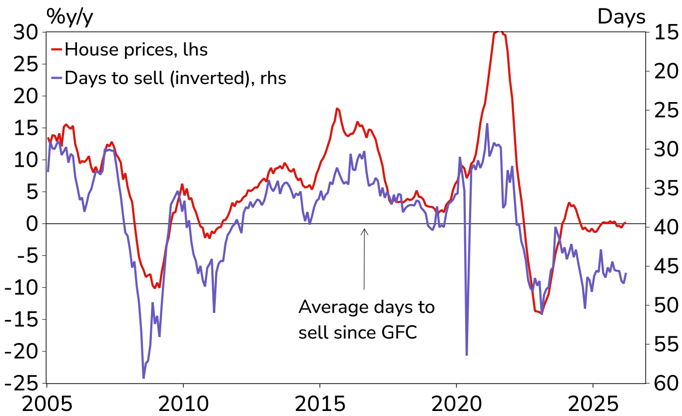
Electronic card spending in retail stores



Source: Stats NZ, Macrobond, Westpac Economics

News from the housing market also provided no major surprises. Sales were down around 4% in March, reversing a 5% rise in February, and have been effectively moving sideways over the last year. The average time to sell shortened compared to February but has also remained within a narrow range and remains longer than usual. The REINZ house price index ticked up slightly in March following a 0.6% rise in February. Prices have now largely reversed the declines that we saw over the second half of 2025 and were up 0.2% from a year earlier. Conditions vary across the country, with prices trending higher in the South Island while the North Island has been more stagnant. Of course, the Middle East conflict has cast a fresh shadow of uncertainty over the economic outlook. It was unlikely that we would see an impact on the housing market as early as March, but in the months ahead we'll be watching for signs of a softening that would support our current forecast of a 1% fall in prices over this year. (Anecdotal evidence suggests greater caution amongst buyers in recent weeks.)

House prices and days to sell

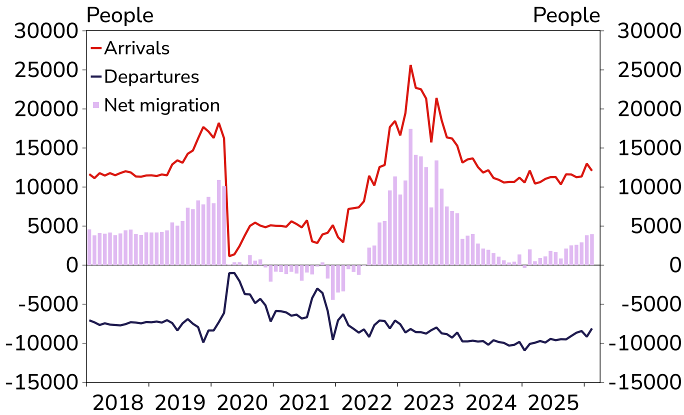


Source: REINZ, Macrobond, Westpac Economics

Another sector that is likely to be challenged by the Middle East conflict is the tourism industry. Increased prices for flights and sharply lower consumer confidence are likely to be weighing on forward bookings, especially from long-haul countries, and this should become evident as the year progresses. However, the recent trend has been very favourable, with arrivals in February increasing for an eighth consecutive month. A notable feature of the latest data was a further improvement in arrivals from China, which until recently had continued to track far below pre-pandemic levels. Thanks to the timing of the Lunar New Year, arrivals from China was more than triple that seen in February last year. But taking the January/February period as one to remove the impact of the floating holiday timing, arrivals were still up more than 50% and just 5% below the level seen in 2019. Helpfully, this comes at a time when there appears to be some slowing in arrivals from some other markets, notably the US and South Korea.

The inflow of longer-term arrivals – new residents and those on working, educational and other visas – has also shown some signs of lifting of late. Keeping in mind that more recent observations are subject to revision, the number of migrant arrivals in February was estimated to be around 2,000 greater than the low point seen in August last year whilst the number of departures was around 3,000 less than last January's highpoint. The net inflow of 3,600 was the largest since March 2024 and the inflow for the year to February – just over 25,000 – was over 7,000 more than the preceding year. At least in part the strengthening trend is further evidence of the improved economic conditions that were developing in New Zealand prior to the Middle East conflict. Changes to visa policy have liked also contributed to the pickup in inflows.

Monthly migration flows, seasonally adjusted



Source: Stats NZ, Macrobond, Westpac Economics

Finally, the release of the Selected Prices Indexes for March has allowed us to finalise our forecast for next week's March quarter CPI report. As expected, the price of petrol increased 19% in March and the price of diesel surged 42%. However, food and some other travel-related prices such as airfares came in slightly weaker than expected. As a result, we have revised down our forecast for the CPI to 0.7%, which would see annual inflation ease back to 2.8% from 3.1% in the December quarter. Higher prices for food and petrol should make the most significant contributions, although tradable prices overall are expected to rise just 0.2% over the quarter and 2.1% over the year. Non-tradables prices are forecast to increase 0.8% over the quarter, lowering annual inflation to 3.3%. Meanwhile measures of core inflation, such as the trimmed mean and the ex-fuel and energy CPI, are expected to remain in the top half of the RBNZ's target range.

