US MARKETS CALL: S&P 500 Valuation Dives As Earnings Soar

By Ed Yardeni & Toby Hearst • 7 Nov 2026

View in browser

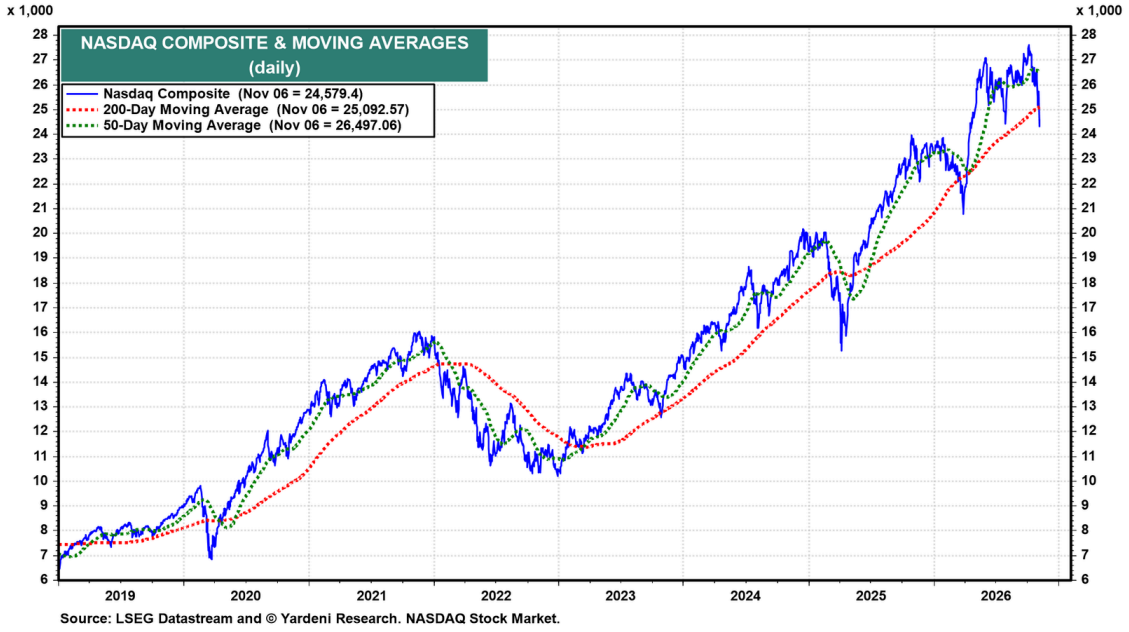

Photo by Baptiste Azais / Unsplash

The stock market dived last week. Investors priced in political backlash against data centers after Democrats swept Congress. We anticipated buying opportunities after the midterm elections, and Thursday's selloff delivered some. This remains an earnings-led bull market. Valuations are falling while earnings are soaring. We still view the AI backlash as another

speed bump, not a roadblock. We are sticking with our 7,900 year-end target for the S&P 500.

I. Performance

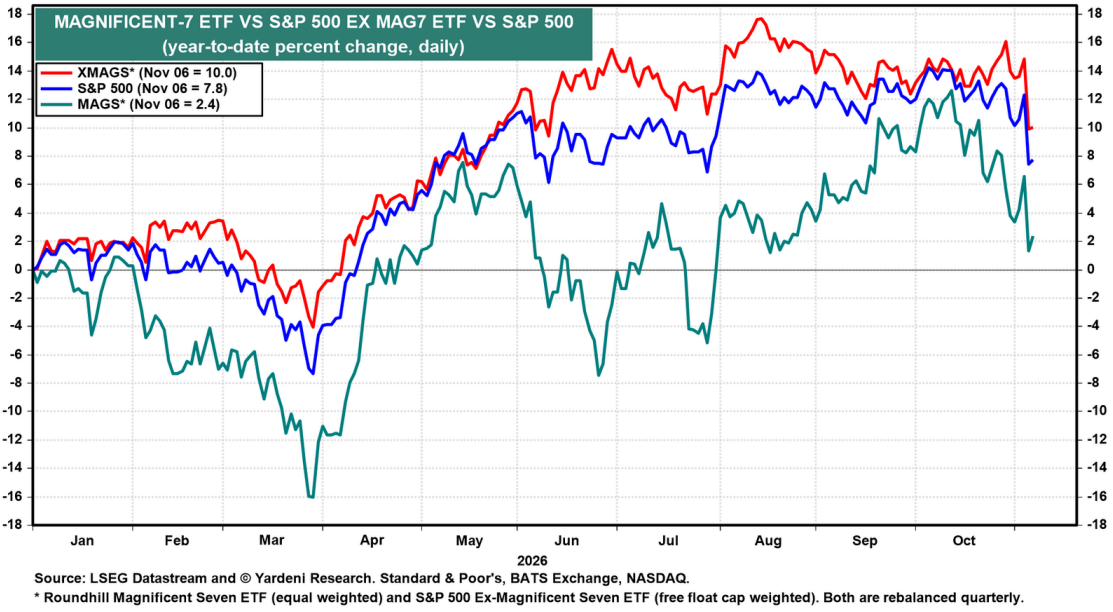

The Nasdaq entered correction territory on Thursday and closed the week below its 200-day moving average (chart). It has done this before recently. It rebounded sharply after its Spring 2025 "Liberation Day" plunge and again after the Iran war started earlier this year, quickly resuming its uptrend both times.

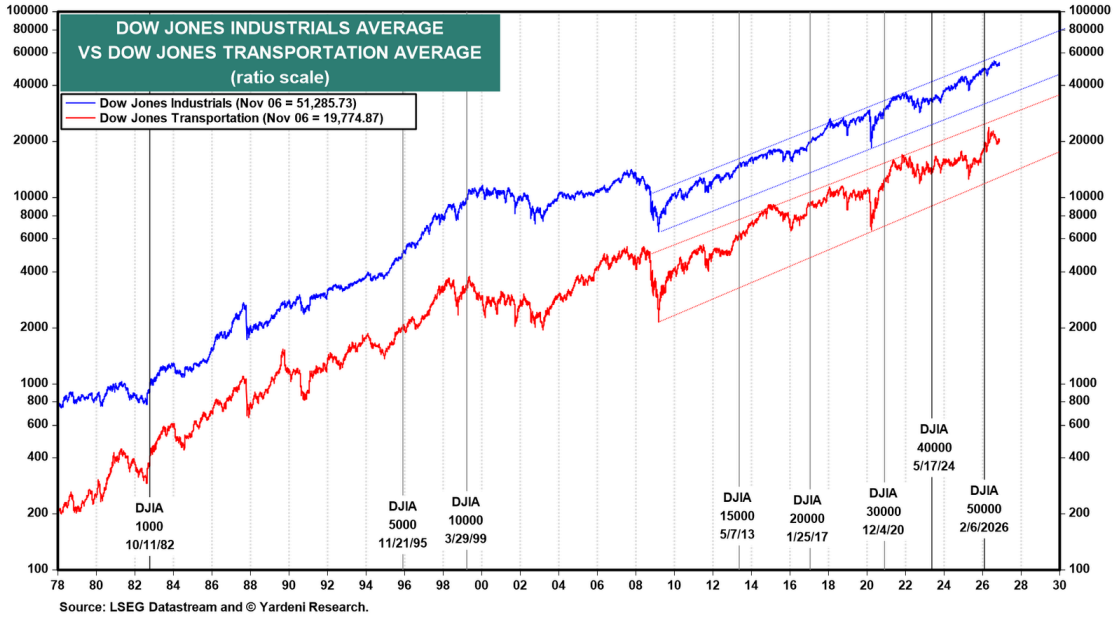

The equal-weight S&P 500 is holding up remarkably well. It remains near its recent record high and above both its 50-day and 200-day moving averages (chart). The damage has been concentrated in the AI trade, not the broader market.

The Magnificent-7 are underperforming again. The MAGS ETF is up only 2.4% ytd, versus 7.8% for the S&P 500 (chart). The Impressive-493 also took a hit this week. The XMAGS ETF includes Micron and the other semiconductor stocks hit hardest in the selloff. It is still up 10.0% ytd.

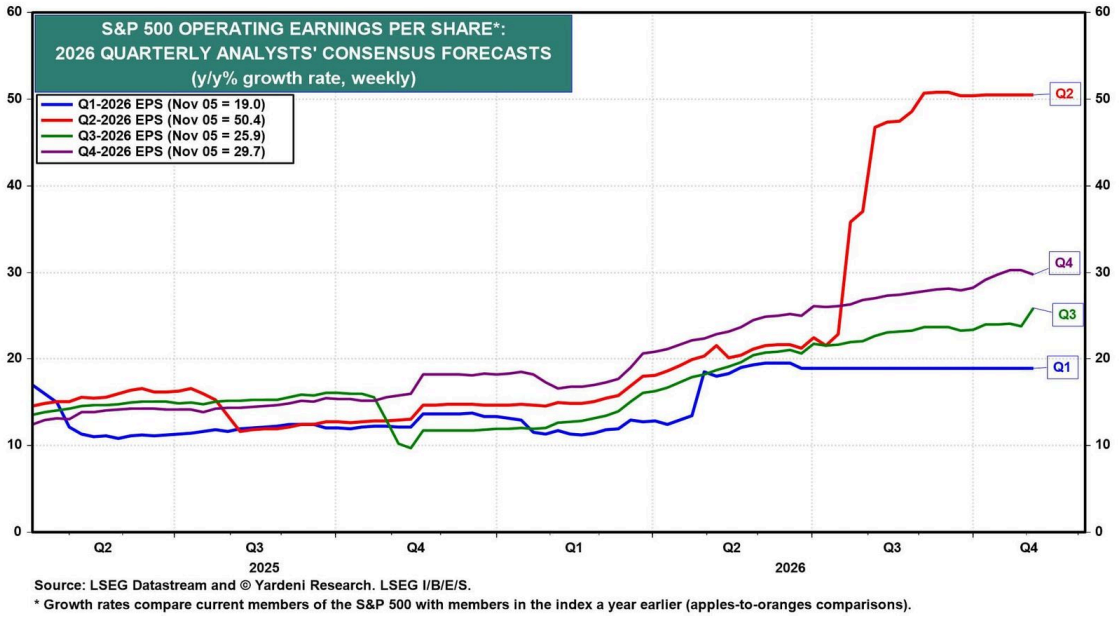

Dow Theory remains bullish. The Dow Jones Industrial Average is holding up well near its highs (chart). The Transports have lagged. They should improve if oil prices continue to fall.

