- trade balance	MYR20.3bn	MYR14.9bn
Taiwan: export orders (Jul)	56.6% y/y	59.4% y/y
Japan: exports (Jul)	20.1% y/y	19.3% y/y
- imports	25.7% y/y	25.4% y/y
- trade balance	-JPY719.7bn	-JPY409.9bn
Aug 21 (Fri)		
Japan: CPI (Jul)	2.0% y/y	1.7% y/y

CENTRAL BANK MEETINGS

Bank Indonesia (BI) (19 August)

We expect Bank Indonesia to leave the BI rate at 5.75% in its August meeting. This meeting carries added significance as it will be chaired by acting Governor Destry Damayanti, after Perry Warjiyo resigned last month. President Prabowo has since nominated Deputy Governor Destry as the sole candidate for the position of the next Governor. If confirmed, the appointment will underscore the government's preference for a technocratic and market-oriented leadership transition, placing a seasoned BI official at the helm of the institution. The August rate review will provide a glimpse into the new leader’s priorities and communication style.

July inflation had slowed to 2.9% yoy from 3.3% in June, while the 2Q growth was relatively resilient at 5.3%, with domestic drivers in the lead, especially investment, followed by consumption, while net trade was a drag. A firm 2Q growth report and stability in the rupiah makes the case for the BI to maintain its rates this month.

People Bank of China (PBOC) (20 August)

We expect the PBOC to keep the 1Y LPR unchanged next week, as resilient exports and stable industrial activity should continue to support growth momentum. Industrial production is expected to edge up from 5.3% yoy in June to 5.4% in July, supported by firm external demand. Exports stayed strong, rising 23.9% yoy in July, driven by the regional AI-electronics upcycle, while the hi-tech and equipment manufacturing sub-PMIs stayed in expansionary territory.

Domestic momentum, however, remains uneven. Retail sales growth is expected to moderate to 0.4% yoy in July, partly reflecting a high base from earlier trade-in subsidies. Household sentiment is weak amid uncertain job prospects, slower income growth and elevated precautionary savings, while subdued property prices continue to weigh on household wealth and consumption. Investment also stays weak, with fixed asset investment expected to contract further by 6.0% yoy ytd in July. Corporate investment is cautious amid the anti-involution campaign, while the property sector continues to be a major drag. Against this backdrop, policymakers are likely to maintain a measured policy stance, relying on targeted fiscal support to sustain growth rather than further rate cuts.

FORTHCOMING DATA RELEASES

Hong Kong SAR

Headline CPI is expected to remain at 2.0% yoy in July, with elevated energy prices offset by the subdued goods and food prices. Electricity fuel charges and petrol prices increased in July, adding to utilities and transport costs, while housing inflation should edge higher amid a firmer residential rental market. However, subdued durable goods and food prices, alongside a slowdown in mainland tourist arrivals from 10.4% yoy in June to 2.7% in July, should partly offset these upward pressures.

Japan

2Q GDP, July trade, and CPI data are forthcoming. GDP growth is expected to post an on-trend rate of 0.8% QoQ saar, albeit lower than the 1.8% recorded in 1Q. Growth is expected to be largely driven by domestic demand. Consumption indicators appeared to have strengthened in 2Q, supported by decent wage increases and energy subsidies aimed at containing inflation. In contrast, exports in real terms have yet to show a substantial recovery in 2Q.

July trade data are expected to show export value growth picking up further to 20% yoy. CPI inflation, meanwhile, is expected to rise to 2.0% yoy in July from 1.7% in June. These readings would be consistent with the preliminary trade data for the first 20 days of July and the Tokyo CPI data released earlier. Overall, the data will likely strengthen the case for an early rate hike by the Bank of Japan at its September meeting. However, an actual move would still hinge on market dynamics, including USD/JPY movements and the outcome of the September FOMC meeting.