Our forecast is a little lower than the updated 3.0% forecast released by the RBNZ at its 8 April Monetary Policy Review. Assuming the CPI prints close to our expectations, the RBNZ will only take modest comfort given what lies ahead. The impact of the oil shock will become more evident when the June quarter CPI is released in July, and perhaps earlier in the monthly Selected Prices Indexes that will be released prior to the CPI. We currently estimate that annual CPI inflation will rise to 4.3% in the June quarter, although much will depend on how petrol prices evolve over coming weeks.

AUS: Mar Westpac-MI Leading Index

Apr 22, Last: +0.08%

The Leading Index growth rate held at +0.08% in February, unchanged from January but down from more firmly positive reads late last year.

The March read will again see a very mixed bag of component updates. The global energy shock has hit sentiment measures and financial markets hard. Both the Westpac-MI Consumer Expectations Index and the Westpac-MI Unemployment Expectations Index deteriorated by 10% in the latest month, the S&P/ASX200 dropping 7.8% month to month and the yield spread narrowing further. However, commodity prices firmed (up 2.1% in AUD terms) and total hours worked rose 0.5% while dwelling approvals posted a big 30% rebound from very weak reads in Dec-Jan. The net effect is hard to judge but may be more neutral than weak.

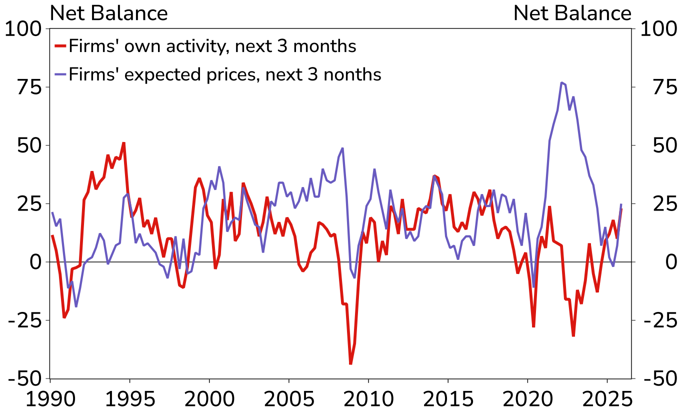
NZ: Q1 NZIER Survey of Business Opinion (index)

Apr 21, General business confidence last: 39.5

The December quarter QSBO showed a more upbeat attitude among businesses than we've seen for some time, with both actual and expected activity picking up, and demand for workers responding accordingly. The March quarter survey will be a different matter though, coming in the wake of the Iran war, and later responses are likely to be significantly more downbeat than earlier ones. The pricing measures of the survey will show the hit from the surge in fuel costs, but more important will be firms' willingness to pass this on into their own prices. This particular measure seems to have been instrumental in kicking off both tightening and easing phases by the RBNZ in recent years.

Quarterly Survey of Business Opinion



Source: NZIER, Stats NZ, Macrobond, Westpac Economics

NZ: Q1 Consumer Prices (%)

Apr 21, Quarterly last: 0.6, Westpac f/c: 0.7
Annual last: 3.1, Westpac f/c: 2.8, RBNZ f/c: 3.0

We estimate that New Zealand consumer prices rose by 0.7% in the March quarter, underpinned by higher prices for food and petrol. The annual inflation rate is expected to dip from 3.1% to 2.8%, slightly below the RBNZ's forecast of 3.0% (updated at its April Monetary Policy Review). Under the surface, core inflation is expected to remain at firm levels. While the annual inflation rate is set to soften a little in March, this will be just a temporary reprieve. Inflation is set to rise sharply through the middle part of the year in response to the recent rise in oil prices and related increases in other costs. We expect inflation will rise to around 4.3% mid-year.

Inflation at top of the range before Iran war

The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Week beginning 13 April 2026

AUSTRALIA & NEW ZEALAND WEEKLY

Analysis and forecasts for this week's key releases.

In this week's edition:

Economic Insight: On hoping you'll be wrong.

The Week That Was: Ceasefire optimism to be tested.

Focus on New Zealand: A hawkish RBNZ is prepared to act decisively.

For the week ahead:

Australia: Unemployment rate, employment change, Westpac-MI consumer sentiment, Westpac-Now.

New Zealand: Retail card spending, selected price indices, REINZ house sales and prices, net migration.

Japan: Industrial production.

China: GDP, fixed asset investment, industrial production, retail sales.

Euro area: HICP inflation, trade balance, industrial production.

UK: Monthly GDP.

United States: PPI, Federal Reserve's Biege Book, industrial production, existing home sales.

Information contained in this report current as at 10 April 2026.

