2Q26 OPM Miss on Freight Costs; Sales Acceleration and Margin Recovery Intact

CITI'S TAKE

Nien Made's 2Q26 earnings missed expectation, mainly due to elevated freight expenses and a higher effective tax rate, while its record GPM and improving July-26 sales momentum remained encouraging. We view soft OPM as transitory as freight costs should ease alongside lower oil prices, while accelerating sales growth should provide better op leverage in 2H26E. We lower our 26-28E EPS by 5-9% mainly reflecting higher freight expenses and opex assumptions and slightly trim our TP to NT\$450 (18x NTM P/E). We remain positive on Nien Made, supported by its record GPM, strengthening sales trajectory and intact 2H margin recovery.

2Q26 record GPM but high freight costs weigh on OPM — NM reported 2Q26 sales of NT\$7.9bn, up 3% y/y but 4% below our forecast. EU was the key growth driver, with sales rising >16% y/y led by strong momentum in Belgium and Denmark, while the US remained soft amid macro uncertainty. GPM reached a record 60.0% up 70 bps y/y, supported by mix upgrade, and pricing increases on custom products. However, OPM declined 380bps y/y to 27.2% owing to higher freight expenses (we estimate c.200bps negative impact). Net profit rose 21% y/y to NT\$1.4bn, missing our/BBG forecast by 29%/23%, also reflecting a higher effective tax rate.

2H26E sales growth set to accelerate — July-26 sales of NT\$3.0bn increased 16% y/y, supported by strong growth in both US and EU, pointing to a visible acceleration entering 2H26E. Mgmt expects US sales to grow at a MSD y/y for FY26. Given that the US sales declined y/y in 1H26, this guidance implies a meaningful rebound during 2H26. Europe should remain another growth engine, supported by continued strength in Belgium and Denmark. For international markets outside NA, mgmt. expects HSD y/y growth with Japan and Australia also offering incremental momentum.

Growth incentive program to reinforce retail partnership — Starting in July-26, NM introduced a growth incentive program under which part of the tariff burden will be refunded to their retail partners, helping strengthen long-term customer relationship and reinforce NM's channel position. Separately, the company expects to receive tariff rebound of c.NT\$300mn from the US government, which should help boost EPS in 2H26E. (continued)

Implications — We trim our 2026-28E earnings estimates by 5-9%, mainly reflecting higher freight costs and opex assumptions. We slightly cut our TP to NT\$450 from NT\$460, based on 18x 2H26-1H27E EPS, which we roll forward from 2026E. Despite the earnings cuts, we remain positive on Nien Made and view 2Q OPM miss as a transitory setback. With oil prices retreating, freight expenses likely normalizing and sales growth accelerating, we expect op leverage to improve and margin recovery to resume in 2H26E.

Nien Made

Company description

Headquartered in Taichung, Taiwan, Nien Made is a leading global window-covering provider, selling various blinds, shutters, shades and curtains in the US, Europe and other countries. Nien Made provides both custom-made window products (71% of sales in 2025) under its own brand “Norman” and “VENETA” and ready-made products (21% of sales in 2025), selling to big-box retailers.

Investment strategy

We rate Nien Made shares as Buy. Our investment thesis is based on: 1) the company's ongoing share gains in custom made market in the US thanks to a more favorable competition landscape with major peer facing financial issue. 2) The price hike of custom made products this year is able to mitigate the tariff impact and potentially drive further margin/earnings upsides. 3) Valuation looks attractive to us as the share is trading at a discount to its historical average while core business remains solid.

Valuation

Our target price of NT\$450 is based on 18x 2H26-1H27E EPS, on par with its historical average since 2016.

Risks

Downside risks that could impede the Nien Made stock from reaching our target price include: 1) A higher than expected Fed fund rate resulting in higher mortgage rates; 2) a weaker than expected US housing market due to a deteriorating macro environment; 3) a strong rise in raw-material prices; 4) a sharp USD depreciation against the TWD; and 4) market-share loss.

Guide to Citi Research Fundamental Research Investment Ratings:

Citi Research stock recommendations include an investment rating and an optional risk rating to highlight high risk stocks.