II. Earnings

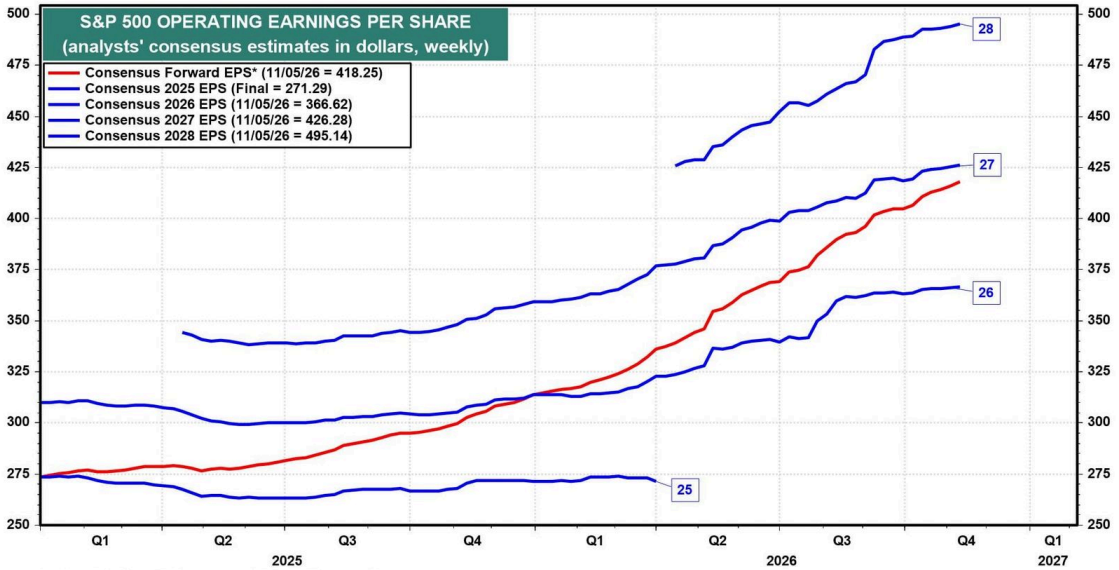

Earnings season picked up this week. The blended Q3 S&P 500 EPS growth estimate (i.e., actual results for companies that have reported, estimates for those that haven't yet) rose to 25.9% y/y from 23.8% a week earlier, helped by AMD's solid results. Q4's estimate edged down to 29.7%

(chart). As we noted previously, Q2's 50.4% y/y EPS growth rate was boosted by mark-to-market gains at Alphabet and Amazon. Excluding those, growth was closer to 25%, which is still very strong.

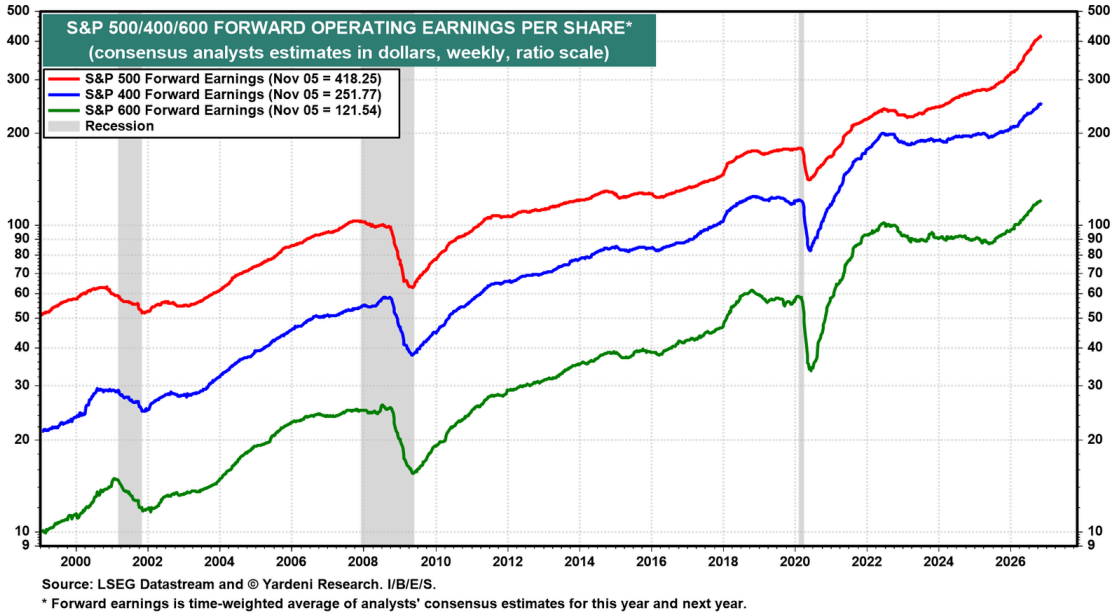

Source: LSEG Datastream and © Yardeni Research. LSEG I/B/E/S.
* Growth rates compare current members of the S&P 500 with members in the index a year earlier (apples-to-oranges comparisons).

Forward earnings rose to a record $418.25. It is converging on the 2027 estimate of $426.28, which continues to climb (chart). Analysts' 2028 consensus S&P 500 EPS estimate rose to $495.14; it's been closing in on $500—which is our target for 2030! We are bullish, but not as bullish as the analysts. The drop in the forward P/E this year suggests that investors also believe analysts are too bullish on earnings.

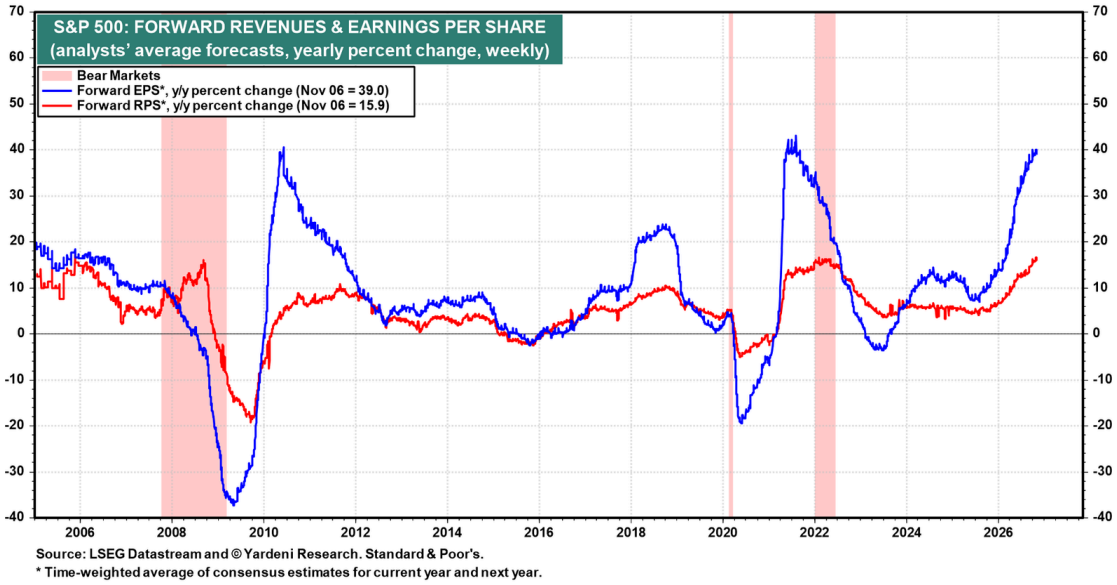

Source: LSEG Datastream and © Yardeni Research.
* Time-weighted average of analysts' consensus estimates for current and coming year.

Forward earnings for the S&P 500, S&P 400, and S&P 600 all rose to record highs again last week (chart). Earnings strength remains broad.

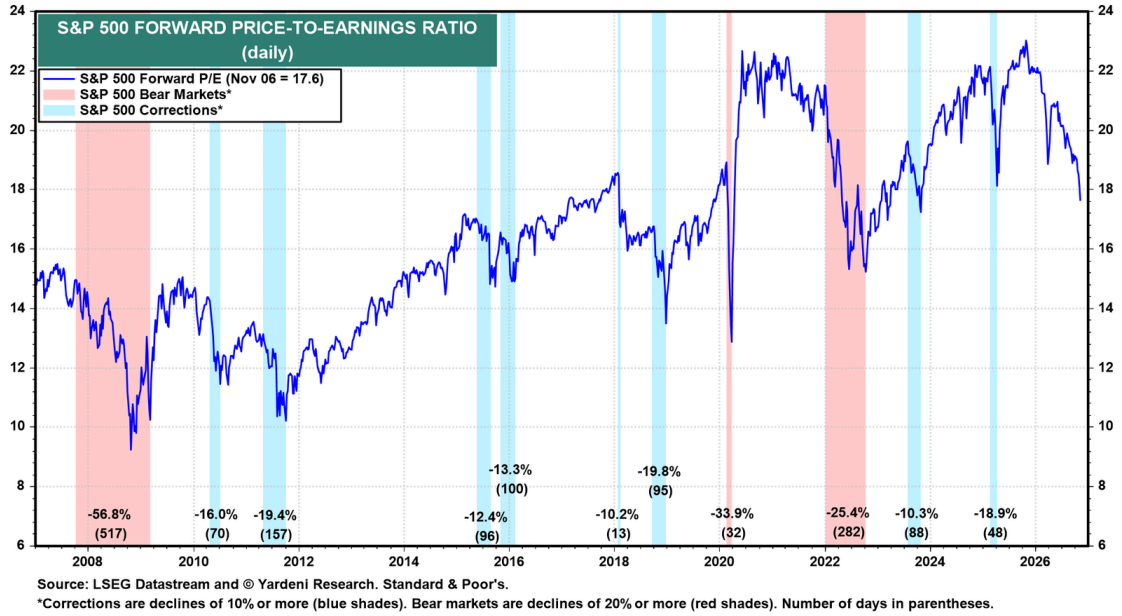

S&P 500 forward revenues per share is up 15.9% y/y, while forward earnings per share is up 39.0% y/y (chart).

