The **Westpac-DataX Card Tracker Index*** softened slightly in the first three weeks of March, dipping 0.4pts to 153.6 as at the week ending March 21.

Quarterly momentum has been mixed, the last two weeks showing a lift back to 1.9%qtr, up from 1% in late February, but with growth rates affected by the weak reads just prior to Christmas, which are now in the base for comparisons. The quarterly growth rate is likely to settle back into the 1-1.5%qtr range as this noise drops out, well below the 2-2.5% pace seen through much 2025 H2.

Monthly growth momentum is much softer, having slowed into the 0-0.5% range since February. Moreover, all of the gains over the last four weeks have come from a sharp rise in fuel spend, up 8.2% compared to the previous four weeks. Non-fuel card activity dipped slightly, by 0.2%, over the same period.

The surge in fuel reflects sharply higher prices and volumes. In seasonally adjusted terms, the first two weeks of March saw the highest number of card transactions across the 'operation of motor vehicles' sub-category since the data began in 2019, the average transaction value up 7.9% vs February.

The softening in non-fuel card activity has centred on discretionary services, led by accommodation and recreational services but with a notable weakening in international transactions as well. Notably, there have been no real signs of weakness around discretionary goods with card activity in this segment over the last four weeks up 1% vs the previous four weeks, durables up closer to 2%.

State-wise, the rise in fuel spend looks to have been slightly more pronounced in Qld and slightly less so in Vic and SA. For total card activity, the quarterly growth pulse remains firmer in Tas, WA, SA and Qld and noticeably slower in Vic.

Overall, with available card data now covering over 85% of Q1, the quarter looks to be tracking a 1-1.5%qtr rise in nominal card activity. While that is likely to be only marginally firmer than the Q1 CPI gain (due to be released on April 29), the total spending measure in the Q1 national accounts will see a positive effect from the end of electricity rebates.
