AI can speed up the drudge work and allow humans to redirect effort to higher-value tasks. But if the drudge work is demonstrating compliance with regulation, will the regulators allow this?

- Breathless commentary on the job-destroying effects of AI partly reflects how quickly the technology is changing, making its implications hard to assess. But it also misses important nuances: when

assessing the job impacts, it assumes jobs are made up of disconnected tasks.

- Academic research points to better ways to think about the issue. One recent paper suggests that firms will automate tasks where AI can achieve current output quality, and not those where it does not. Worker time is freed up as some tasks are automated, and reallocated to other tasks, increasing the quality of output for these tasks. This raises the quality bar for automating them later, and could make human labour more valuable, not less.
- Some tasks will be ripe for automation, because they require significant effort just to achieve bare-minimum quality. Compliance-related tasks are a good example of this, provided the regulators allow it. The result could be a better-quality product from the perspective of customers. But new issues arise, including compliance issues raised by the technology, and the possibility that regulatory expectations rise as automation makes compliance cheaper.

From breathless essays to suspiciously AI-style social media posts, the (potentially disruptive) effects of AI are front of mind for many people. The disruption narrative has become so much part of the zeitgeist that “software developer who lost his job to AI and now has no health insurance” was the backstory for a patient in a recent episode of *Grey’s Anatomy*.

One reason for the angst is that things are moving so quickly that the humans are struggling to make sense of things. Reasoning models are only a year and a half old, after all. The capabilities of the leading models leapt ahead in just the past three months. Any intuitions you had about AI’s impact based on what the models could do six months ago are obsolete. Add in the policy and geopolitical chaos of the Trump administration, and it is no wonder that investors throw up their hands and sell.

Aside from its own speed of development, one of the things that make it hard to assess the implications of AI is that people are using a simplistic ‘bag of tasks’ view of work. If too many of your tasks are automated rather than augmented by AI, goes the thinking, then your job is at risk.

A better approach was suggested in a  recent paper by two University of Toronto professors, Joshua Gans and Avi Goldfarb. Instead of a bag of disconnected tasks, they model production as a set of tasks with varying quality. The quality of the final output is the product of each task’s quality, that is, multiplying quality across tasks. If any task has zero quality, the whole output has zero quality. (These are known as “O-ring” models of production, after the parts failure that was the proximate cause of the Challenger disaster.)

In this setup, firms will automate tasks that the technology can produce to the required quality and reallocate the human effort to the remaining tasks. Worker time is reallocated rather than ‘saved’ in the form of layoffs, because there is a return to improving the quality of the non-automated tasks. It is this variable quality of tasks and output that the ‘bag of tasks’ literature ignores. A concrete example of this time reallocation effect comes from a recent speech by Fed Governor Chris Waller. He noted that AI-based coding tools reduced time spent on routine tasks. Developers at the Fed can instead focus on enhancing security and quality of the end product. This has also been our experience: faster coding means more time for thinking and writing.

Gans and Goldfarb's model has some interesting implications beyond the lack of layoffs. Once some tasks are automated, it becomes harder to automate the remaining tasks, because they are now being done to a higher quality than before. This means that automation will not be a smooth process but could happen in fits and starts. It could also make human labour *more* valuable than before, by focusing it on remaining high-value tasks. The barrier to automating *everything* might therefore be higher than people realise, and the question of what gets automated when depends on what was automated first.

The O-ring model also allows for some useful extensions that the Gans and Goldfarb paper does not mention (and for which the mathematical workings will be available on request). In the standard O-ring model, zero effort on a task translates to zero quality, but any time spent on a task produces positive quality and thus positive final output. Consider the case where significant effort must be spent on a task to reach even zero quality. An example of this might be the effort involved in achieving and demonstrating compliance with legal or regulatory requirements. Expending positive but less than this minimum threshold effort still results in the zero-quality output disaster of a finding of non-compliance.

If one task involves this fixed-effort 'compliance tax' and the others do not, it will be one of the tasks firms seek to automate first, because it frees up much more time to do other things than automating the other tasks would. Again, the 'bag of tasks' view misses this possibility.

The issue then becomes: will the regulators permit automation of compliance activities or demonstrating that compliance? Is it enough for an AI to check against a list or rules, or are costly manual sign-offs needed for accountability? Will regulators who are themselves taking a cautious approach to the new technologies be over-cautious? And will automation just shift compliance tasks to other forms, such as managing vendor risk, or ensuring model results are explainable and that the systems do not hallucinate? Another complication is that different regulators could take different stances on this issue.

