Week beginning 4 May 2026

AUSTRALIA & NEW ZEALAND WEEKLY

Analysis and forecasts for this week's key releases.

In this week's edition:

Economic Insight: RBA May hike locked in.

The Week That Was: Policy perspectives from across the globe.

Focus on New Zealand: RBNZ's Breman says core inflation stable.

For the week ahead:

Australia: RBA policy decision, household spending indicator, dwelling approvals, goods trade balance.

New Zealand: RBNZ financial stability report, unemployment rate, employment, LCI wage inflation.

Japan: S&P Global services PMI.

China: RatingDog Services PMI.

Euro area: PPI, retail sales, Sentix investor confidence, S&P Global manufacturing PMI.

United States: Unemployment rate, average hourly earnings, trade balance, ADP employment change.

World: S&P Global Services PMI.

Information contained in this report current as at 1 May 2026.

RBA May hike locked in

Luci Ellis
Chief Economist, Westpac Group

We reaffirm our expectation that the RBA Monetary Policy Board (MPB) will raise the cash rate a further 25bps at its May meeting, to 4.35%. Inflation was higher than the MPB was comfortable with prior to the Middle East conflict, spurring it to lift the cash rate in both February and March. The RBA doubled down on its views that the economy was tighter than full employment and needed to be restrained to get inflation back under control.

Those rate hikes were based on data relating to the period before the war. While petrol prices have since reversed much of the 32.8% increase recorded in March, part of this was driven by the cut to excise, due to expire in a few months. Diesel prices – and thus freight costs – remain very elevated. The RBA could look through higher fuel prices if that was all that was happening, but it is not. Pass-through to other (non-fuel) prices is clearly starting, touching everything from building products to takeaway food if the reports we are receiving are any guide. The RBA will be hearing similar stories from firms in its liaison program.

March would have been very early days for much pass-through to be evident in the CPI. For example, many of the price increases for building products we are aware of did not take effect until 1 April. Today's CPI data nonetheless show scattered signs of pass-through to other prices. There were some promising signs in softer monthly prices of appliances and some other household goods. However, home-building and vehicle repair costs, along with downstream insurance inflation, all picked up in the month and quarter. Services related to audio-visual, computing and telecommunications also increased in the month, which for telecommunications went against the run of recent months' results.

This is occurring in the context of a starting point where non-tradables and services inflation are already too high. At 0.8%qtr, the RBA's preferred quarterly trimmed mean measure of inflation is still too high for the RBA to walk past, even though it was a touch lower than our pre-release expectation, a downside risk we had flagged.

Together with the spike in both consumer inflation expectations and business survey measures of costs and prices, the March inflation data will have the RBA's inflation warning lights flashing bright red. The MPB will see an imperative to address high inflation despite the caution expressed by the minority voters in March.

Some observers point to the demand-destruction higher fuel prices can unleash via the hit to real incomes, which will dampen inflation on its own eventually. This is plausible, but it will take too long to assuage an RBA facing an extended period of above-target inflation.

Indeed, based on its communication so far, especially the March minutes, the MPB puts little weight on that argument. The minutes characterised the supply shock as 'further exacerbating existing capacity pressures', and the future demand destruction as just a possibility. This view flows from the RBA's analysis that the economy is already too tight, as inferred from inflation already being above target. It is also taking signal from the income boost from higher LNG prices, but no disinflationary signal from exchange rate appreciation beyond what is already implied by the RBA's own actions on rates.

"We reaffirm our view that the RBA will raise the cash rate 25bps to 4.35% next week."

We also consider significant what the RBA has not communicated in recent weeks. When markets began pricing in multiple policy rate hikes by the ECB, Bank of England and Bank of Canada, senior officials at those central banks pushed back. Indeed, BoE Governor Bailey stated in an interview with Reuters that "markets had gotten ahead of themselves". ECB President Lagarde used a speech on 25 March to highlight that the current shock was likely to be less inflationary than the energy shock in 2022 when Russia invaded Ukraine at a time that other supply chains were still recovering from pandemic disruption. The RBA has not pushed back in the same way. In addition to the higher starting point for inflation here, part of the reason seems to be that Australia is already seeing the pass-through to other prices that other central banks are still at the stage of watching for.

All this adds up to the MPB wanting to tighten policy further. The refreshed forecast in the Statement on Monetary Policy will allow the RBA to set out its views of the inflation impulse from the war, making May a good opportunity to take, and explain, the next step.

The outlook for the cash rate beyond May is necessarily less certain. We hold to our base case that there will be two further rate hikes after May, in June and August. The RBA's experience last year, when underlying inflation popped back up almost immediately after it cut rates, will have nudged some within the RBA to the idea that the cash rate needs to be higher than its previous peak to really get inflation under control (for the technically-minded, their individual estimates of the neutral rate got revised up). While outwardly the RBA continues to characterise its strategy as being willing to be a bit less activist to hold onto the post-pandemic employment gains, most of the original architects of that strategy have left the building and those inclined to be more activist will have more influence.

There is a chance that the RBA ends up doing less than our base case, if the voices on the MPB that counselled caution in March can sway other members, or if pass-through to non-fuel prices turns out to be less than current information suggests. However, we put less weight on this scenario given the starting point for domestically driven inflation.

Cliff Notes: policy perspectives from across the globe

Elliot Clarke, Head of International Economics
Illiana Jain, Economist

In Australia, the Q1 CPI report provided the first official estimate of the impact on local prices of the Middle East conflict. Headline inflation accelerated sharply to 1.4% (4.1%yr) in Q1 on the back of a 33% surge in auto fuel prices in March alone. Fortunately, a large portion of this spike has since unwound following the fuel excise cut, although fuel prices remain materially above the pre-conflict level.

While there were some signs of price pressures across home-building, vehicle repair and insurance, it is too early to detect, let alone accurately assess, evidence of pass-through. That said, underlying trimmed mean inflation still rose 0.8% in Q1, with annual growth at 3.5%yr, a full percentage point above the mid-point of the target. Notably, March's data pre-dates the wide range of price increases reported anecdotally for building products and other items which came into effect in April.

Following the CPI release, Chief Economist Luci Ellis reaffirmed our call for the RBA to increase the cash rate by 25bps to 4.35% at the May policy meeting. The combination of an elevated starting point for inflation and imminent risk of pass-through will compel the RBA to act pre-emptively to contain inflation expectations. Next week's voting split, updated staff forecasts and the tone of communications will be informative on the baseline policy outlook and risks. For now, we retain our base case of another two hikes beyond May, in June and August, taking the cash rate to a peak of 4.85%.

The combination of higher inflation, slower growth and rising unemployment is also fostering a complex macroeconomic backdrop for the 2026/27 Federal Budget, due May 12. A full preview will be published next week, but our preliminary note sets out our central expectation that commodity price windfalls are likely to more than offset spending pressures and result in a net improvement in the budget's bottom line over the forward estimates.

Offshore, at the beginning of the week the Bank of Japan held its policy rate at 0.75% in a 6-3 vote. Updated forecasts highlight the risk of stagflation, with FY26 growth revised sharply lower to 0.5% (from 1.5%) and core inflation now expected to remain above 2% through to FY28. With Japanese firms increasingly willing to pass on costs, the Middle East conflict risks amplifying domestic inflationary pressures.

The BoJ remains focused on restoring the policy rate as an effective policy lever. Further hikes were signalled, but the timing left open. With policy settings still considered accommodative and a weak yen threatening import inflation, we anticipate the next hike to occur in June, though there is a risk it is delayed to July. The Financial Statements Statistics update due on 1 June will be an important release to gauge firms' response to the crisis and the implications for both inflation and activity.

In the US, the FOMC then kept the stance of policy unchanged at its April meeting. The tone of the statement was balanced, with a sanguine view on GDP growth and the labour market and inflation simply characterised as "elevated". The statement also noted that "the Committee is attentive to the risks to both sides of its dual mandate", while Chair Powell remarked in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Governors Hammack, Kashkari and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate and signal that a hike was as likely as a cut on current information.

The Bank of Canada also kept its policy stance unchanged. The conflict in the Middle East and US trade policy were called out as sources of uncertainty for the global economy. But overall, the outlook for Canada's economy was viewed as little changed from January. Assuming a protracted resolution to the Middle East conflict into 2027, GDP growth is expected to strengthen through 2027-2028 and inflation to turn back towards the 2%yr target from 3%yr in the near term, allowing the Bank of Canada to remain on hold.

> **"The initial consequences of the Middle East conflict for Australian consumer inflation were seen."**

Thereafter in Europe, the ECB Governing Council opted to maintain its current policy stance. The ECB acknowledged that "upside risks to inflation and downside risks to growth have intensified" and the merits of a rate hike were discussed, but developments to date were not sufficient to convince the Governing Council to take immediate action – the decision to hold was unanimous. At its previous meeting in March, the ECB presented two downside scenarios alongside its baseline. In the April press conference, President Lagarde was reluctant to discuss the details of those scenarios, noting simply that conditions are diverging from March's baseline and the upcoming six weeks "will be the right time" to assess the economy "in order to make an informed decision". Her comments appeared carefully chosen to signal openness to a rate increase in June. Therefore, barring any major changes in the dynamics of the Middle East conflict, we continue to believe that a 25bp policy rate hike is the most probable outcome at the next meeting.

The Bank of England's April meeting also unfolded broadly as expected, the MPC voting 8-1 to keep the policy rate at 3.75%. Chief Economist Hew Pill was the sole dissenter, preferring "a prompt but modest hike in Bank Rate" to contain the risk of second-round inflationary effects. The policy statement maintained a hawkish bias, however, emphasising the potential impact of the energy price shock – its scale and duration – on UK inflation and the committee's readiness to act to ensure inflation returns to the 2% target. Policy makers also showed concern over economic growth and the labour market, with slack increasing prior to the conflict.

Risks to the economic outlook were illustrated using three alternative scenarios, differentiated by oil and gas price assumptions and the persistence of second-round inflation effects. In the first two scenarios, the Brent oil price averages $108 in Q2 2026 then decreases at different speeds. Both scenarios showed headline inflation peaking above 3.5%yr this year before easing in 2027. Importantly, the Governor emphasised that, if the economy evolves in line with these scenarios, further policy tightening may not be required – the removal of the circa 50bp of easing priced before the conflict potentially sufficient to bring inflation back to the 2% target. The committee judged that the most severe scenario – where Brent averages $127 this quarter and remains above $100 well into 2028 – would likely require "a forceful tightening in monetary policy", however. The Governor declined to specify what interest rate changes this would entail, but noted the need to act quickly to minimise second-round effects. Bank Rate hikes this year are therefore not guaranteed, but with Brent Oil surging as much as 20% this week to a peak around USD126 (now USD114) as the US and Iran remained at an impasse, conditions may eventually become too close to the BoE's most severe scenario for the MPC to ignore. We continue to expect a Bank Rate hike at the next policy meeting in June, with further tightening possible, but dependent on evolving circumstances.

RBNZ's Breman says core inflation stable

Darren Gibbs
Senior Economist

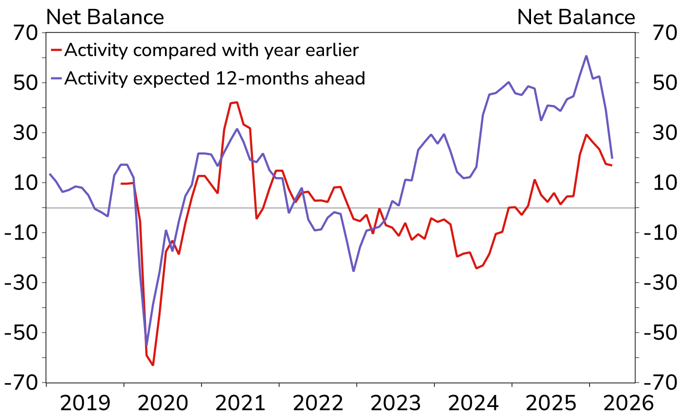
The domestic focus during this past holiday-shortened week has remained on gathering up-to-date information on how the New Zealand economy is being impacted by the ongoing Middle East conflict and assessing the RBNZ's likely response.

Early in the week, RBNZ Governor Breman participated in an event in Hamilton as part of her regional engagement programme. While there were no formal speech notes, the RBNZ issued a press statement outlining the points that she planned to make during a panel discussion, while audio from the session was also made available. In our view, Breman's comments were consistent with those made at the 8 April OCR review. Specifically, Breman stated that "…the Reserve Bank remains focused on balancing inflation control with supporting economic recovery." And she reiterated that "…monetary policy can and should ensure that a temporary increase in inflation does not turn into enduring inflationary pressures."

Perhaps the main news was Breman's reflection on last week's Q1 CPI report. She noted that annual inflation of 3.1% was slightly higher than expected at the time of the April OCR Review. But importantly, she added that "…measures of core inflation, which look through this volatility, have remained stable within the target band." She also emphasised that the Bank was focused on the prospect of second-round inflation effects, specifically transmitted through the labour market, rather than the first-round impact of higher fuel prices. These comments suggest that the RBNZ will take the time necessary to fully understand the nature and implications of the conflict before deciding how it should respond. Breman's comments were the initial catalyst for the repricing of prospects of a rate hike at the RBNZ's 27 May meeting, which the market now views as around 25% (down from 60% at the beginning of the week). Confidence reports released later in the week – discussed below – have contributed to that repricing. For the record, Westpac continues to forecast a first lift in the OCR in September.

Staying with the RBNZ, it was announced this week that the Minister of Finance and the Bank's Monetary Policy Committee (MPC) have agreed changes to the MPC Charter. These changes will provide more transparency and accountability to MPC decision-making. They also are a subset of the reforms we recommended in a note published last year before the new Governor took up her role. While the new Charter continues to encourage the formation of a consensus decision, it requires that the votes of individual members be attributed when a vote takes place. As well as attributing votes, material differences of view or judgement within the Committee will also be attributed in the published Record of Meeting, even when no vote is taken. This will make it easier for MPC members to publicly express differing views on the economic outlook and monetary policy strategy (indeed, it makes clear that members are encouraged to communicate those views externally). The new Charter will be in place for the RBNZ's 27 May meeting so will help elucidate any differences in view amongst the MPC. These reforms are a welcome step in the right direction in our view. Although just how effective the changes will be is still to be assessed in light of just how frequent votes are and the threshold applied when determining if an alternative view is specifically recorded.

Activity past year vs expected year ahead

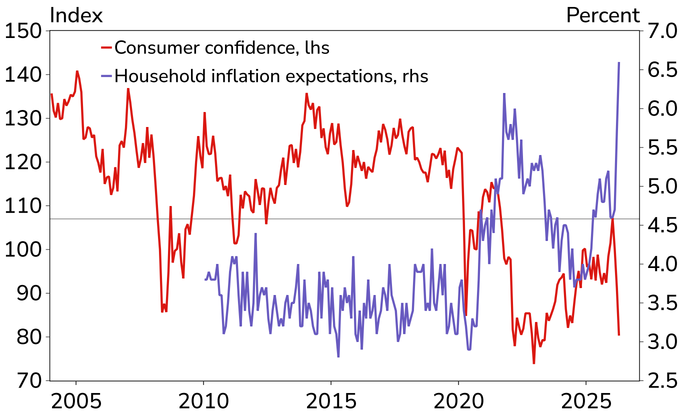


Source: ANZ, Stats NZ, Macrobond, Westpac Economics

On the data front, the focus was the ANZ's Business Outlook Survey for April. Overall, the broad theme of the survey was much as should have been expected based on the late responses to last month's survey and the results of last week's QSBO business survey. Headline business confidence has taken a significant knock, with net optimism declining to -10.6 from 32.5 in April – the first negative reading since 2023. Encouragingly, firms remain more optimistic about their own situation, although the proportion of firms expecting their own trading activity to increase over the next year has halved to 19.6. A similar proportion continue to report an increase in activity levels over the past year, suggesting that demand is holding up for many firms. Uncertainty is curbing firms' willingness to invest in expanding their businesses, however, with net hiring intentions turning modestly negative in April and net investment intentions sliding to barely positive levels. Overall, this survey portrays the picture we expected to see a few weeks ago when we significantly downgraded our view on growth through mid-2026.

Predictably, firms' year-ahead inflation expectation increased to 3.81% from 3.08% previously, even as the net proportion of firms reporting an intention to raise prices fell modestly from March. Firms reported a sharply higher expected increase in their costs over the next three months, whereas expected price increases were little changed from last month's survey. This points to significant pressure on firms' profit margins. Perhaps as a response, firms forecast for year-ahead wage growth fell to just 2.5% - now close to last year's low. The latter is likely to be viewed somewhat encouragingly by the RBNZ given its concern that high near-term headline CPI inflation rate could morph into second-round inflation by driving a wage-price spiral (albeit the current slack in the economy).

Consumer confidence and inflation expectations



Source: ANZ, Westpac New Zealand, Macrobond, Westpac Economics

Turning to the rest of this week's data, the ANZ's consumer confidence index slumped a further 12% to a three-year low of 80.3 in April. This reading is in line with the responses that had been collected in the final week of the March survey, suggesting that confidence may have been broadly stable over the past month. The net proportion of households thinking it's a good time to buy a major household item (the best retail indicator) fell 11ppts to -25, which is the lowest level since September 2024. This appears consistent with some recent anecdotes from the retail sector. Household's two-year ahead inflation jumped 0.9ppts to 6.6%, thus exceeding the levels reached even during the Covid spike.

The final piece of data this week was the building consents report for March. The number of dwelling consents fell a modest 1.3% during the month but were still 8.2% higher than a year earlier. Given that most of the consents issued in March were likely filed in February, it will be another month or two before any impact from the Middle East conflict becomes evident in the building consents figures.

One piece of good news this week was the Government's announcement that it had reached an agreement with one of the largest fuel companies to supply 90m litres of diesel – equivalent to nine days of regular demand – to fill the additional storage space that will become available towards the end of June. This will increase the average level of diesel in the country at any given time by about a third, adding a small but welcome degree of resilience.

Looking ahead to next week, the focus domestically will be on the March quarter labour market surveys. While these surveys will give no insight about the emerging impact of the Middle East conflict, they will still provide important information on the degree of spare capacity and labour cost pressure prior to the oil price shock.

As my colleague Michael Gordon wrote in his preview, we expect that the unemployment rate likely remained stable at 5.4% during the March quarter. While the tax-based Monthly Employment Indicator (MEI) points to a modest lift in employment in the quarter – broadly in line with growth in the working age population – we expect the Household Labour Force Survey (HLFS) of measure of employment will post a 0.1%q/q decline. This simply reflects our sense that the 0.5%q/q increase in the HLFS measure in the December quarter was likely overstated, with the MEI failing to validate the HLFS's indication of a sharp rise in employment among the under-25s during that quarter. With the labour force participation rate in the December quarter likely similarly overstated, we expect a modest decline in participation to be recorded in the March quarter.

Turning to labour costs, given the usual lags, spare capacity in the labour market will likely continue to have restrained wage growth in the March quarter. We expect a 0.5%q/q rise in the Labour Cost Index (LCI) for the March quarter, leaving annual growth at around 2%. Our forecast for private sector wage growth is slightly more subdued at 0.4%q/q. The public sector tends to see larger pay increases in March quarters – we've pencilled in a 0.8%q/q rise, though this would still see annual growth slow from 2.2% to 2.0%.

Our picks are a little softer than the RBNZ's February Monetary Policy Statement forecasts, which assumed faster jobs growth and a decline in the unemployment rate by this point. At the margin, a result in line with our forecasts would strengthen the case for caution before lifting the OCR. But the bigger issue for the RBNZ will be what has happened since the MPS: the Middle East oil shock will hinder the economic recovery, potentially leading to delays in hiring, layoffs and business failures. The RBNZ will need to balance what this might mean for medium-term inflation against the risk that high near-term inflation could nonetheless raise medium-term inflation expectations.

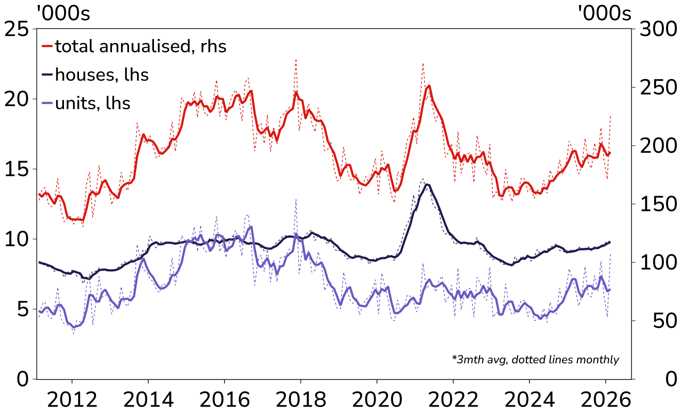
AUS: Mar Dwelling Approvals (%mth)

May 4, Last: 29.7, Westpac f/c: –5.0
Market f/c: –10.0, Range: –29.0 to –4.0

Dwelling approvals rebounded sharply in Feb, up 29.7%mth and 14%yr. The bounce more than retraced a 20% drop through Dec–Jan that followed a choppy run over the previous four months. The volatility has centred on private unit approvals. Private detached house approvals were broadly flat in Feb but have shown positive underlying momentum since the start of the year.

March is likely to show a move lower, the Feb jump taking high rise approvals to an elevated high level that is unlikely to sustain. Detached house and medium density unit approvals should retain some positive momentum. While the mix is uncertain, a 5% decline in total approvals is plausible. Note that it will take a several months for interest rate rises and other developments to impact dwelling approvals.

Approvals ascent re-emerges



Source: ABS, Macrobond, Westpac Economics

AUS: Mar Household Spending Indicator (%mth)

May 5, Last: 0.3, Westpac f/c: 2.0
Mkt f/c: 1.5, Range: –0.5 to 2.4

The Household Spending Indicator rose 0.3%mth in Feb, matching Jan's outcome and in line with its average monthly pace over the past two years. Annual growth edged up to 4.6%yr.

March is expected to show a big jump led by a sharp rise in fuel prices and a pull-forward in fuel purchases. Our **Westpac-DataX Card Tracker** suggests the ABS spending indicator is likely to be up around 2% for the month. That would mark the strongest monthly increase since July 2022 and take annual growth to just above 6.5%yr. Note that the March report will also include estimates for Q1 household spending in real, inflation-adjusted terms. With nominal spend tracking a 1.1% rise in the quarter and the CPI posting a 1.4% rise, real spending may record a small decline for the quarter.

Monthly household spending indicator

AUS: RBA Policy Decision (%)

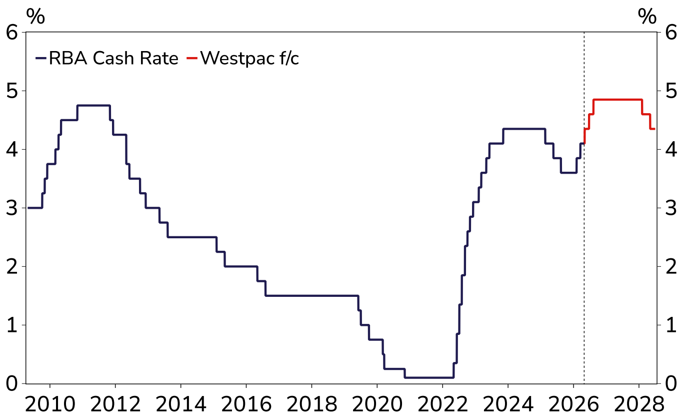
May 5, Last: 4.10, Westpac f/c: 4.35
Market f/c: 4.35, Range: 4.10 to 4.35

Westpac expects the RBA Monetary Policy Board (MPB) will deliver its third consecutive 25bp rate hike at the May meeting, raising the cash rate back to its previous peak of 4.35%.

The Q1 CPI report demonstrated that inflation was higher than the MPB was comfortable with prior to the Middle East conflict. Pass-through of higher fuel costs to other prices throughout the economy is clearly starting. Given the higher starting point and faster pass-through, communications from RBA officials have not pushed back on market's pricing in rate hikes over recent weeks, unlike other central banks.

This round will include a refresh of the staff forecasts which will allow the RBA to set out its views of the inflation impulse from the war. For more detail, see Page 2.

RBA to hike in May



Source: RBA, Macrobond, Westpac Economics

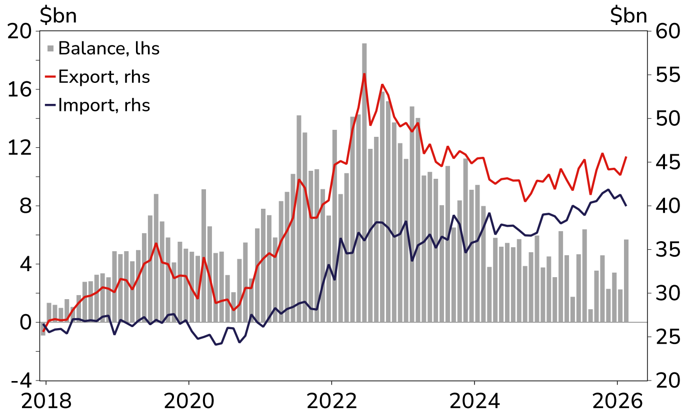
AUS: Mar Goods Trade Balance ($bn)

May 7, Last: 5.7, Westpac f/c: 3.9
Mkt f/c: 4.4, Range: 2.0 to 7.5

A combination of an increase in gold exports, along with a rebound in rural goods outflows, led to an almost 5%mth rise in export values in February. Imports fell by more than 3%mth, primarily due to ongoing volatility in key capital goods imports, leaving the goods trade balance at a seven-month high of $5.7bn.

March is typically a strong month for key commodity exports, but seasonally adjusted data may show lower shipments of the Big 3 commodities. This is despite a significant rise in coal exports, driven by increased demand from Asia. Disruptions from the Middle East conflict could affect Australian imports – although data from ports does not currently indicate a significant impact on oil imports, so we have pencilled in a modest recovery in imports. Overall, we think the headline goods surplus will ease back below $4bn, a level in line with last year's average.

More volatility in goods trade to be expected



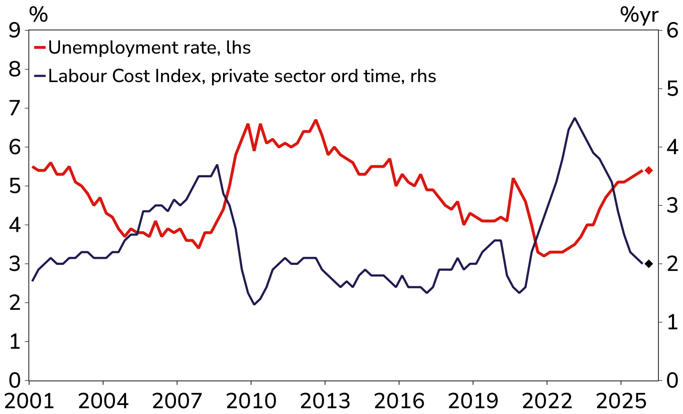
Source: ABS, Macrobond, Westpac Economics

NZ: Q1 Labour Market Surveys (%)

May 6, Unemployment Rate, Last: 5.4, Westpac f/c: 5.4
May 6, LCI Private Sector, Last: 0.5, Westpac f/c: 0.4

We expect the unemployment rate to hold steady at 5.4% for the March quarter. High-frequency indicators have pointed to a modest lift in jobs in recent months, though not outpacing the growth in the working-age population. We do expect to see a small downward correction in the HLFS employment measure, after an overstated 0.5% rise in the December quarter, but this doesn't alter the general picture – we recommend focusing on the unemployment rate, as this is less vulnerable to sampling errors. Given the existing slack in the labour market, wage growth is likely to have remained subdued.

Labour market indicators



Source: Stats NZ, Macrobond, Westpac Economics

US: April employment report

May 8, payrolls, Last: 178k, Mkt f/c: 60k, WBC f/c: 90k
May 8, U/E rate, Last: 4.3%, Mkt f/c: 4.3%, WBC f/c: 4.3%

Nonfarm payrolls rebounded 178k in March, taking the 3-month average to 68k, a material step up from the month-average through the second half of 2025, -8k.
While the unemployment rate is essentially unchanged at 4.3% over the past year, household employment growth has been materially weaker than payrolls. Had the participation rate not declined by around 0.7ppts, the unemployment rate would instead be close to 5.0%.
In April, a robust gain in employment, circa 90k for payrolls, is likely to keep the unemploymen rate unchanged, though risks for employment remain skewed to the downside after a weak period for activity growth.