Malaysia

We expect Malaysia's goods exports to expand by a strong 40.0% yoy in July 2026, extending the robust 45.4% yoy growth in June. Exports performance should remain underpinned by strong artificial intelligence demand for electrical & electronics products, alongside resilient oil and gas shipments, supported by energy prices amid evolving tensions in Middle East. We see Malaysia's headline inflation holding at 1.9% yoy in July 2026, stable relative to June. Price pressures should remain in check, as higher fuel inflation and energy cost pass-through were mitigated by fiscal subsidies.

Singapore

We forecast Singapore's non-oil domestic exports to rise by 26.5%yoy in July. The expansion should continue to be led by electronics shipments, supported by robust AI-related demand for memory chips and server-related products. Non-electronics exports may have rebounded due to favourable base effects, although petrochemicals shipments remained weak due to disruptions in the Strait of Hormuz.

Taiwan

July export orders are expected to moderate slightly to 56.6% yoy, from 59.4% in June. Earlier-released export data showed growth decelerating to 32.9% in July, the lowest reading in five months. In real terms, export growth slowed more notably to 13.1%. This reinforces our view that AI-driven super growth has peaked and is transitioning toward more normal growth in 2H. We expect a similar trend to be reflected in export orders.

Thailand

We expect Thailand's real GDP growth to decelerate to 1.9% yoy in 2Q26 from a strong 2.8% yoy in 1Q26. This slowdown reflected softer private consumption and weaker foreign tourist arrivals, due to challenges arising from the conflict in the Middle East. Government spending and robust private investment provided support, alongside strong goods exports expansion driven by global artificial intelligence tailwinds. However, robust goods imports momentum likely resulted in a negative net trade contribution in 2Q26.

Taiwan: GDP (2Q P)	12.9% y/y	12.9% y/y
Malaysia: GDP (2Q, F)	5.8% y/y	5.8% y/y

FORTHCOMING DATA RELEASES

India

Inflation and trade numbers are due in the second week of August. Headline inflation in July was largely steady at 4.4% yoy vs June. High frequency data on food staples point to a rise in pulses, sugar, milk and edible oils, while vegetables have stabilised. A catch-up in rainfall in July has helped boost sowing activity. Adjustments in domestic retail fuel products (non-subsidised LPG was up 10% yoy in Jul) are also likely to reflect in the utilities and fuel segments. Core readings, however, should be benign at sub-4% in July, helped also by moderation in precious metals in the period. Separately, trade numbers should see the resilience in exports outweighed by a higher import bill, keeping the trade balance in red to the tune of -$29bn, close to -$30bn in June.

China

Credit demand remains weak, with new yuan loan expected to stay at RMB10.8bn in July. Both corporate and household medium- to long-term lending likely softened amid cautious borrowing sentiment and continued mortgage prepayments. M2 growth is expected to remain at 8.0% yoy. Precautionary savings stayed elevated, while weak property prices continued to weigh on household wealth. The wide gap between M2 and M1 growth is expected to persist, reflecting subdued corporate investment and household consumption.

Singapore & Malaysia

We expect Singapore's final 2Q26 GDP print to be revised up to 5.9% yoy and 1.3% qoq sa, from the advance estimates of 5.7% yoy and 1.1% qoq sa. The modestly higher growth figures were driven by a firmer manufacturing outturn than initially reported, alongside a possible upward revision to services growth amid stronger expansion in trade-related services, as indicated by the robust pickup in re-exports in June. With 1H26 growth tracking well above trend, we see a high likelihood that the government will upgrade its official 2026 GDP growth forecast to 4.0-5.0% from 2.0-4.0%, even as it continues to flag high uncertainty and downside risks to the outlook.

Separately, Malaysia's final 2Q26 GDP release will confirm an acceleration in growth at 5+% yoy, supported by stronger exports expansion driven by global artificial intelligence-related tailwinds, as well as sustained domestic demand underpinned by resilient household spending and continued investment implementation.