On hoping you'll be wrong

Luci Ellis
Chief Economist, Westpac Group

- **The economy does not care about your feelings, so forecasts must reflect what you think is the most likely outcome, not necessarily what you wish would happen. This distinction is especially salient now. The outright fall in global fuel supply has different implications than other recent supply shocks, and the outlook for Australia and the world is rough.**
- **The ceasefire announced this week was obviously welcome, but the question is whether the Strait of Hormuz opens properly. The first 24 hours after the announcement were not promising. But if it does, that would be a better outcome than the baseline forecast update we released last week. We would be happy if our baseline forecast was wrong for this reason.**
- **The key issue for Australia, and for the domestic interest rate outlook, is how much of the energy price shock is already being passed through to prices of other goods and services. The RBA will be watching for this kind of behaviour, including through its liaison program, and will see it as a further leg up in underlying inflation from a rate that was already higher than desired.**

The thing about forecasting is that your preferences do not matter. A baseline scenario is simply what you think is most likely. It is not necessarily what you wish would happen. And of course things could play out differently. It is the role of scenario and risk-sensitivity analysis to articulate these other possible future states of the world.

The disconnect between what you hope will happen and what you think will actually happen is especially salient now. The near-term outlook for Australia is tough: higher inflation, with consumers again squeezed by some combination of higher interest rates, lower income growth and higher unemployment. Things are even worse for many other countries. Australia has been able to leverage its LNG exports to ensure we have – so far – not been left short of other fuels. Many lower-income countries do not have this advantage and have been facing the prospect of shortages and rationing; some of our neighbours in the Pacific are particularly hard-hit.

The economic shock from the Gulf conflict centres on global oil and gas supply. It is different from COVID, when the disruptions were all the way down supply chains. It also differs from the energy shock following Russia's invasion of Ukraine, where the Russian oil and gas supply did not disappear, it just needed time to be redistributed to non-European nations willing to buy it despite the sanctions; the peak decline in its oil output was estimated to be around 3 million barrels per day, but the disruption faded quickly. This time around, the oil and gas are not getting out of the Persian Gulf. Some production has been redirected through Saudi pipelines to other ports, but not all of it. Current estimates are that the net reduction of global production has been 8–9 million barrels per day for oil and one-fifth of pre-war global supply for gas. And at the same time, Russia's output capacity has been reduced by successful Ukrainian attacks on Russian oil infrastructure; news reports suggest this has cut global output by a further 0.7–1 million barrels per day.

The effect on prices from such a cut to capacity was always going to be severe.

> **"Forecasts are an assessment of the most likely outcome, not the preferred one."**

News this week that a two-week ceasefire had been agreed was obviously welcome. Assuming it holds well enough to reopen the Strait of Hormuz properly – a big if given the attacks in the 24 hours following its announcement – it would be a better outcome than the baseline update we released last week, and one of the "risks on both sides" we contemplated when we released it. A lasting ceasefire and faster opening up of the Strait would put energy prices on a trajectory between the one we contemplated in last week's baseline, and the one underpinning the forecasts in the March *Market Outlook*. A return to pre-war prices is unlikely in the short term, though, given the damage to oil and gas infrastructure in the Gulf states and in Russia.

Even if the ceasefire holds well enough that the Strait stays open, a key watchpoint is whether ships enter the Gulf during the next two weeks, not just whether those previously stuck there leave. If ships do not enter, the next wave of production will not be able to be shipped. Supply will sag again a few weeks later and prices will rebound, especially for refined product.

If the ceasefire does not hold, the reprieve on fuel supply will be brief. Trust between the parties is low and Iranian control of the Strait – even jointly with Oman – is an unstable equilibrium that is unacceptable to much of the rest of the world. Even if the ceasefire gets back on track after its rocky start, flare-ups later in the year cannot be ruled out.

The real question for Australia, and for the domestic interest rate outlook, is how much of the energy price shock is already being passed through to prices of other goods and services. On this there is less cause for optimism. While ‘temporary fuel levies’ are easier to unwind as fuel prices decline, for many products, list prices have been lifted significantly and a reversal seems less likely. Building materials are a particular issue, with the cost of building a detached home increasing as much as 10%, on our preliminary estimates. The lift in pricing has been widespread across industries and in some cases quite large relative to overall inflation trends. The RBA will be watching for this kind of behaviour, including through its liaison program, and will see it as a further leg up in underlying inflation from a rate that was already higher than desired.

Our next forecast round, scheduled for release next week, will contemplate both the case where traffic through the Strait remains disrupted and one where the ceasefire holds.

If the ceasefire does hold, downside risks to growth diminish and inflation risks ease. Because of the downstream pass-through to other prices we are already seeing, though, the inflation risks do not disappear and the RBA is still likely to raise the cash rate further. Still, it would be a better outcome than our current published baseline. This would be one of the instances where we would be quite happy to be wrong.

Cliff Notes: ceasefire optimism to be tested

Elliot Clarke, Head of International Economics
Mantas Vanagas, Senior Economist
Ryan Wells, Economist

Ahead of the worst of the current conflict, the ABS' household spending indicator gained 0.3% in February, in line with January's result and the trend pace of the past two years. Services continued to drive growth overall, aided in particular by holiday-related spending. Goods spending only managed a 0.1% gain, however, remaining weak.

