

Memo 寫完傳輸時間 3:10，各位就可看業務反應速度

1. 2Q26 營運成果：

- A. 美元營收 40.2B USD(+12.0%qq/+33.7%yy)，位於先前展望的 39.0-40.2B USD 區間上緣。新台幣營收 1.27 兆(+12.0%qq/+36.0%yy)，季增主要受惠於先進製程強勁需求。
- B. 毛利率 67.7%(+1.5pts qq)，高於先前展望的 65.5-67.5%，主要得益於成本改善以及較高的產能利用率，部分被海外工廠的負面效果所抵消。
- C. 營業利益率 60.3%(+2.2pts qq)，亦高於先前展望的 56.5-58.5%。other operating income 52.7 億，主要來自 2024/4/3 地震所得保險理賠金額。
- D. Non-OP 958.3 億 vs 1Q26 288.3 億/2Q25 296.1 億新台幣，主要來自處分& mark to market VIS (632 億)。
- E. Tax rate 18%，較上季增加，主要反映未分配盈餘課稅。
- F. EPS 27.25 元
- G. ROE 45.9% vs 1Q26 40.5%
- H. 晶圓出貨量 4336k (+3.9%qq/+16.6%yy)
- I. FX 31.6 vs 先前展望 31.7
- J. 晶圓製造營收製程別：advanced tech (7nm-) ~77% of wafer revenue
 - i. 2nm 開始貢獻營收

Wafer rev %	2Q25	1Q26	2Q26
0.15um+	3%	3%	3%
90nm-0.13um	3%	2%	2%
65nm	3%	4%	4%
40/45nm	3%	3%	2%
28nm	7%	7%	6%
16/20nm	7%	7%	6%
7nm	14%	13%	11%
5nm	33%	36%	33%
3nm	24%	25%	30%
2nm	0%	0%	3%

- K. 2Q26 技術平台別：
 - i. HPC 66% · +20%qq
 - ii. 智慧型手機 22% · -4%qq
 - iii. 物聯網 5% · +4%qq
 - iv. 車用電子 4% · +15%qq
 - v. 消費性電子 1% · +5%qq
 - vi. 其他 2% · +5%qq
- L. 2Q26 BS：

- i. CL 增加，是因為 85B AP +48B AL。
- ii. AR turnover day 29 vs 1Q26 26
- iii. 存貨金額 3855.3 億，DOI 87 vs 1Q26 80 /2Q25 76，增加主因 2nm 放量。
- iv. Capex 4,960 億新台幣 vs 1Q26 3,507 億。

2. 3Q26 outlook :

- A. 營收：44.6-45.8Bn USD (+12%QoQ/+37%YoY)。
- B. FX：32
- C. GM：65-67%
- D. OPM：56-58%

3. Key message :

- A. 2Q GM 增加 150bps QoQ，略高於預期主因成本改善、較高的 UTR，部分被海外廠商所抵銷。3Q26 GM GM 66%主因為 2nm 放量稀釋 3-4pts 影響，部分被非常強勁的先進製程需求、持本改善(生產效率提升、生產優化)所抵銷。
- B. 2H26+ put and take
 - i. 2nm 快速放量稀釋 GM 3-4pts。
 - ii. 海外擴產，預期 GM 稀釋狀況在未來幾年 2-3pts/3-4pts。
 - iii. 先進製程需求非常強勁，公司積極產出 wafer 並優化廠區生產。
- C. 2026 capital budget
 - i. Agentic AI-提升 2026 capex 60-64Bn USD。
 - ii. 不預期任何的產能擴充瓶頸。
 - iii. Allocate：70-80%用於先進製程、10%特殊製程、10-20%用於先進封裝測試光罩及其他。
 - iv. 持續現金股利的成長在 2027 年。

4. CC Wei

- A. 短期需求狀況：2Q26 營收 USD 40.2B，在先前展望上緣，主因先進製程需求強勁。3Q26 營收受先進製程之城，包含 2nm ramp up，未來預期消費性、價格敏感性受挑戰，總經受挑戰。因此公司審慎做未來計畫，強化公司競爭地位。
- B. AI 相關需求穩健(robust)，需要更多算力，帶來先進製程 wafer 需求增加。公司的客戶、客戶的客戶(csp)仍有非常強的展望。因此公司對多年的 AI trend 仍高，公司預期全年 2026 營收略高於 40%YoY in USD。
- C. Agentic AI：AI 市場動態，帶來 CPU in DC 帶來 more silicon demand in AI 加速晶片，對於 TSMC 正向，不管哪種 CPU(x86/arm based. Risc5)都是公司客戶，公司跟 CPU 客戶合作緊密，以先進製程、必要的產能來支持他們。
- D. TSMC capacity expansion strategy :
 - i. Design in lead time、多年的客戶 production plan(5 年從設計到量產)，同時公司審慎規劃產能。
 - ii. 公司增加 capex 來支持客戶，支持 US customer、US fed sate，現在宣布要投資額外 100Bn USD 在 AZ for 2nm+支持當地客戶。未來規劃 13 台灣廠。
- E. 3nm capacity expansion
 - i. New Fab 1 in tW, 1 in Az, 1 in JP.

- ii. Convert 5nm to support 3nm in TW.
- iii. Capacity optimization across the node for n7/n5/n3.

F. Mature node

- i. Not change
- ii. 最重要的是支持客戶，公司持續增加成熟製程產能在高價值部分，透過 JASM P1 for CIS、ESMC in 德國。PMIC、CIS 以外的需求沒那麼強勁，因此公司持續投入高價、策略性產品來支持客戶。

G. A14 status

- i. 先進製程複雜度帶來 lead time 從設計到量產時間增加，現在要 5-7yr。
- ii. 2nd nanosheet node.
- iii. Vs N2 10-15 speed 25-30 power improve ~20% chip density gain.
- iv. Develop on track.
- v. Sp and hpc AI application.
- vi. RP in 2027. MP in 2028.

