When we lowered S&P 500 year-end target a month ago, it had nothing to do with the market's fundamental underpinnings. Our concerns remain valuation related in light of rising uncertainties in the investment backdrop. But don't be tricked by scary surprises that send stocks southward; they could be attractive buying opportunities, say Ed and Elias, given the robust economic growth and corporate earnings we continue to expect. Today, they explain why prospective frights from four directions—

geopolitical, US political, the Fed, and AI—could turn out to be opportunities in disguise.