Household survey suggests risks to linger

The words “believe”, “anticipate”, “expect”, “intend”, “plan”, “predict”, “continue”, “assume”, “positioned”, “may”, “will”, “should”, “shall”, “risk” and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author’s knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac’s Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac (“WNZL”). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Cliff Notes: policy perspectives from across the globe

Key insights from the week that was.

In Australia, the Q1 CPI report provided the first official estimate of the impact on local prices of the Middle East conflict. Headline inflation accelerated sharply to 1.4% (4.1%yr) in Q1 on the back of a 33% surge in auto fuel prices in March alone. Fortunately, a large portion of this spike has since unwound following the fuel excise cut, although fuel prices remain materially above the pre-conflict level.

While there were some signs of price pressures across home-building, vehicle repair and insurance, it is too early to detect, let alone accurately assess, evidence of pass-through. That said, underlying trimmed mean inflation still rose 0.8% in Q1, with annual growth at 3.5%yr, a full percentage point above the mid-point of the target. Notably, March's data pre-dates the wide range of price increases reported anecdotally for building products and other items which came into effect in April.

Following the CPI release, Chief Economist Luci Ellis reaffirmed our call for the RBA to increase the cash rate by 25bps to 4.35% at the May policy meeting. The combination of an elevated starting point for inflation and imminent risk of pass-through will compel the RBA to act pre-emptively to contain inflation expectations. Next week's voting split, updated staff forecasts and the tone of communications will be informative on the baseline policy outlook and risks. For now, we retain our base case of another two hikes beyond May, in June and August, taking the cash rate to a peak of 4.85%.

The combination of higher inflation, slower growth and rising unemployment is also fostering a complex macroeconomic backdrop for the 2026/27 Federal Budget, due May 12. A full preview will be published next week, but our preliminary note sets out our central expectation that commodity price windfalls are likely to more than offset spending pressures and result in a net improvement in the budget's bottom line over the forward estimates.

Offshore, at the beginning of the week the Bank of Japan held its policy rate at 0.75% in a 6-3 vote. Updated forecasts highlight the risk of stagflation, with FY26 growth revised sharply lower to 0.5% (from 1.5%) and core inflation now expected to remain above 2% through to FY28. With Japanese firms increasingly willing to pass on costs, the Middle East conflict risks amplifying domestic inflationary pressures.

The BoJ remains focused on restoring the policy rate as an effective policy lever. Further hikes were signalled, but the timing left open. With policy settings still considered accommodative and a weak yen threatening import inflation, we anticipate the next hike to occur in June, though there is a risk it is delayed to July. The Financial Statements Statistics update due on 1 June will be an important release to gauge firms' response to the crisis and the implications for both inflation and activity.

In the US, the FOMC then kept the stance of policy unchanged at its April meeting. The tone of the statement was balanced, with a sanguine view on GDP growth and the labour market and inflation simply characterised as "elevated". The statement also noted that "the Committee is attentive to the risks to both sides of its dual mandate", while Chair Powell remarked in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Governors Hammack, Kashkari and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate and signal that a hike was as likely as a cut on current information.

The Bank of Canada also kept its policy stance unchanged. The conflict in the Middle East and US trade policy were called out as sources of uncertainty for the global economy. But overall, the outlook for Canada's economy was viewed as little changed from January. Assuming a protracted resolution to the Middle East conflict into 2027, GDP growth is expected to strengthen through 2027-2028 and inflation to turn back towards the 2%yr target from 3%yr in the near term, allowing the Bank of Canada to remain on hold.

Thereafter in Europe, the ECB Governing Council opted to maintain its current policy stance. The ECB acknowledged that “upside risks to inflation and downside risks to growth have intensified” and the merits of a rate hike were discussed, but developments to date were not sufficient to convince the Governing Council to take immediate action – the decision to hold was unanimous. At its previous meeting in March, the ECB presented two downside scenarios alongside its baseline. In the April press conference, President Lagarde was reluctant to discuss the details of those scenarios, noting simply that conditions are diverging from March’s baseline and the upcoming six weeks “will be the right time” to assess the economy “in order to make an informed decision”. Her comments appeared carefully chosen to signal openness to a rate increase in June. Therefore, barring any major changes in the dynamics of the Middle East conflict, we continue to believe that a 25bp policy rate hike is the most probable outcome at the next meeting.

The Bank of England’s April meeting also unfolded broadly as expected, the MPC voting 8-1 to keep the policy rate at 3.75%. Chief Economist Hew Pill was the sole dissenter, preferring “a prompt but modest hike in Bank Rate” to contain the risk of second-round inflationary effects. The policy statement maintained a hawkish bias, however, emphasising the potential impact of the energy price shock – its scale and duration – on UK inflation and the committee’s readiness to act to ensure inflation returns to the 2% target. Policy makers also showed concern over economic growth and the labour market, with slack increasing prior to the conflict.

Risks to the economic outlook were illustrated using three alternative scenarios, differentiated by oil and gas price assumptions and the persistence of second-round inflation effects. In the first two scenarios, the Brent oil price averages $108 in Q2 2026 then decreases at different speeds. Both scenarios showed headline inflation peaking above 3.5%yr this year before easing in 2027. Importantly, the Governor emphasised that, if the economy evolves in line with these scenarios, further policy tightening may not be required – the removal of the circa 50bp of easing priced before the conflict potentially sufficient to bring inflation back to the 2% target. The committee judged that the most severe scenario – where Brent averages $127 this quarter and remains above $100 well into 2028 – would likely require “a forceful tightening in monetary policy”, however. The Governor declined to specify what interest rate changes this would entail, but noted the need to act quickly to minimise second-round effects. Bank Rate hikes this year are therefore not guaranteed, but with Brent Oil surging as much as 20% this week to a peak around USD126 (now USD114) as the US and Iran remained at an impasse, conditions may eventually become too close to the BoE’s most severe scenario for the MPC to ignore. We continue to expect a Bank Rate hike at the next policy meeting in June, with further tightening possible, but dependent on evolving circumstances.

This information does not constitute an offer, a solicitation of an offer, or an inducement to subscribe for, purchase or sell any financial instrument or to enter into a legally binding contract. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice. Certain types of transactions, including those involving futures, options and high yield securities give rise to substantial risk and are not suitable for all investors. We recommend that you seek your own independent legal or financial advice before proceeding with any investment decision.

This information may contain material provided by third parties. While such material is published with the necessary permission none of Westpac or its related entities accepts any responsibility for the accuracy or completeness of any such material. Although we have made every effort to ensure this information is free from error, none of Westpac or its related entities warrants the accuracy, adequacy or completeness of this information, or otherwise endorses it in any way. Except where contrary to law, Westpac Group intend by this notice to exclude liability for this information. This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward-looking statements. The words “believe”, “anticipate”, “expect”, “intend”, “plan”, “predict”, “continue”, “assume”, “positioned”, “may”, “will”, “should”, “shall”, “risk” and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-

looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability-related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the

appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at the internet address www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Fiji: Unless otherwise specified, the products and services for Westpac Fiji are available from www.westpac.com.fj © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia and registered as a branch in Fiji. The liability of its members is limited.

Papua New Guinea: Unless otherwise specified, the products and services for Westpac PNG are available from www.westpac.com.pg © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia. Westpac is represented in Papua New Guinea by Westpac Bank - PNG - Limited. The liability of its members is limited.

U.S.: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission ("CFTC") as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation ("FDIC"). Westpac Capital Markets, LLC ('WCM'), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 ('the Exchange Act') and member of the Financial Industry Regulatory Authority ('FINRA'). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent

liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

“professional clients” as defined by the rules of the Financial Conduct Authority and is not intended for “retail clients”. Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area (“EEA”): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH (“WEG”) under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority (‘BaFin’) and subject to its regulation. WEG’s supervisory authorities are BaFin and the German Federal Bank (‘Deutsche Bundesbank’). WEG is registered with the commercial register (‘Handelsregister’) of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an ‘investment recommendation’ and/or ‘information recommending or suggesting an investment’, both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) (“MAR”). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Times are AEST. All data forecasts are m/m or q/q and seasonally adjusted unless otherwise specified. Forecasts for Australian data are our forecasts and for other countries they are consensus forecasts.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

10 April 2026

HORMUZ HIT CPI & CORE INFLATION

The magnitude of the shock has significant implications

Key points

- The Iran conflict is the largest energy shock since the oil crises of the 1970s/80s. For more details on the scenario underpinning these projections please refer to Middle East Crisis Update.
- Westpac is forecasting a 1.5%qtr/4.2%yr gain in the March quarter CPI. The Trimmed Mean is forecast to lift 0.9%qtr/3.5%yr.
- Headline inflation is now peaking at 5.4%yr in the June quarter before easing back to 4.6%yr by end 2026.
- Core inflation peaks around 4%yr in the second half of 2026 and does not return to 3%yr till the end of 2027.
- The monthly CPI to rise 1.3% in March and April with the annual pace peaking at 5.8%yr in May.
- The Trimmed Mean is set to rise 0.2% in March followed by 0.5% increase in April; the annual pace peaks around 4%yr in June and holds this pace till year end.

- Pass-through to construction inputs has been reported by Tradelinks to be greater than usual.

A crude shock, surcharges may change expectations

Justin Smirk
Senior Economist

A materially bigger and more persistent shock ...

As noted in our Middle East Crisis Update, a prolonged disruption in the Gulf is sustaining higher energy prices. We now have Brent averaging around US$120/bbl in the June quarter. This is based on our assessment of unfolding infrastructure damage and a slow recovery in shipping traffic through the Strait of Hormuz.

So despite the announced cut in fuel excise, we expect CPI inflation to peak at 5.4%yr in the June quarter, while the monthly measure, which the ABS highlights as the main indicator and can be significantly more volatile that the quarterly series, may peak close to 6%yr in May.

Westpac expects core inflation, as measured by the quarterly Trimmed Mean, peaking around 4% in the second half of year; food, household services and even new dwelling prices, alongside broader non-energy pass-through, are key risks to our estimates. We also note that the monthly TM spikes a bit faster hitting a 4.0%yr pace by June.

In response, the RBA is now expected to deliver three rate hikes (May, June, August), taking the cash rate to a peak of 4.85%. As the combined supply shock and tighter policy weigh on demand, GDP growth is expected to trough at 1%yr in 2027 while unemployment peaks around 5% at end 2026. A deeper dive into these issue are summarised in the video by the Westpac Economics Team led by Luci Ellis "Longer conflict, higher inflation and cash rate"

This was, of course, before the announcement of a two-week ceasefire on the 8th of April (Asian time). This is obviously welcome and a positive risk scenario relative to the baseline we outlined last week and underpins our current inflation forecasts. Should the ceasefire hold – and that is a big if – a faster opening up of the Strait of Hormuz would result in energy prices tracking between the profile we currently have and the one underpinning the forecasts in the March

[Market Outlook](#) (which was based on a one-month closure of the Strait with little infrastructure damage). For further background on the unfolding risks to our current scenario see Luci Ellis's note "[On hoping you are wrong](#)".

In this bulletin we are also release a forward profile of the Monthly CPI. This process is still at a preliminary stage but given the extreme surge we expect to see in the Monthly CPI, we thought it would be timely to provide some guidance out to December 2026.

March and April headline CPI set to surge

The Israel/US assault on Iran began in the morning of the 28th of February. We expect the resulting surge in oil prices to have the largest hit to the CPI in the months of March and April before flattening out in May and June. Auto fuel is set to increase again in July but this is due to the expiration of the recent temporary reduction in fuel excise.

Westpac is forecasting a 1.3% increase in March on the back of a 35% increase in auto fuel. At two decimal points the increase is 1.26% but we warn that given the current volatility in prices, there is a greater than usual degree of uncertainty so these finer estimates should be used with even more caution than usual.

The annual pace lifts from 3.7%yr to 4.7%yr in March.

Our current scenario has auto fuel lifting a further 2% and 6% respectively in April and May. The April CPI will also be boosted by a seasonal bounce in clothing & footwear and holiday travel & accommodation plus the annual increase in health insurance premiums. The annual pace of CPI inflation is expected to peak at 5.8%yr in May (so there is a risk it could peak as high as 6%yr) and then slowly moderate to 4.7%yr by December 2026.

Core inflation is higher for longer

We estimate a 0.23%mth rise in the Monthly Trimmed Mean (TM) in March holding the annual pace steady at 3.3%yr. The six-month annualised pace is also steady at 3.3%yr which down from a 3.7%yr pace in December. We were expecting the pace of core inflation to moderate from here but with the conflict in Iran disrupting shipping out of the Gulf, and the resulting surge in fuel prices, we now see fuel prices remaining higher for longer resulting in a greater degree of pass-through to core inflation.

The TM is set to lift 0.5%mth/3.6%yr in April, 0.4%mth/3.8%yr in May and 0.3%mth/4.0%yr in June. The forecast peak in the annual TM inflation is 4.0%yr in June then holding between 3.9%yr and 4.0%yr to year end; in six-month annualised terms the peak pace is 4.6%yr in September.

Quarterly inflation less volatile

The Monthly CPI is the focus of the ABS CPI release, and as such, it gains the most media attention. However, at least for now given the short history of the complete Monthly CPI, the quarterly measures of inflation will remain the focus of both the RBA and the Australian government when setting both monetary and fiscal policy, particularly when it comes to core inflation as measured by the Trimmed Mean.

Past performance is not a reliable indicator of future performance. The forecasts given above are predictive in character. Whilst every effort has been taken to ensure that the assumptions on which the forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The results ultimately achieved may differ substantially from these forecasts.

As the current conflict started in the last week of February, we have only see one month of higher fuel prices so the auto fuel is expected to rise just 5.9% in the March quarter. However, starting from a high base in the June quarter means fuel prices to continue to rise solidly and we estimate a 24% surge in the fuel prices component in the June quarter.

Overall, we estimate a 1.5% increase in the March quarter taking the annual pace from 3.6%yr to 4.7%yr. As noted earlier, we expect this momentum to continue into the June quarter with a further 1.9% surge in the CPI taking the annual pace to 5.4%yr. While we think this should be the peak in the annual pace, it is nevertheless the fastest pace since June 2023 when it was reported to be 6.0%.

Core inflation is not immune to this boost as we are forecasting a 0.93% increase in the March quarter, matching the 0.9% increase in the December quarter and it is a prelude to the step up to a 1.0% increase in both the June and September quarters. This will see the annual pace peak at 4.0%yr in the second half of the year.

The Trimmed Mean estimate starts from a low of 0.2% to a high of 2.2%. Significant expenditure items trimmed off the bottom includes vegetables (–1.2%), international travel & accommodation (–0.7%) and other non-durable household products (–0.7%). Trimmed off the top are secondary education (2.3%), tobacco (2.4%), furniture (3.3%), women's garments (3.5%), auto fuel (5.9%), electricity (118.3%).

As we have noted in earlier bulletins, until the ABS has a better understanding of the seasonality of the new monthly CPI, they will continue publishing quarterly underlying inflation measures in a manner consistent with the history of price collection frequency. We have replicated this process and found it represents a small downside risk to our March quarter estimate but it still rounds to 0.9%qtr. As such we just note the risk and do not adjust our overall forecast.

Signs of faster pass-through

We have received many anecdotal reports of increases in input costs, often as a fuel surcharge or levy. Some of these were adjusted downwards when the Australian government cut the fuel excise but remain significant. We have also heard of restaurants, cafés and even hairdressers adding a fuel levy to prices but these are yet to be confirmed.

It has also been reported that rising input costs could add as much as 10%, or $50,000, to the cost of building an average detached home. Using input price increases as reported by Tradelink this estimate seems fair. Tradelink data suggests an average increase of 16% in April, the largest increase in the data we have back to January 2020; not all products will see price increases in any given month, but the number of notifications of price increases on the Tradeline website has also risen. The proposed average increase for May increases to 17% before easing back to around 7% in June and July so it will be interesting to see how these estimates are adjusted as actual prices are posted.

U.S: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission (“CFTC”) as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation (“FDIC”). Westpac Capital Markets, LLC (‘WCM’), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 (‘the Exchange Act’) and member of the Financial Industry Regulatory Authority (‘FINRA’). In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac’s London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as “relevant persons”). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for “eligible counterparties” and “professional clients” as defined by the rules of the Financial Conduct Authority and is not intended for “retail clients”. Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area (“EEA”): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH (“WEG”) under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority (‘BaFin’) and subject to its regulation. WEG’s supervisory authorities are BaFin and the German Federal Bank (‘Deutsche Bundesbank’). WEG is registered with the commercial register (‘Handelsregister’) of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an ‘investment recommendation’ and/or ‘information recommending or suggesting an investment’, both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) (“MAR”). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Cliff Notes: Middle East conflict seemingly at an impasse

#cliffnotes #rba #australia #inflation #us #fomc #ecb #aud #usd

By Elliot Clarke & Illiana Jain

10:56 April 24 2026

Share

Key insights from the week that was.

Regarding the Middle East conflict, the week began with the expectation of a second round of in-person talks between the US and Iran. The start of the negotiations was initially pushed from Tuesday to Wednesday; but President Trump then announced on Truth Social that the meeting had been postponed at the request of Pakistani and Iranian officials to allow time for a "unified proposal" to be developed to be put to the US. Thankfully, having been stretched by both sides at the weekend, the expiring two-week ceasefire was extended indefinitely.

Since Wednesday, there has been no concrete evidence of progress towards a deal, the Iranians seemingly refusing to come to the table while the US' blockade remains in place, and the US refusing to end the blockade until a deal is agreed. Both sides have halted and seized ships within their area of operations, but this has not triggered a ceasefire breach – although it must be noted that President Trump overnight ordered the US Navy to strike any vessel laying mines in the Strait of Hormuz, making clear the risk of further military conflict.

With no clear way out of the stalemate, or timeline for formal talks, the price of Brent oil has rebounded back to around USD106 having (very briefly) fallen as low as USD86 late last week. The longer the impasse persists, the greater the chance of a sustained period of high oil prices and refinery margins, with all costs eventually met by businesses and households across the world.

Central banks remain focused on the degree and persistence of price passthrough to domestic consumer inflation, the risk being that inflation persists well above target into 2027 on second-round effects and an uplift in inflation expectations. ECB President Lagarde this week noted that the staff currently view conditions in the Euro Area as between their baseline and adverse projections from the last meeting, and will act "as the situation demands" ahead. Next week's run of central bank meetings across the northern hemisphere will provide a more detailed view on the balance of risks and the implications for monetary policy across the developed world.

In the US meanwhile, President Trump's pick for the next FOMC Chair, Kevin Warsh, appeared before the Senate Banking Committee as part of the confirmation process. Warsh again made clear he believes several aspects of the FOMC's communications and processes should change, but also showed a clear commitment to central bank independence. The next steps in Warsh's confirmation remains highly uncertain, with Republican Senator Tillis refusing to approve the appointment at the Committee stage until the Department of Justice close their investigation into the Federal Reserve and Chair Powell. If Senator Tillis holds out until year end, the Administration may face an additional challenge in 2027 as their Senate majority is at risk in the mid-term election. Chair Powell will remain in place in the interim, giving the FOMC continuity and capacity to manage the US economy.

On data front this week, US retail sales rose 1.7% in March, beating expectations. The control group, which feeds into GDP, also surprised to the upside, 0.7%. For the quarter overall, however, the consumer pulse has been weak, and record-low confidence points to downside risks for Q2. The outlook for US business investment is also increasingly uncertain. Across the pond, the UK unemployment rate fell from 5.2% in January to 4.9% in February, though this reflected a decline in participation. Despite the softer labour market print, wages still rose 3.8%yr in February. A spike in energy prices also saw inflation rise 0.7% in March and 3.3% over the year. While the headlines focus on energy prices, sticky services inflation also remains an issue for the UK, 4.5%yr.

Our latest Market Outlook provides an in-depth view of the outlook for the US, Europe, China and global financial markets.

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

We may at times use technology to capture data about you to help us to better understand you and your needs, including potentially for the purposes of assessing your individual reading habits and interests to allow us to provide suggestions regarding other reading material which may be suitable for you.

Disclaimer

This information has been prepared by Westpac and is intended for information purposes only. It is not intended to reflect any recommendation or financial advice and investment decisions should not be based on it. This information does not constitute an offer, a solicitation of an offer, or an inducement to subscribe for, purchase or sell any financial instrument or to enter into a legally binding contract. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice. Certain types of transactions, including those involving futures, options and high yield securities give rise to substantial risk and are not suitable for all investors. We recommend that you seek your own independent legal or financial advice before proceeding with any investment decision.

This information may contain material provided by third parties. While such material is published with the necessary permission none of Westpac or its related entities accepts any responsibility for the accuracy or completeness of any such material. Although we have made every effort to ensure this information is free from error, none of Westpac or its related entities warrants the accuracy, adequacy or completeness of this information, or otherwise endorses it in any way. Except where contrary to law, Westpac Group intend by this notice to exclude liability for this information. This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words “believe”, “anticipate”, “expect”, “intend”, “plan”, “predict”, “continue”, “assume”, “positioned”, “may”, “will”, “should”, “shall”, “risk” and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author’s knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac’s Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac (“WNZL”). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

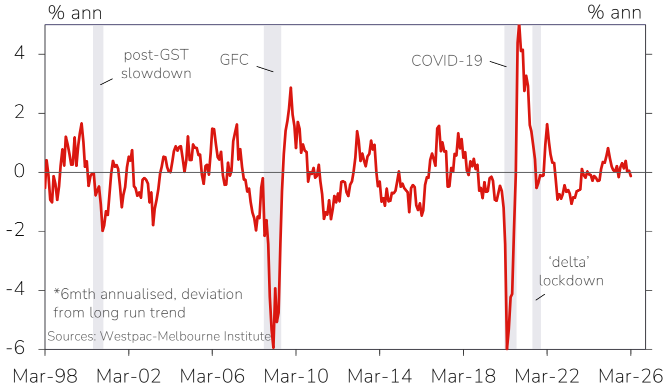
WESTPAC-MI LEADING INDEX BULLETIN

Latest insights into economic momentum

Key points

- Leading Index growth rate declines to –0.13% in March.
- First below-trend pace since August last year.
- Interest rates and global energy shock clearly impacting.

Westpac-MI Leading Index



Leading Index momentum dips back below trend

Matthew Hassan
Head of Australian Macro-Forecasting

The six-month annualised growth rate in the Westpac–Melbourne Institute Leading Index, which indicates the likely pace of economic activity relative to trend three to nine months into the future, declined to –0.13% in March from +0.05% in February.

The Australian economy has lost momentum over the first few months of the year with more weakness likely to emerge in the months ahead. The March Index already points to a period of below-trend growth over the remainder of 2026. While the growth pulse is not overly weak, it is the first below-trend read since August last year and, prior to that, since the extended period of weakness during the 'cost-of-living' crisis of 2022–2024.

The Leading Index growth rate has now swung from +0.31% in October last year to –0.15% currently, a 0.44ppt deterioration. The detail shows clear drags from the shifting interest rate backdrop and the global energy shock associated with the conflict in the Middle East.

Component-wise, the biggest negative shifts have come from: the Westpac–Melbourne Institute Consumer Expectations Index (a 20% drop over the last six months effectively taking 0.27ppts off the headline growth rate); a sharp sell-off in the Australian sharemarket in the March month (–0.24ppts); and a flattening yield spread as short-term interest rates have moved higher (–0.15ppts). Some of these declines may not be sustained though, with a notable recovery in sharemarket in the first three weeks of April. If it sustains, the move will be reflected in next month's index.

Roughly speaking, about 60% of the drag on the six month growth rate coming from these three components looks to be due to the conflict in the Middle East. All of sharemarket fall and about half of the sentiment decline since October has occurred after the conflict began. Most of the yield gap shift however can be attributed to monetary policy developments prior to the war.

Other components have provided partial offsets. Most notably, higher commodity prices (up 11.9% in Australian dollar terms over the last six months) have added 0.09ppts to the Index growth rate over the same period. Dwelling approvals have added a further 0.11ppts although this is likely being exaggerated by a very choppy monthly profile (approvals jumped 30% in February after dropping 20% through December–January). The contribution from the remaining three components has seen no net change since October.

The Westpac-Melbourne Institute Leading Index of Economic Activity is designed to assist in identifying turning points in the economy. The index combines variables that reflect different aspects of the economy into a single index that generally produces a more reliable cyclical indicator than any single component taken individually. The Leading Index of Economic Activity provides advance information on the state of the economy and gives early warnings of cyclical turning points.

The Reserve Bank Monetary Policy Board (MPB) next meets on May 4–5. The latest Leading Index update confirms that higher interest rates and the spike in fuel prices associated with the conflict in the Middle East are starting to weigh on growth momentum, albeit fairly mildly. However, the MPB's main concerns are likely to be around inflation with underlying measures already above the RBA's 2–3% target range and set to move higher as the effects of energy price rises come through. On balance we expect the risk of this feeding into a lift in inflation expectations will over-ride the downside risks to growth. As such, we expect the MPB to raise the cash rate by another 25bps in May with further moves likely in subsequent months.

WESTPAC NOWCAST Q1 2026: SECOND ESTIMATE

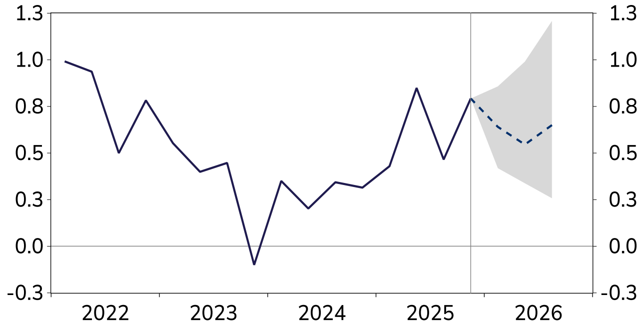
The cyclical upswing is maturing

Key points

- Consistent with our first estimate, Westpac Now points to GDP growth of around 0.6%qtr in Q1 2026 (range: 0.55–0.75%qtr), lifting year ended growth to 2.8%yr.
- Our monthly activity index edged lower in March after moving sideways through January and February. Overall, activity was flat across the March quarter, ending an upswing that began in May 2025 even before the recent tightening in monetary policy could take effect.
- Recent sharp falls in consumer and business confidence were largely 'looked through'; our framework would take more signal from a sustained drop.
- While growth appear to have remained resilient in Q1, a prolonged Middle East conflict increases the risk that weak confidence spills over into a broader set of indicators (many of which have already softened), exacerbating supply chain dislocations and lower real incomes.

Quarterly GDP Growth*

Quarterly % growth. Axis truncated for covid.



Source: ABS, Macrobond, Westpac Economics

*Dotted line show Westpac-Now central estimates. Quarter ahead (or Q1 2026) relies on the actual Westpac monthly activity index to March 2026. Beyond the quarter ahead, estimates rely on projections of the Westpac monthly activity index generated using internal model dynamics. Confidence intervals reflect empirical out of sample forecasting errors.

- Our framework suggests growth will ease to around 0.5%qtr in Q2, before returning to 0.6%qtr in Q3 2026, but these estimates by design do not allow for the wider effect of the conflict and differ from our actual GDP forecasts.
- Westpac Now updates are released monthly, with details in Appendix A.

The Upswing Is Maturing, Even Before Rate Hikes Bite

Pat Bustamante
Senior Economist

In November 2025, we introduced Westpac-Now, a real time measure of current activity in the Australian economy. Westpac-Now draws on more than 60 high frequency economic and financial variables, using advanced statistical techniques to provide a timely pulse check on economic momentum. It is the first Australian model to incorporate internal banking data, enhancing its predictive power.

This note provides the second estimate of growth for the March quarter 2026, using domestic and international data released up to and including the March Labour Force Survey (released 16 April 2026). Future updates will be published monthly (see Appendix A for the release schedule).

Monthly activity index declines over March

Our monthly activity index edged lower in March after moving sideways through January and February. Overall, activity was flat across the March quarter, ending a steady upswing that began in May 2025 even before the recent tightening in monetary policy could take effect. The monthly activity index is now sitting around the levels recorded in September 2025.