III. Valuation

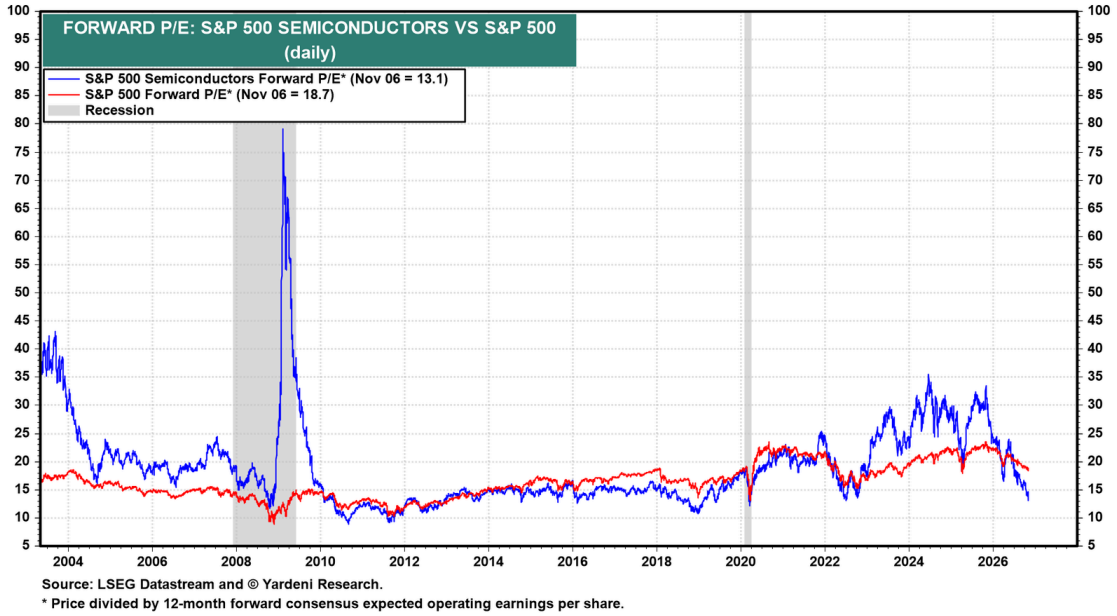

The S&P 500 forward P/E fell to 17.6 last week, below the 2025 Liberation Day low (chart). P/E plunges typically accompany corrections and recessions. The economy shows no sign of a recession anytime soon. Investors instead fear irrational exuberance in earnings forecasts.

Since the bull market began on October 12, 2022, the S&P 500 has risen 106.2%. Forward earnings is up 75.5%, while the forward P/E is up 22.5% (chart). The P/E and E both drove the rally until the forward P/E peaked in October last year. Since then, E has done all the work. Investors are finding it harder to predict the return on all the AI capital spending. They won't pay an excessive multiple given that uncertainty.

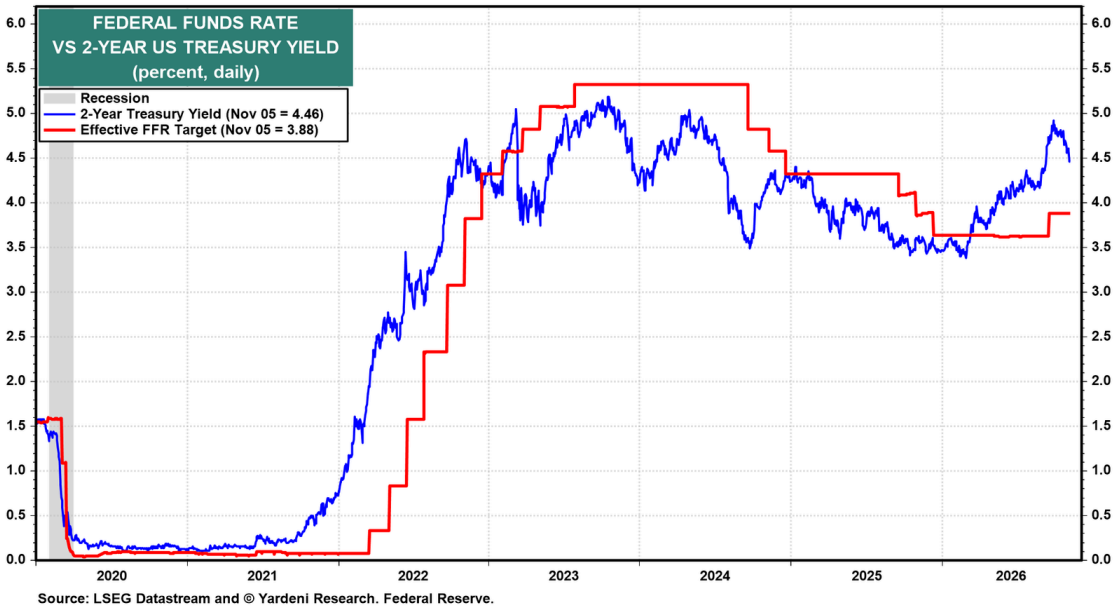

The S&P 500 Semiconductors industry accounts for much of the P/E drop. The industry index's forward P/E has plunged to 13.1, well below the S&P 500's (chart). Semis are now cheaper than they were during the 2022 bear market.

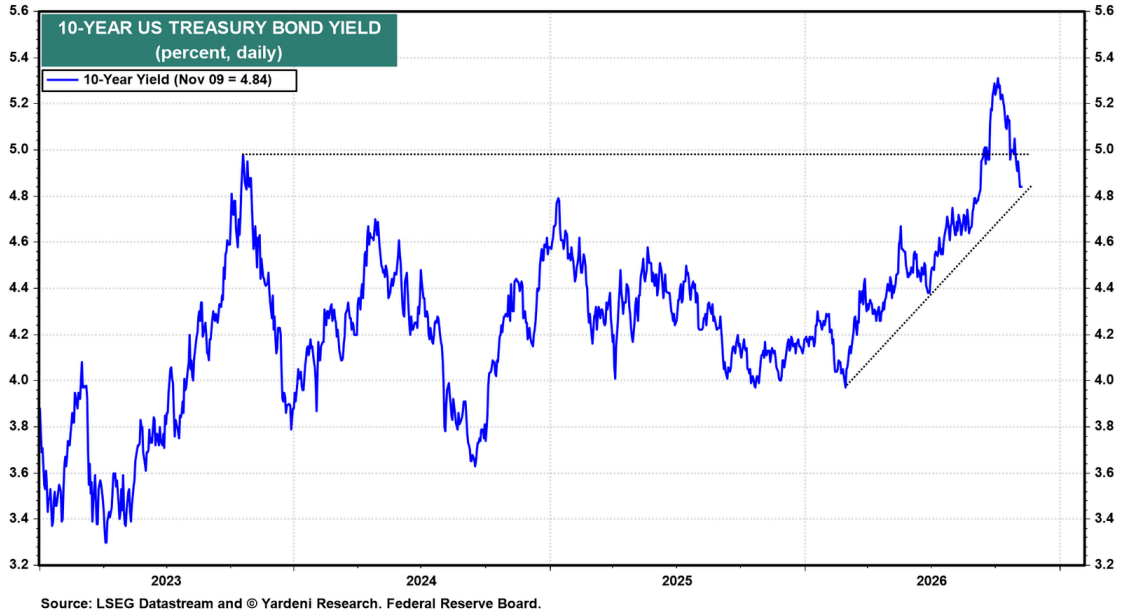

IV. Fixed Income

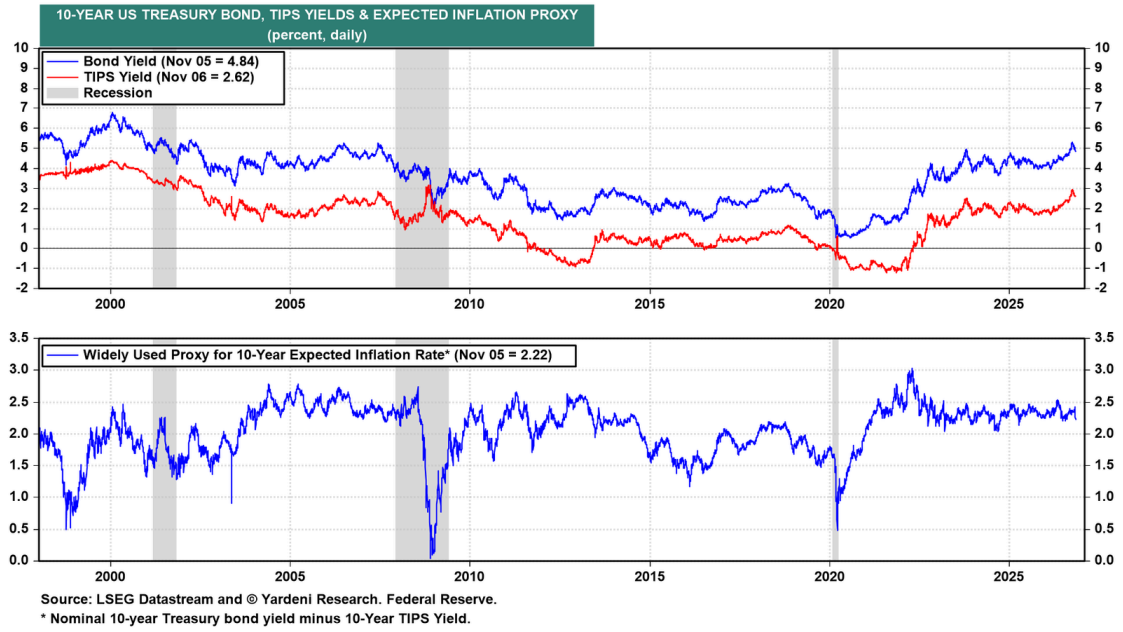

The futures market expects about two rate hikes over the next 12 months. That explains why the 2-year Treasury yield remains well above the 3.88% federal funds rate, even after easing to 4.46% following the midterms (chart).