Our Westpac-DataX Card Tracker suggests spending growth is likely to moderate in coming months as higher energy prices and weaker sentiment are felt, though a lasting end to hostilities could ease concern and see households look through some of the cost shock already in train. Geopolitical considerations are challenging for market participants to digest, let alone households and small business. For these individuals, in the fulness of time, pricing responses and time delays up and down the supply chain could prove as, or more, significant than the energy market dynamics currently being witnessed. Risks for the Australian consumer are therefore likely to linger.

In New Zealand, the RBNZ maintained the stance of policy as expected. However, our New Zealand team took the commentary to be hawkish, with a particular focus on second-round inflation pressures. The RBNZ's short-term inflation forecast is now 4.2%yr at June 2026, in line with Westpac NZ Economics' 4.1%yr projection. As a result, Westpac's expected timing for the first hike for the coming cycle has been brought forward from December to September 2026, with the risk of a further acceleration if evidence of second-round inflation impacts accumulates.

Further afield, the data flow was concentrated in the US and mixed in tone. Over the Easter long weekend, nonfarm payrolls rebounded 178k in March, bringing the three-month average back up to 68k compared to an average monthly outcome of -8k in the second half of 2025 and 10k over the full year. The unemployment rate was also consistent with labour supply and demand being in balance in March, edging back down to 4.3%. Note though, this outcome was due to a further decline in the participation rate (now down 0.7ppts since April 2025) rather than an increase in household survey employment.

The weak outcomes for employment through late-2025 look to increasingly be affecting household demand – indeed, the downward revision to Q4 GDP to just 0.5% annualised was in part due to sub-par consumption growth (1.9% annualised).

Since the turn of the year, momentum looks to have slowed further, with real personal consumption expenditure up just 0.1% in February after a flat January. With business investment soft and susceptible to downside risks (core goods order growth in Q1-to-date is less than a third of the pace registered in Q4), US Q1 GDP growth looks likely to maintain a pace well below trend, closer to Q4's third estimate than the 1.3% annualised pace currently projected by the Atlanta Fed's GDPNow nowcast. This is before the sentiment and cost of living shock emanating from the Middle East is felt.

"pricing responses and time delays... could prove as, or more, significant than the energy market dynamics"

The above outcomes are unlikely to materially alter FOMC member's baseline view and overall risk assessment. While the latest meeting minutes indicate "a vast majority of participants" see "risks to the employment side of the mandate... [as] skewed to the downside", the labour market is considered to be in good health overall. Active risk assessment is therefore likely to focus more on price uncertainty, both with respect to the initial jump in energy prices and second-round effects which, over time, could build greater persistence into the core inflation pulse. This is not to say that the FOMC will vote on hiking interest rates anytime soon, in contrast to the RBA and RBNZ, but it likely means debate over a need to cut further will be deferred for the foreseeable future.

A hawkish RBNZ is prepared to act decisively

Kelly Eckhold
Chief Economist NZ

Views on the likely duration and the severity of the war waxed and waned over the week as markets wavered between the prospect of an end to a civilization (as mooted by President Trump) and the alternative of world peace in our time. The reality remains cloudy and the prospects of a long bumpy road ahead remain the base case. This week the RBNZ channelled these themes of uncertainty and the prospect of potentially longer-lived inflationary impacts, by delivering a hawkish hold. We brought forward our view of when the OCR will begin to normalise and have further fine-tuned how the overall tightening cycle may evolve.

The Iran war and its impacts on New Zealand remained front and centre this week. It's very well understood that the impact will critically depend on the size and duration of the disruption to global energy supply. And this week we saw the full gamut of possibilities on how the war could impact on New Zealand. Businesses and consumers have taken an initial pessimistic view of how the war will impact the operating environment. The questions now are whether those views will be borne out and just how far off course will inflation be knocked and for how long.

The early part of the week was dominated by Trump's Tuesday deadline to Iran to reopen the Straits of Hormuz to traffic or suffer devastating attacks on civilian infrastructure. Fortunately (and as frankly had seemed most likely) cooler heads prevailed, with a hastily arranged cease-fire "deal" announced that at the least allows for a couple of weeks of breathing space for further negotiations towards a permanent truce to occur. That at least is an advance on where we have been in the last six weeks, which had seen little evidence that discussions were even occurring between key players in Iran, Israel and the US. Initial negotiations will take place this weekend and reports concerning these will help determine the tone when markets reopen on Monday.