Importantly, there is greater than usual uncertainty around the monthly activity estimate amid heightened inflationary pressures. Faster price growth can cause nominal indicators, such as consumer spending, to rise strongly even though ‘real’, inflation adjusted spending may be soft. The inclusion of ‘real’ indicators, such as employment and banking transaction volumes, helps manage some of this uncertainty but it remains higher than usual given above average inflationary pressures.

Westpac Monthly Activity Index

Index. Axis truncated for covid.

Confidence: More noise than signal for now

At this stage, our framework largely looks through the recent sharp falls in consumer and business confidence. Historically, these measures can be volatile, and other indicators have not yet moved in the same direction. In that sense, the decline in confidence is inconsistent with broader domestic economic conditions.

This interpretation is intuitive: the shock triggering the confidence response appears exogenous, or linked to the conflict in the Middle East, rather than arising from domestic economic fundamentals. As such, the declines are currently treated as large idiosyncratic shocks.

That assessment would change if the fall in confidence were sustained or if other high frequency indicators, such as banking transaction data, began to corroborate the signal. In that scenario, the model would revise its treatment and place greater weight on the information coming from confidence measures.

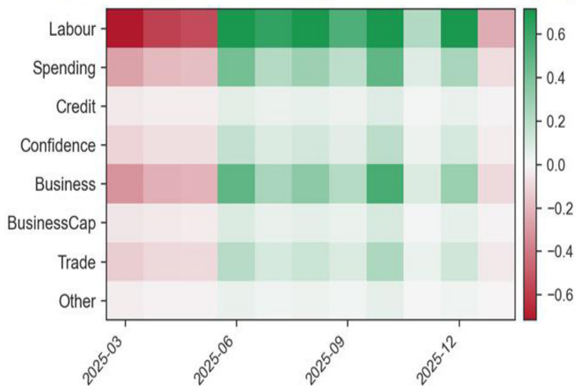
But there are risks with key indicators shifting to neutral

While growth remained resilient in Q1, the longer the Middle East conflict persists, the greater the risk that the weakness evident in confidence starts to show up in a broader set of indicators, such as investment and consumer spending.

Our indicator heatmap decomposes changes in the monthly activity index into group level contributions, allowing us to assess which components drove the recent moderation. For ease of interpretation, indicators are grouped into broad categories. For example, the labour market category includes both official ABS Labour Force Survey outcomes and more timely survey based measures of labour demand and job advertisements.

The heatmap shows that labour market conditions, consumer spending and credit growth lost momentum and shifted to neutral in March, after ending 2025 strongly.

The Common Activity Factor Heatmap by Groups



Westpac Now: Growth moderating even before the recent tightening in monetary policy take effects

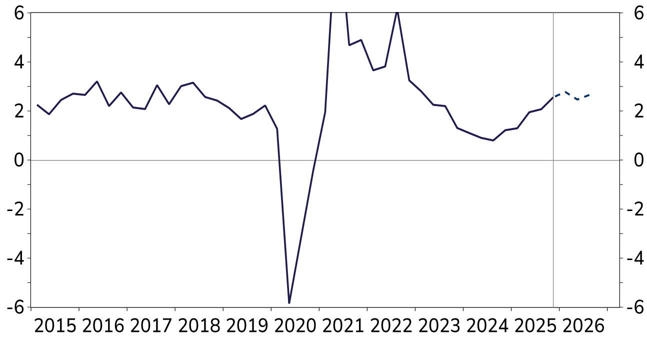
Recall that the Westpac-Now estimate is a more refined indicator that combines our monthly activity indicator using advanced econometric techniques to produce point estimates of GDP growth. As previously noted, the fit is not expected to be exact, as measured GDP includes components that are not well captured by other activity measures, such as imputed rents for owner occupiers, public and business inventories, and the depreciation of buildings and equipment. To bridge monthly and quarterly data, we employ a MIDAS framework, which allows us to combine mixed frequency data and incorporate partial information for the current quarter when producing GDP forecasts.

Based on our current forecast equations, the Westpac-Now Q1 2026 second estimate points to GDP growth of 0.6%qtr (range: 0.55–0.75% qtr), lifting year ended growth to 2.8% yr.

Projections further out, based on the indicator's internal dynamics, suggest growth will ease to 0.5%qtr in Q2, before returning to 0.6%qtr in Q3 2026. However, these projections should be treated as tentative, with heightened uncertainty given the reliance on projected inputs rather than realised data. The potential impact of the Midde East conflict implies that these forward projections are even more uncertain than usual.

Westpac-Now Estimates and Projections*

Year-ended % growth. Axis truncated for covid.



Source: ABS, Macrobond, Westpac Economics

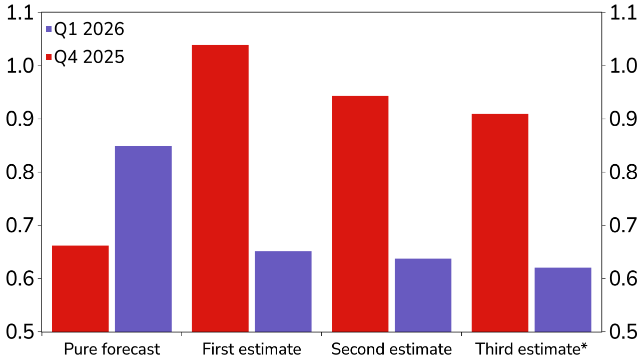
*Dotted line show Westpac-Now central estimates. Quarter ahead (or Q1 2026) relies on the actual Westpac monthly activity index to March 2026. Beyond the quarter ahead, estimates rely on projections of the Westpac monthly activity index generated using internal model dynamics. Confidence intervals reflect empirical out of sample forecasting errors.

March quarter data signal a moderation in growth

Data released over the March quarter point to growth moderating from the previous quarter. Once data released through the quarter are incorporated, our nowcast estimates Q1 growth at 0.6%qtr. This contrasts with the 0.8%qtr 'pure forecast' estimate that we obtain using only data available up to and including December. The pattern of softer estimates once actual data for the quarter begin to be included in the nowcast also contrasts with Q4 in that the nowcast for that quarter remained higher than the 'pure forecast' estimate as more data were included in successive estimates.

Evolution of Westpac-Now

Within quarter changes to Westpac-Now, quarterly % change



Source: ABS, Macrobond, Westpac Economics

*Preliminary third estimate, to be updated when the full suite of monthly March data becomes available

Bottom line

Westpac Now points to moderating growth, with GDP tracking at around 0.6%qtr in Q1 2026. While recent sharp declines in confidence are currently being 'looked through', momentum has softened across key indicators, including labour market conditions, consumer spending and credit growth, even before the RBA's rate hikes took effect on the economy. Growth remains resilient for now, but a prolonged Middle East conflict raises the risk that weak confidence and supply chain disruptions reinforce each other, posing a more material downside risk over coming quarters.

Appendix A: Westpac Now Release Schedule (2026)

Going forward, Westpac Now will be published on the Friday following each ABS Labour Force Survey (LFS) release, at 11:30am AEDT/AEST (Canberra time). Each release incorporates the latest labour market data alongside other high frequency indicators and provides an updated nowcast for quarterly GDP growth. As the quarter progresses, each update should be interpreted as a progressively more complete estimate of that quarter's economic performance.

Release date (Friday)	LFS reference month	Quarter focus	Interpretation
22 May 2026	April 2026	Q1 2026 – final estimate	Near complete read on Q1 activity
19 June 2026	May 2026	Q2 2026 – first estimate	Initial assessment of Q2 momentum
17 July 2026	June 2026	Q2 2026 – second estimate	Refined Q2 signal as activity data accumulate
21 August 2026	July 2026	Q2 2026 – final estimate	Near complete read on Q2 activity
18 September 2026	August 2026	Q3 2026 – first estimate	Initial assessment of Q3 momentum
16 October 2026	September 2026	Q3 2026 – second estimate	Refined Q3 signal as activity data accumulate
20 November 2026	October 2026	Q3 2026 – final estimate	Near complete read on Q3 activity
18 December 2026	November 2026	Q4 2026 – first estimate	Initial assessment of Q4 momentum

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

March CPI – all about fuel, too early for pass through

#inflation #australia #rba #economicbulletinsaustralia

By Justin Smirk
Senior Economist, Westpac

15:30 April 29 2026

Share

Headline March Quarter CPI 1.4%qtr/4.1%yr; Trimmed Mean 0.8%qtr/3.5%yr. Monthly March CPI 1.1%mth/4.6%yr, Trimmed Mean 0.3%mth/3.3%yr.

- Headline inflation being boosted by surging fuel prices.
- Core inflation was moderating before the Gulf Crisis and, at this stage, there is very limited sign of any passthrough to from higher fuel costs to broader price pressures.

- Today's inflation update locks in a May rate increase and while we expect to see two more after this, a lot will depend on just how much demand destruction we see because of higher prices.

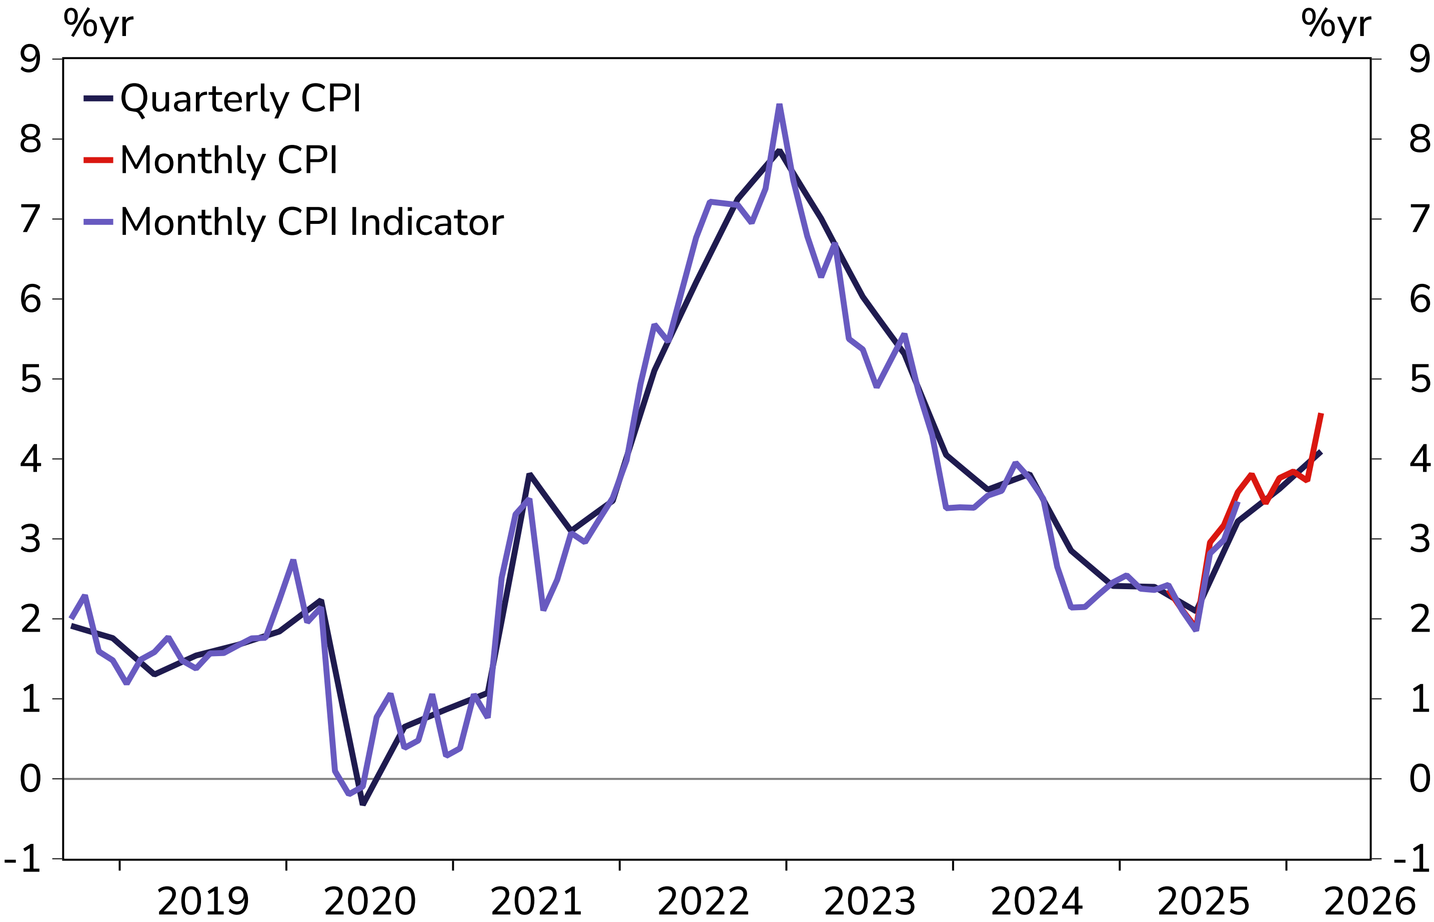
The CPI gained 1.4% in the March quarter, on par with market consensus and close to Westpac's expectation of 1.46%. The annual pace of headline inflation, at 4.1%yr, is accelerating again; it was 2.1%yr in mid-2025 lifting to 3.6%yr in December. The acceleration through 2025 was mainly the unwinding of energy rebates but in early 2026 it is the crisis in the Gulf, and resulting surge in auto fuel prices, that is driving the acceleration. However, the cost-of-living assistance and surge in auto fuel has a limited impact on core inflation and so these measures take on more critical role in assessing the current pace of inflation.

The Trimmed Mean (TM) lifted 0.8% in the March quarter. Westpac and the market expected 0.9% (Westpac 0.93%). However, in our preview we highlighted that calculating the quarterly TM based on historical survey timing, which the ABS is doing given the short history for a number of series, pointed to a small downside risk to our estimate. The annual pace lifted very modestly from 3.4%yr to 3.5%yr.

The monthly trimmed mean increased 0.3%mth, which held the annual pace flat at 3.3%yr for the fourth consecutive month; the six-month annualised pace eased back a touch to 3.5%yr from 3.9%yr in December. It is worth noting that at this point in time the annual pace of the monthly CPI is tracking under that of the quarterly CPI.

Prior to the Gulf Crisis, the momentum in core inflation had been moderating.

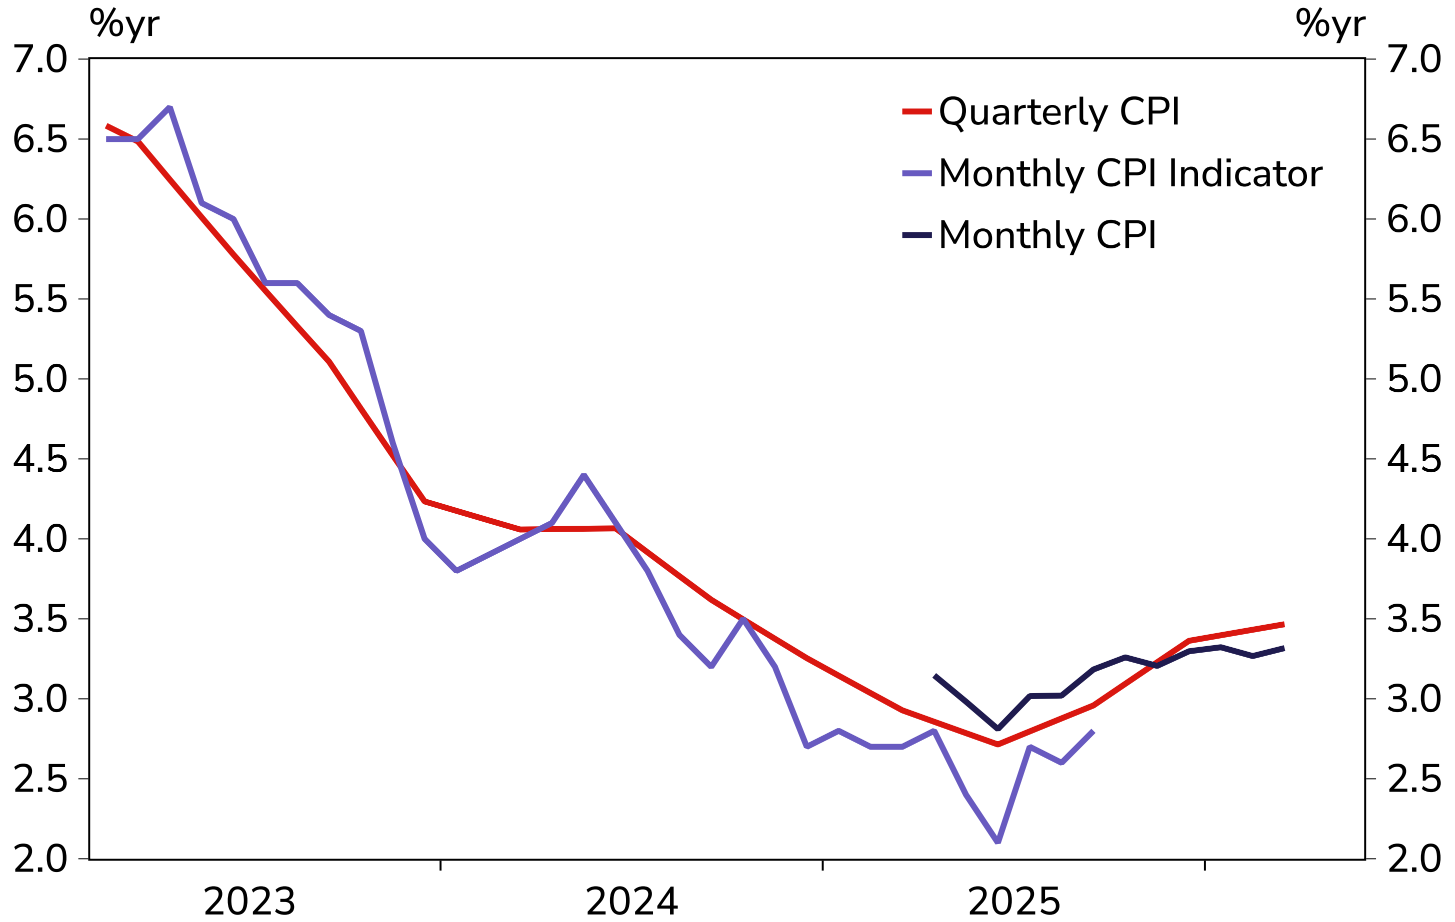
Headline Inflation



Source: ABS, Macrobond, Westpac Economics

The headline Monthly CPI lifted 1.1% in March to be up 4.6% in the year. This was quite a bit softer than our estimate of 1.3%mth/4.7%yr. Worthy of note was that auto fuel was softer than expected, lifting 32.8% vs. 36.4% expected. More concerning to the outlook for core inflation was that dwelling prices lifted 0.5% in the month compared to our expectation for a more modest 0.2% increase. The ABS did note this increase in the annual pace was due to project home builders raising base prices to pass through higher labour and materials costs over the year but made no comment on the monthly increase.

Trimmed Mean Inflation

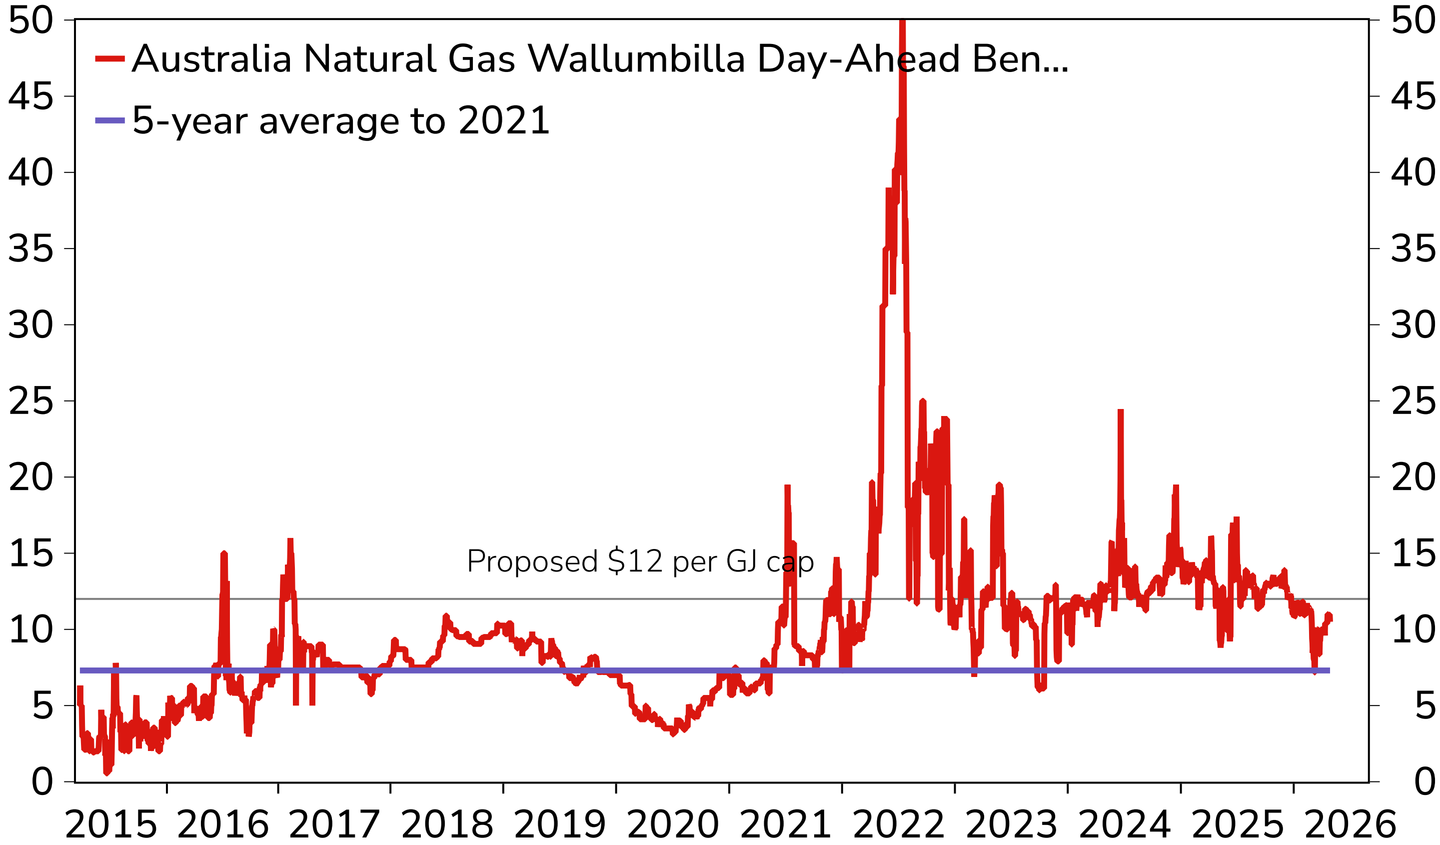


Source: ABS, Macrobond, Westpac Economics

For the RBA, as noted by Westpac's Chief Economist Luci Ellis in "**RBA May hike locked in**", there was some scattered signs of pass-through to other prices, even though March was very early days for this to be evident and most likely it is business taking the opportunity to raise prices in front of looming cost increases. However, it was not widespread and as we covered before, electricity prices have benefited from Australian local gas prices separating themselves from global LNG prices (the local price is currently around $10/GJ so under the government's proposed $12/GJ cap) and the rising share of renewables supported by storage which has seen lower than average summer electricity prices.

Wholesale Natural Gas

Wallumbilla Benchmark Price, $/GJ



Source: , Macrobond, Westpac Economics

Nevertheless, we still expect the RBA to raise the cash rate at their May meeting. Given recent communication from the Bank has characterised the supply shock as ‘further exacerbating existing capacity pressures’ with future demand destruction just a possibility, we see two further interest rate hikes after May. It is true that the Trimmed Mean for the March quarter was on the RBA forecast of 3.5%yr but to achieve their estimate of 3.7%yr for the June quarter we will have to see a step down in the quarterly pace of 0.8%, a bridge too far we think given the current shock we are experiencing. Our current forecast for the June quarter Trimmed Mean is 1.0%qtr.

We are preparing a more detailed bulletin outlining any revisions to our inflation profile once we have processed all the quarterly and monthly data. But we can note that for the March quarter market services ex volatile inflation surprised with a flat print in the quarter with only a very modest lift in the annual pace to 3.4%yr from 3.3%yr. We are expecting it to pick up from here but due to modest wage outcomes, and better productivity in the market sector, we see this acceleration being capped around 4%yr in the second half of 2026, tracking the lift in Trimmed Mean inflation.

Below is the table comparing the quarterly details with our published estimates. We will cover the reasons for the small variations in our review of the monthly CPI as that is where the differences lie.

Monthly March CPI in more detail.

The Israel/US assault on Iran began in the morning of the 28th of February with most of the price and the resulting jump in auto fuel prices above $2/l occurred in the week ending the 8th of March. As such the March CPI would have been very early days for much pass-through to be evident. As noted in earlier bulletins we have recorded price increases for building products, but these did not take effect until 1st April.

Nevertheless, the March CPI did show some scattered signs of pass-through to other prices. Home building and vehicle repair costs, along with downstream insurance inflation, all picked up in the month. Services related to audio-visual, computing and telecommunications also increased in the month, which for telecommunications went against the run we have seen in recent months. There were some promising signs in softer monthly prices of appliances and some other household goods which we will be closely watching to see if they are reversed in the months ahead.

CPI: All groups %qtr/%mth	**1.4**	**0.4**	**0.0**	**1.1**	**1.3**

In terms of downside surprises in March, the largest was for auto fuel at 32.8% vs 36.4% expected. We expect fuel to be flat in April with prices falling through May due to the delayed impact of the excise cut and lower crude oil prices in monthly averages. If the excise cut is reversed on July 1, as currently planned, then auto fuel is set to surge 17% through the month of July.

Also, holiday travel was softer, –1.4% vs. 0.7% expected, on the back of a –2.2% decline in domestic travel.

Most other item outcomes were either close to our estimates or stronger. Housing overall was on par with our 0.2% estimate with a more modest than expected 0.2% increase in rents being offset by a 0.5% increase in dwelling costs. With rising inputs cost for construction this may be an earlier sign we should be expecting a stronger lift in dwelling prices in the months ahead.

Clothing & footwear (–1.9%) did not fall as much as expected (–4.2%) with garments having a smaller than expected seasonal fall (–2.5%) while footwear fell –1.9% and accessories & clothing services fell –0.6%. It does appear that the gold boost to accessories through jewellery may have come to an end with a reported –0.6% in March.

We also did not see the usual seasonal fall in alcohol (0.7% vs. –0.2%expected) which offset a softer than expected rise in tobacco (1.1% vs. 1.4%).

Communication prices lifted 0.5% in the month when we expected a small fall (–0.1%) due to an outsized 3.6% increase in postal services, the largest monthly increase since the 4.2% increase in July 2024.

With the rise in construction costs we will be keeping a close eye on insurance premiums. Insurance surprised us with a 0.7% increase in March following hot on the heels of a 1.4% increase in January and a 0.4% increase in February. Combined with a 0.9% increase in deposit & loan facilities and a 0.8% increase in other financial services, insurance & other financial services lifted 0.8% vs. 0.4% expected.

These small but reasonably broad upside surprises is something we will be watching closely in the months ahead to see if they are early signs of pass-through from higher fuel costs as well as opportunistic price increases give the current backdrop.

There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the

appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at the internet address www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Fiji: Unless otherwise specified, the products and services for Westpac Fiji are available from www.westpac.com.fj © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia and registered as a branch in Fiji. The liability of its members is limited.

Papua New Guinea: Unless otherwise specified, the products and services for Westpac PNG are available from www.westpac.com.pg © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia. Westpac is represented in Papua New Guinea by Westpac Bank - PNG - Limited. The liability of its members is limited.