CENTRAL BANK MEETINGS

Reserve Bank of India policy committee (5 Aug)

The Reserve Bank of India monetary policy committee (MPC) is expected to keep the benchmark rate unchanged at 5.25% on 5 Aug. We anticipate a cautious policy statement, that underscores the need for continued vigilance on the inflation outlook, while placing greater emphasis on core inflation as a more reliable measure of underlying price pressures than headline inflation, which has been influenced by both domestic and global supply-side factors. Against this backdrop, the committee is likely to push back against market expectations of a more aggressive tightening path reflected in implied rates.

That said, the MPC is increasingly confronted by signs of a build-up in inflationary risks. Brent crude prices have risen amid renewed geopolitical tensions. Below-normal rainfall presents upside risks to food inflation, and the development of El Niño conditions could lead to higher imported agricultural commodity prices. Therefore, a more hawkish bias in policy guidance may become increasingly difficult to avoid as the real policy rate cushion narrows, inflation risks remain skewed to the upside, and the probability of GDP growth exceeding 7% in 1QFY27 increases.

For the path ahead, markets will be watchful of developments in West Asia and signs of any change in the US Federal Reserve's policy outlook in the second half of 2026. These developments will have important implications for the rupee, capital flows, and interest rate differentials. In the near term, the anticipated recovery in portfolio inflows, together with continued inflows via the swap windows, should provide a constructive backdrop for onshore markets.

FORTHCOMING DATA RELEASES

China

Exports growth is expected to moderate from 27.0% yoy in June to 17.0% in July, as renewed tensions in the Middle East weighed on external demand. High-frequency indicators suggest export momentum has eased, with total deadweight tonnage handled at China's 20 major ports slowing from 12.9% yoy in June to 12.1% in July. Meanwhile, international cargo flights declined 26.7% to an average of 9,468 per week in July, pointing to softer trade activity.

Hong Kong

Retail sales growth is expected to accelerate from 7.9% yoy in May to 8.5% in June, supported by resilient tourism activity and improving domestic consumption. Mainland visitor arrivals remained robust, growing 10.4% yoy in June. Meanwhile, the growth in residents' outbound departures eased from 8.1% yoy in May to 5.2% in June, suggesting fewer residents spending abroad and a partial shift in consumption back to the domestic market.

South Korea

July inflation data are due for release. Headline CPI is expected to remain elevated at 3.3% yoy, up slightly from 3.2% in June and well above the Bank of Korea's 2% inflation target. The rebound in global oil prices, driven by renewed tensions in the Middle East, is likely to keep imported inflationary pressures elevated. Demand-side inflation remains relatively contained, reflecting the impact of the BOK's pre-emptive monetary tightening in anchoring inflation expectations. We expect CPI inflation to remain in the 3.0–3.5% yoy range throughout 2H26, which should prompt the BOK to deliver an additional 50bps of rate hikes, taking the policy rate to 3.25% by year-end.

Taiwan

July trade and inflation data are due for release. Export growth is expected to remain strong at around 40% yoy, resulting in a robust trade surplus of USD15bn. Excluding price effects, however, export growth is likely to have moderated to around 20% yoy. We maintain our view that the AI-driven export supercycle has peaked and is transitioning toward a more normalised growth trajectory.

CPI inflation is expected to remain elevated at 2.5% yoy. The rebound in oil prices amid renewed Middle East tensions is likely to keep imported raw material costs elevated, while the severe typhoon in July is also expected to have pushed up fresh food prices. We continue to expect CPI inflation to remain in the 2.0–2.5% yoy range through 2H26, prompting the central bank to deliver a 12.5bps rate hike in 4Q26.

Indonesia and Philippines

Inflation and 2Q26 growth numbers are due in early-August. For Indonesia, we expect 2Q26 growth to moderate to 5.3% yoy from 1Q's 5.6%. Momentum at the beginning of the year was jumpstarted by religious festive spending and strong increase in public spending. Entering the second quarter, fiscal spending remained supportive, complemented by stimulus measures and the limited pass-through of elevated global energy prices to household consumption, as domestic fuel prices remained unchanged. Private sector business activity was likely impacted by Middle East hostilities, shifts in domestic policy architecture, and subdued trade sector performance.

