TFT-LCD Panel Price Outlook
for July 2026: TVs -2%, Monitors
and NBs Flat MoM

We stay constructive on opportunities for glass in advanced packaging, but it will take time to make a meaningful contribution.

TV panel prices to decline by 2% MoM in July: Mainstream 32", 43", 55", 65", and 75" TV panel prices are expected to drop 3%, 3%, 2%, 2%, 1%, respectively, for the month of July. This is consistent with our view that TV panel prices should start to trend down from 3Q26. As we've mentioned, TV panel shipments this year should be skewed toward the first half due to earlier restocking to prepare for promotions ahead of major sports events. This could lead to below-seasonal TV panel order momentum in 2H26 and soften the bargaining power of panel makers amid price negotiations. That said, we believe that the supply side discipline that major panel makers have been demonstrating in the past few years should help align the output with demand, mitigating the risk of significant panel pricing pressure. On a quarterly average basis, we expect prices to decline by a low single digit % QoQ in 3Q26.

IT panel prices to stay stable in July: Both monitor and notebook panel prices are expected to remain flat MoM for the month. Overall, we expect IT panel prices to remain relatively more stable than TV panels in the coming quarters. On a quarterly average basis, we expect IT panel prices to stay flat QoQ in 3Q26.

Glass core substrate gaining attention: We believe that the attention the market has been recently paying to the panel stocks is mostly centered around the glass opportunities in advanced packaging, especially glass core substrates. In addition to the collaboration between TSMC, Innolux and Ibiden for its CoWoS and CoPoS configurations, BOE has also been actively talking about this in the past few months. In contrast to Innolux, BOE aspires to finish the whole glass core substrate manufacturing, including the glass core with TGVs and the build-up layers. It has been engaging with domestic and overseas IC designers for verifications. If things move smoothly, it might spend Rmb5bn to build a monthly capacity of 15K substrates (510*515mm) in 2027 and target mass production in 2028 ([see report](#)).

Risk/reward less attractive: We view valuations as less attractive, particularly for Taiwan names AUO (2409.TW; 1.6x P/B) and Innolux (3481.TW; 2.4x P/B), as incremental contributions from advanced packaging will take more time to materialize and competition could intensify at the mass production stage, with multiple supply chain players targeting the opportunity. Within China, we prefer BOE (000725.SZ; 2.1x P/B) over TCL (000100.SZ; 1.9x P/B), reflecting BOE's scale advantage, higher concentration in display, and faster progress in glass core substrates.

Note: To be more consistent with the industry practice, WitsView changed the way it publishes panel price quotes in January 2025. It now only provides expectations of the full-month panel price outlook on the 5th of every month, instead of specific quotes for the first half of the month. It will then provide finalized prices for the month on the 20th of every month, which will be similar to the original 2H panel pricing quotes.

TV Panel Prices To Start Trending Down from 3Q26

TV panel prices started to edge up at the beginning of this year, rising 1% MoM in January, 2% MoM in February and 2% MoM in March. April, May and June were largely flat, and we expect TV panel prices to trend down from 3Q26. That said, we do not expect the decline to be significant, as supply-side discipline should provide downside support.

Exhibit 3: TV Panel Price Trend (QoQ)

Source: Trendforce, Morgan Stanley Research (E) estimates

Exhibit 4: IT Panel Price (QoQ)

Source: Trendforce, Morgan Stanley Research (E) estimates

Below Seasonal Panel Shipments in 2H26

Over the past decade, TV panel shipments have averaged a 49%–51% split between 1H and 2H. In 2026, we see the mix skew toward 1H, as TV brands restocked ahead of major promotional events, including the Winter Olympics in February, the FIFA World Cup in June–July, and China’s 618 campaign. We see no clear evidence that these events will materially boost global TV demand, but shipment timing has consistently shifted across quarters around such promotions. The earlier restocking momentum since the start of the year should taper off, with panel order momentum slowing into 2H26.