U.S.: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission (“CFTC”) as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation (“FDIC”). Westpac Capital Markets, LLC (‘WCM’), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 (‘the Exchange Act’) and member of the Financial Industry Regulatory Authority (‘FINRA’). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent

liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

“professional clients” as defined by the rules of the Financial Conduct Authority and is not intended for “retail clients”. Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area (“EEA”): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH (“WEG”) under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority (‘BaFin’) and subject to its regulation. WEG’s supervisory authorities are BaFin and the German Federal Bank (‘Deutsche Bundesbank’). WEG is registered with the commercial register (‘Handelsregister’) of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an ‘investment recommendation’ and/or ‘information recommending or suggesting an investment’, both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) (“MAR”). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words “believe”, “anticipate”, “expect”, “intend”, “plan”, “predict”, “continue”, “assume”, “positioned”, “may”, “will”, “should”, “shall”, “risk” and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author’s knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac’s Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac (“WNZL”). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Draw a line on just drawing a line

Share

Scenario analysis is essential in uncertain times, but it must be well-grounded, not just drawing an arbitrary line on a graph.

- You know times are uncertain when institutions start publishing scenarios alongside their normal forecasts. Two principles underlie good scenarios. First, the narrative underlying the scenario must hang together – no assuming people do things that are either individually irrational or infeasible.

Second, the scenario must allow people to respond to the initial shock – avoid just drawing a price line on a graph and assuming people cannot adjust their behaviour.

- There is a tension, though, between the need to be realistic and a desire to highlight vulnerabilities or contemplate worst-case scenarios. There is a legitimate role for worst-case thinking, but it must be handled with care. Recall that even though our forecasts last year were less alarmist than many in the wake of Liberation Day, actual outcomes were even better than we had expected.
- The real value of scenarios is teasing out downstream effects and delayed responses. Sometimes the responses to temporary shocks can have lasting effects. From EV purchases to defence budgets, these could be especially important coming out of the current conflict. All the more reason to avoid just drawing a line and assuming that is the outcome.

In times as uncertain as these, you want to be able to articulate more than one possible future state of the world. That is where scenario analysis comes in. Indeed, when institutions start publishing scenarios, you can take it as a sign that things are unusually uncertain. The RBA used scenarios extensively during the pandemic. And while the IMF did not give scenarios any prominence in its previous full *World Economic Outlook* report in October, it did this week. Similarly, we have published several scenario iterations over the past six weeks and will provide an update later today in our *Market Outlook* report.

Using scenarios rather than simple uncertainty ranges or a description of risks is especially useful when the possible future states of the world are qualitatively different from the base case, and when the level of conviction about that base case is low. There is nothing wrong with a scenario that is only a little different from the base case, but it is not that interesting or informative.

Two key principles underlie good scenario analysis. First, the premise of the scenario needs to be well-grounded. The narrative motivating the initial impetus must hang together. It must be logically consistent and represent both the interests and the constraints of the actors within the system. In other words, scenarios should not assume that people do things that are either bonkers or infeasible. Individually rational behaviour that is harmful in aggregate, such as panic-buying toilet paper or conducting fire-sales of loss-making assets, should of course be allowed for, but make sure the action is indeed individually rational.

Second, the methods used in developing the scenario need to go beyond first-round thinking. You need to allow for other people to react. A good scenario cannot be just a one-off shock where nothing else changes. Sometimes it takes time for people to adjust to the new situation, so the reaction occurs with a lag. Teasing these reactions out is the value-add of the scenario.

There is a tension, though, between the need to be realistic and a desire to highlight vulnerabilities or contemplate worst-case scenarios. Sometimes a lack of realism is used to guard against a potential failure of imagination. There is a legitimate role for this approach when stress testing, for example. However, unrealistic assumptions in forecast-flavoured scenarios leave your forecasts open to misinterpretation. We have seen an example of this issue this week, where the IMF's worst-case 'severe' scenario, which implies a global recession, has sparked unhelpful talk of recession here in Australia.

Part of the issue is that the IMF's less-bad 'adverse' scenario (which assumes oil prices average USD100/bbl this year before moderating to USD75 next year) and worst-case 'severe' scenario (which assumes oil prices stay around USD125/bbl from the outbreak of the conflict all the way through to end-2027) are both 'top-down' scenarios that appear to start from an assumed path for oil prices. Unlike our own scenario work, they do not explicitly model loss of supply from the Middle East and work out what prices need to do to clear the global market. By effectively just drawing a line on a graph for oil prices, the scenarios assume away any scope for other producers to respond. This is not an issue in the near term, but the longer the assumption is maintained, the less realistic it is. High prices will spur non-OPEC producers such as the US and Canada to boost production. It takes time to get that expansion running, but eventually prices will start to ease.

Because it assumes high prices right through 2027, the 'severe' scenario is most challenged by this issue. This is not to say that the IMF should not have published that scenario, but it is important to understand the context and what it was trying to achieve in doing so.

When developing scenarios, you also need to avoid the trap of thinking only of downside risks. Part of the problem is that downside risks usually come from identifiable events. It is easy to construct a plausible narrative for a scenario starting from "this particular bad thing happened". But as one of my old bosses used to remind us, sometimes you should also consider the risk everything just turns out a little bit better than expected.

As our April *Market Outlook* goes to publication later today, it is helpful to recall last April's edition. The 'Liberation Day' tariffs had been announced a fortnight previously, and many voices in the market were predicting global or US recessions. At the time we took a more moderate view, based on the principles noted above. Firstly, continuing with very high tariff rates would have been an act of economic self-harm. While it was hard to bet on the Trump administration acting rationally in a context of 'flood the zone' headlines and intemperate social media posts, self-interest is still the best assumption. If there is nothing preventing someone from stopping punching themselves in the face, they will stop punching.

Secondly – and this was a key judgement in our forecast last year – other countries had agency and could respond. In particular, China had scope to stimulate, and this would also cushion growth in Australia. In that context, we note that the latest Chinese GDP growth has again surprised on the upside relative to market expectations.

It turns out that even we were too bearish a year ago: the global economy did much better than expected, and global trade kept expanding with barely a hiccup. Other factors, including a tech boom, turned out to be more important than expected. Trade patterns were also re-routed around the highest tariffs, and of course the US government de-escalated, as is proving to be its pattern.

These principles also hold for other kinds of scenarios. Whenever you read a prediction of doom concerning, say, adoption of a new technology, ask yourself what is preventing people from responding to ameliorate the bad thing. What prevents macroeconomic policymakers from easing, for example, or the tax system from redistributing unequal gains? While occasionally decision-makers decide that a bad thing is good actually, holding that position is itself fragile.

Where scenarios can really add value is when they highlight a lasting effect from a temporary shock. Whether it is the person who buys an EV in response to current high petrol prices and reduces their petrol consumption permanently, or the government that reassesses its defence spending, behavioural responses can change longer-term demand trends, and so the prices that prevail further out. Normalisation after a shock does not always take you back to where you were. That is another reason why it is so important to avoid just drawing a line on a graph and calling it a scenario, ignoring system-wide effects.

Except where contrary to law, Westpac Group intend by this notice to exclude liability for this information. This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward-looking statements. The words “believe”, “anticipate”, “expect”, “intend”, “plan”, “predict”, “continue”, “assume”, “positioned”, “may”, “will”, “should”, “shall”, “risk” and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-

looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability-related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the

appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at the internet address www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Fiji: Unless otherwise specified, the products and services for Westpac Fiji are available from www.westpac.com.fj © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia and registered as a branch in Fiji. The liability of its members is limited.

Papua New Guinea: Unless otherwise specified, the products and services for Westpac PNG are available from www.westpac.com.pg © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia. Westpac is represented in Papua New Guinea by Westpac Bank - PNG - Limited. The liability of its members is limited.

U.S.: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission ("CFTC") as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation ("FDIC"). Westpac Capital Markets, LLC ('WCM'), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 ('the Exchange Act') and member of the Financial Industry Regulatory Authority ('FINRA'). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent

liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

"professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Consumer Sentiment tanks in April as fuel prices spike

4 May 2026

FORECAST UPDATE: THE STATES

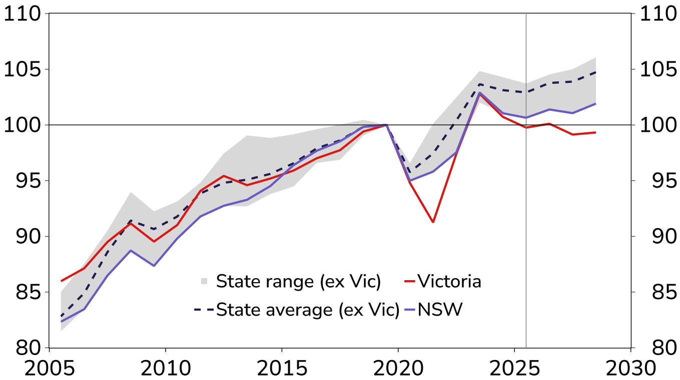
Mining resilient while consumer-led states under pressure

Key points

- After a relatively strong finish to 2025, our updated outlook points to an abrupt slowdown in the Australian economy through 2026 and into 2027 (see here). Here, we flow these aggregate changes through to the state level forecasts published in our March quarter Coast-to-Coast (see here), ahead of our June quarter Coast-to-Coast (due in late June).
- State performances are set to diverge again as national growth slows. Mining based states of Queensland and WA are expected to once again lead the pack, supported by elevated energy prices delivering sizeable income windfalls. SA is also relatively well positioned, underpinned by strength across both public and private activity.
- Consumption-led states set to slow sharply. NSW and Victoria are expected to underperform, with Victoria standing out as the only state where consumption per capita is expected to fall below FY2019 levels by FY2028.

Household consumption per capita

Index: FY2019 = 100, Financial years



Source: , Macrobond, Westpac Economics

- On our forecasts, consumption per capita in Victoria declines by around 3.5% cumulatively over the five years to FY2028, one of the largest and longest lasting contractions on record. However, Tasmania is expected to remain the laggard overall reflecting the state's much weaker population growth.

States to diverge as the household squeeze returns

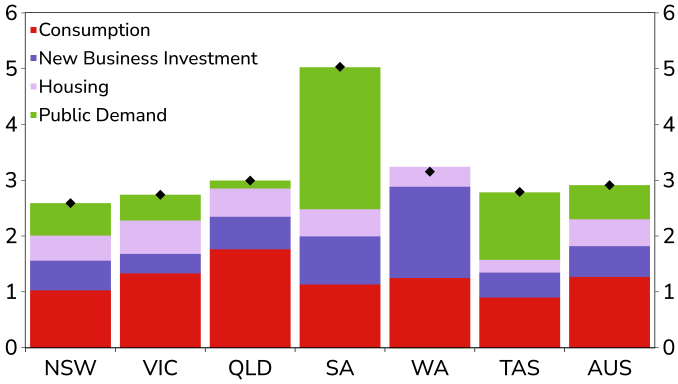
Pat Bustamante, Senior Economist
Ryan Wells, Economist

The strong finish to 2025 was reflected in a broad based lift in activity across the states, as private demand rebounded more quickly than expected. The Australian economy is now heading into a sharp slowdown, as a re-tightening in monetary conditions over recent months collides with a large global supply shock centred on energy.

This shock now appears both larger and more persistent than initially anticipated, intensifying domestic inflationary pressures. As a result, we expect the RBA to deliver two additional 25bp rate hikes beyond the widely anticipated 25bp move in May, aimed at preventing a sustained lift in inflation expectations. Against this backdrop, GDP growth is forecast to slow to just 1%yr in 2026, pushing the unemployment rate towards 5%, with the trimmed mean inflation rate rising to around 4% by year end.

State Final Demand

Contributions to Q4 2025 Growth (ppts ann)



Source: ABS, Macrobond, Westpac Economics

As national growth slows, state performances are set to diverge once again. Differences in industry structure, population dynamics and exposure to interest sensitive demand will reassert themselves through 2026 and into 2027.

The mining based states of **Queensland** and **WA** are expected to once again lead the pack, benefiting from elevated energy prices delivering sizeable income windfalls alongside still solid population growth. Dwelling price growth is also expected to remain firm, as strong demand continues to run up against limited supply, supporting consumption through wealth effects. **SA** is also relatively well positioned, supported by strength across both public and private activity, including public infrastructure investment and defence related spending.

By contrast, the consumer led states of **NSW** and **Victoria** are set to slow sharply, consistent with patterns seen in previous tightening cycles. This is already becoming evident, with housing market conditions deteriorating in both states, which will weigh on household spending via negative wealth effects. Over the quarter to April 2026, house prices fell by 1.5% in Melbourne and 0.9% in NSW, compared with a national average increase of 1.6%. By contrast, strength continues in Brisbane, Adelaide and Perth, which should help support consumption through positive wealth effects (see here).

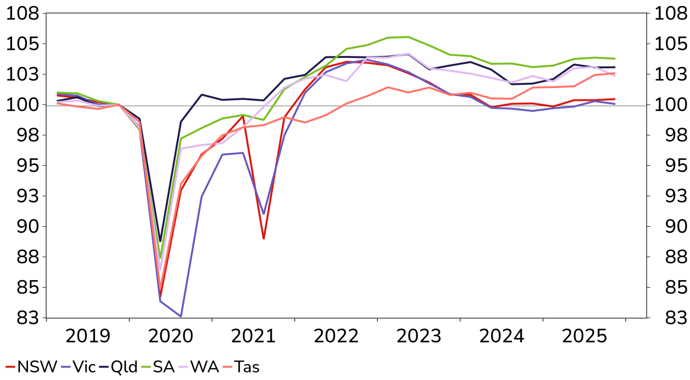
Per capita consumption in both states has largely moved sideways since 2019, underperforming the rises seen elsewhere. In stark contrast to the mining based states, population growth in NSW and Victoria is expected to outstrip gains in both GSP and consumption. On our forecasts, **consumption per capita in Victoria is set to record a cumulative decline of around 3.5% over the five years to FY2028.** The post COVID cost of living squeeze, now compounded by the recent spike in global energy prices, is delivering one of the largest and most prolonged contractions on record, extending back to the early 1990s.

Victoria stands out as the only state where consumption per capita is expected to fall below FY2019 levels by FY2028, underscoring the depth and persistence of the adjustment now underway.

However, **Tasmania** remains the laggard overall. Softer population growth is constraining momentum in housing construction and consumer demand, leaving the state more exposed to the broader slowdown.

Household consumption per working age population

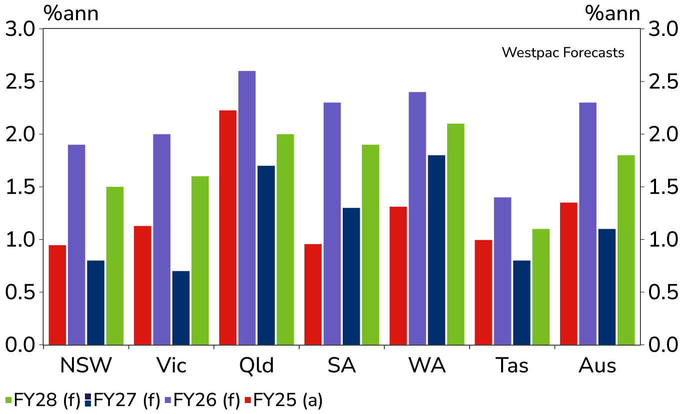
Index: Dec 2019 = 100



Source: ABS, Macrobond, Westpac Economics

Further ahead, as inflation moderates back towards target and interest rates eventually begin to ease in 2028, household spending should recover and growth conditions gradually converge. However, this adjustment will take time, and downside risks increase the longer global supply disruptions and geopolitical tensions persist.

Gross State Product



Source: ABS, Macrobond, Westpac Economics

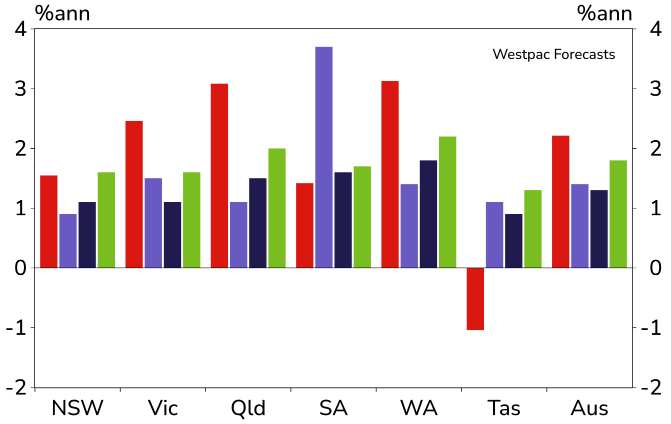
Commodity windfalls will see the mining states outperform

Mining exposure remains a clear positive, particularly as energy-related investment and exports benefit from higher global prices stemming from the conflict in the Middle East. These income windfalls should help cushion households against tighter financial conditions, keeping overall activity relatively resilient through the slowdown.

Queensland is expected to remain one of the stronger performers. GSP growth is forecast to slow from a year-average pace of 2.6%yr in FY2026 to 1.8%yr in FY2027, before picking up again to around 2.0%yr in FY2028. Consumption growth is expected to remain solid, easing only modestly from 2.5%yr in FY2026 to 2.1%yr in FY2027, before rebounding to 2.6%yr in FY2028. Momentum will be further reinforced by Olympics-related infrastructure investment and associated activity. Employment growth is forecast to average around 1.5% in FY2027 and 2.0% in FY2028.

WA is also expected to perform relatively strongly. GSP growth is forecast to moderate from around 2.4%yr in FY2026 to 1.8%yr in FY2027, before re-accelerating to 2.4%yr in FY2028. Consumption growth should remain resilient, easing from 2.8%yr in FY2026 to around 2.1%yr in FY2027, before lifting back to 2.6%yr in FY2028. As in Queensland, higher dwelling prices are expected to support demand near term through wealth effects. On this basis, employment growth is forecast at around 1.8% in FY2027 and 2.2% in FY2028.

Employment



Consumption led states to slow sharply

By contrast, the consumer-led states of NSW and Victoria are set to underperform as higher interest rates and cost of living pressures weigh directly on households.

In NSW GSP growth is forecast to slow from around 1.9% to just 0.8% in FY2027, as tighter financial conditions and elevated inflation dampen demand. The downturn is consumer led, with household consumption growth expected to fall to below 1% in FY2027 from around 2.0% in FY2026. Private investment should provide a partial offset, particularly in structural growth areas such as renewables and data centres. Higher costs will continue to place pressure on the state budget, though policy settings are likely to remain largely unchanged heading into the election early next year.

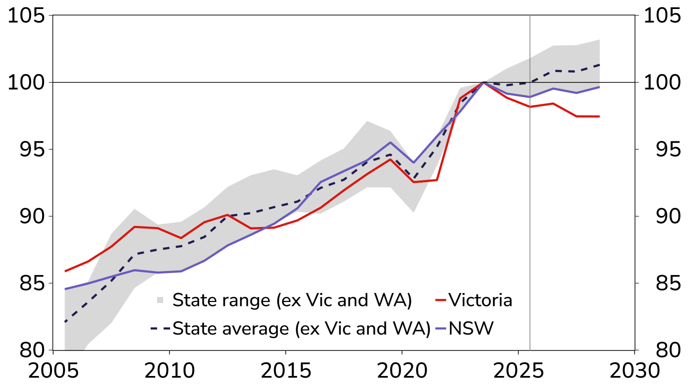
This slowdown is expected to weigh materially on labour demand. Coming off a weak base of 0.6% in FY2026, employment growth is forecast to recover only modestly, rising to 1.1% in FY2027 and 1.6% in FY2028—below the national average in each year.

In Victoria, GSP growth is expected to fall from around 2.0% in FY2026 to 0.7% in FY2027, broadly mirroring the slowdown in NSW. Consumption growth is also expected to ease sharply, from around 2.0% in FY2026 to just 0.7% in FY2027. Risks are more elevated in Victoria. Private investment has been noticeably weaker, particularly in dwelling construction, with forward indicators such as approvals lagging those in most other states (aside from Tasmania). While public demand should provide short term support ahead of the election, there is a risk that post election fiscal consolidation weighs on activity. We also expect some pause in private sector investment decisions as the November 2026 election approaches.

Employment outcomes are forecast to be like NSW in FY2027 and FY2028, though with greater downside risk, given employment growth had already begun to slow sharply even prior to the Middle East conflict.

Gross State Product per capita

Index: FY2023 = 100, Financial years



Source: , Macrobond, Westpac Economics

SA continues to punch above its weight

As highlighted in our March Coast to Coast report (see here), the SA economy is firing on all cylinders. Both private and public activity have firmed, supported by a substantial pipeline of infrastructure and defence related spending. In per capita terms, defence investment and employment are among the strongest in the country, delivering a durable lift to incomes. Housing approvals are also relatively strong on a per capita basis, pointing to ongoing demand growth. Expansion in strategic industries, particularly defence and advanced manufacturing, provides a solid medium term foundation for growth.

That said, some slowing in employment growth is expected. After an exceptionally strong 3.7% in FY2026, employment growth is forecast to ease to 1.6% in FY2027 and 1.7% in FY2028.

Tasmania to continue to be the laggard

Tasmania continues to lag, with softer population growth limiting momentum in housing construction and consumer demand, leaving the state more exposed to the broader slowdown. The state also has the softest labour market and weakest consumer sentiment nationally, which is likely to weigh further on private demand. Employment growth is expected to remain subdued, easing from 1.1% in FY2026 to 0.9% in FY2027. Household consumption per working age population.

Bottom line

The period of state growth convergence seen in 2025 is over. As households are squeezed by higher rates and inflation, state outcomes will diverge sharply, led by the mining states and SA, and dragged by consumption heavy NSW and Vic. While rate cuts in 2028 should eventually stabilise conditions, the longer the global shock persists, the deeper and more uneven the adjustment across states is likely to be.

One liner: A slowing national economy, persistent inflation and higher interest rates will lead to state level divergences, with mining states resilient and the consumer-led states under pressure.

GSP Expenditure Components by State

Federal Budget: On the upside of the revenue cycle, the challenge is policy timing

#federalbudget #australia #aud #inflation

By Pat Bustamante
Senior Economist, Westpac

10:10 April 28 2026

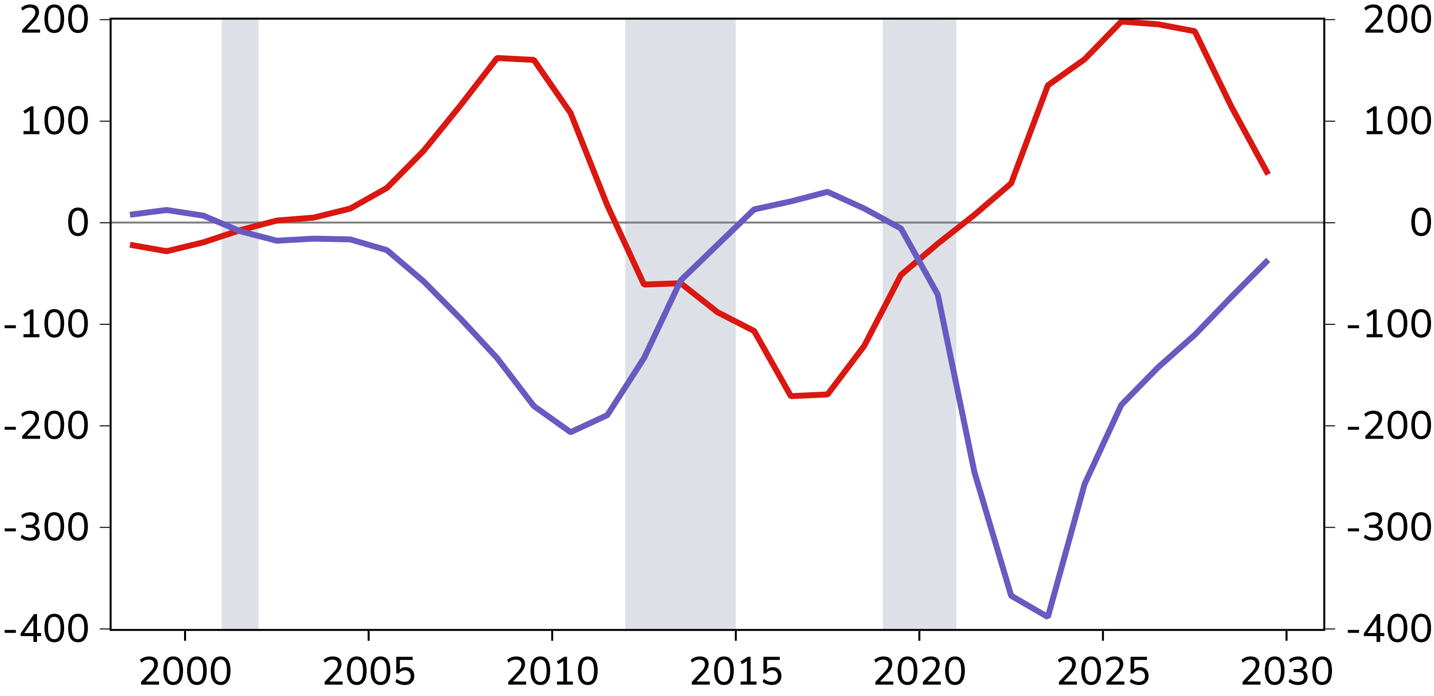
Share

With only a modest budget windfall, changes in the Budget bottom line will hinge on discretionary decisions, which history shows are triggered once labour-market risks become material.

- Higher commodity prices and inflation – among the so-called “parameter variations” that drive government budget outcomes – are expected to deliver a net fiscal windfall, despite higher costs driven by elevated inflation, slower growth, and rising unemployment. Treasury is likely to publish a net improvement of around $23bn across the forward estimates. This is less than the net improvement of $55bn we expect will eventually be published based on our less conservative commodity price (and thus revenue) forecasts.
- Given this relatively small upgrade, the change in the published budget bottom line will largely be determined by discretionary policy decisions. Surprisingly, discretionary fiscal policy has been pro-cyclical over the past 30 years: discretionary measures tending to expand when the nominal economy delivers windfalls and to tighten when there are shortfalls.
- Only during major crises (such as the GFC and COVID) has discretionary fiscal policy played a significant counter-cyclical role. However, fiscal measures have tended to be late and slow to unwind, with the maximum ‘policy impact’ occurring when the recovery was under way and improving economic conditions were delivering revenue windfalls – a lesson perhaps for the current conflict.
- Our analysis also shows that discretionary fiscal policy is highly responsive to labour market risks. Policy has historically become much more activist once employment growth forecasts are downgraded by at least 0.35ppts across the forward estimates. A change of this magnitude is consistent with the economic downgrades we expect this Budget.
- As a result, the scale of any discretionary fiscal response is likely to depend critically on Treasury’s assessment of the labour market fallout from the conflict in the Middle East. **Given the nature of the current oil price shock, a response that is not targeted and temporary risks exacerbating the cycle.**

Economic variations and discretionary policy*

Impact on the UCB, Rolling 3 year sum, $billions.



Source: PBO fiscal data, Macrobond, Westpac Economics

*shaded periods denote counter-cyclical policy where variations and discretionary policy work in opposite direction.