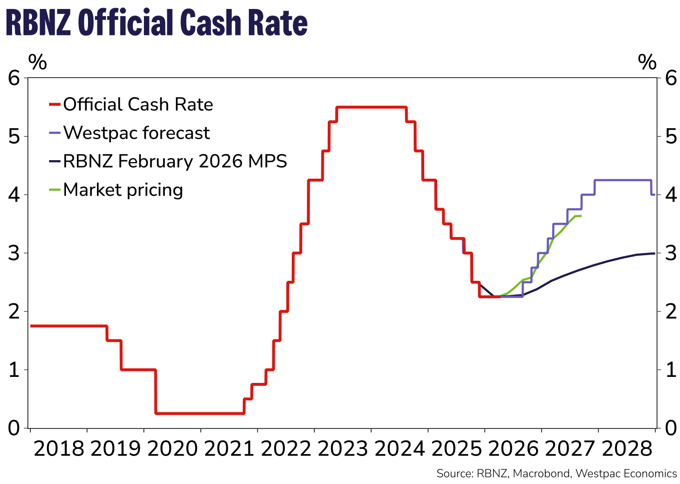
News of the ceasefire has seen a marked reduction in the risk premia evident in oil and refined products markets, resulting in a fall in prices. However, we think that the reality around the opposing parties' views on the "deal" means the prospect for a quick resolution of the situation looks low. As we stand today nothing has really changed in terms of New Zealand's medium-term fuel security situation as no meaningful increase in tanker flows out the Persian Gulf is occurring. That said, news that Asian refineries are securing crude feedstock from elsewhere – notably the US – was welcome. This would appear to lower the near-term risk of interruption to fuel inflows into New Zealand. This provides breathing space for the government to work on additional storage options and to fine-tune plans for the hopefully unlikely situation where interventions to allocate scarce fuel stocks become necessary.

This week the RBNZ channelled the themes of uncertainty about the outlook, but also realism on just how long-lasting the impact of the war might have on the economy and inflation outlook. The tone of the RBNZ's commentary shifted from the relatively sanguine approach that Governor Breman had communicated a couple of weeks ago. We signalled in our OCR preview that such a shift could be in the offing as the broader MPC had a greater opportunity to weigh in. And it seems the MPC was presented some initial forecasts which showed a markedly higher inflation profile was in the offing.

The MPC seems to have separated into a couple of camps: a more hawkish group that sees an argument for a proactive approach to lean against potentially persistent inflation pressures with a higher OCR from perhaps in May or July; and a more dovish camp that's happier to take more time to assess given the possibility that the activity implications of the oil shock could dampen inflation over the medium term. That latter group might perhaps be happier to wait until later in the year before beginning to raise rates, but even among this group there seems no appetite for OCR cuts. Hence, as it was before the Iran war, the issue for the MPC is when, not if, to tighten.

One interesting titbit from the RBNZ's communications was the sense that coming into the war the economy was gathering momentum following a slightly disappointing December quarter. The RBNZ retains optimism that economic momentum won't be unduly undermined by the war given the assumption that it will be over relatively soon. Certainly, some of the data seemed to support that optimism given that the Business NZ PMI for March showed resilience by falling only modestly, although understandably respondents expressed more concerns in the comments submitted with their responses. The ANZ's Heavy Traffic Index – a measure of commercial traffic flows – was also resilient in March, although light traffic volumes declined, likely reflecting higher fuel prices. We also notice that weekly filled jobs trends continued to track in line with year earlier levels through March, suggesting that any job shedding due to the war has not started.

This more hawkish take from the MPC prompted us to bring forward when we expect OCR increases to begin, from December to September 2026. We expect 25bp interest rate hikes at each meeting from then until the OCR reaches 3.5% – at which point the OCR will be firmly in the neutral zone from the RBNZ's perspective. After then, the outlook is cloudier and we expect a slower approach where the OCR increases at Monetary Policy Statements only and the pace of tightening accordingly slows. We continue to believe that the same shape of the latter part of the interest rate cycle where the OCR rises above our assessment of neutral (which remains at 3.75%), peaking at 4.25% in December 2027 and remaining at 4.25% through 2028 before returning to 3.75% in 2029. Hence, we have brought forward our OCR profile by two meetings.



There is a lot of uncertainty about how the economic outlook will play out for obvious reasons. Hence, we think that it's easier to break down the entire interest rate cycle into two components: the initial move of the OCR from stimulatory levels to the neutral zone; and then what happens from there. For now, we suspect it will be easier to get a handle on the first part of the cycle. And indeed, the bar to starting the lift-off of the OCR towards neutral levels is likely a lot lower than moving the OCR above neutral and beyond.

The key focus for the MPC seems to be what the high-frequency data can tell them about the peak in inflation, but especially how persistent inflation pressures are likely to be. Top of mind are indicators of inflation expectations (especially medium-term expectations), firm pricing behaviour and wage growth trends. The reality is that little will be learned about wage setting trends for some time – and indeed stronger wage growth if in the offing is more likely a 2027 than a 2026 story. So, the focus should be on what we can learn from the monthly inflation expectations surveys, the Quarterly Survey of Business Opinion and monthly Selected Price Indices to see if there are signs of broad and potentially persistent inflation pressures.

Looking to the week ahead, there are several data releases to watch. On Monday, we'll get the March Business NZ PSI which will provide a snapshot of how the service sector has been tracking coming into the current period. Later in the week, we'll get updates on migration and house sales. The latter is likely to show that house price growth has remained muted, with abundant supply and upward pressure on borrowing costs keeping a lid on prices.

