

摘要：

据美银全球基金经理调查，本月综合情绪骤降创半年新低。通胀担忧加剧，地缘冲突取代AI泡沫头号风险。私募信贷爆雷隐患创纪录，现金仓位上升。大宗商品超配创两年新高，市场正从“繁荣”切换至“滞胀”防御模式。

全球基金经理情绪在2026年3月急转直下，地缘政治风险与通胀预期重回市场焦点，取代AI泡沫成为头号尾部风险，而私募信贷则以创纪录的比例被视为系统性信用事件的最大隐患。

据美国银行（BofA）3月全球基金经理调查（FMS），本月情绪综合指标从8.2骤降至5.6，创六个月新低。与此同时，现金占比从3.4%跳升至4.3%，为2020年3月新冠疫情冲击以来最大单月涨幅，此前触发反向“卖出信号”的现金规则已回归中性区间。

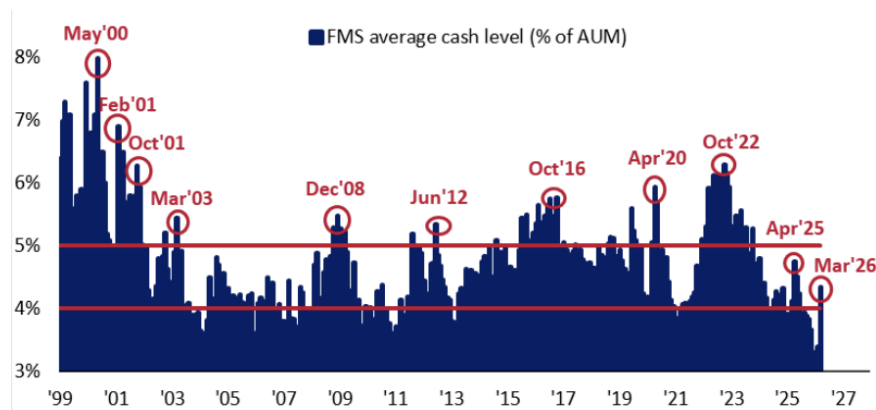

Chart 1: BofA Global FMS investor sentiment falls to 6-month low
Percentile rank of FMS growth expectations, cash levels, and equity allocation

Source: BofA Global Fund Manager Survey

In the March 2026 BofA Global Fund Manager Survey, our broadest measure of FMS sentiment, based on cash levels, equity allocation, and global growth expectations, dropped sharply from 8.2 to 5.6, a 6-month low, but still well above the Apr'25 "Liberation Day" low of 1.8.

Chart 3: FMS cash levels jump to 4.3% from 3.4%...biggest monthly increase since COVID
BofA FMS average cash level (% of AUM)

Source: BofA Global Fund Manager Survey

美银策略师Michael Hartnett指出，当前情绪已足够悲观，可支持在油价突破每桶100美元时做空原油、在美元指数升破100时做空美元、在美国30年期国债收益率达5%时买入，以及在标普500指数触及6600点时逢低建仓。

本次调查于3月6日至12日进行，共有210位基金经理参与，管理资产规模合计5890亿美元。

值得注意的是，尽管情绪显著降温，美银各项仓位指标距离“极度熊市”水平仍有相当距离——当前股票配置、全球广度指标等均未显示出市场大底时通常出现的极端信号，这意味着现阶段尚未形成股票和信用资产的理想战术建仓时机。

Table 1: March FMS bearish...but positioning data not at uber-bear levels of prior big lows

BoFA Trading Rules & Tools in Mar'26 vs. at Big Lows of past 15 years

	Today	Liberation Day Apr'25	Russia- Ukraine Feb/Mar'22	COVID Mar'20	US debt downgrade Aug'11
BoFA Global FMS Cash Rule	4.3%	4.8%	5.9%	5.9%	5.2%
BoFA FMS Equity Allocation	37%	-17%	4%	-27%	-7%
BoFA Global Flow Trading Rule	-0.1%	-1.7%	-1.4%	-4.2%	-3.0%

