

Fositek

Meaningful QD spec upgrades with more customer wins & TAM expansion; 3Q26 preview with GM upside; Assume coverage at OW with PT of NT\$4,000

Fositek's earnings upgrade cycle looks set to accelerate as Nvidia's next-gen Rubin Ultra raises both QD content and spec, with margin upside arriving earlier than the market is pricing. We assume coverage of Fositek with an Overweight rating, and a Dec-27 PT of NT\$4,000, based on 22x 2028E P/E (implying ~60% potential upside from the current share price). Our **2027/2028 EPS is 12%/40% above BBGe consensus**, reflecting three drivers: 1) **near-term gross margin upside** on mix with stronger server QD revenue contribution; 2) **QD TAM expansion into higher-spec rack manifold QDs with continued share gains**/new customer wins from VR200 in 2H26; and 3) **VR Ultra (VRU) spec upgrade** where ZQD adoption at ~2x ASP lifts QD content per VRU NVL72 rack ~100%. We believe market conviction should increase on structural QD spec upgrades, share gains, and another GM beat. *With this note, we transfer coverage of Fositek to Megan Hsueh.*

- **Nvidia VR Ultra partially upgrading to ZQD with ~100% content growth; Fositek the major winner with new customer wins & TAM expansion to higher-spec QDs.** AI rack liquid-cooling content is moving from a volume story to a spec and content growth story, and Fositek sits at the center of that shift. Nvidia's next-gen VRU platform likely upgrades portions of the system from MQD/UQD to higher-spec ZQD, targeting better flow rate and lower leakage, which raises both content and ASP. Our work implies total QD content per VRU NVL72 rack rises ~100% vs VR200/GB300, as ZQD is adopted across compute tray modules, tray entry points, and rack manifold sockets. The key 'why now' comes from the 2H26 transition, where Fositek finally enters into the higher-spec rack manifold QDs (UQD08 now) TAM beyond in-rack QDs from VR200. In addition, the company is gaining share by winning new cold plate customers (besides AVC) from VR200 as well, and continues to sample to more, which could be future upside, in our view.
- **3Q26 preview: likely another quarter of solid GM beat, with better product mix on significant QD shipment growth.** Our 3Q26 GM estimate is ~37% (vs BBGe consensus at ~35%), implying further rapid growth from 34% in 2Q26, driven by the better-than-expected product mix enhancement from: 1) the rapid growth in server revenue contribution (exceeding 80% in July + Aug vs 55% in 2Q26) and 2) increasing shipments of higher-spec QDs (e.g., starting to ship UQD08 for rack manifolds from 2H26). Reported July and August revenues each grew 13% MoM and 12% MoM, respectively, and we believe the decent order momentum will continue into September with another >10% MoM growth (based on JPMe) thanks to VR200 QD and initial new smartphone hinge shipments, which should add up to ~NT\$4.6bn (+23% QoQ; +29% YoY), largely in line with current consensus.
- **Understanding valuation as a QD spec upgrade winner.** Fositek is now trading at 22x 12-month fwd P/E, in the middle of its historical valuation range (15-30x). We apply a 22x 2028E P/E valuation to reflect a multi-quarter earnings upgrade path tied to VR200 share gains and VRU-driven content expansion. The shares have moved up ~55% in the past 3 months vs Taiex ~6%;

Summary Investment Thesis and Valuation

Investment Thesis

We are OW on Fositek for its strong earnings growth potential over the next few years, driven by rising server project wins with an increasing customer base and structural margin expansion with a favourable mix.

Valuation

Our Dec-27 PT of NT\$4,000 is based on a 22x 2028E P/E, in the middle of its historical valuation range of 15-30x since its OTC listing in 2020, which we believe is warranted by its strong earnings potential.

we believe the share price will continue to outperform in the next 6-12 months, as we see Fositek as a primary winner in the QD spec upgrade trend, with its VR200 QD share reaching 50+% (built from 30-40% AVC plus 10-20% incremental share from a new customer), and further upside from more new cold plate customer wins in Taiwan and Japan (now sampling). Key risks include slower VRU spec adoption, weaker-than-expected share capture, pricing pressure, and any reversal in GM trajectory.

Earnings estimates

JPM's above-consensus forecasts

Our 2026E/27E/28E EPS forecasts are 1%/12%/40% above Bloomberg consensus, reflecting: 1) near-term GM upside from better product mix with stronger-than-expected server QD growth, 2) QD new customer wins and TAM expansion to the higher-spec rack manifold QDs from VR200 in 2H26, and 3) meaningful Quick Disconnect (QD) spec upgrade potential in Nvidia's next-gen VR Ultra (VRU) system (upgrading to ZQD with 2x ASP) from 2Q/2H27.

Key risks to our estimates

- **Slower qualification in AI server rail kit customers/projects:** Fositek has started shipping its rail kit for some general server projects since last year and some air-cooled AI servers rail kits since 3Q26. Also, it will start shipping some VR200 low-U count rail kits in 2H26 for one CSP customer, and is qualifying a few more now. If qualification takes longer than expected given the stronger-than-expected competition from existing suppliers, it would be a risk to Fositek's server rail kit business outlook.
- **Continued weakening foldable phone market demand:** If foldable phone penetration slows down amid the weakening smartphone market, this would still be a downside for Fositek, as one of the leading hinge suppliers with still ~30% revenue coming from it.

Valuation

We derive our Dec-27 price target of NT\$4,000 based on 22x 2028E P/E. This is in the middle of its historical valuation range of 15-30x P/E, as we expect an earnings revisions cycle (based on our above-consensus estimates in 2027-28) should support this valuation.

Financial Analysis

We forecast Fositek's revenue to increase 47%/65%/37% YoY in 2026E/27E/28E, supported by the company's QD TAM expansion into higher-spec rack manifold QDs with continued share gains/new customer wins from VR200 in 2H26, along with VR Ultra spec upgrades (partially from MQD/UQD to ZQD with ~2x ASP growth).

Fositek's 2Q26 gross margin expanded to 34% thanks to continued QD yield enhancement. We believe the company's margin will continue to surprise to the upside in 2H26-2028, driven by the near-term favourable product mix from stronger server QD growth and longer-term higher-spec product shipments, which should support our gross margin forecasts of 35%/39%/42% in 2026E/27E/28E, respectively. The stronger GM growth also serves as the key driver to our bottom-line EPS growth of 105%/89%/49% in 2026E/27E/28E, respectively.

Investment Thesis, Valuation and Risks

Fositek (*Overweight; Price Target: NT\$4,000.00*)

Investment Thesis

We are OW on Fositek for its strong earnings growth potential over the next few years, driven by rising server project wins with an increasing customer base and structural margin expansion with a favourable mix.

Valuation

Our Dec-27 PT of NT\$4,000 is based on a 22x 2028E P/E, in the middle of its historical valuation range of 15-30x since its OTC listing in 2020, which we believe is warranted by its strong earnings potential.

Risks to Rating and Price Target

Key downside risks to our rating and price target include: 1) QD ASP/margin pressure or market-share loss from competition, 2) slower qualification in AI server rail kit customers/projects, and 3) continued weakening smartphone market demand.

The chart(s) show J.P. Morgan’s continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period. J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:

J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s team’s, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst’s, or the Research Analyst’s

team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, <https://www.jpmorganmarkets.com>.

J.P. Morgan Equity Research Ratings Distribution, as of July 04, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	53%	36%	12%
IB clients**	83%	80%	73%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	95%	92%	87%

*Please note that the percentages may not add to 100% because of rounding.

**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.

For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.