The Middle East crisis and associated global energy shock will have a complex and varied impact on Federal government finances. Higher-than-assumed commodity prices and elevated inflation will continue to lift nominal incomes and tax receipts. But the Budget impact of the Middle East conflict does not stop there. **In a shock like the current one, where economic and employment growth slow, unemployment ticks higher and inflation accelerates, welfare payments and the cost of government rise as well.**

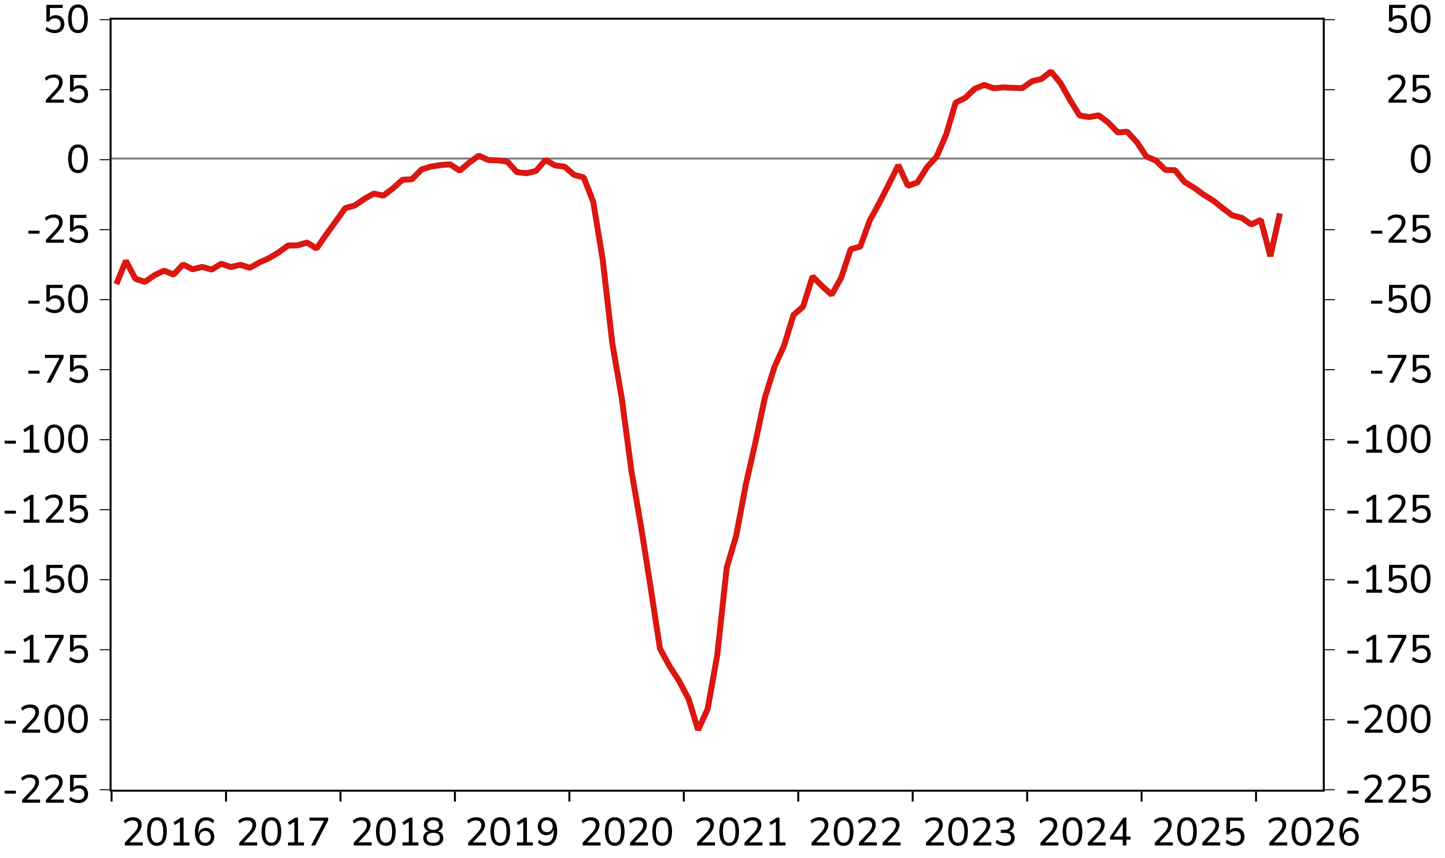
We expect economic growth to slow materially through 2026 to just 1%yr, down from 2.6%yr in calendar 2025. The unemployment rate is forecast to drift higher to almost 5% by year-end, around ½ppt above our pre-conflict profile, and remain elevated through 2027. Combined with accelerating inflation, now expected to peak at around 5.4%yr in Q2 2026 (up from around 3.8%yr expected prior to the conflict), this will push government payments onto a permanently higher path in nominal terms.

The Starting Position is Strong

On Friday 24 April the Department of Finance released the final set of monthly financial statements ahead of the May 12 Budget, and they did not disappoint. The underlying cash balance is currently running around $17bn ahead of the profile set out in the December MYEFO, published only a few months ago. This upside has been driven by the cyclical upswing which is boosting tax collections and making it harder for the Government to get capital out the door because of capacity constraints in certain industries (most notably construction). Looking at the rolling 12-month cash balance, the steady deterioration observed since March 2024 has now stabilised, and we expect an improvement from here.

Underlying Cash Balance

Rolling annual sum, $billions



Source: Australian Department of Finance, Macrobond, Westpac Economics

Cash tax collections are running around $7.2bn ahead of profile. This reflects stronger-than-expected personal income tax collections (around $5bn) and company tax receipts (around $2bn). We expect upside surprises to continue once miners make wash-up payments in May, reflecting higher commodity prices across the 2025 calendar year – particularly for gold.

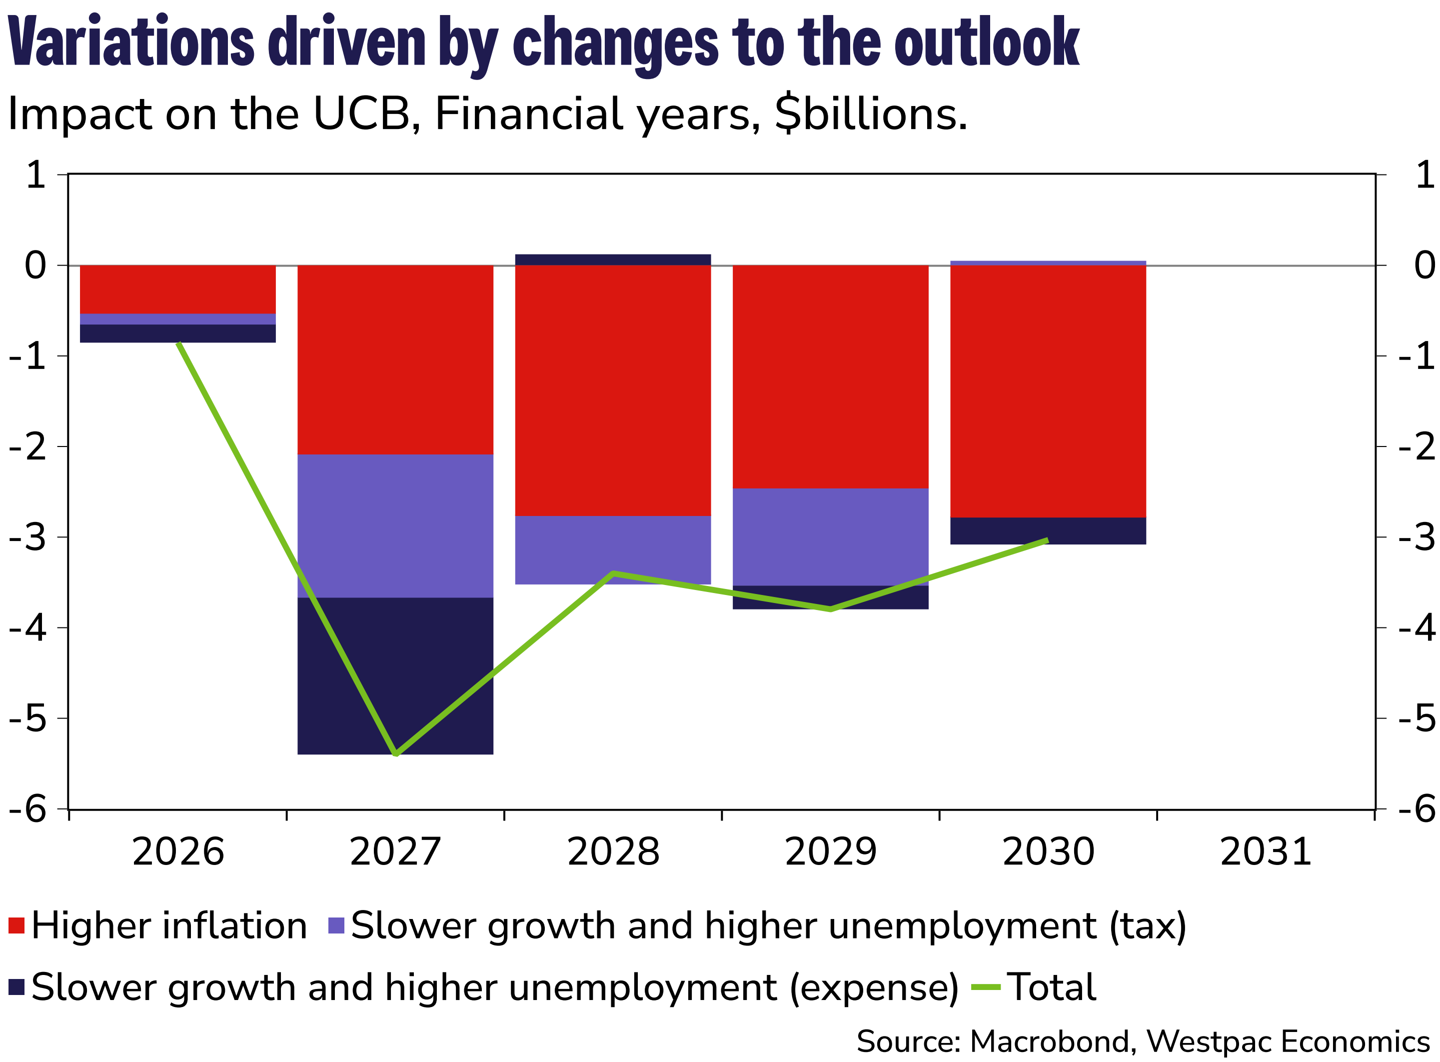
The cyclical upswing is also making it harder for the government to get money out the door. Payments are running around $10bn below forecast, including $2bn in investment in non-financial assets (defence, IT and infrastructure) and $4bn in grants and subsidies to the states, reflecting slower progress payments. In addition, the headline deficit is ahead of profile with off-budget spending (including CEFC and Housing Australia) coming in around $3bn below profile.

Overall, this points to a meaningful improvement in the bottom line, with the deficit now tracking at close to half of what was previously expected.

Payments Pressures Rise in a Stagflationary Environment

But the outlook becomes more challenging from here. Parameter variations will push payments higher mechanically, with inflation lifting both service delivery costs and the indexation of programs such as pensions and income support. **We estimate this will add roughly $11 billion to spending over the five years to FY2030.**

In addition, slower activity and employment growth, alongside a higher unemployment rate, will raise social payments and reduce income-tax collections, at a cost of around $6bn over the same period. **In total, these forces are likely to worsen the budget position by around $17bn.**



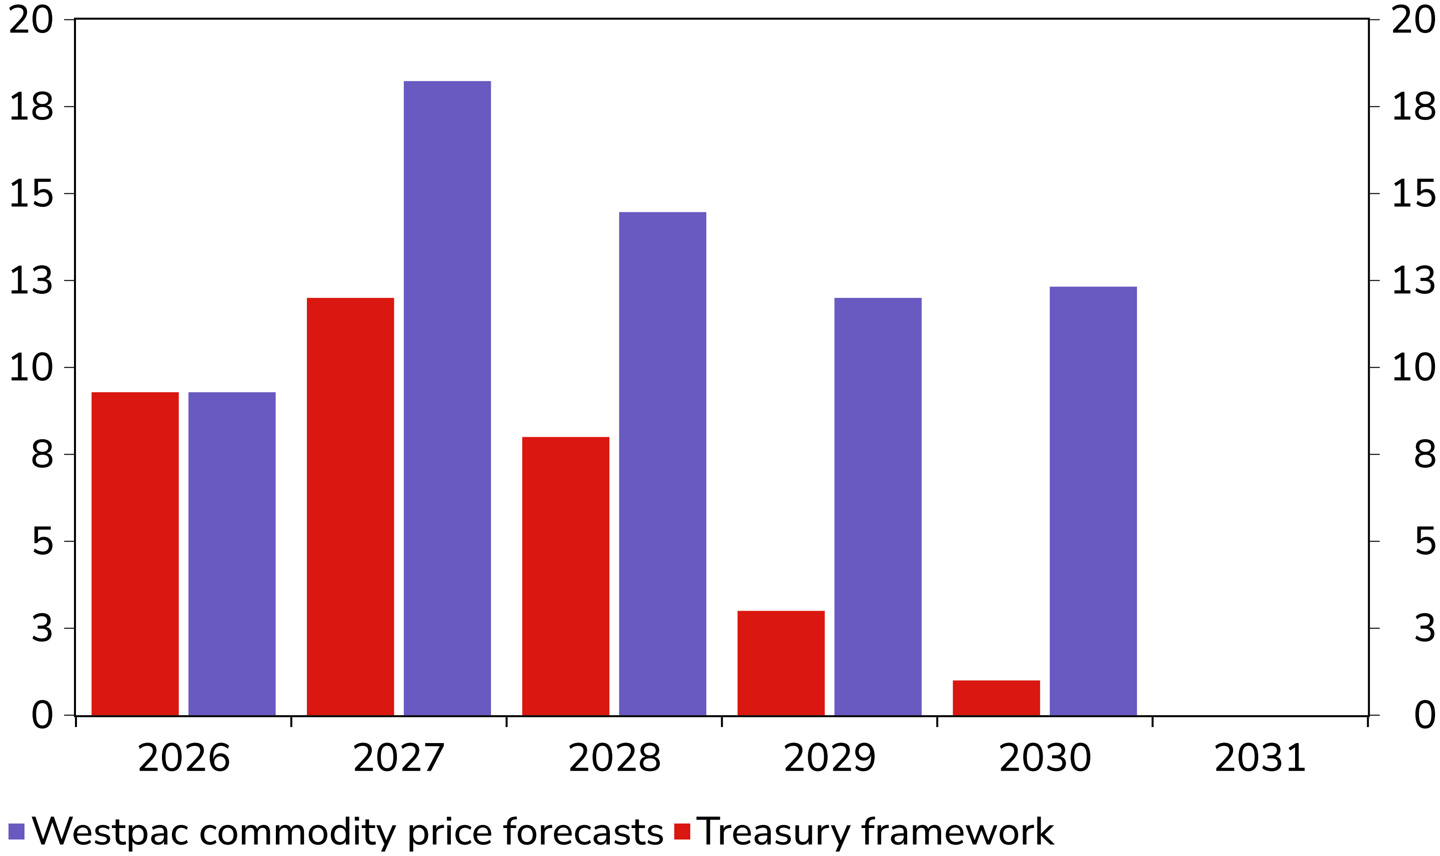
Commodity Revenues More Than Offset Higher Costs

However, these costs are more than offset, at least initially, by higher tax collections. Higher gold prices, elevated inflation and direct spillovers from the Middle East conflict into global commodity markets are set to lift company tax receipts by around **$60bn over the next five years, with roughly $20bn attributable to conflict-driven commodity price gains**.

But much of that uplift is unlikely to appear in full in the 12 May Federal Budget. Treasury's standard approach assumes commodity export prices fall from current spot levels back toward long-run fundamentals, typically over four quarters (and eight quarters for gold). On those more conservative assumptions, the implied windfall is lower at around $29.5bn over five years, with the remainder only materialising in later budgets or final budget outcomes.

Tax upgrades driven by elevated commodity prices

Impact on the UCB, Financial years, $billions.

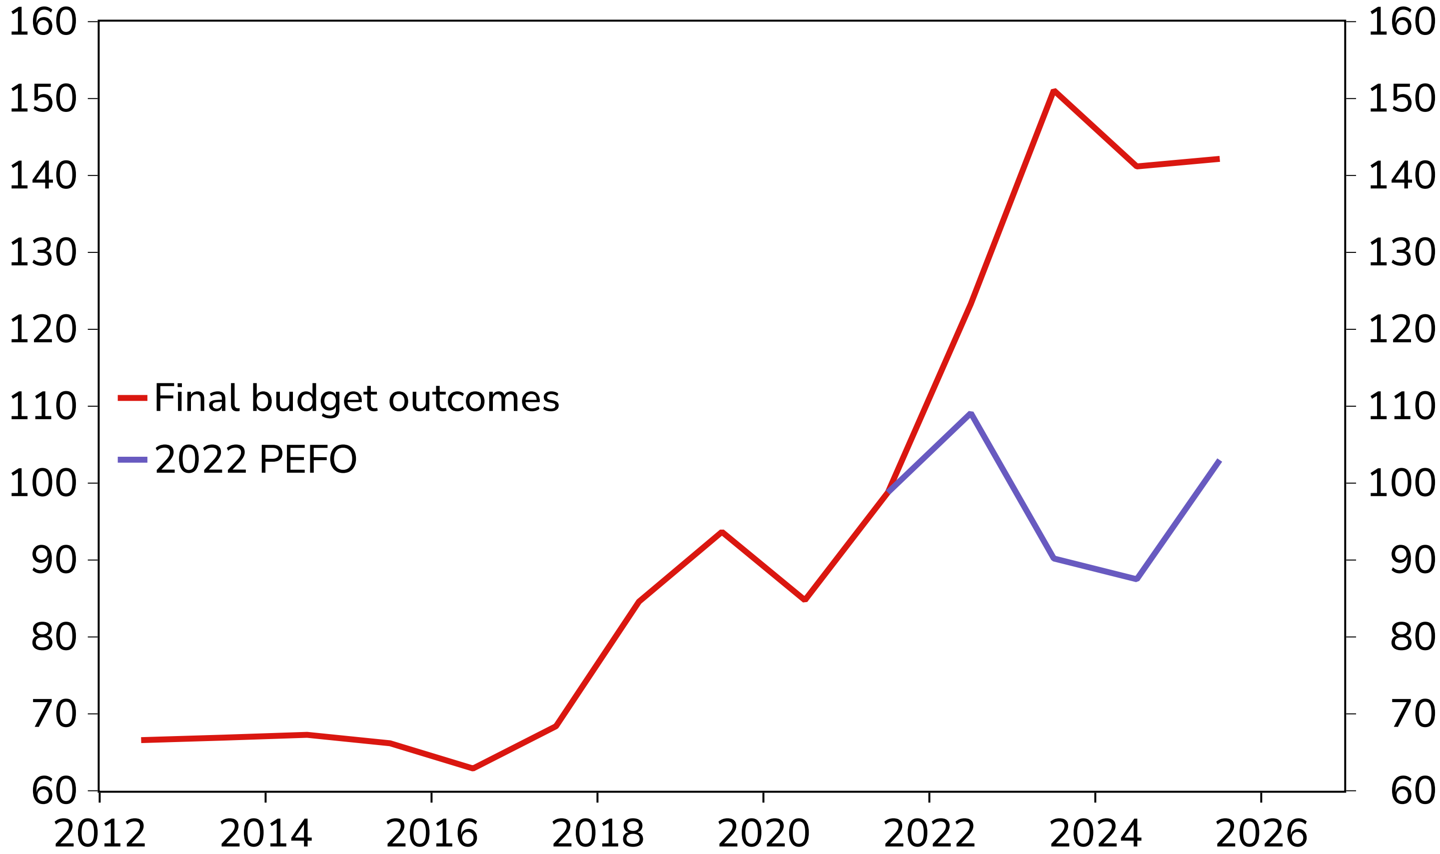


Source: Macrobond, Westpac Economics

This familiar pattern, conservative commodity price assumptions up front followed by stronger-than-expected company tax receipts down the track, has become a defining feature of Australia's recent fiscal narrative. **Over the four years to the end of FY2025, company tax receipts were a staggering $168bn higher than projected in the 2022 Pre-Election Fiscal Outlook (or an average of $42bn higher per year).**

Company tax forecast and outcomes

Financial years, $billions.



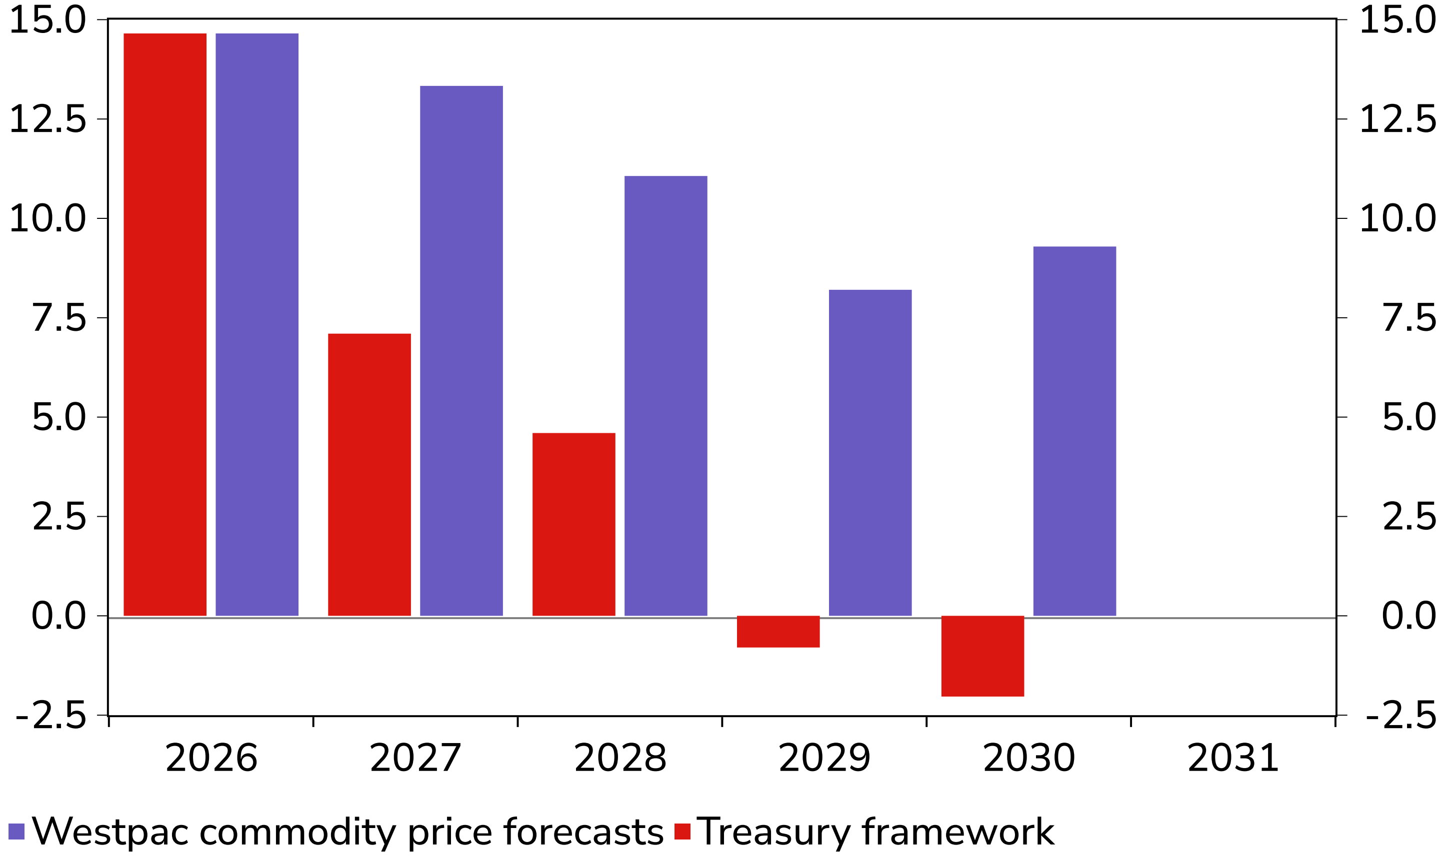
Source: Macrobond, Westpac Economics

Delivering the Budget a Temporary Windfall

Under Treasury's standard assumptions, what will be published on 12 May, the net gain to the Budget is closer to $23bn over the next five years, with net gains frontloaded, shifting to negative over the final two years of the forward estimates. Under our less conservative commodity-price forecast, the windfall is materially larger, closer to $55bn over the same period.

Net impact of changes to the economic outlook

Impact on the UCB, Financial years, $billions.



Source: Macrobond, Westpac Economics

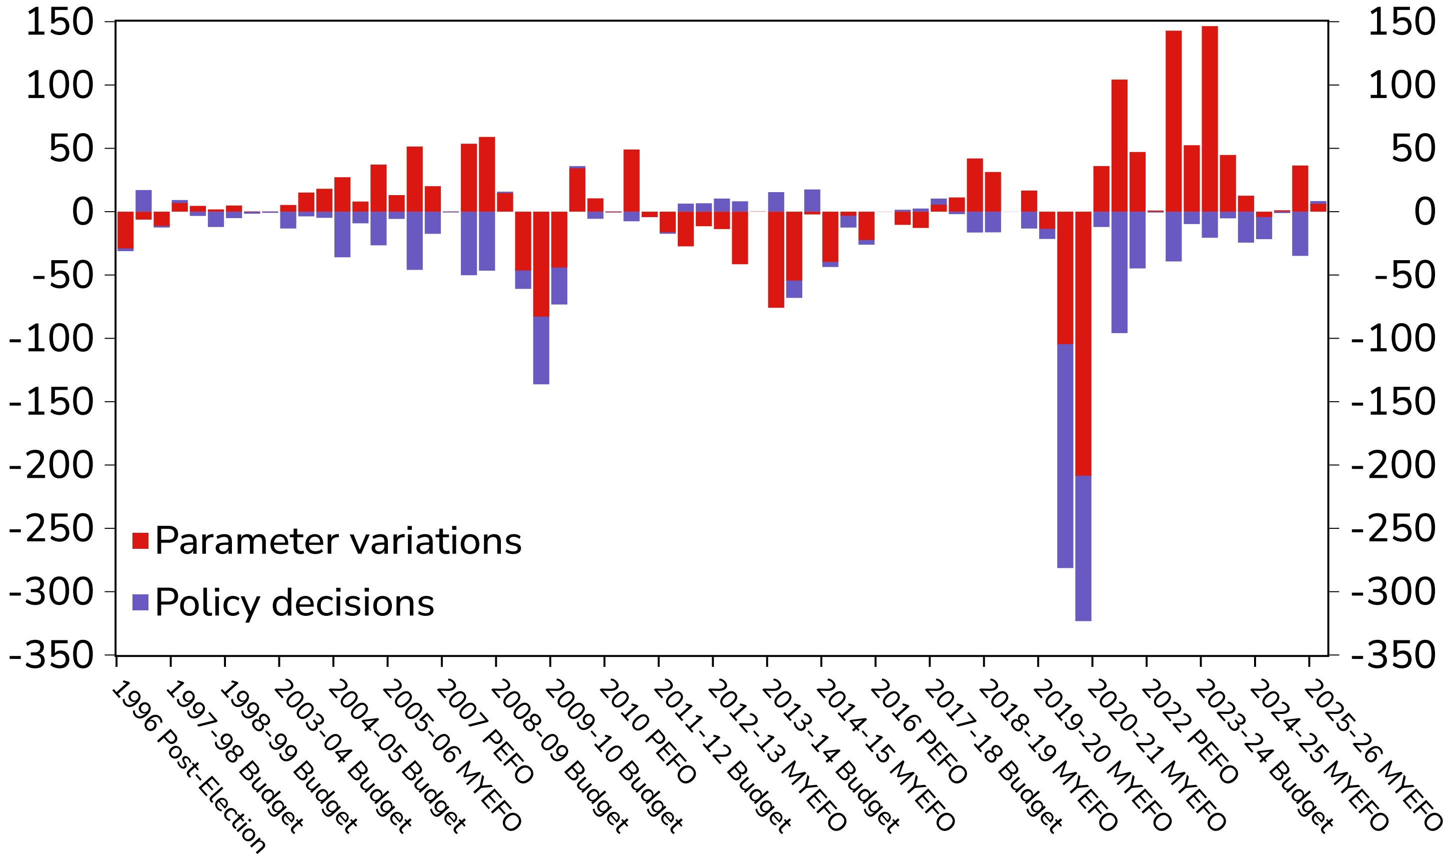
Discretionary Policy: The Key Swing Factor

The big unknown at this stage is how the government chooses to respond to the economic and social fallout from the conflict in the Middle East and how this is balanced against other reforms, most notably those aimed at reining in spending on the NDIS and promoting intergenerational equity. Given relatively small upgrades, **the Federal government will be navigating uncharted waters where policy decisions will determine whether the budget position ultimately improves or deteriorates.**

This is different from the historic norm where the impact of variations driven by changes to the economic outlook (red bars in the chart below) have been significantly larger than the impact of policy changes (purple bars).

Economic variations and discretionary policy by round

Impact on the UCB over relevant forwards, $billions.



Source: PBO fiscal data, Macrobond, Westpac Economics

Looking at government behaviour over the past 30 years, several clear regularities emerge.