BoFA GLOBAL RESEARCH

情绪骤冷：增长预期崩塌，通胀担忧卷土重来

宏观预期的逆转是本次调查最引人注目的变化。全球经济增长乐观比例从上月净39%断崖式下跌至净7%，为近期最大单月跌幅。与此同时，**通胀预期大幅反弹——净45%的受访者预计未来12个月全球CPI走高，而上月这一比例仅为9%。**

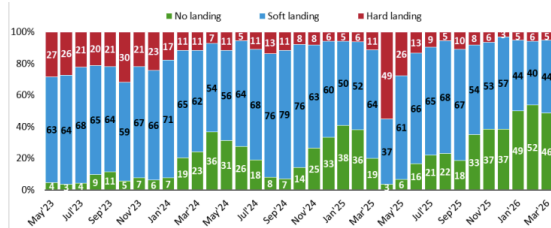

通胀预期的跳升直接压低了降息预期。预计短期利率将下降的受访者比例从上月净46%收缩至净17%，为2023年2月以来最低。对收益率曲线继续陡化的预期也明显降温，净56%的受访者预计3个月至10年期美债收益率曲线将趋陡，较上月净80%大幅回落。

对全球经济形势的判断同样发生了结构性转变。在宏观情景分类上，**51%的受访者预计未来12个月将出现“滞胀”（低于趋势的增长叠加高于趋势的通胀），较上月的42%明显上升；预计“繁荣”（高增长、高通胀）的比例则从36%降至29%。**

尽管如此，硬着陆的市场定价依然极低——仅5%的受访者认为经济将出现硬着陆，46%预计“不着陆”，44%预计软着陆，“不着陆”已连续三个月成为市场共识。

Chart 4: 46% say "no landing," 44% say "soft landing," just 5% say "hard landing"

What is the most likely outcome for the global economy in the next 12 months?

Source: BoFA Global Fund Manager Survey, Bloomberg

46% of FMS investors see “no landing” as the most likely outcome for the global economy, while another 44% expect a “soft landing.”

“No landing” has been the consensus among FMS investors for three months in a row now.

While investors are more bearish on global growth in March, the probability of a “hard” landing is still a very low 5%.

Chart 5: Short-term rate expectations catching up with rising inflation outlook

Net % expecting higher global CPI and net % expecting higher short-term rates

Source: BoFA Global Fund Manager Survey

Our March survey shows the first hit of a second wave higher in inflation expectations...net 45% expect higher global CPI in the next 12 months (up from 9% a month ago).

Higher CPI expectations are driving a rise in rate expectations...net 17% of investors expect lower short-term rates (from 46% a month ago, and 78% in Aug'25)...lowest since Feb'23.

Chart 6: FMS investors pull back on expectations for yield curve steepening

Net % FMS expect yield curves to steepen

Source: BoFA Global Fund Manager Survey, Bloomberg

There has been a cyclical peak in expectations for a steeper yield curve...net 56% expect the 3mo-10yr yield curve to steepen, down sharply from 80% a month ago.

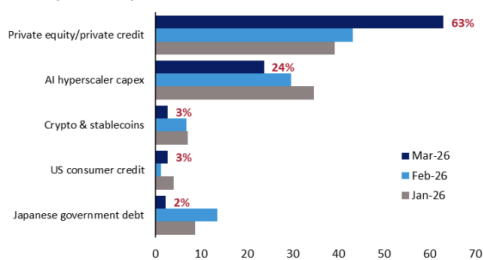

尾部风险易主：地缘政治登顶，私募信贷警报升级

市场对风险来源的判断发生了显著位移。在"最大尾部风险"问题上，37%的受访者将地缘政治冲突列为首要威胁，较上月的14%大幅攀升；上月位居榜首的"AI泡沫"则跌至仅10%的支持率。与伊朗相关的地缘政治紧张态势，被视为驱动本轮情绪转变的重要催化剂之一。

在系统性信用风险的来源判断上，63%的受访者将私募信贷列为最可能引爆系统性信用事件的领域，这一比例创下调查有史以来最高纪录。与此同时，3月信用违约风险指标急升至2025年4月以来最高，净46%的受访者认为违约风险高于正常水平，而上月这一比例仅为17%。

Chart 10: Record 63% say private equity/private credit is most likely source of a credit event
What is the most likely source of a systemic credit event?