Display Fab Utilization Stayed at 80%-85% in 2Q26

Stronger TV panel shipments supported display fab utilization at ~80% in 4Q24 and 82% in 1Q25. Utilization declined to 78% in 2Q25 as brands turned more conservative after earlier pull-ins faded and the impact of China’s trade-in program eased. Utilization rebounded to 80%–85% in 3Q25 as restocking resumed for year-end promotions and stayed at similar levels in 4Q25 despite seasonal softness, as well as into 1Q26. Industry utilization remained broadly flat QoQ at 80%–85% in 2Q26, reflecting ongoing output discipline.

Over the medium to long term, we maintain the view that the display segment is undergoing structural change. Chinese panel makers have shifted from top-line growth to profitability, with fewer government subsidies reinforcing supply discipline. We believe more investors now accept that the industry’s “production-to-order” model can remain sustainable, particularly as panel price cycles shortened to quarters in 2023–24 versus multi-year cycles in the prior decade. Consolidation moves – including LG Display’s sale of its Gen 8.5 Guangzhou fab to TCL and Sharp’s shutdown of its Gen 10 Sakai fab – also support a healthier supply backdrop (for more information, see [Display – Structural Changes on Supply Side Not Fairly Priced In](#), June 17, 2021).

Exhibit 5: Industry Average Utilization at Display Fabs

Risk/Reward Remains Less Attractive

We believe this round of panel price hikes is coming to an end, and thus risk/reward is less attractive, especially for Taiwanese names. Below are our current views:

- **AUO (2409.TW, Derrick Yang):** We are EW on AUO, with a PT of NT\$27.00, based on a 1.4x 2026e P/B multiple. While we see this round of TV panel price hikes coming to an end, there should be downside support as major panel makers are expected to continue demonstrating good output discipline. While we appreciate AUO's efforts in business diversification, it is likely to take time to make a meaningful contribution.
- **BOE (000725.SZ, Derrick Yang):** We have a relative preference for BOE owing to its scale advantage, higher concentration in display, and faster progress in glass core substrates. Our PT of Rmb9.30 is based on 2.5x 2026e P/B, which we believe is reasonable, given that we estimate ROE of 5-8% over 2026-28 vs. BOE's average of 1.1x P/B in 2023-25 with ROE of 2-4% in the same period.
- **Innolux (3481.TW, Derrick Yang):** On the semi business, while we believe that Innolux is involved in one foundry's glass core substrate project, we do not expect contributions to kick in until 2028 and do not rule out more players joining in the mass production stage. We remain EW with a PT of NT\$60.00, based on a 2.1x 2026e P/B multiple.
- **LG Display (034220.KS, Shawn Kim):** Meaningful OLED revenue contribution should increasingly improve earnings from 2H25, but potentially weaker end-markets keep us from turning bullish on LGD. The stock trades at 0.8x 2026e P/B vs. a historical mid-cycle level of 0.5x.
- **TCL (000100.SZ, Derrick Yang):** We are EW with a price target of Rmb4.70 (1.7x 2026e P/B). The stock is trading at 1.9x 2026e P/B vs. its mid-cycle average of 1.4x since 2022.
- **Corning (GLW.N, Meta Marshall):** GLW's display business operates efficiently and sees further margin support from additional currency-related price increases, while the optical business resumes growth as carrier fiber deployments pick up. GLW's display business closely correlates with panel maker utilization, and is its largest earnings contributor.
- **Greater China DDIC supply chain implications – Novatek (3034.TW, Daniel Yen):** Daniel's UW thesis is based on weaker PC, smartphone and auto demand, gross margin pressure and a lack of new growth drivers. That said, Novatek's OLED DDI roadmap looks more competitive than that of its key Korean competitors on performance and cost, helping it increase its market share in Apple's iPhone supply chain.

Where Could We Be Wrong?

- **Stronger end-demand:** If end-demand for major applications turns out to be better than expected, there could be stronger panel shipments and less panel price pressure.
- **More stringent output control:** If major panel makers collectively adjust utilization to an extreme extent, they could mitigate pricing pressure in the case of softer demand.
- **Non-commodity display business:** If the non-commodity business progresses faster than expected, panel makers could show better financial results.

Valuation Methodology and Risks

TCL Corp. (000100.SZ)

Base case, P/B to capture the stock's cyclical nature and align with our methodology for other panel makers in Greater China. We apply 1.7x 2026e P/B vs. its five-year range of 1.1x to 3.8x P/B, which we view as justified by our ROE estimates of 8% in 2025 and 11% in 2026, respectively.

