### 3Q26 result overview

ITEQ' 3Q26 core business (OPI) was 83/31% above our estimates/consensus as GM was 10.6/5.8ppt higher than GSe/consensus. We believe the higher than expected GM expansion this quarter (+12.3ppt QoQ, +20.6ppt YoY) was mainly driven by the higher-than-expected price hike on its low-end CCL products (M6 grade CCL and below).

For earnings, ITEQ 3Q26 EPS was 123%/38% higher than GSe/BBG consensus on the solid GM expansion.

### Valuation

We maintain our Sell rating with a 12m TP of NT$134, based on 13.5x 4Q26-3Q27E P/E, which is +0.5x STDV lower than past 10-year average valuation.

## Investment Thesis & PT methodology and risks

ITEQ is a key high-end CCL player, mainly focused on the server market (15-20% global share as of 2024). While we are positive on its long-term outlook given promising growth in the server CCL and automotive high-speed CCL markets, we continue to see a weaker than peer revenue/profitability outlook, considering the company's lagging technology. Further, we believe the mid- to low-end CCL market oversupply issue will continue in the coming years, weighing on ITEQ's profitability in the foreseeable future. Meanwhile, the company is trading at a 2026E P/E that is much higher than the average peak valuation and Taiwan peers. We are Sell rated on the stock. Key upside risks: (1) stronger-than-expected demand from server/switch segments in the coming years; (2) stronger-than-expected CCL pricing hikes in the coming quarters without component cost increases; and (3) stronger-than-expected 5G BTS demand globally in the coming quarters.

**Valuation methodology:** Our 12m TP of NT$134 is based on a 4Q26E-3Q27E P/E multiple of 13.5x (-0.5x s.d. lower than past 10-year average valuation).

**Key upside risks:** (1) stronger-than-expected demand from server/switch segments in the coming years; (2) stronger-than-expected CCL pricing hikes in the coming quarters without component cost increases; and (3) stronger-than-expected 5G BTS demand globally in the coming quarters.

## GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

**Growth** is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

## M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

## Ratings, coverage universe and related definitions

**Buy (B), Neutral (N), Sell (S)** Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

**Total return potential** represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

**Coverage Universe:** A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

**Not Rated (NR).** The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that

has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.