The 10-year Treasury yield continues to fall. It dropped to 4.84% and is testing its uptrend line from last year's low (chart). We'll see if it bounces. Either way, it is back in the 4.00%-5.00% "old normal" range where we feel comfortable.

The 10-year TIPS yield fell to 2.62%. The yield spread between the 10-year Treasury and TIPS, a widely used proxy for expected inflation, eased to 2.22% (chart). That proxy tends to move with oil prices. The recent drop in crude showed up here.

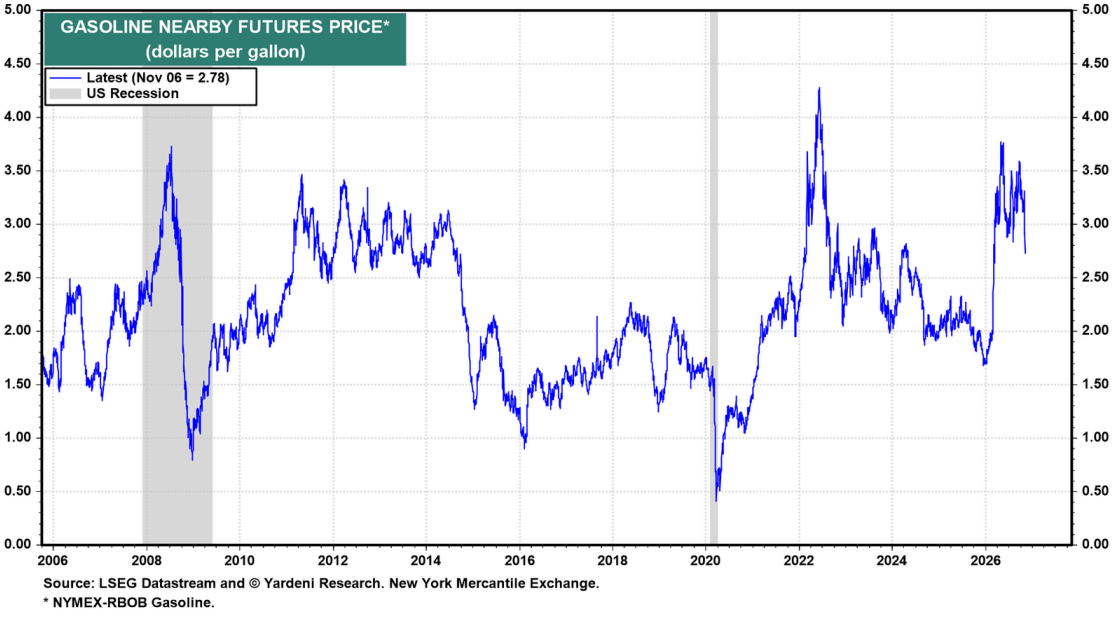

V. Commodities

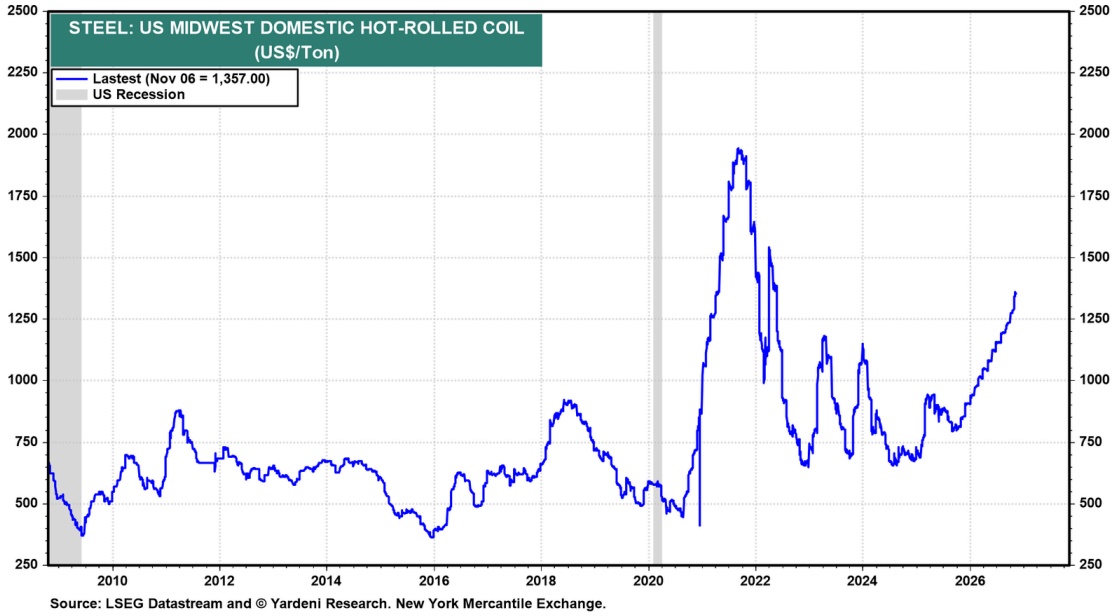

The price of Brent crude oil fell to $98.32 a barrel in recent days (chart). No news of the re-escalation of the war in the Middle East has emerged since the midterms. Hopes for a US-Iran deal are reflected in the oil market. We still see a risk of re-escalation.

Nearby gasoline futures dropped to $2.78 a gallon last week (chart). If sustained, that should start to show up as lower inflation in a couple of months. Renewed fighting in the Middle East would reverse that.

Steel prices show no sign of a slowdown in data center construction. US Midwest hot-rolled coil rose to $1,357 a ton, the highest since 2022 (chart).

Agricultural prices have eased. The S&P GSCI Agriculture Spot index fell to 376.77 last week (chart). Fears of a food price spike should subside.

We Promised You Buying Opportunities After The Midterms

By Ed Yardeni & Elias Griepentrog • 5 Nov 2026

I. The Delayed Cold Shower

Since September 15, we've counseled proceeding with caution in the stock market through the midterm elections. We anticipated buying opportunities after Tuesday's elections. Stocks rallied on Wednesday. But they plunged today.

The S&P 500 fell 4.4%, its worst day since the April 2025 tariff shock (charts). The Nasdaq composite sank 5.5%, entering correction territory, while the Dow dropped 3.4% and the PHLX Semiconductor index plunged 12.0%. The cold shower we warned might follow a Democratic sweep arrived a day late.

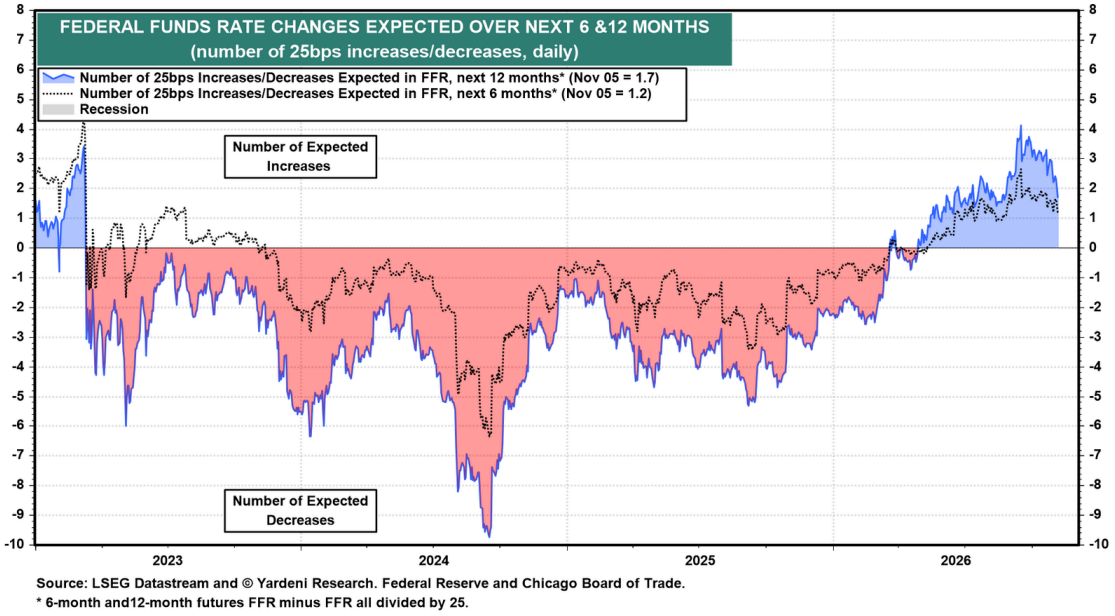

We believe that Wednesday's rally was driven by short covering as two key risks failed to materialize. First, investors feared President Donald Trump might contest close elections, potentially triggering a constitutional crisis. Instead, on Wednesday morning, he acknowledged the Democrats' decisive victory and said he is willing to work with them. Second, investors feared an immediate re-escalation of the war in Iran after the midterms. But oil prices fell sharply on Wednesday on reports that the US and Iran are pursuing a diplomatic solution.