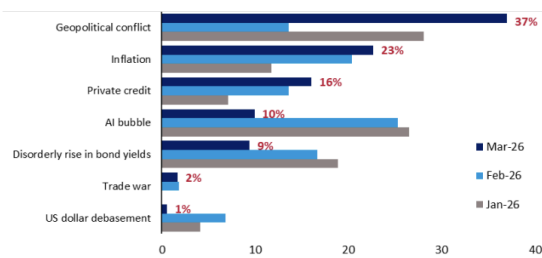

Source: BofA Global Fund Manager Survey.

BofA GLOBAL RESEARCH

Asked what is the most likely source of a systemic credit event, FMS investors said private equity/private credit (63%), for the 8th month in a row.

Chart 11: Geopolitical conflict surges to #1 biggest tail risk in March
What do you consider the biggest 'tail risk'?

Source: BofA Global Fund Manager Survey

BofA GLOBAL RESEARCH

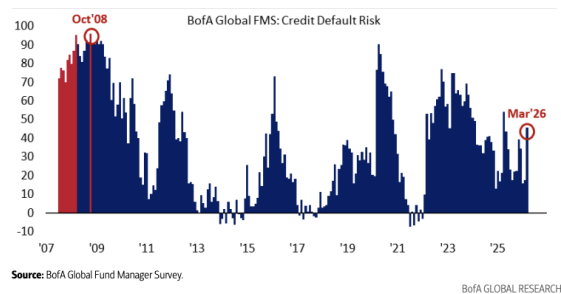

Asked for the biggest 'tail risk,' 37% of FMS investors said geopolitical conflict, up sharply from 14% a month ago.

Last month, the biggest tail risk per FMS investors was "AI bubble" (now just 10%).

对应金融稳定性的其他分项指标亦出现全面走弱迹象。FMS金融市场稳定风险指标从-1.8升至1.2，在7项风险因子中有6项相对1月份出现恶化，涵盖新兴市场风险、信用风险、商业周期风险、货币政策风险、交易对手风险和地缘政治风险。

流动性状况虽然整体仍属正面，但净47%的受访者评价流动性为正面，较两个月前的峰值66%已明显下滑，为2025年5月以来最低。

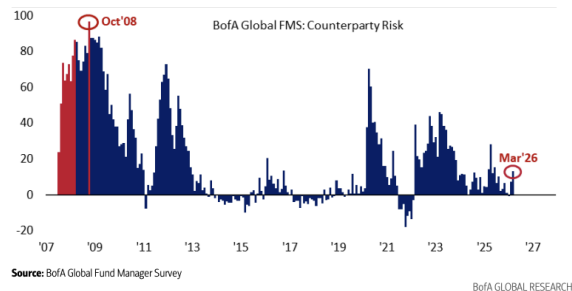

Chart 13: Credit default risk concerns rose to the highest level since Apr'25
BoFA FMS rating of potential credit default risk to financial market stability

FMS metrics of credit default risk, counterparty risk, and liquidity conditions showed early deterioration starting in mid-2007 ahead of the GFC, signalling financial system concerns were on the rise.

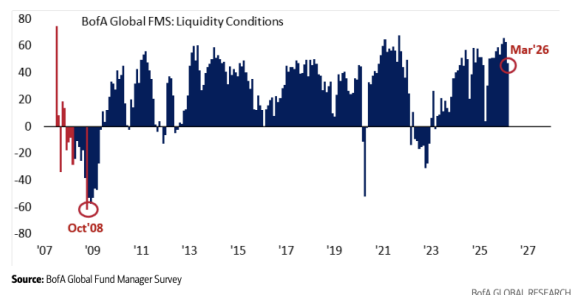

In Mar'26, FMS measure of credit default risk rose sharply (net 46% say risk is above normal, up from 17% to highest since Apr'25).