Growth in Philippines is expected to show signs of bottoming out but remain at modest levels, with 2Q output set to register 3% yoy rise. Inflation outcomes will benefit from a temporary pullback in global energy prices, but food costs are set to turn dearer on El Nino risks in Philippines as well as Indonesia. BSP is expected to tighten policy rates, while BI will opt to keep rates on hold after back-to-back increases.

Thailand

We expect Thailand's headline inflation to accelerate to 3.0% yoy in July, the upper end of the central bank's 1-3% target range, from 2.4% yoy in June. The pickup reflected firmer food price increases amid low base effects, and higher core inflation due to the pass-through of energy costs. Energy-driven inflation likely remained elevated as global and domestic fuel prices rebounded following the escalation of tensions in the Middle East. Nonetheless, the Bank of Thailand is unlikely to rush into monetary tightening, as it looks through this supply-driven increase in inflation, balancing with concerns about uneven economic growth.

Vietnam

We expect Vietnam's goods exports to expand by 25.5% yoy in July, extending the strong growth of 28.1% yoy in June, supported by robust electronics shipments benefitting from spillovers from artificial intelligence-related demand, despite weakness in textiles, garments, and footwear exports. Retail sales likely picked up amid resilient domestic consumption and solid tourism arrivals, despite elevated inflation. We anticipate headline inflation to rise to 5.0% yoy in July from 4.7% yoy in June, driven by firmer transport price increases as global and domestic fuel prices rebounded following the escalation of tensions in the Middle East, alongside persistently elevated food inflation.

GENERAL DISCLOSURE/ DISCLAIMER (For Macroeconomics, Currencies, Interest Rates, Digital Assets or Commodities)[1]

The information herein is published by DBS Bank Ltd and/or DBS Bank (Hong Kong) Limited (each and/or collectively, the "Company"). It is based on information obtained from sources believed to be reliable, but the Company does not make any representation or warranty, express or implied, as to its accuracy, completeness, timeliness or correctness for any particular purpose. Opinions expressed are subject to change without notice. This research is prepared for general circulation. Any recommendation contained herein does not have regard to the specific investment objectives, financial situation and the particular needs of any specific addressee. The information herein is published for the information of addressees only and is not to be taken in substitution for the exercise of judgement by addressees, who should obtain separate legal or financial advice. The Company, or any of its related companies or any individuals connected with the group accepts no liability for any direct, special, indirect, consequential, incidental damages or any other loss or damages of any kind arising from any use of the information herein (including any error, omission or misstatement herein, negligent or otherwise) or further communication thereof, even if the Company or any other person has been advised of the possibility thereof. The information herein is not to be construed as an offer or a solicitation of an offer to buy or sell any securities, futures, options or other financial instruments or to provide any investment advice or services. The Company and its associates, their directors, officers and/or employees may have positions or other interests in, and may effect transactions in securities mentioned herein and may also perform or seek to perform broking, investment banking and other banking or financial services for these companies. The information herein is not directed to, or intended for distribution to or use by, any person or entity that is a citizen or resident of or located in any locality, state, country, or other jurisdiction (including but not limited to citizens or residents of the United States of America) where such distribution, publication, availability or use would be contrary to law or regulation. The information is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction (including but not limited to the United States of America) where such an offer or solicitation would be contrary to law or regulation.

[#for Distribution in Singapore] This report is distributed in Singapore by DBS Bank Ltd (Company Regn. No. 196800306E) which is Exempt Financial Advisers as defined in the Financial Advisers Act and regulated by the Monetary Authority of Singapore. DBS Bank Ltd may distribute reports produced by its respective foreign entities, affiliates or other foreign research houses pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Where the report is distributed in Singapore to a person who is not an Accredited Investor, Expert Investor or an Institutional Investor, DBS Bank Ltd accepts legal responsibility for the contents of the report to such persons only to the extent required by law. Singapore recipients should contact DBS Bank Ltd at 65-6878-8888 for matters arising from, or in connection with the report.