Risks to Upside

- Less-intense competition in the industry
- Better improvement in AMOLED production yield
- More capacity shutdowns by existing players

Risks to Downside

- Worse-than-expected industry-wide ASP
- Lower production yield in G10.5 fab
- More TFT-LCD capacity additions

BOE Technology (000725.SZ)

Base case, P/B valuation, which we think better reflects BOE's intrinsic value in view of the industry's relatively cyclical nature and aligning with the methodology we use for other panel makers in Greater China. We view our target multiple of 2.5x 2026e P/B as reasonable given that we estimate ROE of 5-8% over 2026-28 vs. BOE's average of 1.1x P/B in 2023-25 with ROE of 2-4% during the same period.

Risks to Upside

- Better-than-expected industry-wide ASP
- Higher yield in G10.5 fab
- Faster-than-expected AMOLED ramp
- Faster progress on advanced packaging business

Risks to Downside

- Worse-than-expected industry-wide ASP
- Lower yield in G10.5 fab
- Slower-than-expected AMOLED ramp
- Slower progress on advanced packaging business

AU Optronics (2409.TW)

Base case, 2026e P/B of 1.4x. We believe price/book value better reflects AUO's intrinsic value, in view of the industry's relatively cyclical nature. The stock's mid-cycle average has been 0.8x P/B, but it has re-rated due to its CPO and LEO businesses. We see our target multiple as reasonable in consideration of the company's business diversification efforts, although they will take time to contribute.

Risks to Upside

- Stronger-than-expected end-demand
- Disciplined capacity control among peers
- Favorable panel pricing environment
- Faster progress on new business initiatives

Risks to Downside

- Macro headwinds leading to weak demand
- Faster yield improvement among Chinese players, leading to more supply
- Faster OLED panel adoption among large-size applications
- Slower progress on new business initiatives

Novatek (3034.TW)

Base case, residual income model. Key assumptions: cost of equity constant at 9.8% (2.0% risk-free rate, 6% risk premium, 1.3 beta), payout ratio of 80%, medium-term growth rate of 6.1% and terminal growth rate assumption of 3.4%.

Risks to Upside

- Faster-than-expected 8K/4K TV growth.
- Better-than-expected smartphone sell-through.
- Better-than-expected sell-through of foldable products.

Risks to Downside

- Intensified price competition in TDDI, driving Novatek's gross margin below its corporate average.
- Slower-than-expected 8K/4K TV growth.
- Slower sell-through of foldable products.

Innolux (3481.TW)

Base case, 2.1x 2026e P/B. We use price/book value as our methodology because we believe it better reflects Innolux's intrinsic value, in view of the industry's relatively cyclical nature. Innolux has generally traded at an average of 0.6x P/B, but the stock has re-rated from the FOPLP/advanced packaging angle. We view 2.1x as justified because we see do not see semi contribution kicking in until 2028.

Risks to Upside

- More panel price hikes amid slower ramps of Chinese players
- Higher contribution from assembly business
- Stronger TV/IT demand recovery
- Faster progress on semi businesses

Risks to Downside

- Macro demand slowdown
- Fiercer competition from Chinese panel makers
- Faster OLED panel adoptions in large size applications

- Slower progress on semi businesses

(Shanghai), Winbond Electronics Corp, WT Microelectronics Co. Ltd., Xiaomi Corp, Yageo Corp., Zebra Technologies Corporation, Zhen Ding.

Morgan Stanley & Co. LLC makes a market in the securities of ACM Research Inc, Ciena Corporation, F5 Inc, Himax Technologies Inc, Keysight Technologies Inc, Silicon Motion.

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of June 30, 2026)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm.

