Fositek reported 3Q26 results on November 3rd. 3Q OP was in line with our estimates, but was 3% higher than BBG consensus. OPM was 32.4% in 3Q26, which was 7.2/1.3ppt higher than our estimates/BBG consensus. GM of 38.0% was higher than our estimates/BBG consensus by 6.4/1.5ppt on better product mix (server accounted for 81% of total revenue in 3Q26 vs. 55% in 2Q26). Total revenue was 22/1% lower than GSe/consensus.

Going into 4Q26, we expect revenue to reach NT$5,305mn (+18% QoQ, +33% YoY), as we expect the solid YoY will be mainly driven by the server business, along with the ramp up of Vera Rubin with overall QD usage that is 25%+ higher than GB300. We expect GM to continue to expand to 39.1% (+1.1ppt QoQ and +10.1ppt YoY). We continue to see the company's revenue and GM to expand on the increasing contribution from the high margin QD products (with GM ~40% per GSe).

Overall, we maintain our Buy rating on Fositek with a new 12-m TP of NT$2,390 (from NT$2,082).

Investment view

We are positive on Fositek's positioning to capitalize on the increasing penetration of liquid cooling for AI servers. We believe Fositek will continue to benefit from the ramp up of Vera Rubin in 2H26, with total QD usage increase by 25%+ comparing to GB300, while the company will extend its QD offerings into the compute tray. Furthermore, the company will also ramp up QD offerings for its key ASIC clients, with volume to accelerate in 4Q26. The company will continue to see contribution from new ASIC clients going into 2027E. Moreover, the company has expanded its QD capacity to reach 4.5mn units/month currently (50% increase from 3.0mn units/month last quarter), with its time to market capacity expansion to capture the increasing demand across GPU/ASIC clients. We expect QD to be the key revenue/profitability driver going forward with its increasing content within AI servers as well as higher than average corporate GM (we expect 2028E GM will expand to 37.2% vs. 26.3% in 2025).

3Q26 overview

Fositek's 3Q26 core business profit was in line with GSe, while we saw higher-than-expected GM expansion (3Q26 GM at 38.0% vs. GSe of 31.7%) while opex is lower than our expectation (at NT$252mn vs. GSe of NT$376mn). Total revenue is 22/1% below GSe/consensus.

Earnings revision:

We revise up our 2026 earnings estimates by 1% to factor in 3Q26 results (we revise down our 2026E revenue estimates by 18%). We revise up 2027/28E earnings estimates by 14%/23% to reflect a better product mix with higher contribution from the server business (we revise up our 2027/28E revenue estimates by 2/4%). We now expect the GM expansion to be faster due to the higher server business contribution, and thus revise up GPM by 5.3/3.1/4.4ppt in 2026/27/28E.

Investment thesis and Valuation & Risks

Fositek is a global leading hinges supplier, mainly for foldable smartphones (56% of 2025 revenues). We expect the company's foldable smartphone hinges revenues to show solid growth in 2026/27E driven by (1) rising foldable phone market penetration rate; (2) expanding customer base, from China smartphones to more global-tier smartphones; and (3) stabilized smartphone market demand, encouraging brand makers to launch new form factors to attract consumers. Competitive edges of Fositek lie in its strong innovation (e.g., hinges for rollable phones, wearable phones), in-house molding and automated production to secure precision, long experience to support fast delivery, and leading customer base with expansion (e.g., supplying Huawei since the first foldable phone back in 2019). We continue to see Fositek successfully entering the AI-related business, especially QD (quick disconnect) products for AI server liquid cooling. The company has the largest QD production capacity (4.5mn units/month) among Taiwanese thermal suppliers and will continue to expand if demand continues to accelerate. Furthermore, the company continues to make progress with its rail kit business, which will continue to break into AI servers (including both GPU servers and ASIC servers). Overall, we believe Fositek will successfully transition from a consumer-focused company to AI-focused company, with server-related business to contribute 94% of total revenue in 2028E (vs. 50% in 2025), and will see GM continue to expand to 37.2% in 2028E (vs. 26.3% in 2025).

Price Target Risks and Methodology - Fositek

Valuation methodology: Our 12m TP of NT$2,390 is based on a target 22.6x 2027 P/E, which is the company's average P/E since 2022. We consider this multiple appropriate given the increasing contribution from AI-related products (including QD and rail kits) could offset the potential weakness from its foldable smartphone business.

Key downside risks: (1) Slower-than-expected contribution from AI-related products, (2) slower-than-expected foldable phone penetration; and (3) Potential competition from more suppliers

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our universe of rated stocks) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Early-Stage Biotech, Coverage Suspended or Not Covered), is deemed Neutral. Each region manages Regional Conviction Lists, which are selected from Buy rated stocks on the respective region's Investment Lists and represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction Lists are managed by the Investment Review Committee or other designated committee in each respective region and do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) are removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Early-Stage Biotech (ES).** An investment rating and a target price are not assigned pursuant to Goldman Sachs policy when this company has neither a drug, treatment or medical device that has passed a Phase II clinical trial nor a license to distribute a post-Phase II drug, treatment or medical device. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an

investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by Global Investment Research. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees will from time to time have long or short positions in, act as principal in, make a market or act as liquidity provider in, and buy or sell, any securities, derivatives, or other financial instruments referred to in this research (including any financial instruments issued by the companies referred to herein), unless otherwise prohibited by regulation or Goldman Sachs policy.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.goldmansachs.com/disclosures/cftc_fcm_disclosures. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by Goldman Sachs Global Investment Research may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