A further wrinkle arises if effort is required to meet bare compliance, but there is also a ceiling beyond which further effort on the compliance task is fruitless. Think of a five-star or 'fully compliant' rating, but no sixth star to shoot for. If the manual effort to comply is large enough, the firm will choose to automate even if that means going from five-star to bare pass, if that raises the quality of other activities enough.

That choice will be most attractive if the over-compliance is insurance rather than an expression of risk appetite. If manual effort has uncertain outcomes, firms will choose to over-comply to avoid occasional non-compliant outcomes. An aspect of this uncertainty, as Westpac has previously highlighted in its submission to the productivity roundtable process, is that regulators in Australia tend not to confirm that what the entity is doing complies, but rather, wait for those moments of non-compliance and enact consequences. Over-compliance is the natural response to this regulatory approach; a more reliable, less-manual process might not need as large a buffer. If automated outcomes are more reliable and certain as well as faster and cheaper, then the firm may rationally choose not to over-comply the way it

did when everything was done manually. Firms will need to ask themselves: are they over-complying to ensure reliability of the process, or is it part of the brand and culture that they want to retain?

Regulators might not be pleased to see regulated entities remaining compliant, but no longer five-star. They will need to ask themselves if their assessment criteria emphasise process rather than outcome. On the other hand, once real-time automated data checking becomes possible, periodic manual sampling will seem inadequate. The bar on compliance could inexorably rise as compliance becomes faster and cheaper. The reliability and explainability of the regulated entities' processes will also matter.

So you probably will comply using the AI, and you will certainly want to, given the payoff of freeing up time for other things. Key questions for Australia's future technology adoption and productivity growth are: what other issues does it raise, and will the various regulators agree to the change?

Additional country disclosures:

Australia: Westpac holds an Australian Financial Services Licence (No. 233714). You can access Westpac's Financial Services Guide [here](#) or request a copy from your Westpac point of contact. To the extent that this information contains any general advice, it has been prepared without taking into account your objectives, financial situation or needs and before acting on it you should consider the

appropriateness of the advice.

New Zealand: In New Zealand, Westpac Institutional Bank refers to the brand under which products and services are provided by either Westpac (NZ division) or Westpac New Zealand Limited (company number 1763882), the New Zealand incorporated subsidiary of Westpac ("WNZL"). Any product or service made available by WNZL does not represent an offer from Westpac or any of its subsidiaries (other than WNZL). Neither Westpac nor its other subsidiaries guarantee or otherwise support the performance of WNZL in respect of any such product. WNZL is not an authorised deposit-taking institution for the purposes of Australian prudential standards. The current disclosure statements for the New Zealand branch of Westpac and WNZL can be obtained at the internet address www.westpac.co.nz.

Singapore: This material has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (as defined in the applicable Singapore laws and regulations) only. Recipients of this material in Singapore should contact Westpac Singapore Branch in respect of any matters arising from, or in connection with, this material. Westpac Singapore Branch holds a wholesale banking licence and is subject to supervision by the Monetary Authority of Singapore.

Fiji: Unless otherwise specified, the products and services for Westpac Fiji are available from www.westpac.com.fj © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia and registered as a branch in Fiji. The liability of its members is limited.

Papua New Guinea: Unless otherwise specified, the products and services for Westpac PNG are available from www.westpac.com.pg © Westpac Banking Corporation ABN 33 007 457 141. This information does not take your personal circumstances into account and before acting on it you should consider the appropriateness of the information for your financial situation. Westpac Banking Corporation ABN 33 007 457 141 is incorporated in NSW Australia. Westpac is represented in Papua New Guinea by Westpac Bank - PNG - Limited. The liability of its members is limited.

U.S.: Westpac operates in the United States of America as a federally licensed branch, regulated by the Office of the Comptroller of the Currency. Westpac is also registered with the US Commodity Futures Trading Commission ("CFTC") as a Swap Dealer, but is neither registered as, or affiliated with, a Futures Commission Merchant registered with the US CFTC. The services and products referenced above are not insured by the Federal Deposit Insurance Corporation ("FDIC"). Westpac Capital Markets, LLC ('WCM'), a wholly-owned subsidiary of Westpac, is a broker-dealer registered under the U.S. Securities Exchange Act of 1934 ('the Exchange Act') and member of the Financial Industry Regulatory Authority ('FINRA'). In accordance with APRA's Prudential Standard 222 'Association with Related Entities', Westpac does not stand behind WCM other than as provided for in certain legal agreements between Westpac and WCM and obligations of WCM do not represent

liabilities of Westpac.