On Friday we'll get updates on both selected consumer prices and retail spending for March. Those releases will warrant close attention, with the impacts of the Middle East conflict likely to be evident. On retail spending, we're expecting a fuel-related rise in spending as prices rocketed higher over the month and many people rushed to fill their tanks ahead of further price increases. However, increased spending on essentials like fuel and groceries is weighing on spending in other areas such as hospitality. As a result, core (ex-fuel) spending is likely to be down. On the price front, March's Selected Prices update will show a sharp rise in fuel costs. The big question is how those costs are rippling through the economy more broadly. The full impact of those indirect fuel price rises won't be evident until later this year. However, we will see some early impacts, with airlines announcing large increases in domestic and international airfares during the month.

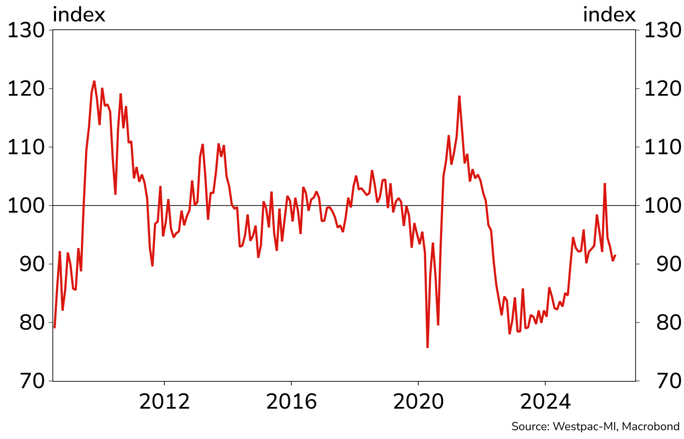
AUS: Apr Westpac-MI Consumer Sentiment (index)

Apr 14, Last: 91.6

Consumer sentiment edged 1.2% higher to 91.6 in March from 90.5 in February. The survey was conducted in the first week of the month, during the initial outbreak of conflict in the Middle East but prior to the RBA's 25bp rate hike in the third week of the month. While the survey as a whole showed a slight improvement, daily responses showed a material weakening over the course of the survey week with responses captured in the last three days of the week consistent with an index read of just 84.

The April survey is in the field over the week ending April 11. It will almost certainly show a decline with the Middle East conflict escalating (albeit with a ceasefire announced on April 8)and big spike in fuel prices (up +44c a litre vs last month). With last month's RBA rate hike and wider inflation fears also in the mix, sentiment looks primed for a sizeable fall.

Consumer Sentiment Index



AUS: Mar Labour Force – Employment Change (000s)

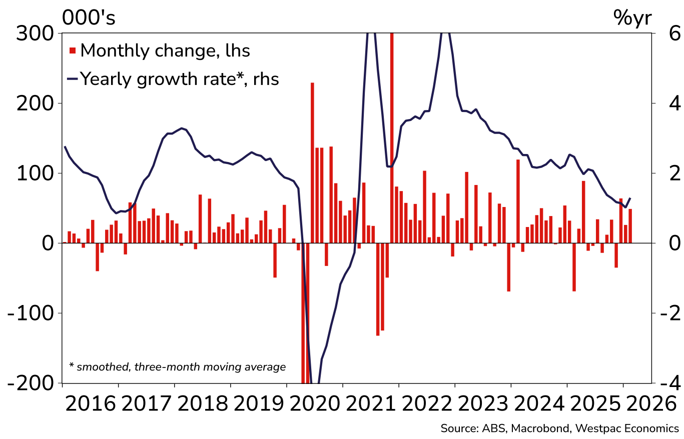
Apr 16, Last: 48.9, Westpac f/c: 25
Market f/c: 20.0, Range: 5.0 to 35.0

Feb's gain in employment was firmer than expected, but it was partly a result of a shift in seasonal patterns around marginally attached workers, resulting in softer Jan reads and stronger Feb reads for employment.

Having now moved past this seasonal dynamic, we have pencilled in a lift in employment of +25k for March – slightly firmer than the average gain over the preceding twelve months, reflecting the pre-conflict trend of firming employment growth.

The March survey was in the field from March 1 to 14. This will garner significant interest given it is the first official economic data release that overlaps the Middle East conflict. However, it is far too early to detect any meaningful shift in broad labour market conditions in response. See our preview [here].