On Thursday, investors began discounting the implications of the Democratic sweep for the economy's golden goose: the AI investment boom.

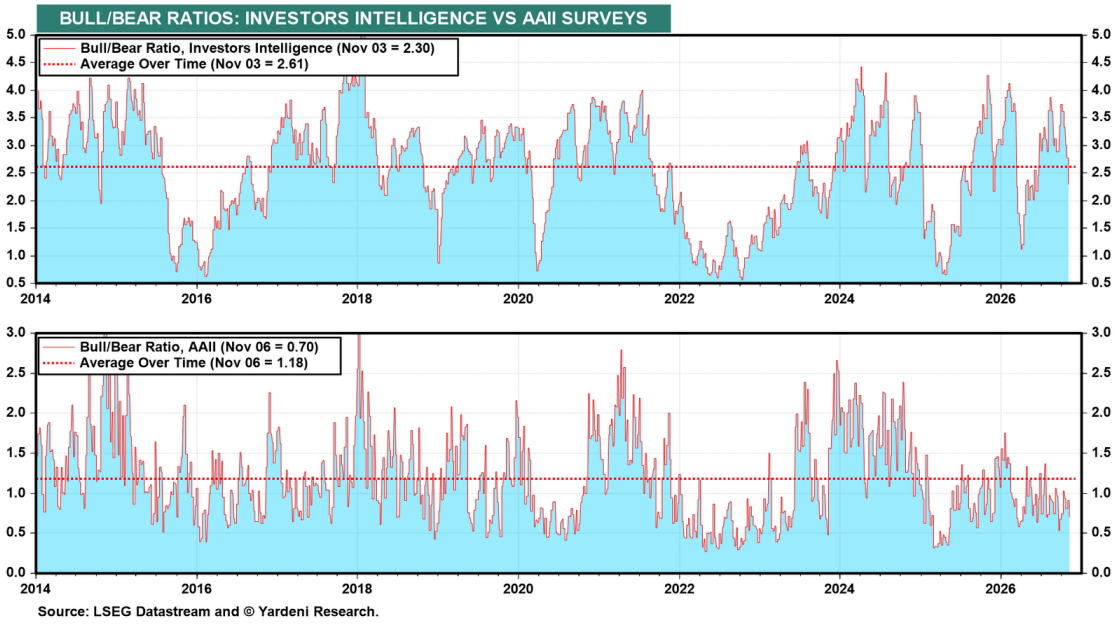

The political backlash against data centers is gaining momentum, with 76% of voters opposing new facilities in their communities, according to NBC exit polls. Perhaps most consequentially, Texas, which accounts for nearly 30% of planned US data center additions in 2028, elected Gina Hinojosa as governor after she promised to halt new approvals. Goldman Sachs estimates that states facing possible restrictions account for roughly 45% of planned US data center capacity. Tougher permitting and higher costs could delay billions in investment and postpone returns for hyperscalers. Given the AI boom's growing importance to economic activity, the implications extend well beyond technology.

As a result, the 10-year Treasury yield fell another 7bps to 4.83% today, reflecting safe-haven demand and fears of weaker economic growth. Investors also pared back Fed tightening expectations, with futures pricing just 1.7 quarter-point hikes over the next 12 months (chart).

We view the political backlash as another constraint on AI investment, alongside financial and physical bottlenecks. But these are speed bumps, not roadblocks, even though Wall Street seems to be pricing in the latter. We think that's overdone. As AI adoption broadens and productivity gains accelerate, demand for compute will keep growing. Data centers will get built, albeit at a slower pace. Speed bumps should prevent the AI boom from moving too fast and crashing around the next curve.

That's why we view Thursday's selloff as a buying opportunity. Our favorite Boom-Bust Ratios likely turned even more bearish after today's selloff (chart). From a contrarian perspective, panic attacks tend to be bullish. Our Roaring 2020s scenario remains on track, and we are sticking with our 7,900 year-end S&P 500 target.

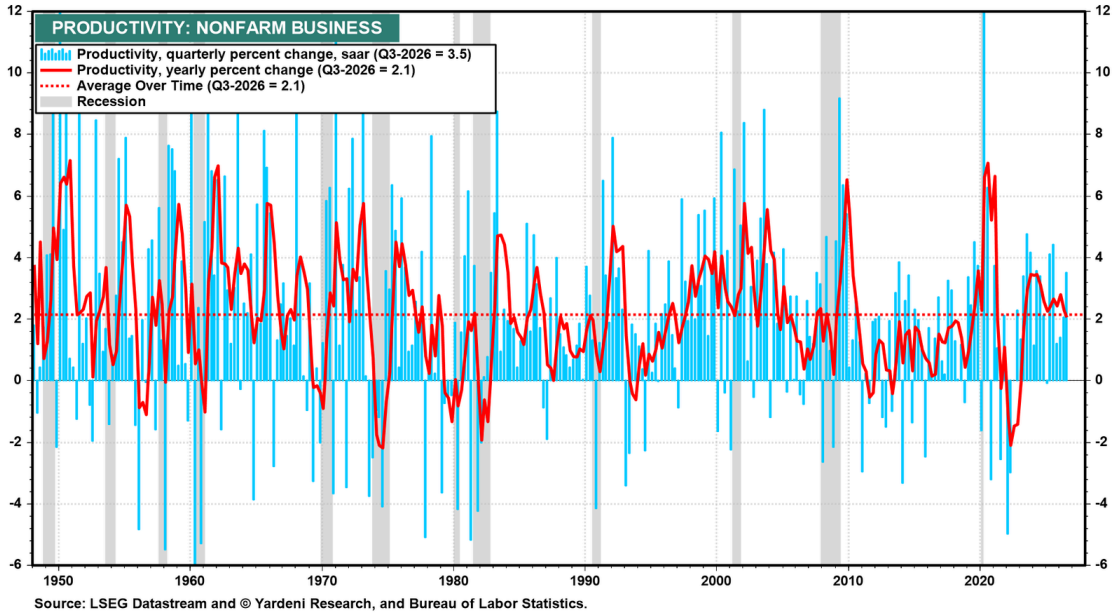

Late-breaking news: Texas Governor-elect Gina Hinojosa was interviewed after the market closed on CNN and said, "All currently permitted data centers in Texas will be allowed to finish construction." This essentially covers all of 2027 and likely most of 2028. She plans to pursue legislation requiring newly permitted data centers to pay taxes, protect consumers from higher power prices, preserve water availability, use union labor, and give "Texans a seat at the table."

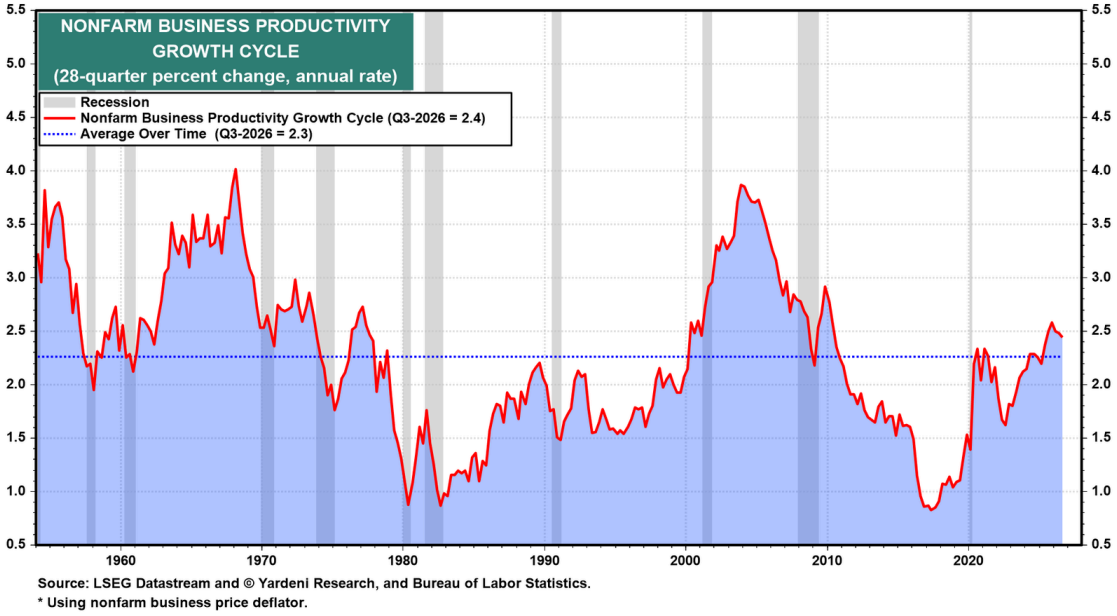

II. On Productivity and Labor Market Conditions

While Wall Street frets about a potential slowdown in the AI investment boom, the latest data show that productivity growth is already accelerating, even as AI adoption remains in its early stages. Here is more:

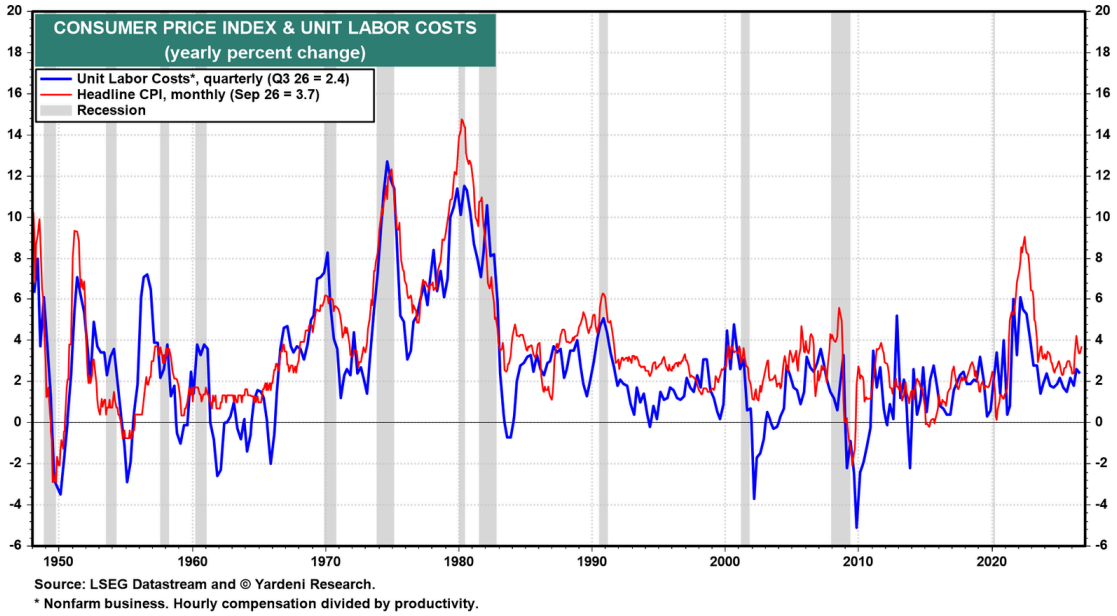

(1) Productivity. Nonfarm business productivity jumped 3.6% q/q (saar) during Q3, the strongest pace since Q3-2025, while rising 2.1% y/y (chart).

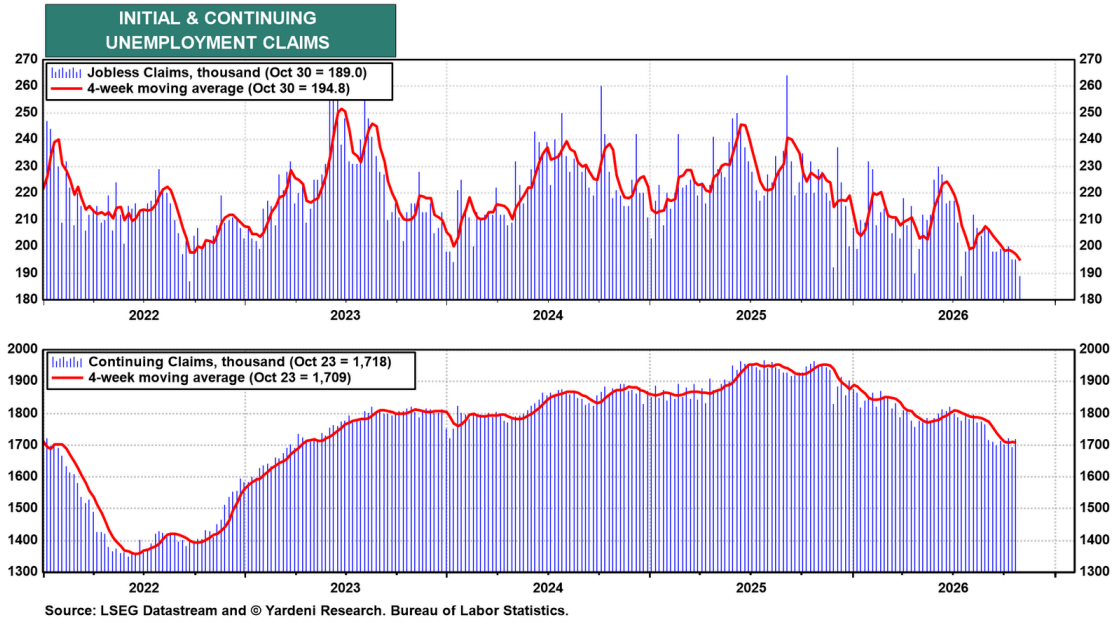

The seven-year productivity growth cycle is increasing by 2.4% annually, exceeding its historical average (chart). In our Roaring 2020s scenario, productivity growth is likely to rise to 3.5%-4.0% over the remainder of this decade.

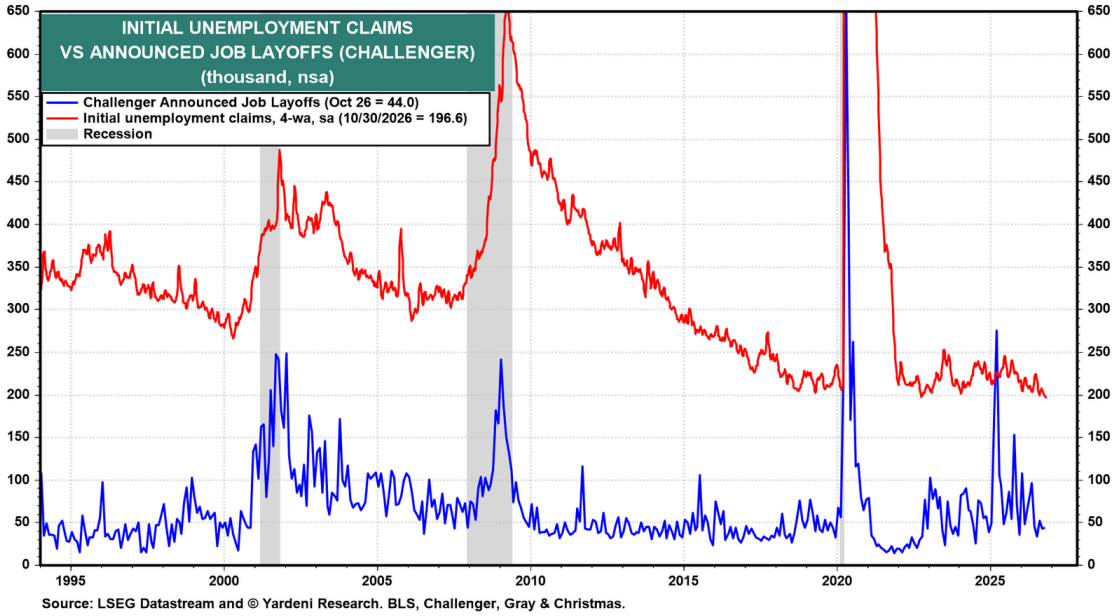

(2) Unit labor costs & inflation. Unit labor costs is measured as hourly compensation divided by productivity. It rose just 2.4% y/y in Q3-2026, reinforcing our view that the labor market is not currently a source of inflationary pressure (chart).

(3) Unemployment claims. Initial jobless claims fell to just 189,000 during the week ended October 31 (chart). The four-week moving average dropped to 194,750, its lowest level since 1969! Continuing claims also remain low. The message is clear: The Fed has little reason to worry about the health of the US labor market.

(4) Layoff announcements. Challenger reported just 44,000 announced job cuts in October, down 71% y/y and the lowest October reading since 2023, reinforcing the message that layoffs remain subdued (chart).

Subject: 全球十大財經事件｜2026/11/06 07:51（台灣時間）
Date: 40 minutes ago

MACROMICRO RESEARCH｜每日財經摘要

全球十大財經事件｜2026/11/06 07:51（台灣時間）

涵蓋區間為近72小時（台灣時間11/3 07:51至11/6 07:51）。入選事件中，近12小時4件、12至48小時5件、48至72小時1件。

本期十大事件

1. 11/5 英國央行升息1碼至4.00%，為2023年8月來首度升息
2. 11/5 墨西哥央行意外降息1碼至6.25%，為2022年3月來最低
3. 11/3 澳洲央行升息1碼至4.85%，創2008年來新高
4. 11/5 費城半導體指數重挫逾12%，創2020年3月來最大跌幅
5. 11/5 Fed官員哈瑪克、巴爾金表態支持漸進升息
6. 11/5 台股重挫1,374點至41,575點，連六黑跌破42,000點
7. 11/5 台灣10月CPI年增2.33%，連六個月高於2%警戒線
8. 11/5 日銀9月會議紀要顯示委員一致支持持續升息
9. 11/5 豐田第二財季營業利益年增34%，全年財測上修15%
10. 11/4 中國10月RatingDog服務業PMI降至50.8，創三個月新低

事件 1

11/5 英國央行升息1碼至4.00%，為2023年8月來首度升息

五大重點

1 英國央行貨幣政策委員會11/5以8比1決議，將政策利率由3.75%調升1碼至4.00%，為2023年8月以來首度升息，符合市場預期；委員曼恩投反對票，主張一次升息2碼至4.25%。

2 英國9月CPI（消費者物價指數）年增3.5%，高於8月的3.1%，能源貢獻約1個百分點；央行預測通膨將在2027年第二季升至近5%，較7月預測高約1.25個百分點，2028年底才回到2%目標。

3 總裁貝利說明，能源價格帶來的通膨壓力已在傳導途中，足以支持升息，但這不代表將展開一連串升息；他同時表示，除非中東衝突化解，這次不太可能是最後一次升息。

4 委員看法分歧，首席經濟學家皮爾認為只升息一次恐怕不夠，委員泰勒則稱自己的贊成票是「先保險一次」；決議後交易員把12月再升息機率提高到約35%，英國10年期公債殖利率收在5.132%。

