

摘要：

“美联储传声筒”Nick Timiraos表示，美国3月核心CPI环比涨幅为0.196%，略低于预期，但单月数据不足以改变整体判断。美联储希望看到能源价格回落，并对关税传导效应的结束建立更多信心。值得注意的是，更多能源相关的影响（如机票、运输价格）可能还在前方。

美国3月通胀走势分化：整体CPI受能源价格拖累超预期跳涨，核心CPI则意外温和、略低于预期。“美联储传声筒”Nick Timiraos提醒，单月数据不足以改变整体判断，更多能源相关的影响可能还在前方。

Nick Timiraos @NickTimiraos · 8m

Core CPI was a bit softer than expected, at 0.196% in March.

Still, one month doesn't settle too much. The Fed will want to see energy prices coming down (plus more confidence tariff pass thru is over) & it's possible the more of the energy echo (airfares, shipping) is ahead.

Core consumer-price index

12%

Nick Timiraos表示，美国3月核心CPI环比涨幅为0.196%，略低于预期。但单月数据不足以改变整体判断。美联储希望看到能源价格回落，并对关税传导效应的结束建立更多信心。值得注意的是，更多能源相关的影响（如机票、运输价格）可能还在前方。

从具体分项来看，核心CPI整体较为温和。核心商品环比上涨0.11%，三年年化率上涨0.9%，同比上涨1.2%。住房环比上涨0.27%，三年年化率上涨2.9%，同比上涨3.0%。剔除住房的核心服务环比上涨0.18%，三年年化率上涨4.6%，同比上涨3.1%。

整体CPI受能源驱动跳升，汽油价格创纪录

美国劳工统计局周五公布的数据显示，3月CPI环比上涨0.9%，创2022年6月以来最大单月涨幅，同比加速至3.3%，为2024年以来最高水平。汽油价格创1967年有记录以来最大单月涨幅，贡献了月度涨幅的近四分之三。

核心CPI环比上涨0.2%，低于预期的0.3%，为市场带来些许安慰，短期降息押注有所上升。但经济学家警告，能源冲击的二次效应尚未在核心通胀中充分体现，4月数据面临进一步走高风险。

能源成本正向服务业传导

高价航空燃油将推高机票价格，达美航空已就此发出预警；柴油成本上升将传导至公路运输，进而推高消费品价格；化肥价格走高预计将推升食品杂货账单；美国邮政服务同样已警告将上调收费标准。

Timiraos援引了2008年时任美联储理事Kevin Warsh的观点，暗示当前美联储对通胀冲击的容忍度，部分取决于其对通胀预期稳定性的判断。这一历史参照表明，面对能源驱动的通胀跳升，美联储的应对路径仍存变数。

Nick Timiraos @NickTimiraos · 2h

Your confidence in looking through a shock depends in part on your view of the stability of inflation expectations. Here's then-governor Kevin Warsh in June 2008, when the Fed was confronted with another energy shock

Third, let me turn to inflation risks. Inflation risks, in my view, continue to predominate as the greater risk to the economy. There is more evidence of a global secular reversal of inflation trends, making the jobs of central bankers worldwide considerably more difficult. I remain worried about energy and food pass-through and the effect of a weakening dollar if our policy rates and those of our major trading partners are perceived to diverge. I would expect import prices, core inflation, and expectations to move up in the coming months even more than in the Greenbook, likely causing a policy response by our foreign peers. Commodity prices, again, with the exception

June 24–25, 200880 of 253

of metals, have been moving up while global demand is falling, and markets have come to see this rise of some, if not most, commodities as essentially permanent. So at the end of the day, we have to be concerned about this period of above-acceptable inflation. It's crucial that broader prices do not start to rise at still-faster rates, and that could well happen if those making decisions about prices and pay expect higher inflation in the future. Anecdotes are not comforting, particularly on the price front. As a result, I think the trajectory of inflation is less favorable than in the Greenbook, thereby necessitating a policy response more significant than the Greenbook would suggest.