Chart 14: Investor concerns over counterparty risk are still well below pre-GFC levels
BoFA FMS rating of potential counterparty risk to financial market stability

FMS counterparty risk is up only slightly...13% say counterparty risk is above normal levels, from 7% last month.

Chart 15: Net 47% of FMS investors say liquidity conditions are positive
Net % of FMS rate liquidity conditions as positive

Net 47% say liquidity conditions are positive, down from peak 66% two months ago, and the lowest level since May'25. That said, most market participants perceive ample liquidity conditions.

AI热度降温：不再是最大风险，亦不再是最拥挤交易

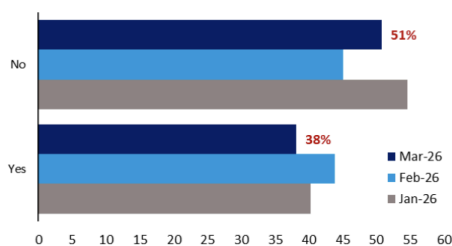

AI相关资产在本次调查中的存在感大幅消退。在"AI股票是否处于泡沫"的问题上，51%的受访者认为并不存在泡沫，38%认为是泡沫。对AI超大规模资本开支的担忧也有所缓解——认为企业过度投资的受访者比例从上月创历史新高的净33%降至净22%。

在对AI影响的预期上，受访者认为AI在未来12个月最大的作用将体现于通过提升生产效率推动企业盈利扩张（27%），其次是AI基础设施建设带来的大宗商品通胀效应（26%），另有22%认为AI将通过推高失业率带来劳动力市场的通缩压力。

从拥挤交易的角度来看，"做多AI/Magnificent 7"的光环已基本褪去——仅9%的受访者认为"做多Magnificent 7"是当前最拥挤的交易，较去年12月的峰值54%大幅缩水。当前最拥挤交易的桂冠由"做多黄金"和"做多全球半导体"并列分享，各获35%的支持率。

值得关注的是，美银的反向交易逻辑指出，在伊朗战事缓和的情景下，仓位较轻的Magnificent 7、消费类股和中国股票或有望跑赢仓位仍然偏重的新兴市场、日本、半导体、银行和工业股。

Chart 7: 51% of FMS investors say AI stocks not in a bubble
Do you think AI stocks are in a bubble?

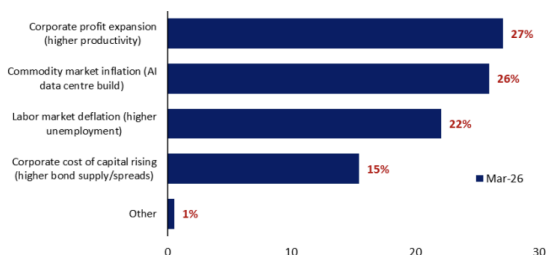

Source: BofA Global Fund Manager Survey.

BofA GLOBAL RESEARCH

Asked if AI stocks are in a bubble, 51% of FMS investors said no, while 38% said yes.

Chart 8: AI expected to have greatest impact on corporate profit expansion via productivity
Over the next 12 months, on which of the following will AI have the greatest impact?

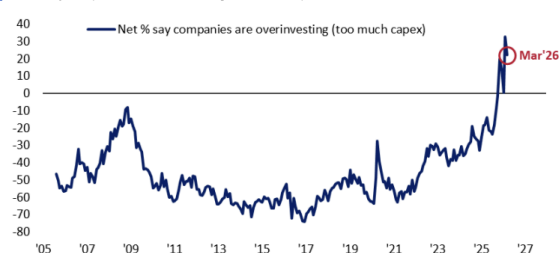

Source: BofA Global Fund Manager Survey.

BofA GLOBAL RESEARCH

FMS investors expect AI to have the biggest impact on corporate profits via higher productivity (27%), followed closely by commodity inflation via AI buildout (26%). Another 22% believe AI's greatest impact will be on labor market deflation, via higher unemployment.