For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Stock Rating Category	Coverage Universe		Investment Banking Clients (IBC)			Other Material Investment Services Clients (MISC)	
	Count	% of Total	Count	% of Total IBC	% of Rating Category	Count	% of Total Other MISC
Overweight/Buy	1544	42%	453	49%	29%	757	44%
Equal-weight/Hold	1577	43%	390	42%	25%	769	44%
Not-Rated/Hold	3	0%	1	0%	33%	1	0%
Underweight/Sell	544	15%	89	10%	16%	204	12%
Total	3,668		933			1731	

Data include common stock and ADRs currently assigned ratings. Investment Banking Clients are companies from whom Morgan Stanley received investment banking compensation in the last 12 months. Due to rounding off of decimals, the percentages provided in the "% of total" column may not add up to exactly 100 percent.

Analyst Stock Ratings

Overweight (O). The stock's total return is expected to exceed the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Equal-weight (E). The stock's total return is expected to be in line with the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Not-Rated (NR). Currently the analyst does not have adequate conviction about the stock's total return relative to the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Underweight (U). The stock's total return is expected to be below the average total return of the analyst's industry (or industry team's) coverage universe, on a risk-adjusted basis, over the next 12-18 months.

Unless otherwise specified, the time frame for price targets included in Morgan Stanley Research is 12 to 18 months.

Analyst Industry Views

Attractive (A): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be attractive vs. the relevant broad market benchmark, as indicated below.

In-Line (I): The analyst expects the performance of his or her industry coverage universe over the next 12-18 months to be in line with the relevant broad market benchmark, as indicated below.

Cautious (C): The analyst views the performance of his or her industry coverage universe over the next 12-18 months with caution vs. the relevant broad market benchmark, as indicated below.

Benchmarks for each region are as follows: North America - S&P 500; Latin America - relevant MSCI country index or MSCI Latin America Index; Europe - MSCI Europe; Japan - TOPIX; Asia - relevant MSCI country index or MSCI sub-regional index or MSCI AC Asia Pacific ex Japan Index.

Important Disclosures for Morgan Stanley Smith Barney LLC Customers

Important disclosures regarding any material conflict of interest that can reasonably be expected to have influenced Morgan Stanley Smith Barney LLC's choice of a third-party research provider or the subject company of a third-party research report, are available on the Morgan Stanley Wealth Management disclosure website at www.morganstanley.com/online/researchdisclosures. For Morgan Stanley specific disclosures, you may refer to <https://www.morganstanley.com/eqr/disclosures/webapp/generalresearch>.

Each Morgan Stanley research report is reviewed and approved on behalf of Morgan Stanley Smith Barney LLC. This review and approval is conducted by the same person who reviews the research report on behalf of Morgan Stanley. This could create a conflict of interest.

Other Important Disclosures

As of July 2, 2026, Morgan Stanley beneficially owned a net long position exceeding 0.5% of the total issued share capital of the following companies covered in Morgan Stanley Research: Lingyi Tech Guangdong Co.

A member of Research who had or could have had access to the research prior to completion owns securities (or related derivatives) in the Cisco Systems Inc. This person is not a research analyst or a member of research analyst's household.

Morgan Stanley Research policy is to update research reports as and when the Research Analyst and Research Management deem appropriate, based on developments with the issuer, the sector, or the market that may have a material impact on the research views or opinions stated therein. In addition, certain Research publications are intended to be updated on a regular periodic basis (weekly/monthly/quarterly/annual) and will ordinarily be updated with that frequency, unless the Research Analyst and Research Management determine that a different publication schedule is appropriate based on current conditions.

Morgan Stanley is not acting as a municipal advisor and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

Morgan Stanley produces an equity research product called a "Tactical Idea." Views contained in a "Tactical Idea" on a particular stock may be contrary to the recommendations or views expressed in research on the same stock. This may be the result of differing time horizons, methodologies, market events, or other factors. For all research available on a particular stock, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

Morgan Stanley Research is provided to our clients through our proprietary research portal on Matrix and also distributed electronically by Morgan Stanley to clients. Certain, but not all, Morgan Stanley Research products are also made available to clients through third-party vendors or redistributed to clients through alternate electronic means as a convenience. For access to all available Morgan Stanley Research, please contact your sales representative or go to Matrix at <http://www.morganstanley.com/matrix>.

If you do not agree to our Terms of Use and/or if you do not wish to provide your consent to Morgan Stanley processing your personal data or using cookies please do not access our research. Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.

Morgan Stanley may make investment decisions that are inconsistent with the recommendations or views in this report.