This communication is provided for distribution to U.S. institutional investors in reliance on the exemption from registration provided by Rule 15a-6 under the Exchange Act and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors in the United States. WCM is the U.S. distributor of this communication and accepts responsibility for the contents of this communication. Transactions by U.S. customers of any securities referenced herein should be effected through WCM. All disclaimers set out with respect to Westpac apply equally to WCM. If you would like to speak to someone regarding any security mentioned herein, please contact WCM on +1 212 389 1269. Investing in any non-U.S. securities or related financial instruments mentioned in this communication may present certain risks. The securities of non-U.S. issuers may not be registered with, or be subject to the regulations of, the SEC in the United States. Information on such non-U.S. securities or related financial instruments may be limited. Non-U.S. companies may not be subject to audit and reporting standards and regulatory requirements comparable to those in effect in the United States. The value of any investment or income from any securities or related derivative instruments denominated in a currency other than U.S. dollars is subject to exchange rate fluctuations that may have a positive or adverse effect on the value of or income from such securities or related derivative instruments.

The author of this communication is employed by Westpac and is not registered or qualified as a research analyst, representative, or associated person of WCM or any other U.S. broker-dealer under the rules of FINRA, any other U.S. self-regulatory organisation, or the laws, rules or regulations of any State. Unless otherwise specifically stated, the views expressed herein are solely those of the author and may differ from the information, views or analysis expressed by Westpac and/or its affiliates.

UK: The London branch of Westpac is authorised in the United Kingdom by the Prudential Regulation Authority (PRA) and is subject to regulation by the Financial Conduct Authority (FCA) and limited regulation by the PRA (Financial Services Register number: 124586). The London branch of Westpac is registered at Companies House as a branch established in the United Kingdom (Branch No. BR000106). Details about the extent of the regulation of Westpac's London branch by the PRA are available from us on request.

This communication is not being made to or distributed to, and must not be passed on to, the general public in the United Kingdom. Rather, this communication is being made only to and is directed at (a) those persons falling within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) those persons falling within the definition of high net worth companies, unincorporated associations etc. (set out in Article 49(2) of the Order; (c) other persons to whom it may lawfully be communicated in accordance with the Order or (d) any persons to whom it may otherwise lawfully be made (all such persons together being referred to as "relevant persons"). Any person who is not a relevant person should not act or rely on this communication or any of its contents. In the same way, the information contained in this communication is intended for "eligible counterparties" and

“professional clients” as defined by the rules of the Financial Conduct Authority and is not intended for “retail clients”. Westpac expressly prohibits you from passing on the information in this communication to any third party.

European Economic Area (“EEA”): This material may be distributed to you by either: (i) Westpac directly, or (ii) Westpac Europe GmbH (“WEG”) under a sub-licensing arrangement. WEG has not edited or otherwise modified the content of this material. WEG is authorised in Germany by the Federal Financial Supervision Authority (‘BaFin’) and subject to its regulation. WEG’s supervisory authorities are BaFin and the German Federal Bank (‘Deutsche Bundesbank’). WEG is registered with the commercial register (‘Handelsregister’) of the local court of Frankfurt am Main under registration number HRB 118483. In accordance with APRA’s Prudential Standard 222 ‘Association with Related Entities’, Westpac does not stand behind WEG other than as provided for in certain legal agreements (a risk transfer, sub-participation and collateral agreement) between Westpac and WEG and obligations of WEG do not represent liabilities of Westpac. Any product or service made available by WEG does not represent an offer from Westpac or any of its subsidiaries (other than WEG). All disclaimers set out with respect to Westpac apply equally to WEG.

This communication is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to local law or regulation.

This communication contains general commentary, research, and market colour. The communication does not constitute investment advice. The material may contain an ‘investment recommendation’ and/or ‘information recommending or suggesting an investment’, both as defined in Regulation (EU) No 596/2014 (including as applicable in the United Kingdom) (“MAR”). In accordance with the relevant provisions of MAR, reasonable care has been taken to ensure that the material has been objectively presented and that interests or conflicts of interest of the sender concerning the financial instruments to which that information relates have been disclosed.

Investment recommendations must be read alongside the specific disclosure which accompanies them and the general disclosure which can be found [here](#). Such disclosure fulfils certain additional information requirements of MAR and associated delegated legislation and by accepting this communication you acknowledge that you are aware of the existence of such additional disclosure and its contents.

To the extent this communication comprises an investment recommendation it is classified as non-independent research. It has not been prepared in accordance with legal requirements designed to promote the independence of investment research and therefore constitutes a marketing communication. Further, this communication is not subject to any prohibition on dealing ahead of the dissemination of investment research.