Employment growth moving past its trough



AUS: Mar Labour Force – Unemployment Rate (%)

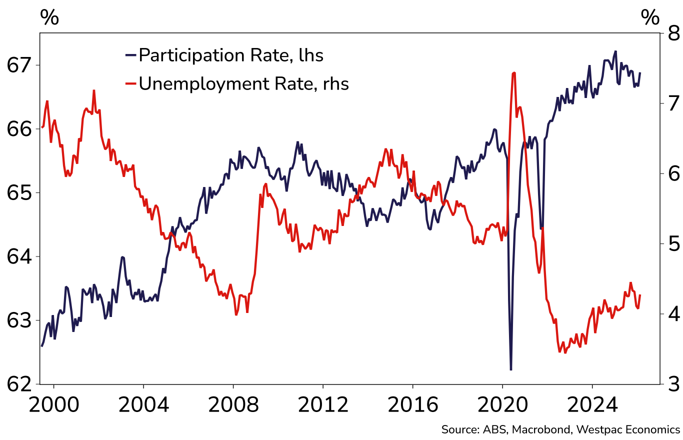
Apr 16, Last: 4.3, Westpac f/c: 4.2
Market f/c: 4.3, Range: 4.2 to 4.4

The unemployment rate lifted from 4.1% over Dec/Jan to 4.3% in Feb, taking it back to the levels seen through most of the second half of last year. The increase was mainly due to a lift in the participation rate, from 66.7% to 66.9%.

Lower prints for unemployment around in Dec/Jan came from lower labour force participation – while employment growth was weak, growth in the size of the labour force was even weaker, resulting in apparent 're-tightening'.

For March, we have pencilled in a slight dip in the participation rate to 66.8%, seeing the unemployment rate tick down to 4.2%. Looking further ahead, we think the unemployment rate will rise to 5% by year-end. See our preview [here].

Participation and unemployment rates lift

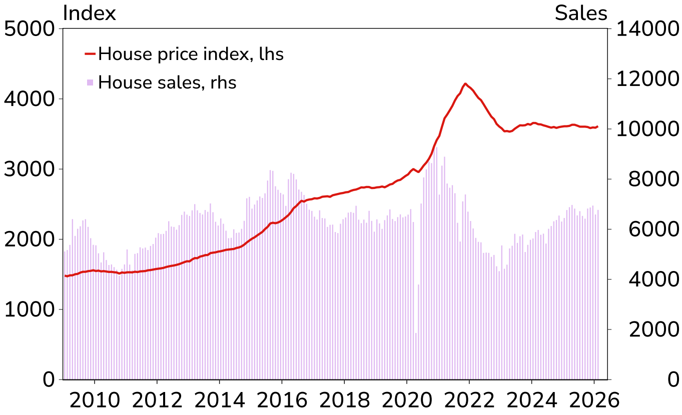


NZ: Mar REINZ House Sales and Prices (%yr)

Apr 15, Sales last: 0.3, Prices last: 0.0

February was a perkier month for the housing market, with a lift in the number of sales and a 0.6% seasonally adjusted rise in prices. However, neither measure has escaped from the generally sideways trend of the last year or so. Low mortgage rates are supporting demand, but the ample supply of homes on the market, low population growth and falling rents mean that there is a lack of pressure on house prices. The move higher in fixed-term mortgage rates in recent months has likely weighed on investor sentiment as well.

REINZ house sales and prices



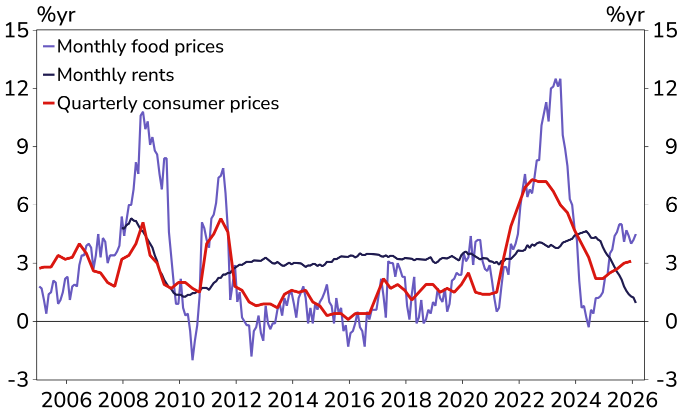
Source: REINZ, Macrobond, Westpac Economics

NZ: Mar Selected Prices (%mth)

Apr 17

The SPI covers around 50% of the full CPI (out 21 April) and will provide an early read on how the Middle East conflict has affected inflation pressures. Petrol prices are estimated to be up 20% over the past month with diesel prices up 50%. Importantly, those higher fuel prices have been flowing through to other prices. While the full impact of those indirect price rises won't be evident until later this year, March did see large increases in domestic and international airfares. There could be some related softness in other prices, like holiday accommodation, but that would only offset a small proportion of the other cost increases were seeing. On the housing front, we're expecting to see continued softness in rents.

