

摘要：

随着印度、中国仿制药集群的强力介入，GLP-1行业正式宣告进入“减肥平权”时代。这不仅是一场价格战，更是一场关于慢病管理逻辑的降维打击。

一、发生了什么？从“减肥神药”到“减肥平权”：GLP-1行业正在进入价格革命阶段

全球减肥药产业正在经历一场静默却深刻的结构性裂变。GLP-1类药物（胰高血糖素样肽-1）正从“供给短缺时代”加速进入“普及化时代”，三个标志性事件勾画出这一历史拐点的清晰轮廓。

礼来口服GLP-1药物Foudayo（orforglipron）提前获FDA批准。2026年4月1日，FDA提前于PDUFA日期批准了这款每日一次的非肽类口服小分子GLP-1。这是首款可不受食物或饮水限制服用的口服GLP-1。礼来的定价策略极富攻击性：直接面向消费者的价格为149-349美元/月，同时采用会员忠诚计划和DTC（直达消费者）销售模式。这标志着GLP-1首次系统性脱离传统高端处方药路径，向消费医疗产品转型。药企第一次像互联网消费公司一样运营减肥药。

Exhibit 1: Orforglipron Dosing and Pricing Details

Phase 3 Capsule Dose	Foudayo Tablet Equivalent Dose	Direct-to-Patient Price	Journey Program Price*
1mg	0.8 mg	\$149	N/A – same
3mg	2.5 mg	\$199	N/A – same
6mg	5.5 mg	\$299	N/A – same
12mg	9 mg	\$299	N/A – same
24mg	14.5 mg	\$349	\$299
36mg	17.2 mg	\$349	\$299

印度仿制药集中上市，价格断崖式下降。2026年3月21日，司美格鲁肽在印度的核心专利正式失效。高盛报告显示，太阳制药、雅培（与诺和诺德合作）、Cipla、MankindPharma、TorrentPharma、瑞迪博士实验室（Dr.Reddy's）、ZydusLifesciences等至少12家大型印度药企随即入场。上市短短十天内，仿制药便抢走近四分之一市场份额——全球第一次真正验证了“减肥平权”的商业逻辑：一旦价格下降，需求会指数级爆发。

Exhibit 5: We have seen at least a dozen generic players enter the semaglutide market recently in India with vials pricing at <US\$15

List of generic players in the GLP-1 therapy segment (non exhaustive)

#	Company	IPM M/S	Brand Name(s)	Lowest monthly cost (US\$)	Notable Features / Strategy
1	Sun Pharma	8.4%	Sematrinity, Noveltreat	33	Focused on both Type 2 diabetes and chronic weight management indications.
2	Abbott	5.9%	Extensior	93	Launched in partnership with Novo Nordisk, with commercialization commencing in February 2026.
3	Cipla	5.8%	NA	NA	Commercializing tirzepatide (Yurpeak) through a partnership with Eli Lilly; evaluating future entry into semaglutide generics.
4	Mankind Pharma	5.5%	Semaglu	55	Investing strategically in peptide manufacturing capabilities and delivery-device partnerships.
5	Torrent Pharma	4.9%	Sembolic, Semalix	44	Partnered injectable portfolio with parallel development focus on oral dosage formulations.
6	Alkem Labs	4.1%	Semasize, Obesema, Hepaglide	20	Developing multiple branded offerings targeted at the weight management segment.
7	Lupin	3.5%	Semanext, Lvarise	24	Partnered with Zydus Lifesciences for semaglutide injectable formulations.
8	Dr. Reddy's	3.2%	Obeda	46	Fully backward-integrated product with an initial global sales target of ~12 million pens in the first year.
9	Zydus Lifesciences	3.2%	Semaglyn, Mashema, Alterme	24	Single-pen delivery system (up to 15 mg) enabling flexible and progressive dose titration.
10	Emcure	2.5%	Povlutra	96	Commercialized in partnership with Novo Nordisk, with launch initiated in December 2025.
11	Glenmark	2.1%	Glipiq	14	Targeting the Type 2 diabetes segment across both vial and pre-filled pen formats.
12	Eris/Natco	1.3%	SemaNat, Semafull, Sundae	14	Strategic partnership focused on vial formulations to improve accessibility for middle-income patient populations.

IPM overall Market share is for Mar-2026 on a MAT basis

Source: Data compiled by Goldman Sachs Global Investment Research, AIOCD

中国市场进入关键窗口期。由于监管数据保护（RDP）授予了六年临床数据保护期（自2021年4月Ozempic在中国首次获批算起），仿制药最早获批预计要到2027年4月。这在中国形成了一个极其特殊的“时间差”：原研药利用窗口期建立品牌和患者心智，创新药企业加速布局多靶点和口服产品，上游多肽CDMO和API企业则疯狂扩产。根据高盛，目前已有至少10家中国企业提交了司美格鲁肽仿制药的NDA/ANDA，另有9-10家处于三期临床阶段。