Risk rating takes into account both price volatility and fundamental criteria. Stocks will either have no risk rating or a High risk rating assigned.

Investment Ratings: Citi Research investment ratings are Buy, Neutral and Sell. Our ratings are a function of analyst expectations of expected total return ("ETR") and risk. ETR is the sum of the forecast price appreciation (or depreciation) plus the dividend yield for a stock within the next 12 months. The target price is based on a 12 month time horizon. The Investment rating definitions are: Buy (1) ETR of 15% or more or 25% or more for High risk stocks; and Sell (3) for negative ETR. Any covered stock not assigned a Buy or a Sell is a Neutral (2). For stocks rated Neutral (2), if an analyst believes that there are insufficient valuation drivers and/or investment catalysts to derive a positive or negative investment view, they may elect with the approval of Citi Research management not to assign a target price and, thus, not derive an ETR. Citi Research may suspend its rating and target price and assign "Rating Suspended" status for regulatory and/or internal policy reasons. Citi Research may also suspend its rating and target price and assign "Under Review" status for other exceptional circumstances (e.g. lack of information critical to the analyst's thesis, trading suspension) affecting the company and/or trading in the company's securities. In both such situations, the rating and target price will show as "—" and "—" respectively in the rating history price chart. Prior to 11 April 2022 Citi Research assigned "Under Review" status to both situations and prior to 11 Nov 2020 only in exceptional circumstances. As soon as practically possible, the analyst will publish a note re-establishing a rating and investment thesis. Investment ratings are determined by the ranges described above at the time of initiation of coverage, a change in investment and/or risk rating, or a change in target price (subject to limited management discretion). At times, the expected total returns may fall outside of these ranges because of market price movements and/or other short-term volatility or trading patterns. Such interim deviations will be permitted but will become subject to review by Research Management. Your decision to buy or sell a security should be based upon your personal investment objectives and should be made only after evaluating the stock's expected performance and risk.

Catalyst Watch/Short Term Views ("STV") Ratings Disclosure:

Catalyst Watch and STV Upside/Downside calls: Citi Research may also include a Catalyst Watch or STV Upside or Downside call to indicate the analyst expects the share price to rise (fall) in absolute terms over a specified period of 30 or 90 days in reaction to one or more specific near-term catalysts or events impacting the company or the market. A Catalyst Watch will be published when Analyst confidence is high that an impact to share price will occur; it will be a STV when confidence level is moderate. A Catalyst Watch or STV Upside/Downside call will automatically expire at the end of the specified 30/90 day period. The Catalyst Watch will also be automatically removed if share price performance (calculated at market close) exceeds 15% against the direction of the call (unless over-ridden by the analyst). The analyst may also remove a Catalyst Watch or STV call prior to the end of the specified period in a published research note. A Catalyst Watch/STV Upside or Downside call may be different from and does not affect a stock's fundamental equity rating, which reflects a longer-term total absolute return expectation. For purposes of FINRA ratings-distribution-disclosure rules, a Catalyst Watch/STV Upside call corresponds to a buy recommendation and a Catalyst Watch/STV Downside call corresponds to a sell recommendation. Any stock not assigned to a Catalyst Watch Upside, Catalyst Watch Downside, STV Upside, or STV Downside call is considered Catalyst Watch/STV No View. For purposes of FINRA ratings distribution-disclosure rules, we correspond Catalyst Watch/STV No View to Hold in our ratings distribution table for our Catalyst Watch/STV Upside/Downside rating system. However, we reiterate that we do not consider No View to be a recommendation. For all Catalyst Watch/STV Upside/Downside calls, risk exists that the catalyst(s) and associated share-price movement will not materialize as expected.