NZ selected consumer prices



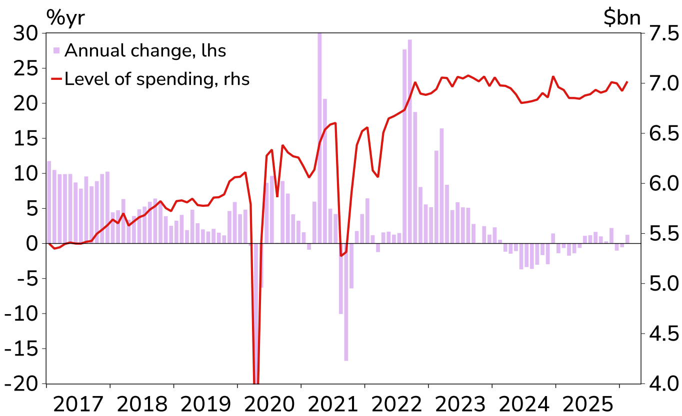
Source: Stats NZ, Macrobond, Westpac Economics

NZ: Mar Retail Card Spending (%mth)

Apr 17, Last: 1.4, Westpac: 0.5

We're expecting a 0.5% rise in retail card spending in March. But underlying that is an ugly breakdown of spending across categories. Underpinning the expected rise in spending is the large increases in petrol and diesel prices over the past month as a result of the Middle East war. We also saw households rushing to fill tanks and keep them full. We're also expecting a pick-up in grocery food spending, in part due to concerns about shortages which saw some households stocking up. However, core spending (ex fuel) is likely to be down over the month, with higher fuel prices and increased spending on essentials likely to see households reining in their spending in discretionary areas. In particular, we expect a sharp fall in hospitality spending.

NZ retail card spending



Source: Stats NZ, Macrobond, Westpac Economics

China: Q1 GDP

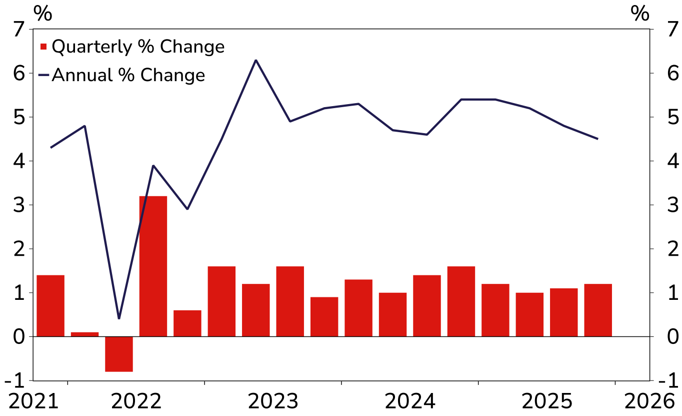
Apr 16, %y/y, Last: 4.5%, Mkt f/c: 4.8%, WBC f/c: 4.8%

China's authorities achieved their 5.0% growth ambition in 2025, albeit with an abnormally large contribution from net exports and despite persistent weakness in household demand. Given the scale of their trade surplus and China's dominant position in global manufacturing, such a feat will be very difficult to repeat in 2026 and beyond.

This year, growth is likely to be softer, closer to 4.5% than 5.0%, and will increasingly rely on the consumer and domestically-focused investment (housing and infrastructure) as trade provides support only at the margin.

In getting a read on growth opportunities in 2026, the monthly activity data to March will be as important as the GDP detail. This is true both for the baseline view and the risks.

2025 target achieved; 2026 at risk



Source: NBS, Macrobond, Westpac Economics

Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

What to watch

Things you should know

We respect your privacy: You can view the New Zealand Privacy Policy here, or the Australian Group Privacy Statement here. Each time someone visits our site, data is captured so that we can accurately evaluate the quality of our content and make improvements for you. We may at times use technology to capture data about you to help us to better understand you and your needs, including potentially for the purposes of assessing your individual reading habits and interests to allow us to provide suggestions regarding other reading material which may be suitable for you.

Disclaimer

This information has been prepared by Westpac and is intended for information purposes only. It is not intended to reflect any recommendation or financial advice and investment decisions should not be based on it. This information does not constitute an offer, a solicitation of an offer, or an inducement to subscribe for, purchase or sell any financial instrument or to enter into a legally binding contract. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice. Certain types of transactions, including those involving futures, options and high yield securities give rise to substantial risk and are not suitable for all investors. We recommend that you seek your own independent legal or financial advice before proceeding with any investment decision.

This information may contain material provided by third parties. While such material is published with the necessary permission none of Westpac or its related entities accepts any responsibility for the accuracy or completeness of any such material. Although we have made every effort to ensure this information is free from error, none of Westpac or its related entities warrants the accuracy, adequacy or completeness of this information, or otherwise endorses it in any way. Except where contrary to law, Westpac Group intend by this notice to exclude liability for this information. This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Disclaimer continues overleaf ▶

Fiji: Unless otherwise specified, the products and services for Westpac Fiji are available from www.westpac.com.fj © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia and registered as a branch in Fiji. The liability of its members is limited.

Papua New Guinea: Unless otherwise specified, the products and services for Westpac PNG are available from www.westpac.com.pg © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia. Westpac is represented in Papua New Guinea by Westpac Bank - PNG - Limited. The liability of its members is limited.

U.S: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission ("CFTC") as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation ("FDIC"). Westpac Capital Markets, LLC ('WCM'), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 ('the Exchange Act') and member of the Financial Industry Regulatory Authority ('FINRA'). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.