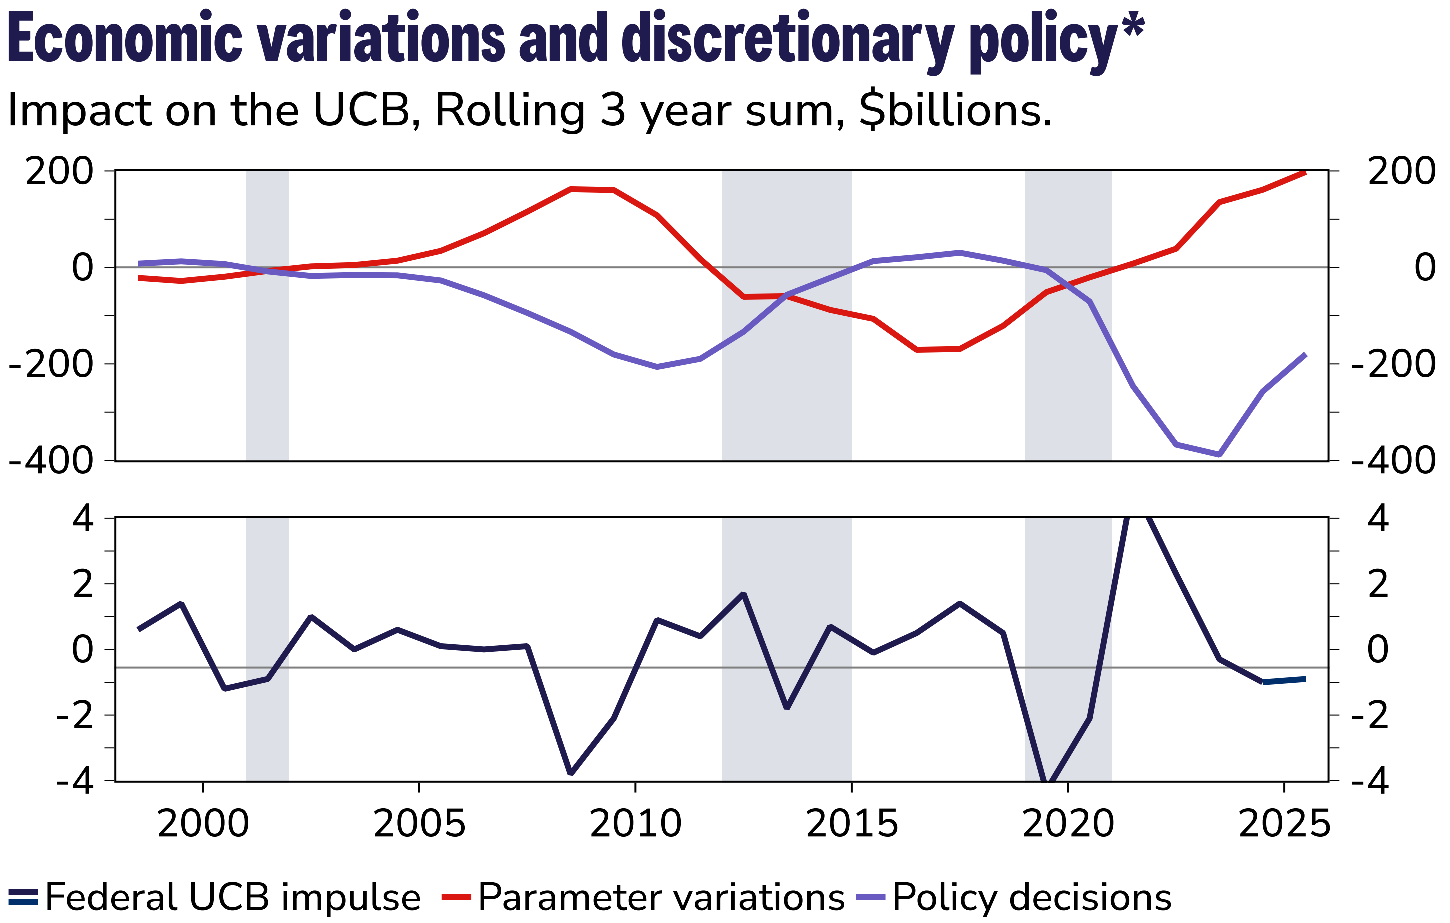
First, discretionary fiscal policy has generally been pro-cyclical. That is, discretionary government decisions add to the fiscal impulse when the nominal economy and commodity prices deliver a budget windfall and vice versa. This pattern was especially pronounced in the pre-pandemic decade and in the aftermath of COVID, with discretionary government policy adding materially to the overall fiscal impulse.

For example, immediately prior to the pandemic discretionary policy changes improved the budget while variations driven by the nominal economy were subtracting from the budget – in other words, the nominal economy was surprising on the downside. This combination of tighter policy when the economy and commodity prices underwhelm likely contributed to the period of sluggish growth and below RBA target underlying inflation recorded at the time.

On average across the budget rounds since the 1996 post-election budget, around 75% of the budget windfalls have been spent.

Note that there are instances when the nominal economy could be growing more strongly than the real economy, such as when commodity prices are rising and inflation is elevated. In this world, “pro-cyclical” policy could be more justifiable, only where the real economy is softening.

Secondly, fiscal policy becomes counter-cyclical during crises, such as the GFC and COVID. Importantly, these episodes are typically characterised by a fiscal overshoot, with fiscal expansion persisting even as the shock dissipates and economic conditions improve. For example, peak policy impact around COVID was in the 2023FY, when a recovery was gaining traction and economic variations and nominal income growth were surprising to the upside.



Source: PBO fiscal data, Macrobond, Westpac Economics
*shaded periods denote counter-cyclical policy where variations and discretionary policy work in opposite direction.

Finally, discretionary spending has historically been highly responsive to labour market risks. Our modelling of how fiscal policy responds to changes in economic conditions and forecasts shows that policy is particularly sensitive to expectations for employment growth and unemployment, and that this response is non-linear.

Using historical budget data, we find statistically significant threshold effects. When employment growth is downgraded by at least 0.35ppts in a single budget round, governments have tended to shift into a more activist fiscal regime. A downgrade closer to ½ppt (which is consistent with Westpac Economics' recent downgrades) has, in the past, been associated with discretionary fiscal packages of at least $10bn over the forward estimates.

Taken together, this suggests that at least some of the windfall is likely to be spent, and possibly a large fraction of it. **The scale of any discretionary response will depend critically on Treasury's assessment of the labour-market implications of the conflict in the Middle East. While there is no sense of panic within government, policymakers are clearly alert to the downside risks.**

What next

Before the May 12 budget we will publish our final estimate of the bottom line including announced measures. As noted, unlike the most recent history, overall improvements will hinge on government policy rather than the economy. In addition, we will publish what this means for the national (federal and state) fiscal impulse going forward.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

“professional clients” as defined by the rules of the Financial Conduct Authority and is not intended for “retail clients”. Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area (“EEA”): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH (“WEG”) under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority (‘BaFin’) and subject to its regulation. WEG’s supervisory authorities are BaFin and the German Federal Bank (‘Deutsche Bundesbank’). WEG is registered with the commercial register (‘Handelsregister’) of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an ‘investment recommendation’ and/or ‘information recommending or suggesting an investment’, both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) (“MAR”). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

It Depends on What You are Trying to Achieve

Speculation about tax reform in the upcoming federal budget abounds. That presumes a lot about the problems the budget should solve and whether the tax system is the right solution.

- Pre-budget speculation has tended to start from the presumption that more revenue is needed. The justification is sometimes the perceived need to fund spending priorities that are assumed – perhaps erroneously – to be rising. In other quarters, minimising the deficit or government debt appears to be the objective. Whatever the objective, it should be scrutinised not assumed.

- Speculation about changes to the capital gains tax (CGT) regime highlight the potential to increase revenue, but there is no guarantee of this. For example, switching back to the pre-1999 regime or the simplified version of it we have previously suggested will only boost revenue if asset price growth exceeds 5%.
- There are many possible objectives that fiscal systems – tax and spending – can address, often different objectives in different parts of the system. “Boost revenue” is not the only possible goal, and tweaking the tax system is not the only solution to a policy objective.

Speculation is building as budget night approaches. While the government must deal with the immediate issues in front of it stemming from the Middle East conflict, many observers are focused on the maxim “never let a good crisis go to waste” and hoping for broader reforms – usually the same ones they were advocating before the conflict erupted. The question of what the budget should do rests, however, on the deeper question of what problems the government is trying to solve.

For example, recent discussion has been focused on an assumed need for extra revenue. Tax reforms are dissected for how much more they might raise, while revenue windfalls from higher commodity prices are downplayed. Underlying this view are other presumptions – seemingly widespread across different levels of government and the bureaucracy – that “people expect more from government nowadays” and that governments should strive to meet those expectations. Absent from these discussions are the questions of whether the government’s effort and resources are being deployed effectively, and whether it can stop doing some things altogether.

A related presumption underlying the search for more revenue is the belief that population ageing is shrinking the workforce, even though this is not true in Australia and most other advanced economies outside North America.

A separate pathway to the search for more revenue comes from a different premise: that the federal fiscal position is weak and large revenue measures (and/or spending cuts) must be found to reduce the deficit significantly. It is good to have strong public finances. It keeps government borrowing costs low and leaves plenty of space to spend in a crisis. Yet the presumption that government finances are parlous and in need of repair sits oddly with Australia’s actual federal fiscal position, which is stronger than many of its peers.

Take the recent speculation about removing the CGT discount. It has been touted as a revenue-raising measure, but there is no guarantee of this. One could consider moving back to the pre-1999 system of adjusting the gain for growth in CPI and applying the full marginal rate to the remainder. Alternatively, one could consider the simplified version we suggested in 2023, where the adjustment is 2.5% per year the asset is held – the midpoint of the RBA’s inflation target – regardless of actual inflation over the holding period.

Applying a full marginal rate to an adjusted return still taxes mobile capital more lightly than other income, as economic theory would suggest. It has an advantage over the current system of not privileging capital gains-producing assets over income-producing assets at the margin. Because assets that can be leveraged are especially advantaged by the current system, switching back to the pre-1999 system or our simplified alternative would also promote financial stability. It would increase the effective tax rate on capital gains during booms in real asset prices, and our simplified proposal would also lean against periods of high CPI inflation.

What it will not do, though, is necessarily boost revenue. If asset prices rise by less than 5% per year, revenue is lower. For example, a 4% rise, less 2.5% deduction, means tax is paid on 1½% of capital gains. The current system of half the marginal rate on the full gain would be the equivalent of taxing 2% of gains if asset prices rose 4%yr. Revenue is only higher than the current scheme if asset prices rise by more than 5%. And even in that case, the increase in revenue might only be small once people have adjusted to the change and the other possible design decisions associated with it, such as grandfathering and limits on the number and type of assets eligible for the discount.

Absent from the current discourse is any discussion of the proper role and size of government, or the level of government that is best placed to take on the functions required. As Westpac Economics colleague Pat Bustamante has previously shown, the size of government in Australia has increased substantially over the past decade. When private demand indirectly induced by public spending is included (think legal work for construction companies working on public infrastructure projects), the footprint of public demand has risen from 27% to 35% of GDP over the past decade.

Much of this expansion is desirable. We should want to care for disabled and elderly Australians properly and have high-quality childcare available at an affordable price. That takes resources, and private markets alone are unlikely to deliver enough of these services. Likewise, with population growth running around 1½%, both pre-pandemic and currently, we will always need more public infrastructure. Both types of spending also have positive spillovers. Social care spending allows those who were providing informal care to enter paid employment. And done well, infrastructure spending can boost skills and productivity and open up new opportunities through better logistics.

The question of what should or will happen in the budget boils down to which of the many possible objectives government wants to prioritise. Is it addressing the growing income tax burden in a system of fixed tax brackets, or minimising the deficit, or making the tax system more responsive to the economic cycle, or providing more services to meet the public's expectations, or doing so more efficiently? What about national and economic security? The budget is a complex beast and different design decisions can address different objectives. This is not like monetary policy, where there is only one instrument and at most two objectives, inflation and full employment, which are in any case correlated at least some of the time.

Global economic and geopolitical developments pose challenges, while new technology and an expanding, ageing workforce create opportunities. We should not assume that tweaking the tax system is the answer to every issue. Your fiscal priorities should relate to your public policy objectives.

The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

“professional clients” as defined by the rules of the Financial Conduct Authority and is not intended for “retail clients”. Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area (“EEA”): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH (“WEG”) under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority (‘BaFin’) and subject to its regulation. WEG’s supervisory authorities are BaFin and the German Federal Bank (‘Deutsche Bundesbank’). WEG is registered with the commercial register (‘Handelsregister’) of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an ‘investment recommendation’ and/or ‘information recommending or suggesting an investment’, both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) (“MAR”). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

Each time someone visits our site, data is captured so that we can accurately evaluate the quality of our content and make improvements for you. We may at times use technology to capture data about you to help us to better understand you and your needs, including potentially for the purposes of assessing your individual reading habits and interests to allow us to provide suggestions regarding other reading material which may be suitable for you.

Disclaimer

This information has been prepared by Westpac and is intended for information purposes only. It is not intended to reflect any recommendation or financial advice and investment decisions should not be based on it. This information does not constitute an offer, a solicitation of an offer, or an inducement to subscribe for, purchase or sell any financial instrument or to enter into a legally binding contract. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice. Certain types of transactions, including those involving futures, options and high yield securities give rise to substantial risk and are not suitable for all investors. We recommend that you seek your own independent legal or financial advice before proceeding with any investment decision.

This information may contain material provided by third parties. While such material is published with the necessary permission none of Westpac or its related entities accepts any responsibility for the accuracy or completeness of any such material. Although we have made every effort to ensure this information is free from error, none of Westpac or its related entities warrants the accuracy, adequacy or completeness of this information, or otherwise endorses it in any way. Except where contrary to law, Westpac Group intend by this notice to exclude liability for this information. This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words “believe”, “anticipate”, “expect”, “intend”, “plan”, “predict”, “continue”, “assume”, “positioned”, “may”, “will”, “should”, “shall”, “risk” and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author’s knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac’s Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac (“WNZL”). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

Cliff Notes: conflict in the Middle East to cast a long shadow

#cliffnotes #rba #australia #inflation #us #fomc #ecb #aud #usd

By Elliot Clarke & Ryan Wells

11:38 April 17 2026

Share

Key insights from the week that was.

The first detailed look at the mindset of Australian consumers and businesses amidst the Middle East conflict proved sobering. Our Westpac-MI Consumer Sentiment Index posted its largest fall since COVID-19, down 12.5% to a deeply pessimistic reading of 80.1. The impact from the surge in fuel prices was acute, leading to a more pronounced deterioration in the sub-indexes tracking current conditions – namely 'family finances vs a year ago' (–16.7%) and 'time to buy a major household item'

(–15.0%). There were also significant hits to the year-ahead outlook for family finances (–13.9%) and the economy (–12.4%), suggesting households are bracing for enduring pressure.

The tone of the March NAB business survey was no better, business confidence collapsing 29pts from a neutral reading in February. This came alongside a notable lift in purchase cost pressures, up 1.7ppts to a quarterly pace of 3.0%. That final producer prices lifted +0.4ppts emphasises the rapid pass-through of surging fuel costs, but also that businesses are currently absorbing most of the increase in costs via margins, impacting profitability. Note though, the readings for current trading conditions and employment were positive, enabling business conditions to hold around its long-run average. This suggests the underlying health of the economy can be maintained if risks subside quickly.

This week we also received the March Labour Force Survey. It showed the Australian labour market was in good health prior to the Middle East conflict and the RBA's most recent rate hike. Employment growth continued to strengthen from its trough in March, from 1.0%yr to 1.5%yr on a three-month average basis, reflecting the economy's momentum through the second half of 2025 and into 2026. The unemployment rate has also held at 4.3% over the past two months, a similar level to the second half of last year. It now looks increasingly like the 4.1% prints at the turn of the year were due to temporary weakness in participation, not a sustained re-tightening.

However, given the hit to business confidence and the expectation of further policy tightening, the Middle East conflict looks set to cast a long shadow over the labour market. We expect a combination of lower average hours worked and slower employment growth, seeing the unemployment rate lift to 5.0% in early 2027. Tracking industries most exposed to the fuel shock will provide an initial take on the scale of the impact. Manufacturing, construction, transport/logistics and travel/tourism are the sectors to watch.

Offshore, an abrupt end to the first round of in-person talks between the US and Iran and the US' Navy's subsequent blockade of Iranian ports and associated vessels was the main point of conversation for markets this week. The market's take has been sanguine, the price of Brent oil retreating below US$100 and global equities rallying back to historic highs during the week. Comments made by both sides imply negotiations are ongoing and another round of in-person talks will occur before the two-week ceasefire ends in coming days. There is also the option to extend the ceasefire, if necessary.

Effectively cut off from global shipping, Iran's need for a deal is clear. But arguably this is also the case for the US economy, University of Michigan consumer sentiment falling to a record low this week, 43% below the average of the survey since 1978. Price pressures are currently limited to first-order effects, headline CPI inflation printing at 0.9% against a core reading of just 0.2% in March; but, should the conflict persist, it is highly likely second-round effects will permeate through the US economy, materially increasing the likelihood of inflation holding well above target and term interest rates trending higher. FOMC members who spoke this week all showed confidence in the underlying health of the US economy but also concern over the potential for an lasting imbalance between growth and inflation.

In contrast, China's economy showed strength this week, annual GDP growth accelerated from 4.5%yr in Q4 2025 to 5.0%yr in Q1, matching the full-year outcome for 2025. From the monthly partial data, China’s Q1 momentum was principally due to the strength of exporters and associated investment, both of which are likely to receive a lasting boost from increased demand for green technology given the Middle East’s impact on energy prices and supply. There is reason for guarded optimism over the outlook for property investment as well, the year-to-date decline having moderated from -17%ytd at December to -11%ytd in February and March. Still equivalent to circa 15% of GDP, an end to the sharp construction declines of recent years would provide a material boost to aggregate growth through 2026.

External demand and investment’s support for GDP masks the still-troubled state of consumer demand, however. Having surprised to the upside in February at 2.8%ytd, in March retail sales growth slowed once again to 2.4%ytd. While not a disastrous outcome by any means, it is less than half the average pace of the past five years post pandemic, a historically weak period for household demand growth. Policy makers have been clear in their intent to provide additional support to households but are yet to action plans. And, while equities have risen through the year, house prices continue to decline, weighing on wealth and sentiment. Without broadening the growth pulse, aggregate momentum will remain susceptible to slipping towards, or through, 4.0% in coming years, even with a significant benefit from global demand for green technology.

A full update of our expectations and assessment of risks for the global economy and markets will be made available today in the April edition of Market Outlook on Westpac IQ.

U.S.: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission (“CFTC”) as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation (“FDIC”). Westpac Capital Markets, LLC (‘WCM’), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 (‘the Exchange Act’) and member of the Financial Industry Regulatory Authority (‘FINRA’). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent

liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac’s London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”)); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2)of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as “relevant persons”). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for “eligible counterparties” and "professional clients" as defined by the rules of the Financial Conduct Authority and is not intended for "retail clients". Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area ("EEA"): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH ("WEG") under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority ('BaFin') and subject to its regulation. WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

Except where contrary to law, Westpac Group intend by this notice to exclude liability for this information. This information is subject to change without notice and none of Westpac or its related entities is under any obligation to update this information or correct any inaccuracy which may become apparent at a later date. This information may contain or incorporate by reference forward looking statements. The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

WEG's supervisory authorities are BaFin and the German Federal Bank ('Deutsche Bundesbank'). WEG is registered with the commercial register ('Handelsregister') of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an 'investment recommendation' and/or 'information recommending or suggesting an investment', both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) ("MAR"). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found here. Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.

30 April 2026

MORNING REPORT

Today's economic developments and market movements.

Key themes

Markets were mixed as developments in the Middle East dominated sentiment, with President Trump rejecting Tehran's latest proposal, while the FOMC separately left policy unchanged and Chair Powell indicated this would be his final meeting as Chair.

Equity markets were subdued, though sentiment found some support from strong AI and cloud-related growth reported by major US technology firms, while the ASX 200 recorded its seventh consecutive daily decline.

US bond markets sold off sharply as hawkish dissent at the FOMC challenged statement language viewed as implying an easing bias, while Australian government bonds found support after a softer-than-expected core inflation outcome.

The USD strengthened, with the Australian dollar recording its weakest daily performance against the greenback since March.

Oil prices surged, with Brent climbing to its highest level since 2022.

Financial Markets

Markets were mixed overnight, with a range of headlines shaping sentiment. Developments in the Middle East saw reports that President Trump has rejected Tehran's latest proposal, reaffirming that the US will not lift its naval blockade of the Strait of Hormuz until a deal addressing Iran's nuclear programme is secured.

In the US, the FOMC left policy unchanged at its April meeting in an 8–4 vote. In his press conference, Chair Powell noted that this would be his final meeting as Chair, adding that he intends to remain on the Board as Governor until investigations into the Federal Reserve are concluded with "finality and transparency".

- Equity markets were generally lower. In the US, equities were subdued, with the S&P 500 and NASDAQ 100 little changed and the Dow Jones down -0.6%. Strong growth reported by Microsoft, Alphabet and Amazon in their AI and cloud related divisions helped offset broader weakness.
- European equities struggled, with the Euro Stoxx 50 down -0.3% and the FTSE 100 posting a deeper decline of -1.2%. Asian markets diverged, with the Hang Seng up 1.7% while the Nikkei 225 fell -1.0%. Locally, the ASX 200 recorded its seventh consecutive daily decline, down -0.3%.
- US bond markets reacted sharply to the Fed's divided decision, with hawkish dissent over statement language in focus, pushing the 2 year yield up 11bps and the 10 year 8bps. Futures pricing has reversed recent moves, now assigning an 11% probability of a rate hike by year-end.
- Australian government bonds found support following a softer than expected core inflation outcome. The 3 year yield fell 4bps and the 10 year yield declined 3bps. Following the CPI release, swap markets now price a 67% probability of a rate hike at next week's meeting.
- FX markets saw broad USD strength, with the DXY up 0.3%. The AUD recorded its weakest daily performance against the greenback since March, falling -0.9% to 0.7114.
- Commodity markets were dominated by sharp gains in oil following news that President Trump rejected Iran's latest proposal. Brent rose 8.1% to US$120/bbl, its highest level since 2022, while WTI climbed 7.0% to US$107/bbl. Gold declined further by -1.1%, while iron ore edged 0.6% higher.

International Data

The **FOMC** kept the stance of policy unchanged at its April meeting. The tone of the statement was broadly balanced, with a sanguine view given for GDP growth and the labour market and inflation simply characterised as "elevated". Chair Powell noted in the press conference that, in his view, policy is in a good place to take time to monitor conditions, being at the "high end of neutral, perhaps mildly restrictive". Hammack, Kashkari, and Logan also showed greater concern over inflation than the labour market at this meeting, wanting to maintain the target range for the federal funds rate but not the "inclusion of an easing bias in the statement at this time".

The **Bank of Canada** also kept its policy stance unchanged overnight. The conflict in the Middle East and US trade policy were called out as sources of uncertainty and risk for the global economy. The outlook for Canada's economy was regarded as little changed from January.

US durable goods orders rose 0.8% in March after a 1.2% decline in February. Core goods orders jumped 3.3% in the month, after an upwardly revised 1.6% gain in February.

US housing starts jumped 10.8% in March as building permits fell 10.8%.

Euro Area economic confidence fell from 96.2 to 93.0 in April, around 7% below the average of the past 5 years.

Local Data

In Australia, **March CPI** printed broadly as expected, with headline inflation at 1.4%qtr driven by fuel prices, while the trimmed mean rose a softer-than-expected 0.8%qtr, pointing to limited broader passthrough into underlying inflation pressures at this stage (see here).

The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Week beginning 27 April 2026

AUSTRALIA & NEW ZEALAND WEEKLY

Analysis and forecasts for this week's key releases.

In this week's edition:

Economic Insight: It Depends on What You are Trying to Achieve.

The Week That Was: Middle East conflict seemingly at an impasse.

Focus on New Zealand: A matter of balance.

For the week ahead:

Australia: ANZAC Day public holiday, Q1 CPI, Cotality home value index, private credit.

New Zealand: ANZAC Day public holiday, employment indicator, ANZ business and consumer confidence.

Japan: BoJ policy decision, industrial production, jobless rate.

Euro area: ECB policy decision, CPI, GDP, unemployment rate.

UK: BoE policy decision.

United States: FOMC policy decision, PCE deflator, personal income and spending, ISM manufacturing.

Canada: BoC Policy decision.

Information contained in this report current as at 24 April 2026.

It Depends on What You are Trying to Achieve

Luci Ellis
Chief Economist, Westpac Group

- **Pre-budget speculation has tended to start from the presumption that more revenue is needed. The justification is sometimes the perceived need to fund spending priorities that are assumed – perhaps erroneously – to be rising. In other quarters, minimising the deficit or government debt appears to be the objective. Whatever the objective, it should be scrutinised not assumed.**
- **Speculation about changes to the capital gains tax (CGT) regime highlight the potential to increase revenue, but there is no guarantee of this. For example, switching back to the pre-1999 regime or the simplified version of it we have previously suggested will only boost revenue if asset price growth exceeds 5%.**
- **There are many possible objectives that fiscal systems – tax and spending – can address, often different objectives in different parts of the system. "Boost revenue" is not the only possible goal, and tweaking the tax system is not the only solution to a policy objective.**

Speculation is building as budget night approaches. While the government must deal with the immediate issues in front of it stemming from the Middle East conflict, many observers are focused on the maxim "never let a good crisis go to waste" and hoping for broader reforms – usually the same ones they were advocating before the conflict erupted. The question of what the budget should do rests, however, on the deeper question of what problems the government is trying to solve.

For example, recent discussion has been focused on an assumed need for extra revenue. Tax reforms are dissected for how much more they might raise, while revenue windfalls from higher commodity prices are downplayed. Underlying this view are other presumptions – seemingly widespread across different levels of government and the bureaucracy – that "people expect more from government nowadays" and that governments should strive to meet those expectations. Absent from these discussions are the questions of whether the government's effort and resources are being deployed effectively, and whether it can stop doing some things altogether.

A related presumption underlying the search for more revenue is the belief that population ageing is shrinking the workforce, even though this is not true in Australia and most other advanced economies outside North America.

A separate pathway to the search for more revenue comes from a different premise: that the federal fiscal position is weak and large revenue measures (and/or spending cuts) must be found to reduce the deficit significantly. It is good to have strong public finances. It keeps government borrowing costs low and leaves plenty of space to spend in a crisis. Yet the presumption that government finances are parlous and in need of repair sits oddly with Australia's actual federal fiscal position, which is stronger than many of its peers.

Take the recent speculation about removing the CGT discount. It has been touted as a revenue-raising measure, but there is no guarantee of this. One could consider moving back to the pre-1999 system of adjusting the gain for growth in CPI and applying the full marginal rate to the remainder. Alternatively, one could consider the simplified version we suggested in 2023, where the adjustment is 2.5% per year the asset is held – the midpoint of the RBA's inflation target – regardless of actual inflation over the holding period.

"Speculation about tax reform in the upcoming federal budget abounds."

Applying a full marginal rate to an adjusted return still taxes mobile capital more lightly than other income, as economic theory would suggest. It has an advantage over the current system of not privileging capital gains-producing assets over income-producing assets at the margin. Because assets that can be leveraged are especially advantaged by the current system, switching back to the pre-1999 system or our simplified alternative would also promote financial stability. It would increase the effective tax rate on capital gains during booms in real asset prices, and our simplified proposal would also lean against periods of high CPI inflation.

What it will not do, though, is necessarily boost revenue. If asset prices rise by less than 5% per year, revenue is lower. For example, a 4% rise, less 2.5% deduction, means tax is paid on 1½% of capital gains. The current system of half the marginal rate on the full gain would be the equivalent of taxing 2% of gains if asset prices rose 4%yr. Revenue is only higher than the current scheme if asset prices rise by more than 5%. And even in that case, the increase in revenue might only be small once people have adjusted to the change and the other possible design decisions associated with it, such as grandfathering and limits on the number and type of assets eligible for the discount.