Citi Research broadly and simultaneously disseminates its research content to the Firm's institutional and retail clients via the Firm's proprietary electronic distribution platforms (e.g., Citi Velocity and various Global Wealth platforms). As a convenience, certain, but not all, research content may be distributed through third party aggregators. Clients may receive published research reports by email, on a discretionary basis, and only after such research content has been broadly disseminated. Certain research is made available only to institutional investors to satisfy regulatory requirements. The level and types of services provided by Citi Research analysts to clients may vary depending on various factors such as the client's individual preferences as to the frequency and manner of receiving communications from analysts, the client's risk profile and investment focus and perspective (e.g. market-wide, sector specific, long term, short-term etc.), the size and scope of the overall client relationship with the Firm and legal and regulatory constraints.

Pursuant to Comissão de Valores Mobiliários Resolução 20 and ASIC Regulatory Guide 264, Citi is required to disclose whether a Citi related company or business has a commercial relationship with the subject company. Considering that Citi operates multiple businesses in more than 100 countries around the world, it is likely that Citi has a commercial relationship with the subject company.

Securities recommended, offered, or sold by the Firm: (i) are not insured by the Federal Deposit Insurance Corporation; (ii) are not deposits or other obligations of any insured depository institution (including Citibank); and (iii) are subject to investment risks, including the possible loss of the principal amount invested. The Product is for informational purposes only and is not intended as an offer or solicitation for the purchase or sale of a security. Any decision to purchase securities mentioned in the Product must take into account existing public information on such security or any registered prospectus. Although information has been obtained from and is based upon sources that the Firm believes to be reliable, we do not guarantee its accuracy and it may be incomplete and condensed. Note, however, that the Firm has taken all reasonable steps to determine the accuracy and completeness of the disclosures made in the Important Disclosures section of the Product. The Firm's research department has received assistance from the subject company(ies) referred to in this Product including, but not limited to, discussions with management of the subject company(ies). Firm policy prohibits research analysts from sending draft research to subject companies. However, it should be presumed that the author of the Product has had discussions with the subject company to ensure factual accuracy prior to publication. Statements and views concerning ESG (environmental, social, governance) factors are typically based upon public statements made by the affected company or other public news, which the author may not have independently verified. ESG factors are one consideration that investors may choose to examine when making investment decisions. All opinions, projections and estimates constitute the judgment of the author as of the date of the Product and these, plus any other information contained in the Product, are subject to change without notice. Prices and availability of financial instruments also are subject to change without notice. Notwithstanding other departments within the Firm advising the companies discussed in this Product, information obtained in such role is not used in the preparation of the Product. Although Citi Research does not set a predetermined frequency for publication, if the Product is a fundamental equity or credit research report, it is the intention of Citi Research to provide research coverage of the covered issuers, including in response to news affecting the issuer. For non-fundamental research reports, Citi Research may not provide regular updates to the views, recommendations and facts included in the reports. Notwithstanding that Citi Research maintains coverage on, makes recommendations concerning or discusses issuers, Citi Research may be periodically restricted from referencing certain issuers due to legal or policy reasons. Where a component of a published trade idea is subject to a restriction, the trade idea will be removed from any list of open trade ideas included in the Product. Upon the lifting of the restriction, the trade idea will either be re-instated in the open trade ideas list if the analyst continues to support it or it will be officially closed. Citi Research may provide different research products and services to different classes of customers (for example, based upon long-term or short-term investment horizons) that may lead to differing conclusions or recommendations that could impact the price of a security contrary to the recommendations in the alternative research product, provided that each is consistent with the rating system for each respective product.

Investing in non-U.S. securities, including ADRs, may entail certain risks. The securities of non-U.S. issuers may not be registered with, nor be subject to the reporting requirements of the U.S. Securities and Exchange Commission. There may be limited information available on foreign securities. Foreign companies are generally not subject to uniform audit and reporting standards, practices and requirements comparable to those in the U.S. Securities of some foreign companies may be less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, exchange rate movements may have an adverse effect on the value of an investment in a foreign stock and its corresponding dividend payment for U.S. investors. Net dividends to ADR investors are estimated, using withholding tax rates conventions, deemed accurate, but investors are urged to consult their tax advisor for exact dividend computations. Investors who have received the Product from the Firm may be prohibited in certain states or other jurisdictions from purchasing securities mentioned in the Product from the Firm.
