2Q26 beat on better opex control

MPI reported its 2Q26 preliminary results (see Exhibit 1) on 12 Aug. 2Q26 GM of 58.4% (59.4% 1Q26) came in slightly higher vs. GSe of 57.9%, but inline with cons. of 58.5%. Meanwhile, 2Q26 OpM of 34.4% exceeded both GSe/cons. of 32.1%/32.9%, driven by better cost control and stronger operating leverage. Overall, 2Q26 EPS of NT\$15.55 came in above GSe and cons. by 7-10%. To note, the company will host an in-person analyst meeting on 14 Aug at 2pm Taiwan time.

Set for GM improvement into 3Q26 and 4Q26

Looking into 2H26, management now guides for 3Q26 revenue growth of 0-5% QoQ, followed by a 5-10% QoQ increase in 4Q26. We believe the sequential growth into 4Q26 should still be largely driven by the continued AI/HPC demand across both VPC and MEMS. To note, we expect MPI's new US CPU customer could start to ramp in 4Q26. On the margin front, management expects GM to recover toward 1Q26 levels in 3Q26, driven by a more favorable product mix and price hikes (which happened in 2Q26, with positive effect contributing starting 3Q26), and 4Q26 GM is also now guided to be flat QoQ, but does not exclude the possibility for potential upside from new customer ramp and higher utilization rates.

Meanwhile, management maintained its view that the 2026 opex ratio should remain within 25-27%, while expecting further operating leverage in 2027 despite continued investments in R&D and labor with capacity expansion. Overall, we now model **3Q26E/4Q26E revenue growth of 10.7%/14.3% QoQ, with GM of 59.8%/60.4%.**

Multiple growth drivers into 2027

We expect MPI to deliver a strong revenue growth outlook with

continuous margin expansion into 2027E driven by **1) strong growth outlook from AI ASIC/networking customers with continuous TAM expansion, 2) significant market share gain within new US CPU customer, with the new customer potentially becoming the largest single customer in 2027, 3) the ramp of in-house PCB production in 3Q27, which could help lower its outsourcing ratio to 50% and help improve its profitability, 4) potential further price hike, and 5) emerging CPO opportunities. We now expect its revenue to grow by 105% YoY (vs. 61% YoY in 2026E) with GM improving to 62.2% (vs. 59.6% in 2026E) in 2027E.**

CPO progressing well but qualification takes time

In terms of the progress on CPO, MPI's equipment for Insertion 3 are expected to begin engineering-sample shipments by around 10 units in 4Q26 to multiple customers spanning OSAT, foundry, and fabless clients. As for Insertion 2, MPI has completed on-site qualification and is now shipping to clients' overseas production sites to do qualification. Overall, we remain optimistic that CPO will become the standard for next-generation AI networking, and **we now model MPI's CPO-related business to potentially contribute mid single digit % and high single digit % of its total revenue in 2027E/2028E** (vs. high single digit % and low teens % previously).

Earnings changes, valuation and risks

Forecast changes

We revise down our 2026E EPS by -1.5% as to factor in management's updated revenue growth guidance for 2H26, which came in lower vs. our prior forecasts. For 2027E-2028E, we revise up EPS by 4.1%/6.2% mainly as to reflect our view of the stronger new US customer contribution, and better operating leverage as revenue further scales up.

Maintain Buy with TP raised to NT\$8,500 from NT\$8,000

Following our upward earnings revisions, we raise our 12-month TP to NT\$8,500 (from NT\$8,000 previously). Our 12-month TP is based on a 40x 2028E discounted P/E (unchanged). We apply this to our 2028E EPS, and discount it back to 2027E at a 12.4% CoE to arrive at our TP of NT\$8,000. Our key assumptions for CoE include: (1) 1.3x beta (sourcing Bloomberg), (2) a 4.25% risk-free rate (inline with GS house-view), and (3) a market risk premium of 6.25% (in line with our GS house view). This is also inline with our WinWay valuation methodology. Overall, our new TP implies c.29% upside from the current share price, and we maintain our Buy rating on MPI.

Investment Thesis, Price Target Risks and Methodology

Investment Thesis – MPI (6223.TWO)

MPI is a leading Taiwan-based probe card provider specializing in CPC (Cantilever Probe Card), VPC (Vertical Probe Card), and MEMS (Micro-Electro-Mechanical Systems) Probe Card, which are used in the chip probe (CP) stage. The company is the 4th largest probe card supplier with c.7% market share (2024), and 57% of its total revenue comes from the probe card segment.

We like MPI as we expect its revenue/earnings CAGR to further accelerate to 69%/95% in 2025–28E, driven by 1) continued share gain in vertical probe card (VPC) market via AI ASIC, and 2) potential share gain in MEMS probe card market through penetration into new both AI and non-AI customers, along with AI ASIC upgrade. MPI is also aiming to increase its PCB self-sufficiency to enable shorter product delivery lead time, which would provide it with more advantages over peers. The company is now trading above its average AI cycle forward P/E; however, with increasing ASP thanks to rising chip complexity and shorter product cadence driving frequent probe card upgrade demand, we continue to see upside potential to its revenue and earnings growth. We have a Buy rating on the name.

Price Target Risks and Methodology – MPI (6223.TWO)

Valuation: We are Buy rated on MPI. Our 12-month TP of NT\$8,500 is based on a target P/E of 40x (1.7x of 3-year average forward P/E) applied to our 2028E EPS, and discounted back to 2027E at 12.4% CoE. Our key assumptions for CoE include: (1) 1.3x beta (sourcing Bloomberg), (2) a 4.25% risk-free rate, and (3) a market risk premium at 6.25% (in line with GS house view).

Key risks to our views: 1) softer AI/HPC demand, 2) slower penetration into new TAM, and 3) intensifying competition.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at <https://www.gs.com/research/hedge.html>.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (<https://www.sipc.org>).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at <https://www.theocc.com/about/publications/character-risks.jsp> and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites.