Absent from the current discourse is any discussion of the proper role and size of government, or the level of government that is best placed to take on the functions required. As Westpac Economics colleague Pat Bustamante has previously shown, the size of government in Australia has increased substantially over the past decade. When private demand indirectly induced by public spending is included (think legal work for construction companies working on public infrastructure projects), the footprint of public demand has risen from 27% to 35% of GDP over the past decade.

Much of this expansion is desirable. We should want to care for disabled and elderly Australians properly and have high-quality childcare available at an affordable price. That takes resources, and private markets alone are unlikely to deliver enough of these services. Likewise, with population growth running around 1½%, both pre-pandemic and currently, we will always need more public infrastructure. Both types of spending also have positive spillovers. Social care spending allows those who were providing informal care to enter paid employment. And done well, infrastructure spending can boost skills and productivity and open up new opportunities through better logistics.

The question of what should or will happen in the budget boils down to which of the many possible objectives government wants to prioritise. Is it addressing the growing income tax burden in a system of fixed tax brackets, or minimising the deficit, or making the tax system more responsive to the economic cycle, or providing more services to meet the public's expectations, or doing so more efficiently? What about national and economic security? The budget is a complex beast and different design decisions can address different objectives. This is not like monetary policy, where there is only one instrument and at most two objectives, inflation and full employment, which are in any case correlated at least some of the time.

Global economic and geopolitical developments pose challenges, while new technology and an expanding, ageing workforce create opportunities. We should not assume that tweaking the tax system is the answer to every issue. Your fiscal priorities should relate to your public policy objectives.

Forecast changes

- **A full update to our forecasts was published in our Market Oulook publication on April 17.**

Cliff Notes: Middle East conflict seemingly at an impasse

Elliot Clarke, Head of International Economics
Illiana Jain, Economist

Regarding the Middle East conflict, the week began with the expectation of a second round of in-person talks between the US and Iran. The start of the negotiations was initially pushed from Tuesday to Wednesday; but President Trump then announced on Truth Social that the meeting had been postponed at the request of Pakistani and Iranian officials to allow time for a "unified proposal" to be developed to be put to the US. Thankfully, having been stretched by both sides at the weekend, the expiring two-week ceasefire was extended indefinitely.

Since Wednesday, there has been no concrete evidence of progress towards a deal, the Iranians seemingly refusing to come to the table while the US' blockade remains in place, and the US refusing to end the blockade until a deal is agreed. Both sides have halted and seized ships within their area of operations, but this has not triggered a ceasefire breach – although it must be noted that President Trump overnight ordered the US Navy to strike any vessel laying mines in the Strait of Hormuz, making clear the risk of further military conflict.

With no clear way out of the stalemate, or timeline for formal talks, the price of Brent oil has rebounded back to around USD106 having (very briefly) fallen as low as USD86 late last week. The longer the impasse persists, the greater the chance of a sustained period of high oil prices and refinery margins, with all costs eventually met by businesses and households across the world.

Central banks remain focused on the degree and persistence of price passthrough to domestic consumer inflation, the risk being that inflation persists well above target into 2027 on second-round effects and an uplift in inflation expectations. ECB President Lagarde this week noted that the staff currently view conditions in the Euro Area as between their baseline and adverse projections from the last meeting, and will act "as the situation demands" ahead. Next week's run of central bank meetings across the northern hemisphere will provide a more detailed view on the balance of risks and the implications for monetary policy across the developed world.

In the US meanwhile, President Trump's pick for the next FOMC Chair, Kevin Warsh, appeared before the Senate Banking Committee as part of the confirmation process. Warsh again made clear he believes several aspects of the FOMC's communications and processes should change, but also showed a clear commitment to central bank independence. The next steps in Warsh's confirmation remains highly uncertain, with Republican Senator Tillis refusing to approve the appointment at the Committee stage until the Department of Justice close their investigation into the Federal Reserve and Chair Powell. If Senator Tillis holds out until year end, the Administration may face an additional challenge in 2027 as their Senate majority is at risk in the mid-term election. Chair Powell will remain in place in the interim, giving the FOMC continuity and capacity to manage the US economy.

On data front this week, US retail sales rose 1.7% in March, beating expectations. The control group, which feeds into GDP, also surprised to the upside, 0.7%. For the quarter overall, however, the consumer pulse has been weak, and record-low confidence points to downside risks for Q2. The outlook for US business investment is also increasingly uncertain.

Across the pond, the UK unemployment rate fell from 5.2% in January to 4.9% in February, though this reflected a decline in participation. Despite the softer labour market print, wages still rose 3.8%yr in February. A spike in energy prices also saw inflation rise 0.7% in March and 3.3% over the year. While the headlines focus on energy prices, sticky services inflation also remains an issue for the UK, 4.5%yr.

Our latest Market Outlook provides an in-depth view of the outlook for the US, Europe, China and global financial markets.

A matter of balance

Satish Ranchhod
Senior Economist

The conflict in the Middle East has cast a long shadow across the New Zealand economy, with a softening in demand, rising costs and winding back of plans for hiring. Inflation is already at elevated levels and it's set to take a large step higher over the next few months. All of this leaves the RBNZ with a particularly challenging balancing act. But while there are questions about how quickly the RBNZ will adjust the OCR, the direction of those movements will be upwards.

Curtain raiser

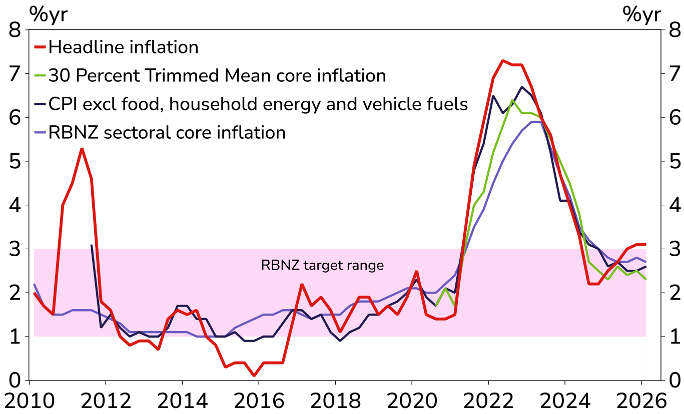
The latest CPI report showed that, even before the full impact of the recent oil price shock has been felt, New Zealand inflation was running hotter than we or the RBNZ expected. Consumer prices rose 0.9% in the March quarter. That saw the annual inflation rate remaining unchanged at 3.1%, above both our forecast and the RBNZ's April expectations.

The March quarter did see a large seasonal increase in food prices (1.5%). More important, however, were the large increases in transport costs. The sharp rise in global oil prices since late February left petrol prices up 3.5% over the quarter, with diesel prices up 11%. Notably, we also saw the early stages of spillovers from those high fuel prices into other costs, with domestic airfares up 9% over the quarter.

Looking under the surface, the various measures of core inflation provided some mixed messages on how strong the underlying inflation pulse has been. Some closely-watched measures of core inflation remain elevated. For instance, CPI ex-fuel and food came in at 3.0%yr (vs 2.9% previously). Similarly, the RBNZ's sectoral measure of core inflation held firm at 2.7%yr in the March quarter. However, other measures of core inflation, such as the trimmed mean and weighted median measures or those measures that exclude government charges, have been softer.

While not every measure of core inflation is running red hot, what stands out is that inflation in New Zealand hasn't fallen to 'low' levels over the past year. That's despite weak growth and a soft labour market. Part of the reason for that is because we have continued to see large increases in administered costs (like council rates and electricity charges) that aren't very responsive to changes in interest rates. But we are also seeing pressures in some other areas. This lingering firmness in overall inflation is significant for the RBNZ, highlighting the limited headroom they had even before the recent oil price shock.

Consumer prices and core inflation



Source: Stats NZ, RBNZ, Macrobond, Westpac Economics

The worst is yet to come

The March quarter inflation result was really just the curtain raiser. Inflation is set to rise sharply through the middle part of this year as the full impact of recent oil price rises ripples through the economy. We also expect to see continued firmness in administered prices, like council rates and electricity charges.

However, the outlook for inflation is much cloudier when we look at price pressures in more cyclical parts of the economy. That was highlighted in the latest Quarterly Survey of Business Opinion, and in our own recent discussions with businesses across the country.

Businesses have highlighted significant pressure on operating costs. And that pressure has not been limited to fuel and transport prices, with more widespread disruptions to supply chains. In some cases, like in the building sector, the reported increases in materials costs have been large.

At the same time, businesses have reported that much of the firming in economic momentum that we saw in the early part of the year has now been derailed. Economic confidence has dropped sharply over the past month, and the dampening impacts of the Middle East conflict on demand are becoming more visible. We've already seen tourist operators reporting an increase in cancelled bookings, and businesses across the country are reporting softness in discretionary spending as households grapple with rising costs for essentials.

Looking ahead, businesses across the economy are bracing themselves for softer trading conditions over the next few months. That's seen them winding back their plans for capex and hiring.

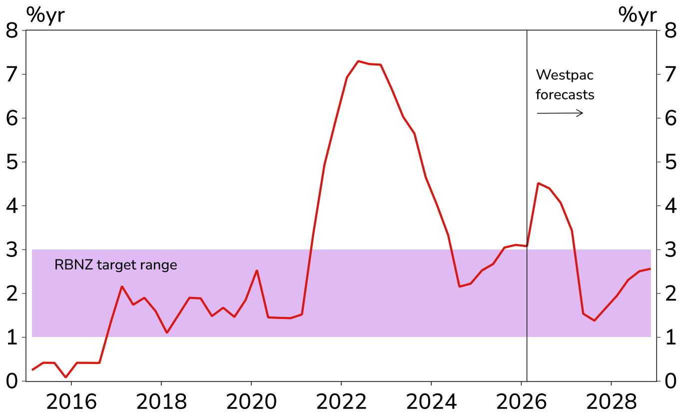
That softness in demand is raising questions about whether businesses can pass increases in operating costs through to output prices. At this stage, that passthrough has not been complete, with many businesses reporting increased pressure on margins. But that can't continue indefinitely. Many businesses have already seen their margins being squeezed for several years now, and they are now facing further (and in some cases very large) increases in operating costs. Against that backdrop, while softness in demand might limit the extent of output price rises over the coming months, inflation still looks set to take a sizeable step higher.

Putting that mix of soft demand and significant increases in operating costs together, we now expect that inflation will rise to 4.5% in mid-2026 (up from our previous forecast for 4.3%yr). Further ahead, inflation is expected to ease only gradually, slowing to 4.1% by the end of this year.

Headline inflation is expected to slow materially over 2027 as the impact of earlier oil price increases dissipates. However, core inflation is expected to remain elevated this year, and is expected to ease back towards the mid-point of the RBNZ's target band only gradually over 2027, rather than falling to low levels.

The outlook for inflation remains murky, particularly beyond the current quarter. Crucially, the outlook will be highly dependent on the evolution of tensions in the Middle East and the related (potentially large) moves in oil prices. But even if tensions in the Middle East were to dissipate quickly, the associated disruptions to supply chains and pressure on operating costs would still take some time to ease.

CPI inflation forecasts



Source: , Macrobond, Westpac Economics

Balancing act

All of this leaves the RBNZ with a particularly challenging balancing act. The RBNZ can't offset the rise in oil prices that's already occurred by hiking the OCR now. However, business surveys are pointing to a broadening lift in price pressures, and the RBNZ can't ignore the risk that the current oil-related rise in operating costs evolves into a more widespread and protracted lift in inflation. The past few years have shown just how corrosive and long-lasting the effects of high inflation can be for the economy, and the RBNZ is loath to see those sorts of pressures taking hold again.

Earlier interest rate hikes might help limit the risk that we see a more sustained rise in inflation. However, the RBNZ is also very mindful that higher interest rates now would weigh on economic activity at a time when the labour market is already soft.

This isn't an easy trade-off for the RBNZ. Balancing those concerns, we expect that the RBNZ will begin a series of increases in the Official Cash Rate from September, earlier than they previously signalled in their last published forecasts from February (which pre-dated the Middle East conflict). We expect the OCR will rise from the current low of 2.25% to 3.50% in early 2027. While that would be a relatively fast rise in the OCR, it would only take the OCR back around 'neutral' levels from the RBNZ's perspective at a time when inflation has been persistently above 3%.

Further ahead, the outlook is less certain. As a result, we expect that interest rates will continue to rise, but at a more gradual pace.

Market pricing for the OCR has been pulled forward in recent weeks and is now consistent with the first hike coming in July. We certainly wouldn't rule out an earlier start to the tightening cycle, given the significant rise in cost pressures. However, we think the RBNZ will prefer to wait to see how pricing behaviour in the economy is shaping up. While we will have a number of business surveys and monthly prices updates by the time of the July policy meeting, we won't have the full June quarter CPI report until after that meeting. (In contrast to the monthly price updates from Stats NZ, the quarterly CPI report has broader coverage including a range of discretionary spending categories. That update will help to illustrate how the balance between higher costs and softer demand is evolving in terms of overall pricing pressures.) The RBNZ will also want to see how spending and the labour market are evolving, both of which will be important for determining how persistent the strength in inflation will be.

Fiscal pressures

The other news of note this week was Moody's decision to attach a negative outlook to New Zealand's sovereign credit rating. The current top-tier "Aaa" rating – shared with just ten other countries – has been in place since October 2002 and is a notch higher than the rating currently assigned by both Standard and Poor's and Fitch (the latter also moved its rating to a negative outlook last month). It is worth noting that Moody's base model assigns a rating one notch lower, with the current Aaa rating reflecting a one-notch uplift based on an assessment that the recent weakening of fiscal metrics would improve over time. This week's action clearly indicates that Moody's are considering removing that uplift. Specifically, Moody's stated: "The negative outlook reflects our assessment that risks to New Zealand's fiscal trajectory have increased..." due to "...the potential for a combination of tighter monetary policy, slower short-term growth and increased debt servicing costs".

Following this ratings action, the Minister of Finance, Nicola Willis, held a press briefing at which she also outlined some economic scenarios that the Treasury had produced during its preparations for the upcoming Budget on 28 May. Willis stated that the ratings action reinforced the Government's decision to resist the temptation to "splash the cash" in reaction to the current oil shock. Importantly, she reaffirmed that the operating allowance for new initiatives in the upcoming Budget will be held at a relatively frugal $2.4bn. This will necessitate savings and reprioritisations to fund the targeted relief that the Government has already provided to lower income workers and some other groups, as well as the other pressures on operating spending that flow from higher fuel prices.

Unsurprisingly, the information presented by Willis showed that an upgrade to the outlook for growth and employment had been the base case prior to the Middle East conflict. More surprisingly, the least severe post-war scenario presented – one based on crude oil remaining around $110/bbl in the near-term – was associated with a growth outlook that was similar to that presented in the Half-Year update in December. This scenario, which Willis seemed to indicate might be most representative of the current outlook, would likely still lead to a modest deterioration in the near-term fiscal outlook due to increases in spending that sit outside the spending allowance, such as benefit costs (which are indexed to the CPI) and debt servicing. However, it would probably not generate a repeat of the very large upgrades to the borrowing programme that have been seen at various times in recent years.

We will publish our preview of Budget 2026 after we have seen the Government's financial accounts for April (released 12 May). Willis indicated that the Treasury had finalised its economic forecasts this week and that Cabinet would make final Budget decisions in around a fortnight.

AUS: Q1 Headline CPI (%qtr)

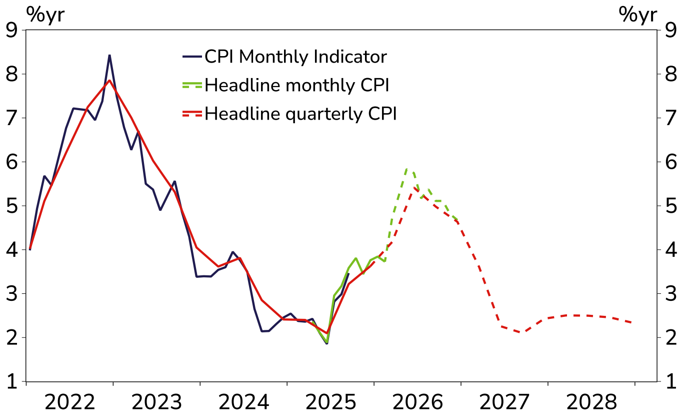
Apr 29, Last: 0.6, Westpac f/c: 1.5
Market f/c: 1.4, Range: 1.1 to 1.6

Westpac is estimating a 1.5%qtr/4.2%yr gain in the March quarter CPI. At two decimal places our estimate is a solid 1.48% so we see the risks as balanced.

The Middle East conflict is the largest energy shock since the oil crises of the 1970s/80s. It started Febuary 28 so its impact was only felt through March, mostly via auto fuel. As such we expect a much broader impact in the June quarter and through the second half of the year. For more details on the scenario underpinning these projections, and our latest thoughts on the risks, please refer to the April Market Outlook.

For a detailed breakdown of our June quarter estimates, and the monthly estimates to May, see our Inflation Outlook Bulletin.

Headline inflation in three series



Source: ABS, Macrobond, Westpac Economics

AUS: Q1 Trimmed Mean CPI (%qtr)

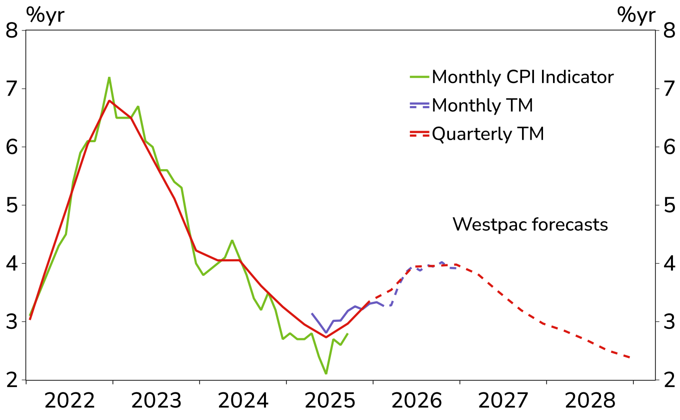
Apr 29, Last: 0.9, Westpac f/c: 0.9
Market f/c: 0.9, Range: 0.8 to 1.0

Core inflation is not immune to the Middle East Crisis. While the impact is likely to be more significant through the second half of the year we are expecting a 0.93% increase in the March quarter, matching the 0.90% December quarter gain. The annual pace is expected to lift modestly to 3.5%yr from 3.4%yr.

The March quarter is a prelude to the step up in the pace with a 1.0% increase in the June and September quarters and the annual pace peaking at 4.0%yr in the second half of the year.

The ABS are publishing the quarterly underlying inflation measures consistent with the historical price collection frequency. Replicating this process represents a small downside risk to our estimate.

Trimmed Mean inflation in three series



Source: ABS, Macrobond, Westpac Economics

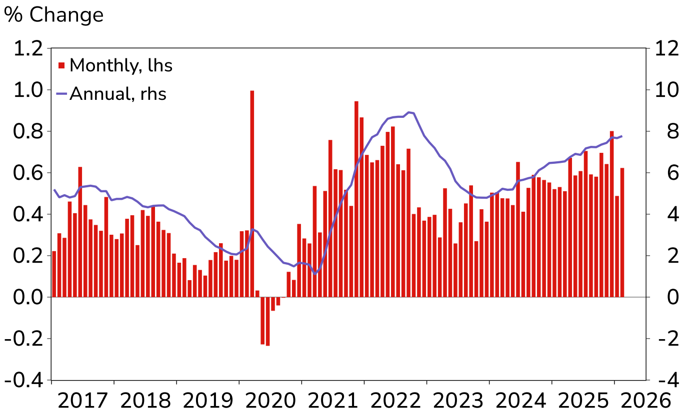
AUS: Mar Private Sector Credit (%mth)

Apr 30, Last: 0.6 Westpac f/c: 0.5
Market f/c: 0.6, Range: 0.5 to 0.7

Private sector credit rose 0.8%mth in December, eased to 0.5%mth in January, and then steadied at 0.6%mth in February, in line with the two-year average.

For March, headline growth is expected to moderate to 0.5%mth. The effects of the RBA's cash rate increases in February and March are likely to emerge with a lag, although interest rate expectations rose earlier. In addition, the global energy price shock associated with the war in the Middle East is placing further pressure on household budgets and disrupting business activity. With both consumer sentiment and business confidence falling sharply in March, credit growth is likely to face increasing downward pressure, amid heightened economic uncertainty.

Private Sector Credit Growth



Source: RBA, Macrobond, Westpac Economics

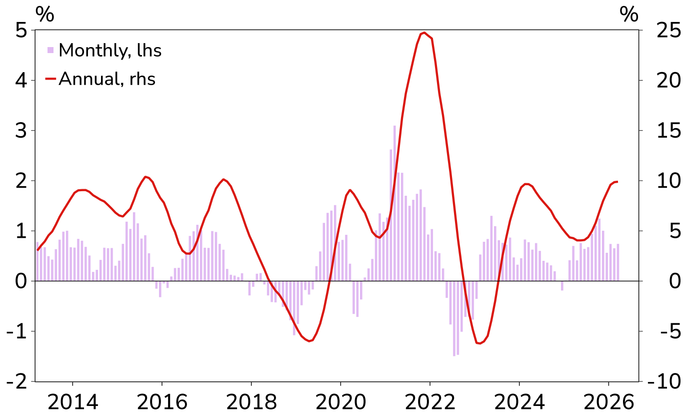
AUS: Apr Cotality Home Value Index (%mth)

May 1, Last: 0.6, Westpac f/c: 0.3

The Cotality home value index rose 0.6% in March, following similar gains over the previous three months, annual growth holding broadly steady at 9.3%yr. The detail continued to show slight price declines in Sydney and Melbourne, where turnover also looks to be pulling back, but relatively strong price gains in Brisbane, Adelaide and Perth where turnover remains firmer.

The daily measure points to a slower 0.3% rise for the April month with slightly more pronounced declines in Sydney and Melbourne and price gains moderating a touch in the mid-sized capitals.

Cotality home value index



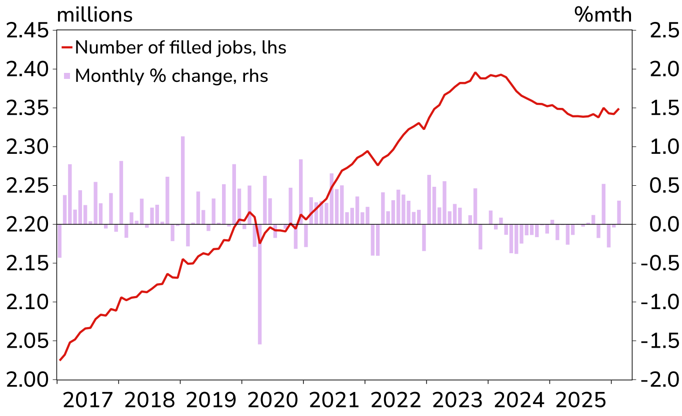
Source: Cotality Australia, Macrobond, Westpac Economics

NZ: Mar Monthly Employment Indicator (%mth)

Apr 28, Last: 0.3, Westpac f/c: flat

The February MEI added to the evidence that the New Zealand economy was regaining momentum prior to the Iran war. The number of filled jobs rose by 0.3%, although this is likely to be revised down a little in subsequent releases; the broader picture is one of a stabilisation in jobs in recent months after declining through 2024-25. The weekly snapshots provided by Stats NZ are now running about in line with a year ago, which suggests a flattish outcome for the March month. We'll be watching these figures closely for any signs that the uncertainty stemming from the Iran war is prompting businesses to put off hiring decisions.

Monthly Employment Indicator



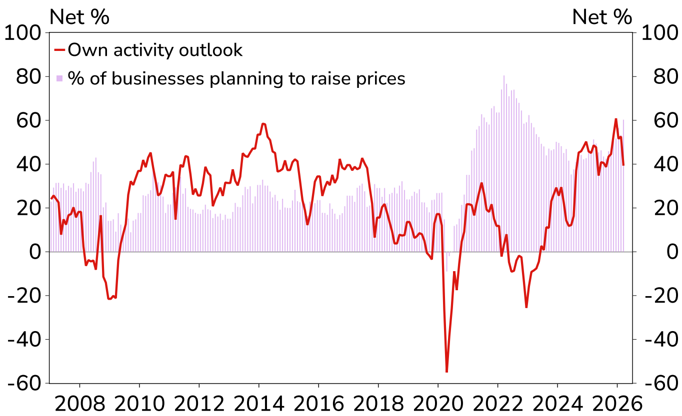
Source: Stats NZ, Macrobond, Westpac Economics

NZ: Apr ANZ Business Confidence (index)

Apr 30, Last: 32.5

The first business survey since the beginning of the Iran war saw a sharp drop in confidence, with late-March responses turning significantly weaker than earlier ones as the gravity of the situation became clearer. That sets the stage for an April survey that's likely to look quite ugly on the whole, even if there is some improvement within the month as the 8 April ceasefire helped to bring fuel prices down from their highs. Firms' inflation expectations and pricing intentions are likely to take a further step up, but the measures of wage growth and hiring intentions will also be an important consideration as to whether we see a sustained rise in inflation beyond the initial spike.

Business confidence high prior to Iran conflict



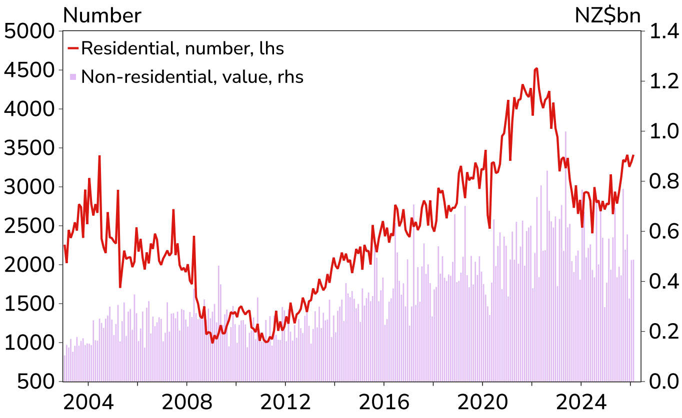
Source: ANZ, Macrobond, Westpac Economics

NZ: Mar Building Consents (%mth)

May 1, Last: 2.7, Westpac f/c: flat

Since late 2025, dwelling consent numbers have taken a step higher, and we expect that issuance will remain firm in March. That would see annual consent numbers climbing to around 37,800 – its highest level since 2023. Developers have been bringing new projects to market, supported by last year's reductions in interest costs and the earlier easing in cost pressures. However, those gains pre-date the recent conflict in the Middle East. Builders are now reporting significant increases in materials costs and pressure on interest rates is mounting. That's likely to see fewer new projects coming to market over the coming months, and some planned work may not proceed. Commercial consent numbers have been mixed across segments to date. But across all segments, the risks are now tilted towards greater caution in businesses' plans for capex in the near term.

Building consents picking up



Source: Stats NZ, Macrobond, Westpac Economics

US: FOMC Policy Decision (%)

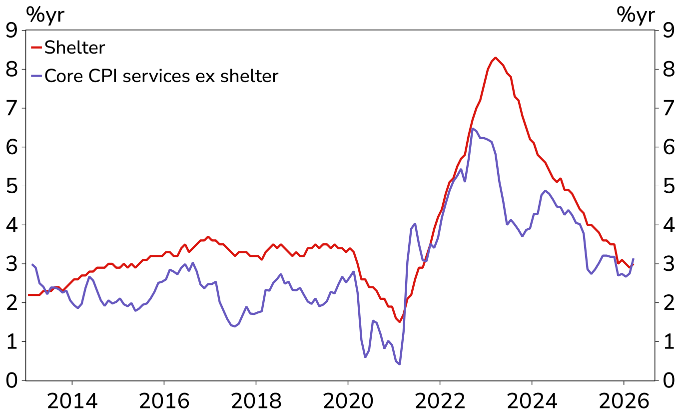
Apr 28-29, Last: 3.625, Market f/c: 3.625, Westpac f/c: 3.625

The FOMC received a reprieve from downside risks to the economy over the past month as nonfarm payrolls growth turned up after an extended period of weakness.

