

Gold Circuit

2Q26 lighter GM/OPM; still intact sales/GM growth from 3Q26; new PO NT\$1,500, Buy

Reiterate Rating: BUY | PO: 1,500 TWD | Price: 964.00 TWD

Lighter GM/OPM in 2Q: higher material/depreciation costs

Gold Circuit's (GCE) 2Q26 OP was 3% above BofAe but 2% below consensus. GM/OPM of 34.7%/26.4% came in below BofAe of 35.8%/27.4% and consensus of 36.0%/28.1%. We believe the margin outcome reflected larger sales scale (+26% QoQ, +75% YoY; 7%/5% above BofAe/consensus), still favorable mix (server/networking accounted for 78%/15% of 2Q26 sales, vs. 72%/20% in 1Q26 and 74%/13% in 2Q25), and higher material/depreciation costs. NP was 13%/8% above BofAe/consensus (Exhibit 3), thanks to a lower tax rate, despite a non-operating loss (details to be disclosed),

Still intact sales/GM growth from 3Q but HDI likely for T4

We now expect 3Q/4Q26 sales +28%/+1% QoQ (taking 2026E sales +77% YoY) and 2027/28E sales +37%/+26% YoY, driven by new ASIC platform launches, ASP growth from server spec upgrades, and ongoing capacity expansion in Taiwan/Thailand/China. We also expect GM to increase QoQ from 3Q26 as higher material costs are passed through. Looking ahead to AWS Trainium 4 generation, we believe GCE will remain a key AWS supplier. However, our latest check suggests that HDI technology will likely be used for Trainium 4, vs. GCE's current focus on multi-layer board products. We thus adopt more conservative GM assumptions to reflect 1) potentially higher upfront/production costs to make HDI boards and 2) higher depreciation costs from building more new sites.

Lower PO to NT\$1,500 but reiterate Buy

We lift 2026-28E EPS by 6-9% mainly to reflect 2Q26 results, still solid sales/margin growth riding on the AI upcycle, and a lower tax rate (29% guidance vs. 32% earlier). We trim PO to NT\$1,500 (25x 2027E EPS) from NT\$1,810 (32x 2027E EPS), reflecting an unchanged valuation base but lower P/E multiple. We use 25x (2.5SD above P/E average since 2020, vs. prior 32x historical high) on slow margin expansion pace. Nevertheless, we continue to like GCE as a top ASIC server PCB maker amid strong AI demand, all-time focus on high-end AI server/networking PCBs, expanding margins. Reiterate Buy.

Company Description

Gold Circuit (GCE) is a PCB company in Taiwan with high exposure in server (74% of 2025 sales) and networking (15%). Key end-clients are global CSPs and US top networking/telecom names. Besides its headquarters, the company has production sites in Taoyuan (Taiwan), Suzhou (China), Jiangsu (China), and Thailand, with ongoing capacity expansion. GCE was established in 1981 and listed on the Taiwan stock market in March 1998.

Investment Rationale

We have a Buy rating on Gold Circuit, given (1) its high exposure and focus on better-margin server/networking business amid rising AI applications globally to keep high ASP/margin, (2) strong competitive advantages and high entry barrier as focusing on high-end products, (3) higher production flexibility after adding capacity in Thailand, (4) positive FCF/OCF since 2007/2019, respectively, with an improving balance sheet (from net debt to net cash) and expanding ROE.

Gold Circuit (GOCCF)

Our PO of NT\$1,500 is based on 25x 2027E EPS. Our 25x valuation multiple (2.5SD above historical average since 2020 when 50%+ of sales from server) is similar to the average of its closest AI PCB peers' P/E multiple targets we set given (1) strong AI PCB market demand, (2) GCE's high AI server exposure, (3) solid sales mix from better-margin server/networking business, and (4) ongoing margin expansion to historical high level.

Upside risks: (1) stronger server/networking market demand to drive ASP/margins, (2) better utilization rate, (3) faster capacity expansion in Thailand, (4) lower raw material/labor/logistics costs, and (5) favorable FX movement.

Downside risks: (1) ASIC platform delay, (2) weaker market demand amid inflation/macro uncertainties, (3) softer AI server demand due to AI chip short supply, (4) GM pressure from lower utilization rate, higher raw material/labor/logistics costs, and (5) unfavorable FX movement.

Equity Investment Rating Distribution: Global Group (as of 30 Jun 2026)

Coverage Universe	Count	Percent	Inv. Banking Relationships ^{R1}	Count	Percent
Buy	1987	56.11%	Buy	1190	59.89%
Hold	797	22.51%	Hold	496	62.23%
Sell	757	21.38%	Sell	391	51.65%

^{R1} Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. VOLATILITY RISK RATINGS, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. INVESTMENT RATINGS reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R2}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R2} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. Coverage Cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Price Charts for the securities referenced in this research report are available on the [Price Charts website](#), or call 1-800-MERRILL to have them mailed. In the US, retail sales and/or distribution of this report may be made only in states where these securities are exempt from registration or have been qualified for sale: Gold Circuit. The country in which this issuer is organized has certain laws or regulations that limit or restrict ownership of the issuer's shares by nationals of other countries: Gold Circuit. BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

From time to time research analysts conduct site visits of covered issuers. BofA Global Research policies prohibit research analysts from accepting payment or reimbursement for travel

expenses from the issuer for such visits.

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may

be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

You should therefore assume that BofA Securities will not update any fact, circumstance or opinion contained herein.

Subject to the quiet period applicable under laws of the various jurisdictions in which we distribute research reports and other legal and BofA Securities policy-related restrictions on the publication of research reports, fundamental equity reports are produced on a regular basis as necessary to keep the investment recommendation current.

Certain outstanding reports or investment opinions relating to securities, financial instruments and/or issuers may no longer be current. Always refer to the most recent research report relating to an issuer prior to making an investment decision.

In some cases, an issuer may be classified as Restricted or may be Under Review or Extended Review. In each case, investors should consider any investment opinion relating to such issuer (or its security and/or financial instruments) to be suspended or withdrawn and should not rely on the analyses and investment opinion(s) pertaining to such issuer (or its securities and/or financial instruments) nor should the analyses or opinion(s) be considered a solicitation of any kind. Sales persons and financial advisors affiliated with BofAS or any of its affiliates may not solicit purchases of securities or financial instruments that are Restricted or Under Review and may only solicit securities under Extended Review in accordance with firm policies.

Neither BofA Securities nor any officer or employee of BofA Securities accepts any liability whatsoever for any direct, indirect or consequential damages or losses arising from any use of this information.