5 央行情境分析指出，若油價連續兩年高於每桶100美元，通膨高峰將達6.2%；這次預測只用到10月下旬資料，此後油價已因美國期中選舉結果回落逾7%，下次決議在12/17。

三大結論

1 英國央行繼澳洲、瑞典之後升息，顯示能源衝擊已讓部分央行由觀望轉為動手，與Fed、歐洲央行、日銀10月同步按兵不動形成對比；各國政策利差擴大，匯率與資金流的影響需逐一評估。

2 英德公債利差有相當部分來自兩國政策利率差距，英國升息會使利差再擴大，但這反映貨幣政策差異，不能直接視為英國主權信用惡化；配置歐洲資產仍以低負債、海外收入與成本轉嫁能力選股。

3 當油價回落且核心服務價格同步降溫時，12月再升息機率將下降，長債價格壓力可望緩解；若能源與工資再度加速，應延後增加長天期公債，並以短券維持調整彈性。

事件 2

11/5 墨西哥央行意外降息1碼至6.25%，為2022年3月來最低

五大重點

1 墨西哥央行11/5宣布將基準利率由6.50%調降1碼至6.25%，11/6生效，為2022年3月以來最低；市場原本預期維持不變，這是連續三次會議按兵不動後首度調整，決議未獲一致通過。

2 墨西哥10月上半月整體通膨年增3.62%，高於9月的3.45%，核心通膨3.78%，主要來自服務；央行同時把2026年第四季整體與核心通膨預測都上修至3.70%。

3 央行聲明說明降息理由，包括去通膨進程延續、經濟存在閒置產能使匯率波動對物價的傳導有限，以及國內未見需求壓力；央行並表示這次降息屬一次性調整。

4 副總裁希斯與博爾哈投下反對票；央行表示將把利率維持在6.25%一段較長時間，以協助通膨收斂至3%目標，並維持2027年第四季達標的預估。

5 決議後墨西哥披索兌美元走貶至約18.8；央行也承認預測期間通膨風險仍偏向上行，有機構警告降息效益有限，卻可能增加匯率波動與央行信譽風險。

三大結論

1 墨西哥在英國、澳洲、瑞典接連升息之際逆勢降息，顯示各國依自身通膨與景氣條件分化；新興市場不能用單一的全球升息循環概括，需逐一檢視通膨、利差與匯率。

2 降息縮小墨西哥與美國的利差，在Fed 12月仍可能升息之下，披索的貶值壓力上升；若匯率轉弱推高進口物價，央行「一次性」降息的承諾將面臨考驗。

3 當披索持續走貶且通膨回升時，應提高新興市場貨幣部位的避險比例；匯率處理以漸進調整為主，因為短期匯率方向通常比企業財報更難驗證。

事件 3

11/3 澳洲央行升息1碼至4.85%，創2008年來新高

五大重點

1 澳洲央行11/3將現金利率目標由4.60%調升1碼至4.85%，為今年第五次升息，利率升至2008年11月以來最高；貨幣政策委員會以6比3通過，3位委員主張維持不變。

2 央行聲明指出，通膨仍高且範圍廣泛，通膨展望大幅上修，預估未來一年維持在3%以上，要到2027年底才回到2%至3%目標區上緣，比先前預測晚約三季。

3 央行列出的升息原因包括中東衝突推高燃料與原物料價格、國內產能壓力比原先判斷略緊，以及AI相關投資推升科技產品價格；許多企業反映成本壓力並計畫漲價。

4 央行也指出失業率已上升，且預估升幅將超過8月預測；總裁布洛克表示利率升至4.85%後，部分家庭可能感受到類似衰退的壓力，政策將轉向依數據決定。

5 央行警告通膨預期上升並固化的風險正在增加，部分衡量指標近期已走高；聲明並稱政策已處於可因應情勢發展的位置，將持續關注後續數據。

三大結論

1 澳洲央行把AI相關投資列為推升科技產品價格的原因之一，顯示AI建置的成本效應已進入央行通膨評估，與能源衝擊共同墊高通膨，增加央行維持緊縮的理由。

2 6比3的分歧與失業率上升，顯示升息已接近經濟可承受的邊界；後續若失業率進一步上升，澳洲央行續升的空間將縮小，政策較可能轉為暫停觀察。

3 當各國通膨預期持續上升時，應預期央行延長緊縮，並以短券維持流動性；長天期債券只在核心通膨與工資同步降溫時才逐步增加，不急於一次補足。

事件 4

11/5 費城半導體指數重挫逾12%，創2020年3月來最大跌幅

五大重點

1 美股11/5全面重挫，費城半導體指數下跌逾12%，創2020年3月以來最大單日跌幅，30檔成分股全數下跌；那斯達克指數跌5.52%，較10/6高點回落11.9%，進入技術修正。

2 標普500指數跌4.36%至7,353點，道瓊跌3.44%至51,523點，三大指數同創2025年4月以來最大單日跌幅，標普500成分股市值蒸發約3兆美元；輝達跌逾9%，美光跌約17%。

3 賣壓主因是民主黨取得國會兩院多數後，市場擔心資料中心建設遭加強監管或暫停；與民主黨同陣營的參議員桑德斯呼籲全國暫停興建資料中心，記憶體與儲存股跌幅最深。

4 避險買盤湧入美債，10年期殖利率降至約4.83%、近兩個月低點；CME FedWatch顯示12月升息1碼機率由11/5的81.5%降至11/6的70.9%，比特幣跌破7.66萬美元。

5 美光傳出因勞資糾紛暫停台灣一座約45億美元的新廠工程；11/4 AI晶片股已率先走弱，11/5賣壓擴及歐洲，歐洲科技類股跌逾4%，台積電ADR跌近11%。

三大結論

1 這次重挫源自監管與政策疑慮，而非已公布的訂單或財報轉弱；上游龍頭存貨天數仍在下降、產能緊缺未解，目前沒有客戶取消訂單或回款惡化的證據，高品質上游仍是相對優勢。

2 美債殖利率下滑與科技股重挫並存，顯示股債反映不同資訊；增加風險前須確認投資級信用利差穩定、企業現金流支持，不能只因無風險利率下降就加碼。

3 當價格下跌但上游存貨下降、公司指引維持、投資級信用穩定時，應以小額分批檢驗；若資料中心延後伴隨訂單取消、回款變差與融資困難，應減少高波動衛星並下修中期評分。

事件 5

11/5 Fed官員哈瑪克、巴爾金表態支持漸進升息

五大重點

1 克里夫蘭Fed總裁哈瑪克11/5在蘇黎世演講表示，貨幣政策需要轉向限制性立場，才能及時讓通膨回到2%，並主張盡可能以頻率較高、幅度較小的方式升息。

2 哈瑪克認為小步升息對經濟與金融體系衝擊較小，也能降低政策落後、通膨心態固化的風險；她在10月FOMC（聯邦公開市場委員會）會議與理事庫克一同投下反對票，主張升息。

3 里奇蒙Fed總裁巴爾金同日在夏洛特表示支持漸進升息，理由是當前不確定性高、期間仍會獲得新資訊，但未表態利率最終需要升到多高；他是2027年FOMC票委。

4 官員表態的背景是9月PCE（個人消費支出）物價年增3.6%、核心PCE年增3.1%仍偏高；Fed 10月以10比2維持利率於3.75%至4.00%，聲明表示需要累積更多資訊再決定政策立場。

5 市場仍押注12月升息，CME FedWatch顯示11/6升息1碼機率為70.9%，低於11/5的81.5%，主要因美股重挫推升避險需求；美國10月非農就業將於11/6公布。

三大結論

1 兩位官員都偏好漸進而非大幅升息，與10月聲明的觀察立場一致；Fed處於暫停觀察而非寬鬆循環，12月是否升息仍取決於核心通膨與需求，不宜把美股重挫解讀為降息訊號。

2 若就業轉弱而能源通膨仍高，Fed決策將更困難，不能預設失業率上升就立刻降息；短券此時提供到期現金與調整彈性，長久期股票則需要更高的現金流可見度。

3 當10月非農與後續物價顯示房租、工資和服務同步加速時，應上修12月升息風險並延後增加長債；若核心通膨降速、招聘維持溫和，才逐步延長存續期間。

事件 6

11/5 台股重挫1,374點至41,575點，連六黑跌破42,000點

五大重點

1 台股加權指數11/5下跌1,374.19點、跌幅3.2%，收41,574.72點，連續第六個交易日下跌，為7/31以來首度收在42,000點以下；盤中最低來到41,513.57點。

2 外資連續五個交易日賣超，累計約5,120億元；權值前50大個股中有11檔跌停，電子權值股是主要拖累，金融、紡織、水泥與橡膠類股相對抗跌。

3 賣壓延續11/4美國AI晶片股的跌勢，市場擔心民主黨掌控國會後美國資料中心建設受限，加上AI評價與政策不確定性升高；台股半導體權重高，受衝擊最直接。

4 基本面數據尚未轉弱，台灣9月外銷訂單1,142.1億美元、年增62.4%，台積電10月法說會上修全年美元營收成長至約44%，這次下跌主要反映評價與政策風險。

5 11/5晚間費城半導體指數再跌逾12%、台積電ADR跌近11%，韓國三星電子與SK海力士11/6盤前分別下跌12%、15%，亞洲科技股短線仍面臨賣壓。

三大結論

1 外資賣超使台股與台幣同時承壓，延續今年股匯分化格局；企業保留美元與海外投資需求也削弱出口順差對台幣的支撐，台幣投資人應把股票與匯率曝險分開管理。

2 台股需求面仍有支撐，但指數高度集中於AI供應鏈，限制短期加碼速度；美股半導體、台股晶圓代工與韓股記憶體看似跨市場，實際共享同一資本支出循環，應合併計算AI曝險上限。