The deceleration in GDP growth evident in Q4 and expected in Q1 notwithstanding (see below), the focus of FOMC risk analysis is likely to be the threat of elevated inflation. The latest CPI report was favourable, with inflationary pressures concentrated in energy prices and core inflation benign. However, if a deal between the US and Iran is not forthcoming, this situation could change rapidly.

We expect the Committee to note concerns over passthrough, but to hold a balanced view overall, waiting for data to show the evolution of risks in coming months.

Passthrough risk the near-term concern



Source: BLS, Macrobond, Westpac Economics

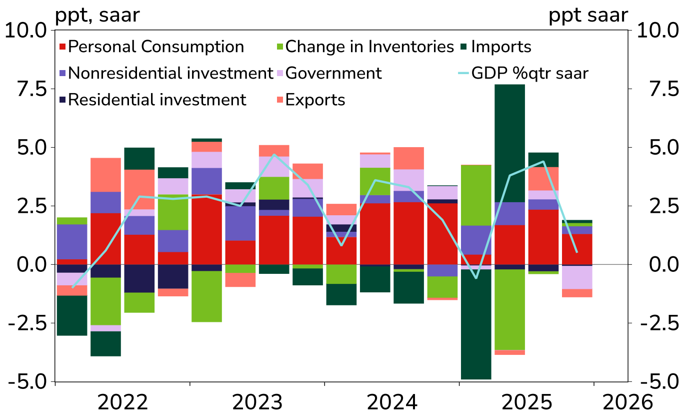
US: Q1 GDP (%ann'd)

Apr 30, Last: 0.5, Market f/c: 2.0, Westpac f/c: 1.0

US GDP decelerated abruptly at the end of 2025 following strong growth through mid year, and under the weight of the Federal Government shutdown and tariff uncertainty. Partials available for Q1 2026 point to another poor result as the new year begins.

In part this looks to be due to net exports subtracting materially from growth in the three months to March. Though housing investment seems to be contracting, and household consumption and business investment growth is below trend. With consumer sentiment at record lows, US GDP growth is susceptible to remaining below trend through Q2 and Q3, potentially seeing additional slack build in the labour market.

United States contributions to GDP



Source: BEA, Macrobond, Westpac Economics

Japan: BoJ Policy Decision (%)

Apr 27, Last: 0.75, Market f/c: 0.75, Westpac f/c: 0.75

We anticipate the Bank of Japan will remain on hold at its April meeting but signal that further rate rises are on the horizon. A fresh set of forecasts should show inflation is on track to be higher given higher costs of energy and still elevated food prices.

The Policy Board is focused on creating the right conditions for domestically-driven inflation. They will want to be patient to ensure financial conditions remain sufficiently accomodative for the corporate sector to continue to raise wages and invest while balancing the impact a weak yen has on domestic inflation. We continue to anticipate a June hike.

Real wage gains still key for BoJ

The words "believe", "anticipate", "expect", "intend", "plan", "predict", "continue", "assume", "positioned", "may", "will", "should", "shall", "risk" and other similar expressions that are predictions of or indicate future events and future trends identify forward-looking statements. These forward-looking statements include all matters that are not historical facts. Past performance is not a reliable indicator of future performance, nor are forecasts of future performance. Whilst every effort has been taken to ensure that the assumptions on which any forecasts are based are reasonable, the forecasts may be affected by incorrect assumptions or by known or unknown risks and uncertainties. The ultimate outcomes may differ substantially from any forecasts.

Conflicts of Interest: In the normal course of offering banking products and services to its clients, the Westpac Group may act in several capacities (including issuer, market maker, underwriter, distributor, swap counterparty and calculation agent) simultaneously with respect to a financial instrument, giving rise to potential conflicts of interest which may impact the performance of a financial instrument. The Westpac Group may at any time transact or hold a position (including hedging and trading positions) for its own account or the account of a client in any financial instrument which may impact the performance of that financial instrument.

Author(s) disclaimer and declaration: The author(s) confirms that (a) no part of his/her compensation was, is, or will be, directly or indirectly, related to any views or (if applicable) recommendations expressed in this material; (b) this material accurately reflects his/her personal views about the financial products, companies or issuers (if applicable) and is based on sources reasonably believed to be reliable and accurate; (c) to the best of the author's knowledge, they are not in receipt of inside information and this material does not contain inside information; and (d) no other part of the Westpac Group has made any attempt to influence this material.

Further important information regarding sustainability related content: This material may contain statements relating to environmental, social and governance (ESG) topics. These are subject to known and unknown risks, and there are significant uncertainties, limitations, risks and assumptions in the metrics, modelling, data, scenarios, reporting and analysis on which the statements rely. In particular, these areas are rapidly evolving and maturing, and there are variations in approaches and common standards and practice, as well as uncertainty around future related policy and legislation. Some material may include information derived from publicly available sources that have not been independently verified. No representation or warranty is made as to the accuracy, completeness or reliability of the information. There is a risk that the analysis, estimates, judgements, assumptions, views, models, scenarios or projections used may turn out to be incorrect. These risks may cause actual outcomes to differ materially from those expressed or implied. The ESG-related statements in this material do not constitute advice, nor are they guarantees or predictions of future performance, and Westpac gives no representation, warranty or assurance (including as to the quality, accuracy or completeness of the statements). You should seek your own independent advice.

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide here or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Week beginning 20 April 2026

AUSTRALIA & NEW ZEALAND WEEKLY

Analysis and forecasts for this week's key releases.

In this week's edition:

Economic Insight: Drawing a line on just drawing a line.

The Week That Was: Conflict in the Middle East to cast a long shadow.

Focus on New Zealand: Oil shock begins to surface in data.

Forecast Update: Our latest forecast updates are detailed in our April Market Outlook.

For the week ahead:

Australia: Westpac-MI Leading Index.

New Zealand: Q1 CPI, NZIER Survey of Business Opinion and Q1 trade balance.

United States: Retail sales, initial jobless claims, University of Michigan Sentiment.

Euro area: ZEW Survey of Expectations, consumer confidence, President Lagarde speaks.

UK: Unemployment rate, CPI, GfK consumer sentiment.

Japan: CPI.

World: Manufacturing and services PMI.

Information contained in this report current as at 17 April 2026.

Draw a line on just drawing a line

Luci Ellis
Chief Economist, Westpac Group

- **You know times are uncertain when institutions start publishing scenarios alongside their normal forecasts. Two principles underlie good scenarios. First, the narrative underlying the scenario must hang together – no assuming people do things that are either individually irrational or infeasible. Second, the scenario must allow people to respond to the initial shock – avoid just drawing a price line on a graph and assuming people cannot adjust their behaviour.**
- **There is a tension, though, between the need to be realistic and a desire to highlight vulnerabilities or contemplate worst-case scenarios. There is a legitimate role for worst-case thinking, but it must be handled with care. Recall that even though our forecasts last year were less alarmist than many in the wake of Liberation Day, actual outcomes were even better than we had expected.**
- **The real value of scenarios is teasing out downstream effects and delayed responses. Sometimes the responses to temporary shocks can have lasting effects. From EV purchases to defence budgets, these could be especially important coming out of the current conflict. All the more reason to avoid just drawing a line and assuming that is the outcome.**

In times as uncertain as these, you want to be able to articulate more than one possible future state of the world. That is where scenario analysis comes in. Indeed, when institutions start publishing scenarios, you can take it as a sign that things are unusually uncertain. The RBA used scenarios extensively during the pandemic. And while the IMF did not give scenarios any prominence in its previous full *World Economic Outlook* report in October, it did this week. Similarly, we have published several scenario iterations over the past six weeks and will provide an update later today in our Market Outlook report.

Using scenarios rather than simple uncertainty ranges or a description of risks is especially useful when the possible future states of the world are qualitatively different from the base case, and when the level of conviction about that base case is low. There is nothing wrong with a scenario that is only a little different from the base case, but it is not that interesting or informative.

Two key principles underlie good scenario analysis. First, the premise of the scenario needs to be well-grounded. The narrative motivating the initial impetus must hang together. It must be logically consistent and represent both the interests and the constraints of the actors within the system. In other words, scenarios should not assume that people do things that are either bonkers or infeasible. Individually rational behaviour that is harmful in aggregate, such as panic-buying toilet paper or conducting fire-sales of loss-making assets, should of course be allowed for, but make sure the action is indeed individually rational.

Second, the methods used in developing the scenario need to go beyond first-round thinking. You need to allow for other people to react. A good scenario cannot be just a one-off shock where nothing else changes. Sometimes it takes time for people to adjust to the new situation, so the reaction occurs with a lag. Teasing these reactions out is the value-add of the scenario.

There is a tension, though, between the need to be realistic and a desire to highlight vulnerabilities or contemplate worst-case scenarios. Sometimes a lack of realism is used to guard against a potential failure of imagination. There is a legitimate role for this approach when stress testing, for example. However, unrealistic assumptions in forecast-flavoured scenarios leave your forecasts open to misinterpretation. We have seen an example of this issue this week, where the IMF's worst-case 'severe' scenario, which implies a global recession, has sparked unhelpful talk of recession here in Australia.

"Scenario analysis is essential in uncertain times, but it must be well-grounded, not just drawing an arbitrary line on a graph."

Part of the issue is that the IMF's less-bad 'adverse' scenario (which assumes oil prices average USD100/bbl this year before moderating to USD75 next year) and worst-case 'severe' scenario (which assumes oil prices stay around USD125/bbl from the outbreak of the conflict all the way through to end-2027) are both 'top-down' scenarios that appear to start from an assumed path for oil prices. Unlike our own scenario work, they do not explicitly model loss of supply from the Middle East and work out what prices need to do to clear the global market. By effectively just drawing a line on a graph for oil prices, the scenarios assume away any scope for other producers to respond. This is not an issue in the near term, but the longer the assumption is maintained, the less realistic it is. High prices will spur non-OPEC producers such as the US and Canada to boost production. It takes time to get that expansion running, but eventually prices will start to ease.

Because it assumes high prices right through 2027, the 'severe' scenario is most challenged by this issue. This is not to say that the IMF should not have published that scenario, but it is important to understand the context and what it was trying to achieve in doing so.

When developing scenarios, you also need to avoid the trap of thinking only of downside risks. Part of the problem is that downside risks usually come from identifiable events. It is easy to construct a plausible narrative for a scenario starting from "this particular bad thing happened". But as one of my old bosses used to remind us, sometimes you should also consider the risk everything just turns out a little bit better than expected.

As our April Market Outlook goes to publication later today, it is helpful to recall last April's edition. The 'Liberation Day' tariffs had been announced a fortnight previously, and many voices in the market were predicting global or US recessions. At the time we took a more moderate view, based on the principles noted above. Firstly, continuing with very high tariff rates would have been an act of economic self-harm. While it was hard to bet on the Trump administration acting rationally in a context of 'flood the zone' headlines and intemperate social media posts, self-interest is still the best assumption. If there is nothing preventing someone from stopping punching themselves in the face, they will stop punching.

Secondly – and this was a key judgement in our forecast last year – other countries had agency and could respond. In particular, China had scope to stimulate, and this would also cushion growth in Australia. In that context, we note that the latest Chinese GDP growth has again surprised on the upside relative to market expectations.

It turns out that even we were too bearish a year ago: the global economy did much better than expected, and global trade kept expanding with barely a hiccup. Other factors, including a tech boom, turned out to be more important than expected. Trade patterns were also re-routed around the highest tariffs, and of course the US government de-escalated, as is proving to be its pattern.

These principles also hold for other kinds of scenarios. Whenever you read a prediction of doom concerning, say, adoption of a new technology, ask yourself what is preventing people from responding to ameliorate the bad thing. What prevents macroeconomic policymakers from easing, for example, or the tax system from redistributing unequal gains? While occasionally decision-makers decide that a bad thing is good actually, holding that position is itself fragile.

Where scenarios can really add value is when they highlight a lasting effect from a temporary shock. Whether it is the person who buys an EV in response to current high petrol prices and reduces their petrol consumption permanently, or the government that reassesses its defence spending, behavioural responses can change longer-term demand trends, and so the prices that prevail further out. Normalisation after a shock does not always take you back to where you were. That is another reason why it is so important to avoid just drawing a line on a graph and calling it a scenario, ignoring system-wide effects.

Forecast changes

- **A full update to our forecasts was published in our Market Oulook publication on April 17.**

Cliff Notes: conflict in the Middle East to cast a long shadow

Elliot Clarke, Head of International Economics
Ryan Wells, Economist

Our Westpac-MI Consumer Sentiment Index posted its largest fall since COVID-19, down 12.5% to a deeply pessimistic reading of 80.1. The impact from the surge in fuel prices was acute, leading to a more pronounced deterioration in the sub-indexes tracking current conditions – namely 'family finances vs a year ago' (–16.7%) and 'time to buy a major household item' (–15.0%). There were also significant hits to the year-ahead outlook for family finances (–13.9%) and the economy (–12.4%), suggesting households are bracing for enduring pressure.

The tone of the March NAB business survey was no better, business confidence collapsing 29pts from a neutral reading in February. This came alongside a notable lift in purchase cost pressures, up 1.7ppts to a quarterly pace of 3.0%. That final producer prices lifted +0.4ppts emphasises the rapid pass-through of surging fuel costs, but also that businesses are currently absorbing most of the increase in costs via margins, impacting profitability. The readings for current trading conditions and employment were positive, enabling business conditions to hold around its long-run average. This suggests the underlying health of the economy can be maintained if risks subside quickly.

This week we also received the March Labour Force Survey. It showed the Australian labour market was in good health prior to the Middle East conflict and the RBA's most recent rate hike. Employment growth continued to strengthen from its trough in March, from 1.0%yr to 1.5%yr on a three-month average basis, reflecting the economy's momentum through the second half of 2025 and into 2026. The unemployment rate has also held at 4.3% over the past two months, a similar level to the second half of last year. It now looks increasingly like the 4.1% prints at the turn of the year were due to temporary weakness in participation, not a sustained re-tightening.

However, given the hit to business confidence and the expectation of further policy tightening, the Middle East conflict looks set to cast a long shadow over the labour market. We expect a combination of lower average hours worked and slower employment growth, seeing the unemployment rate lift to 5.0% in early 2027. Tracking industries most exposed to the fuel shock will provide an initial take on the scale of the impact. Manufacturing, construction, transport/logistics and travel/tourism are the sectors to watch.

Offshore, an abrupt end to the first round of in-person talks between the US and Iran and the US' Navy's subsequent blockade of Iranian ports and associated vessels was the main point of conversation for markets this week. The market's take has been sanguine, the price of Brent oil retreating below US$100 and global equities rallying back to historic highs during the week. Comments made by both sides imply negotiations are ongoing and another round of in-person talks will occur before the two-week ceasefire ends in coming days. There is also the option to extend the ceasefire, if necessary.

Effectively cut off from global shipping, Iran's need for a deal is clear. But this is also the case for the US economy, University of Michigan consumer sentiment fell to a record low this week, 43% below the average of the survey since 1978. Price pressures are currently limited to first-order effects, headline CPI inflation printing at 0.9% against a core reading of just 0.2% in March. Should the conflict persist, it is highly likely second-round effects will permeate through the US economy, materially increasing the likelihood of inflation holding well above target and term interest rates trending higher. FOMC members who spoke this week all showed confidence in the underlying health of the US economy but also concern over the potential for an lasting imbalance between growth and inflation.

In contrast, China's economy showed strength this week, annual GDP growth accelerated from 4.5%yr in Q4 2025 to 5.0%yr in Q1, matching the full-year outcome for 2025. From the monthly partial data, China's Q1 momentum was principally due to the strength of exporters and associated investment, both of which are likely to receive a lasting boost from increased demand for green technology given the Middle East's impact on energy prices and supply. There is reason for guarded optimism over the outlook for property investment as well, the year-to-date decline having moderated from -17%ytd at December to -11%ytd in February and March. Still equivalent to circa 15% of GDP, an end to the sharp construction declines of recent years would provide a material boost to aggregate growth through 2026.

External demand and investment's support for GDP masks the still-troubled state of consumer demand. Having surprised to the upside in February at 2.8%ytd, in March retail sales growth slowed once again to 2.4%ytd. While not a disastrous outcome by any means, it is less than half the average pace of the past five years post pandemic, a historically weak period for household demand growth. Policy makers have been clear in their intent to provide additional support to households but are yet to action plans. And, while equities have risen through the year, house prices continue to decline, weighing on wealth and sentiment. Without broadening the growth pulse, aggregate momentum will remain susceptible to slipping towards, or through, 4.0% in coming years, even with a significant benefit from global demand for green technology.

A full update of our expectations and assessment of risks for the global economy and markets will be made available today in the April edition of Market Outlook on Westpac IQ.

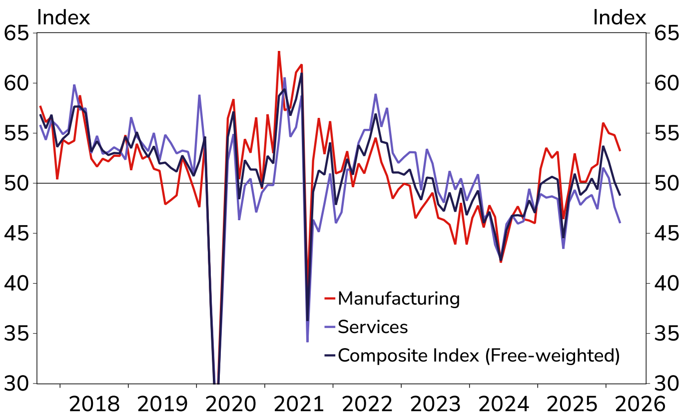
Oil shock begins to surface in data

Darren Gibbs
Senior Economist

The past week has delivered some further insight on the early impact of the Middle East conflict on the New Zealand economy. Unsurprisingly, that data points to some marked changes in spending patterns and clear upward pressure on prices for energy products. Even greater impacts are certain to be evident over coming months as the shock transmits through the economy.

On Monday, BusinessNZ reported that its Performance of Services Index had declined 1.6pts in March to a 10-month low of 46.0. All five subindexes fell below 50, with the activity/sales index falling to 44.6 and the new orders/business index falling to 45.7. The employment index also fell to the lowest level since October 2024. Separately, MBIE reported a modest decline in job ads in March. However, for now, the level of advertising remains more than 10% higher than a year earlier, and we are also yet to see any sign of labour shedding in the weekly filled jobs data collected from tax records. Meanwhile, more than two-thirds of the comments submitted by respondents to the BusinessNZ survey were said to be negative, with many – especially in industries dealing with discretionary spending – unsurprisingly citing the impacts of the Middle East crisis.

BusinessNZ PMIs

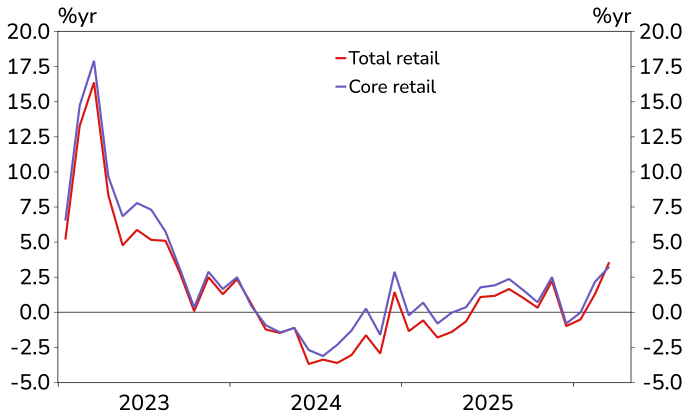


Source: BusinessNZ, Stats NZ, Macrobond, Westpac Economics

Later in the week news from the retail sector provided no major surprises. Consumer spending, as measured by electronic card payments, increased 0.7%m/m in March. Unsurprisingly, with petrol prices surging almost 19% during the month, spending on fuel increased over 17%. By contrast, core spending – which excludes spending on fuel and vehicles – fell a modest 0.1%m/m. Within the core measure, while spending on consumables (groceries) and durables grew, this was more than offset by a decline in spending on apparel and hospitality. These data were broadly in line with the trends that were evident in Westpac's own card spending data, which we had published earlier in the week.

Given the outcome for March, retail spending over the March quarter grew 1.0%. This was the strongest quarter since the December 2024 quarter, consistent with our view that the economy's forward momentum had improved at the start of this year. But looking ahead, high fuel prices will continue to siphon money out of households' pockets. At the same time, they will add to costs of production for a variety of other goods and services and will continue to significantly undermine consumer confidence. Overtime, these costs will also weigh on the strong growth in tourist arrivals that has helped retailers to weather a time of relatively subdued domestic spending. We continue to anticipate that consumer spending volumes will decline slightly in the current quarter, even as the value of spending is sustained by higher prices.

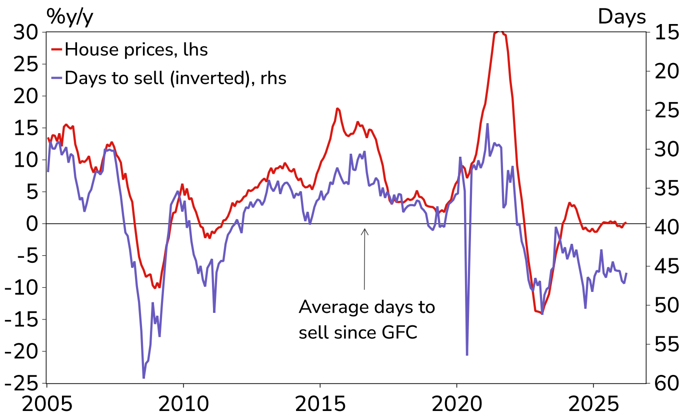
Electronic card spending in retail stores



Source: Stats NZ, Macrobond, Westpac Economics

News from the housing market also provided no major surprises. Sales were down around 4% in March, reversing a 5% rise in February, and have been effectively moving sideways over the last year. The average time to sell shortened compared to February but has also remained within a narrow range and remains longer than usual. The REINZ house price index ticked up slightly in March following a 0.6% rise in February. Prices have now largely reversed the declines that we saw over the second half of 2025 and were up 0.2% from a year earlier. Conditions vary across the country, with prices trending higher in the South Island while the North Island has been more stagnant. Of course, the Middle East conflict has cast a fresh shadow of uncertainty over the economic outlook. It was unlikely that we would see an impact on the housing market as early as March, but in the months ahead we'll be watching for signs of a softening that would support our current forecast of a 1% fall in prices over this year. (Anecdotal evidence suggests greater caution amongst buyers in recent weeks.)

House prices and days to sell



Source: REINZ, Macrobond, Westpac Economics

Another sector that is likely to be challenged by the Middle East conflict is the tourism industry. Increased prices for flights and sharply lower consumer confidence are likely to be weighing on forward bookings, especially from long-haul countries, and this should become evident as the year progresses. However, the recent trend has been very favourable, with arrivals in February increasing for an eighth consecutive month. A notable feature of the latest data was a further improvement in arrivals from China, which until recently had continued to track far below pre-pandemic levels. Thanks to the timing of the Lunar New Year, arrivals from China was more than triple that seen in February last year. But taking the January/February period as one to remove the impact of the floating holiday timing, arrivals were still up more than 50% and just 5% below the level seen in 2019. Helpfully, this comes at a time when there appears to be some slowing in arrivals from some other markets, notably the US and South Korea.

The inflow of longer-term arrivals – new residents and those on working, educational and other visas – has also shown some signs of lifting of late. Keeping in mind that more recent observations are subject to revision, the number of migrant arrivals in February was estimated to be around 2,000 greater than the low point seen in August last year whilst the number of departures was around 3,000 less than last January's highpoint. The net inflow of 3,600 was the largest since March 2024 and the inflow for the year to February – just over 25,000 – was over 7,000 more than the preceding year. At least in part the strengthening trend is further evidence of the improved economic conditions that were developing in New Zealand prior to the Middle East conflict. Changes to visa policy have liked also contributed to the pickup in inflows.

Monthly migration flows, seasonally adjusted

Finally, the release of the Selected Prices Indexes for March has allowed us to finalise our forecast for next week's March quarter CPI report. As expected, the price of petrol increased 19% in March and the price of diesel surged 42%. However, food and some other travel-related prices such as airfares came in slightly weaker than expected. As a result, we have revised down our forecast for the CPI to 0.7%, which would see annual inflation ease back to 2.8% from 3.1% in the December quarter. Higher prices for food and petrol should make the most significant contributions, although tradable prices overall are expected to rise just 0.2% over the quarter and 2.1% over the year. Non-tradables prices are forecast to increase 0.8% over the quarter, lowering annual inflation to 3.3%. Meanwhile measures of core inflation, such as the trimmed mean and the ex-fuel and energy CPI, are expected to remain in the top half of the RBNZ's target range.

Our forecast is a little lower than the updated 3.0% forecast released by the RBNZ at its 8 April Monetary Policy Review. Assuming the CPI prints close to our expectations, the RBNZ will only take modest comfort given what lies ahead. The impact of the oil shock will become more evident when the June quarter CPI is released in July, and perhaps earlier in the monthly Selected Prices Indexes that will be released prior to the CPI. We currently estimate that annual CPI inflation will rise to 4.3% in the June quarter, although much will depend on how petrol prices evolve over coming weeks.

AUS: Mar Westpac-MI Leading Index

Apr 22, Last: +0.08%

The Leading Index growth rate held at +0.08% in February, unchanged from January but down from more firmly positive reads late last year.

The March read will again see a very mixed bag of component updates. The global energy shock has hit sentiment measures and financial markets hard. Both the Westpac-MI Consumer Expectations Index and the Westpac-MI Unemployment Expectations Index deteriorated by 10% in the latest month, the S&P/ASX200 dropping 7.8% month to month and the yield spread narrowing further. However, commodity prices firmed (up 2.1% in AUD terms) and total hours worked rose 0.5% while dwelling approvals posted a big 30% rebound from very weak reads in Dec-Jan. The net effect is hard to judge but may be more neutral than weak.

Westpac-MI Leading Index

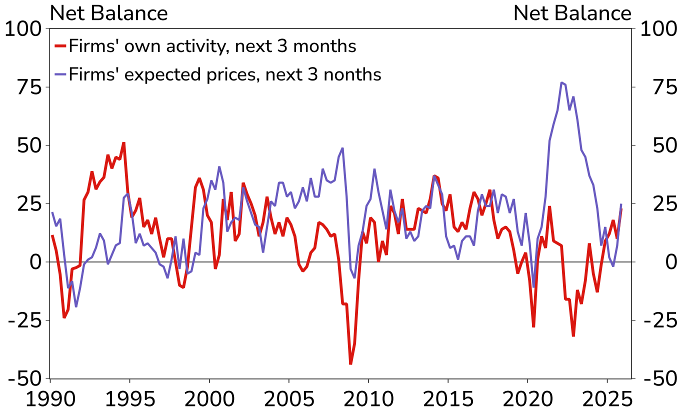
NZ: Q1 NZIER Survey of Business Opinion (index)

Apr 21, General business confidence last: 39.5

The December quarter QSBO showed a more upbeat attitude among businesses than we've seen for some time, with both actual and expected activity picking up, and demand for workers responding accordingly. The March quarter survey will be a different matter though, coming in the wake of the Iran war, and later responses are likely to be significantly more downbeat than earlier ones. The pricing measures of the survey will show the hit from the surge in fuel costs, but more important will be firms' willingness to pass this on into their own prices. This particular measure seems to have been instrumental in kicking off both tightening and easing phases by the RBNZ in recent years.

Quarterly Survey of Business Opinion



Source: NZIER, Stats NZ, Macrobond, Westpac Economics

NZ: Q1 Consumer Prices (%)

Apr 21, Quarterly last: 0.6, Westpac f/c: 0.7
Annual last: 3.1, Westpac f/c: 2.8, RBNZ f/c: 3.0

We estimate that New Zealand consumer prices rose by 0.7% in the March quarter, underpinned by higher prices for food and petrol. The annual inflation rate is expected to dip from 3.1% to 2.8%, slightly below the RBNZ's forecast of 3.0% (updated at its April Monetary Policy Review). Under the surface, core inflation is expected to remain at firm levels. While the annual inflation rate is set to soften a little in March, this will be just a temporary reprieve. Inflation is set to rise sharply through the middle part of the year in response to the recent rise in oil prices and related increases in other costs. We expect inflation will rise to around 4.3% mid-year.

Inflation at top of the range before Iran war