Chart 9: Overinvesting concerns down from last month's 20-year high
Net % say companies are overinvesting (too much capex)

Source: BofA Global Fund Manager Survey.

BofA GLOBAL RESEARCH

Net 22% of FMS investors believe companies are overinvesting (too much capex), down from a record high of 33% last month.

Concerns over AI hyperscalers overspending on capex have eased in the past few weeks.

资产配置：从“繁荣”切换到“滞胀”，大宗商品仓位飙升

在资产配置层面，基金经理正在将组合从“繁荣”主线向“滞胀”主线切换。本月加仓方向集中于日本股票、医疗健康和现金，减仓方向则为可选消费、欧洲股票和银行股。

从绝对仓位来看，受访者最超配的资产类别依次为新兴市场股票、医疗健康、股票整体和大宗商品；最低配的则为债券、可选消费和美元。

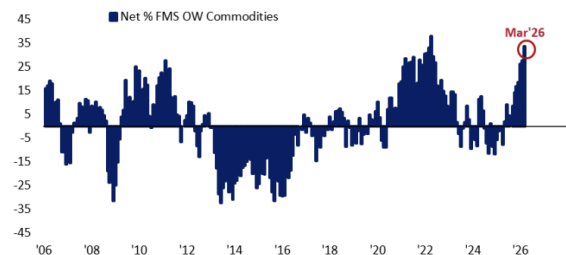

大宗商品超配比例升至净34%，为2022年4月以来最高，高于历史均值达2.1个标准差，显示出强烈的通胀对冲需求。

在区域股票配置方面，新兴市场股票的超配比例升至净53%，创2021年2月以来最高，高于历史均值1.6个标准差；日本股票则从上月净低配1%迅速转为净超配14%。

与之形成鲜明对比的是，美国股票仍处于净低配17%的状态，可选消费类股更遭遇净低配27%，为2022年12月以来最低。

Chart 19: FMS most overweight commodities since Apr'22

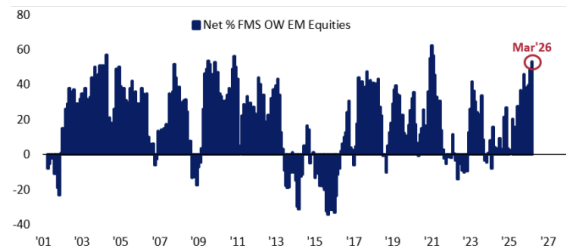

Net % overweight commodities

In March, FMS investors were 34% net overweight commodities, the most since Apr'22.

Chart 20: Allocation to emerging market equities highest since Feb'21

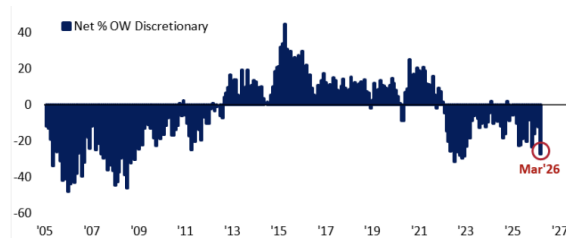

Net % overweight emerging market equities

In March, net 53% were overweight emerging market equities, the highest since Feb'21.

Chart 21: Biggest UW to consumer discretionary since Dec'22

Net % overweight consumer discretionary

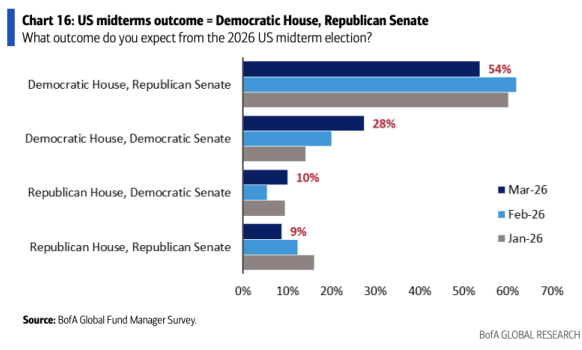

In March, net 27% of FMS investors were underweight consumer discretionary, the lowest allocation since Dec'22.