3 當營收、庫存週轉與市場廣度一起改善時，應逐步提高曝險；若訂單與回款轉弱，應先減少高波動供應鏈部位，不把每次回檔都視為買進機會。

事件 7

11/5 台灣10月CPI年增2.33%，連六個月高於2%警戒線

五大重點

1 主計總處11/5公布10月CPI年增2.33%，低於9月的2.74%（31個月新高），但已連續六個月高於2%警戒線；扣除蔬果與能源的核心CPI年增2.23%。

2 外食費年增3.01%，連續五個月高於3%；進口物價以新台幣計年增33.32%，為1977年編製以來最大漲幅，其中礦產品年增58.35%，機械及電氣設備年增31.7%。

3 主計總處說明，10月漲幅縮小主因是蔬菜價格回落、電費與個人用品漲幅縮小，以及今年中秋節不在10月、與去年基期不同；機械設備進口價格上漲則來自AI需求。

4 主計總處官員蔡秀惠表示，11月CPI年增率可能仍高於2%，且有機會超過10月的2.33%；電子零組件漲價多用於出口，對國內物價的影響有限。

5 進口物價以美元計年增26.72%，為1980年3月以來最大漲幅，國際油價推升礦產品進口價格；上游成本能否轉嫁到民生物價，是11月CPI的觀察重點。

三大結論

1 央行先前表示升息關鍵在明年通膨能否如期回落；10月CPI雖降溫，但進口物價創紀錄、主計總處預期11月漲幅可能擴大，年底升息不是台幣配置的必要假設，但也不宜完全排除。

2 重貼現率維持2.00%而CPI高於2%，代表實質利率仍為負值（推算），台灣與海外利差擴大，加上企業保留美元，台幣升值條件仍弱，股匯分化可能延續。

3 當核心CPI與外食費持續高於2%、進口成本向下游擴散時，應提高央行升息情境的權重並檢視台幣避險比例；若通膨如期回落，則維持依支出幣別安排現金的原則。

事件 8

11/5 日銀9月會議紀要顯示委員一致支持持續升息

五大重點

1 日銀11/5公布9/17至18貨幣政策會議紀要，該次會議以7比2將政策利率升至1.25%，為1995年以來最高；紀要顯示委員一致認為，日銀應持續升息並調整貨幣寬鬆程度。

2 委員的依據是基礎通膨已接近2%、金融環境仍屬寬鬆；多位委員指出，政策目標已由推升基礎通膨，轉為讓基礎通膨穩定在2%附近。

3 對升息步調看法分歧，有委員認為若物價出現超漲跡象需加快升息，另有委員主張較快接近中性利率，也有委員認為基礎通膨上升不快，無需倉促行動。

4 委員關注原油自7月以來上漲約50%，並提到沙烏地輸油管停運、紅海航運不穩與美中原油儲備下降，可能造成實體原油短缺的風險。

5 日本內閣府代表（列席日銀會議）要求日銀審慎檢視過去升息的累積效果、參考中性利率估計，並在經濟與市場過度波動時適當因應，但未要求暫停升息。

三大結論

1 紀要確認日銀仍處於升息循環，與10月按兵不動並不矛盾；補貼退場推升通膨在日銀預期之內，下一次升息較可能落在今年12月或明年1月，但仍需看通膨延續性與內需。

2 日本家庭實質消費仍弱，限制加快升息的空間；若利率上升壓低本益比的速度快於獲利成長，日股總報酬將受壓，選股宜偏重設備、材料與具現金流的企業。

3 當通膨持續高於2%且實質消費改善時，應提高12月升息情境的權重並維持日債低配；日圓快速升值會壓縮出口換算收入，持有出口股時應另外檢查匯率敏感度。

事件 9

11/5 豐田第二財季營業利益年增34%，全年財測上修15%

五大重點

1 豐田汽車11/5公布7至9月營業利益1.13兆日圓，年增34%，為六季以來首度成長，高於分析師中位數預估的9,920億日圓。

2 豐田將截至2027年3月的全年營業利益財測上修15%至3.9兆日圓，8月時的財測為3.4兆日圓。

3 公司說明，獲利成長來自日圓走弱與高毛利油電混合車需求強勁，抵銷中國與中東銷售下滑；首席會計主管表示，公司以銷售努力與成本削減吸收中東情勢與原物料價格飆漲的衝擊。

4 豐田股價11/5午盤大漲逾14%，有望創2008年以來最大單日漲幅；早盤日本車廠已因市場預期民主黨推動撤銷關稅而普遍走高，本田上漲7.2%。

5 這次獲利改善主要依賴匯率與產品組合，而非整體銷量擴張；中國與中東銷售仍在下滑，日圓若轉強將直接影響海外獲利換算。

三大結論

1 豐田獲利回升主要來自匯率與產品組合，與日本經濟「外熱內冷」的結構一致；日股盈餘改善仍屬選擇性，不宜外推為整體日股全面上修。

2 日銀若在12月或明年1月升息，日圓可能走強而壓縮出口換算收入；弱日圓則提高能源進口成本，匯率變動對汽車股不能一概視為利多。

3 當日圓快速升值時，應重新檢查出口企業的收入換算與財測假設；若實質消費改善、盈利擴散至更多產業，才考慮提高日本指數的整體權重。

事件 10

11/4 中國10月RatingDog服務業PMI降至50.8，創三個月新低

五大重點

1 中國10月RatingDog服務業PMI（採購經理人指數）由9月的51.6降至50.8，為三個月來最慢擴張，也是7月以來首度下滑，但仍高於50的榮枯線。

2 新訂單成長步調與9月相當，出口訂單連續第六個月增加，為2024年以來最長的增長期；企業持續增聘全職與兼職員工以消化工作量。

3 投入成本以五個月來最快速度上升，主因原物料、燃料與薪資；但在激烈競爭下，企業連續第二個月調降售價，國慶黃金週對價格的支撐有限。

4 企業信心降至7月以來最低，業者指出投入價格上升與競爭加劇是主因；成本上升而售價下降，代表服務業利潤空間受到擠壓。

5 企業反映競爭加劇並持續降價，若成本續升而售價無法轉嫁，服務業擴張可能進一步放緩；即將公布的10月物價數據是下一個驗證點。

三大結論

1 服務業成本上升、售價下跌，與工業端下游難以轉嫁成本的格局一致；中國價格回升集中在上游與出口，尚未轉成居民需求的全面修復。

2 人行以隔夜逆回購與結構性工具壓低實際資金成本，但內需疲弱的根源在居民收入與資產價格，仍需地方支出與收入端政策接棒，服務業信心才可能回穩。

3 當零售、民間投資與房市資金連續改善時，才應考慮提高中國股市整體比重；在此之前維持選擇性配置，以出口型技術製造作衛星，並以毛利與回款確認。

待確認

1. 與上一輪比對結果：比對「全球十大財經事件｜2026/11/05 07:51（台灣時間）」，以下主題因重複而排除：美國期中選舉結果、瑞典央行升息、人行股票回購增持再貸款降息、11/4油價重挫、11/4道瓊大漲與AI晶片股下跌、高通財報、美國10月ISM服務業PMI、歐元區10月CPI初值、11/4科創50大漲、諾和諾德財測，均未重列。

2. 新事實晚於上一輪資料同步時間（11/5 07:51）：事件4以11/5美股收盤（台灣時間11/6 05:00）的新低為主體，11/4晶片股下跌僅一句背景帶過；事件6台股11/5收盤為台灣時間11/5 13:30；事件8日銀紀要於台灣時間11/5 07:50公布，上一輪未列入事件，本輪依重要性選入。

3. 事件3澳洲央行11/3升息已在11/4報告列出，但不在上一輪（11/5）報告中，依「72小時內利率調整必須單獨成件並排前三」規則再次列入；同期捷克（升至4%）、亞美尼亞、摩爾多瓦升息屬非主要經濟體，未入選。挪威央行11/5維持利率不變。

4. 事件2墨西哥央行投票人數有不同報導，本文只寫兩位副總裁反對；「一次性調整」取自快訊轉述。披索約18.8為媒體盤中報價。

5. 事件4費城半導體指數跌幅有12.25%與12.5%兩種報導，本文寫「逾12%」；美光暫停台灣新廠工程只有單一來源，公司尚未發布正式聲明。

6. 事件6外資五日累計賣超5,120億元取自單一來源；台積電11/5台股收盤跌幅未查得官方數據。

7. 事件7實質利率為負值屬推算（重貼現率2.00%減CPI年增2.33%）。

8. 事件9豐田股價漲幅早盤報導為8.5%、午盤報導逾14%，本文採午盤；擴大股票回購與日圓假設未查得官方新聞稿全文，未採用。

9. 九大分類中未單獨入選者：台灣公司本期無重大財報公告，台積電以台股事件涵蓋；中美國際政治經濟競爭方面，中國商務部11/5僅延續對美正丙醇反傾銷與反補貼稅五年，份量較低；原物料與地緣政治方面，布蘭特原油11/5反彈3.3%至97美元，並傳出胡塞武裝控制曼德海峽，尚無官方確認，未單獨成件。

10. 六大實質內涵中本期未涵蓋者：政府與財政政策無重大新措施；AI重要發展中OpenAI發布GPT-6 Cyber、Google傳投資170億美元在懷俄明州建資料中心，均以單一來源為主，未單獨成件。

11. 尚未公布、留待下一輪觀察：11/6美國10月非農就業、中國10月貿易與物價數據、台積電10月營收、11/18輝達財報。

資料同步時間

資料同步時間：台灣時間2026/11/06 07:51（快訊更新至11/06 07:18）；涵蓋區間：台灣時間11/3 07:51至11/6 07:51；比對之上一輪報告主旨：「全球十大財經事件｜2026/11/05 07:51（台灣時間）」。