H. A13/A12 as extension of A14

- i. A13 6% die area saving, Design rule compatible with A14.
- ii. A12 w/ SPR.
- iii. MP in 2029.

QA

1. (Capex) beyond 2026 capex outlook? 3yr capex plan?

- A. No number, invest 2026 for future opportunity.
- B. Conviction in AI megatrend, step up capex include 2026.
- C. 未來三年會比過去三年強勁，更為強勁。

2. (AZ capex) additional AZ invest, schedule, timeframe?

- A. Schedule depend on market situation. Mega trend is strong so additional 100B
- B. Additional 4 more fab include BE.

3. (Competition) foundry competition are engaging, KR and Terafab, how do we see the competition?

- A. KR 對手投資一大筆錢，很嫉妒她。
- B. US 有非常強烈的政府支持，公司也有政府支持儘管沒有公告。
- C. There's no short cut→back to fundamental.
- D. Technology, manufacturing, customer trust are the most important things.
- E. Choosing a tech, ramp up is not buying a milk from 7-11. Need to understand the technology and work together, it takes 5 yrs. (明天買統一超?)

4. (Revised CAGR) AI semi CAGR revised? From 55-59%...?

- A. Continue to invest more with good reason.
- B. AI CAGR.. stronger and stronger and stronger bcz increasing today.

5. (AP tech. and competition) React to EMIB-T?

- A. Our pkg capacity is so tight that limit customer work.
 - B. Additional help TSMC FE wafer.
 - C. Technology look good, hope they will successful.
 - D. 現在很努力來填補需求跟產能之間的空缺
6. (AP tech. and competition) 如果你客戶要你幫忙 EMIB-T，說是有助於客戶的客戶，你會幫忙？
- A. 公司第一要務是讓客戶成功，只要能讓客戶成功，公司就會做。
7. (Expansion) how to plan and determine capacity plan?
- A. 每次想商業模式時都會考慮競爭，從 top down/ bottom up 去想，做很多調整，並告訴客戶、客戶的客戶 (CSPs)，考慮需求，做決策。
 - B. 是基於每個客戶都說實話的狀況下。
 - C. 因為所有客戶都很積極，那就是 CEO 的責任。
 - D. 公司審慎評估，52-56→60-64B 也是很多錢。
8. (things outside of chips) 公司出貨後客戶放存貨？
- A. 公司會看 Data Center 相關資料，確保公司的晶片不會被放到庫存。
 - B. 從現在到 2030 年，需求很強勁。趨勢很穩健。公司注意到有許多新的產業，AI industry 在日常生活中越來越多，影響到各個產業。
9. (Profitability) Foundry could be more value, L-T profitability ?
- A. 關鍵就是公司的晶圓價格、價格策略-公司把客戶當做 partner，客戶必須要成功，公司也是客戶可信賴的夥伴，所以不會突然增加價格 4x、5x。
 - B. We earn our value make sure profit that is enough for sustain.
10. (risk around concentration?)
- A. Not our concern.
 - B. Some customer also growing very fast. A lot of new player in AI industry.
11. (end/direct customer is financing in AI, is something that TSMC is considering?)
- A. Every company has different consideration.
 - B. So far, tsmc do not do financial 支援。
12. (100B another capex)100B another invest how to think?
- A. Have a plan. Progress most of the time depend on market situation and customer demand.
 - B. Schedule no plan yes.
 - C. Try to speed up ASAP.
 - D. also TW and JP fab ASAP bcz the gap between cap and demand is big.
13. (COUPE) COUPE have meaningful contribution
- A. RP now, COUPE continue to increase the demand and become important tech in next few year.
14. (outlook) raise capex, outlook for CPU/GPU...etc.?
- A. All of them are in TSMC, using same kind of technology.
15. (AP) last month JP show glass technology, more progress update? (glass core/glass substrate)
- A. Today the majority is CoWoS.

B. Work with substrate vender so customer can product in their market

C. Pilot line 幾個月前，還需要一年才會技術成熟，才有機會生產。

16. (capex and sales) capex/ rev increasing, rev guide for next several years?

A. Rev correlated to our investment.

B. Next few year is good years for TSMC.

C. AI related.

17. (L-T strategy) BE competition lead to FE completion?

A. FE and BE are 2 df things. ASE become FE competitor?

B. Since our capacity in BE is shortage more, the gap is bigger, so welcome competitor BE.

18. (high NA adoption) high NA adoption, customer die shrinking feedback?

A. High NA is good tool, high performance, but TSMC work with ASML try to make is more suitable in terms of cost, maturity.

19. (3nm) demand > supply 30-50%?

A. We don't have number to sure.

B. A very big gap.

20. (capacity expansion) 2nm capacity growth 60% from 2026-2028? 3nm CAGR 25%? # still the same?

A. We show the chart, and now is bigger.

21. (AP side) capex allocate to AP exclude test, mask and others?

A. Make sure capex is correct but some 彈性 in FE and BE.

B. BE is about 10-20%.

22. (capex revision) YTD 台積電上修很多 capex，面對的狀況和六個月前有什麼不同？

A. 最重要的原因是需求持續增加，公司產能必須跟上客戶。還有通膨，現在設備都是通膨後的價格。

23. (mature node S-D) 成熟製程現在復甦也非常強勁，也有供應問題，怎麼看供需動態？

A. Mature node cover lot segment, only in AI is shortage. (1) PMIC, all DC need PM. (2) sensor portion, to detect mental information and put into DC to analyze.

B. consumer product is not in high demand.