政治变量：民主党"蓝潮"预期升温，油价预期大幅低于现价

在政治层面，美国2026年中期选举的预期正在发生悄然变化。54%的受访者预计选举结果为“民主党控制众议院、共和党控制参议院”；但预期民主党全面横扫（同时控制众参两院）的比例已从两个月前的11%升至28%，政治风险的市场定价正在悄然调整。

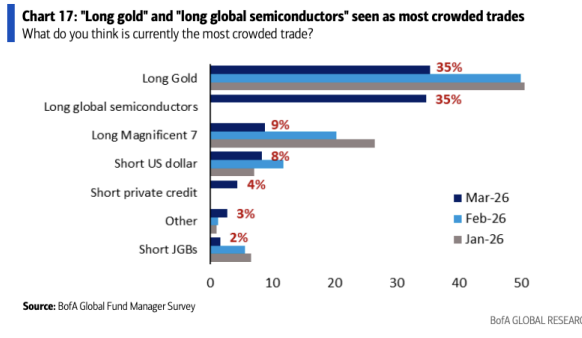

黄金方面，随着金价持续上涨，净38%的受访者认为黄金估值已偏高，较上月的31%进一步上升，但“做多黄金”依然是最拥挤交易的并列第一，显示尽管估值压力渐增，投资者的避险需求和通胀对冲诉求仍在支撑金价。

美元方面，净24%的受访者低配美元，较上月的28%略有收窄，净46%认为美元估值偏高。

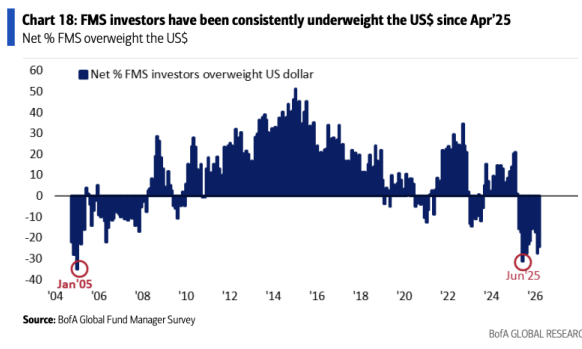

Asked about the most likely outcome for the 2026 US midterm elections (currently Republicans hold majority in both US House and Senate), FMS investors believe it will be a Democratic House & Republican Senate (per 54%).

Note 28% now expect a “blue wave” (Democratic House & Democratic Senate), up from 11% just two months ago.

The two most crowded trades in March were “long gold” (35%) and long global semiconductors (35%).

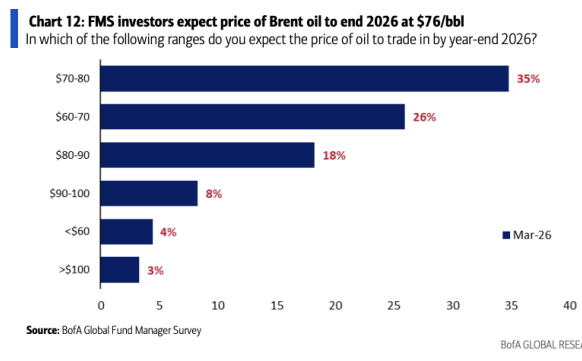

Just 9% of FMS respondents said the most crowded trade was “long Magnificent 7”... down from peak 54% in December.

Net 24% of FMS investors are underweight the US dollar, albeit less than last month’s 28%.

In Jun’25, FMS allocation hit a low of net 31% underweight.

对于大宗商品市场，基金经理的油价预判与当前市价存在显著落差。调查显示，仅11%的受访者预计布伦特原油年底价格将超过每桶90美元（调查期间布伦特油价约为每桶102美元），加权平均预期价格为每桶76美元，隐含约26%的下行空间，折射出市场对地缘政治溢价难以持续的普遍判断。

Asked about Brent oil by year end, just 11% expect the price to be over \$90/bbl (Brent currently \$102/bbl).

The weighted average price for oil expectations is \$76/bbl by year end.
