摘要 Abstract

Existing fiscal policies may roll out at a faster pace, amplifying supply disruptions in Q3.

Fiscal stimulus in H1 followed an early strong-then-slow trajectory, with sluggish local fiscal activity in March–April weighing on growth stabilization efforts. Ample room remains for policy execution in H2; given marginal softening in domestic demand, policy implementation is set to accelerate in Q3, bringing a peak in government bond issuance.

Preliminary estimates place net government bond financing at approximately RMB 7.21 trillion in H2, broken down into RMB 4.1 trillion for Q3 and RMB 3.11 trillion for Q4. Issuance volume may peak in September, posing temporary strains on narrow liquidity.

Risks: Bond supply exceeding expectations.

财政存量政策落地节奏加快，Q3供给扰动上升。上半年财政发力“先快后慢”，3-4月地方财政乏力拖累稳增长力度。下半年存量空间充足，考虑到内需边际走弱，预计三季度政策落地将提速，政府债发行迎来高峰。初步测算，下半年政府债净融资规模约7.21万亿元，其中Q3、Q4政府债净融资规模分别为4.1万亿、3.11万亿，高峰可能在9月，或对狭义流动性构成阶段性挑战。

风险因素：1) 供给超预期。

Fiscal policy delivered frontloaded stimulus in January–February, yet local fiscal efforts slowed markedly in March–April, weighing on the overall growth-stabilizing effect of fiscal spending. **Government bond issuance proceeded at a subdued pace in the first five months, leaving ample room for existing policy tools in the second half of the year.** Specifically, around RMB 3.37 trillion of new local government bonds remain to be issued, alongside RMB 3.08 trillion of net financing left for general treasury bonds, so there is little immediate need for additional new stimulus policies.

Domestic demand has weakened marginally since March, and implementation of existing policies is expected to accelerate in Q3. Local bond issuance will likely pick up in July, while new policy-backed financial instruments will roll out faster in Q3, bringing heightened supply-side disruptions to liquidity. We project total net government bond financing of RMB 7.21 trillion in H2, split into RMB 4.1 trillion in Q3 and RMB 3.11 trillion in Q4, with the financing peak likely falling in September.

1. Fiscal Momentum Has Eased Since March

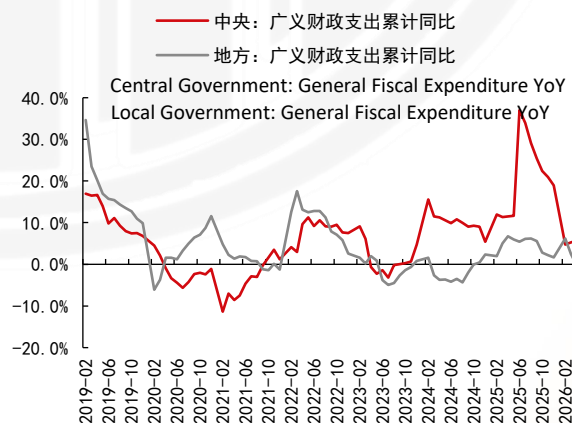

Fiscal stimulus was frontloaded in January and February, but local government spending momentum weakened from March onward, dragging down the overall fiscal support for growth. The year-on-year growth rate of broad fiscal spending rose to a relatively high 6.07% in the first two months. However, fiscal outlays expanded at a slower clip after March, with the cumulative broad spending growth cooling to just 0.44% YoY for the first four months. Breaking down central and local authorities: cumulative broad fiscal spending by the central government grew 5.64% YoY over Jan–Apr, while local broad fiscal spending contracted 0.20% YoY. The slowdown in local fiscal outlays undermined aggregate growth stabilization.

Figure 1: Broad Fiscal Spending Growth Slid in March–April

Sources: Wind, CITIC Futures

Figure 2: Local Fiscal Impetus Weakened Sharply in March–April

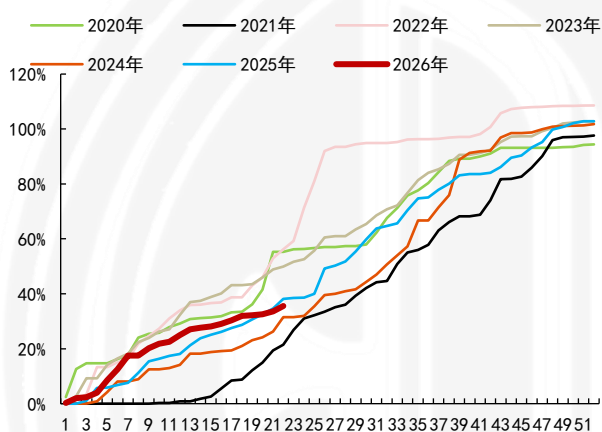

Sources: Wind, CITIC Futures

Local bond issuance lagged behind schedule in the first five months, with RMB 3.37 trillion of new local bonds and RMB 578.3 billion of refinancing bonds remaining for June–December.

Over Jan–May, local governments issued RMB 339.6 billion of new general-purpose bonds and RMB 1.50 trillion of new special-purpose bonds, bringing cumulative new local bond issuance to RMB 1.83 trillion, completing only 35.56% of the full-year quota, a slower pace than the same period last year. The remaining volume of new local bonds stands at roughly RMB 3.37 trillion.

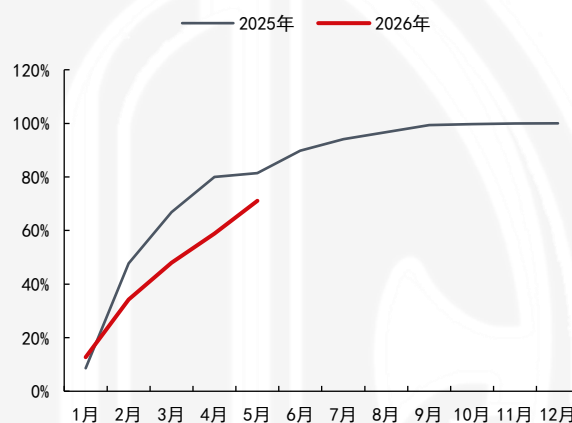

Refinancing bond issuance has also lagged last year's pace. Cumulative refinancing bond issuance reached RMB 1.42 trillion in Jan–May, down RMB 207.4 billion YoY, representing a completion rate of 71.08%, versus 81.46% a year earlier—a gap of nearly 10 percentage points. RMB 578.3 billion of refinancing bonds are left to be issued from June through December.

Figure 3: New Local Bond Issuance Lagged Schedule in Jan–May

Sources: Wind, CITIC Futures

Figure 4: Refinancing Bond Issuance Also Slower in Jan–May

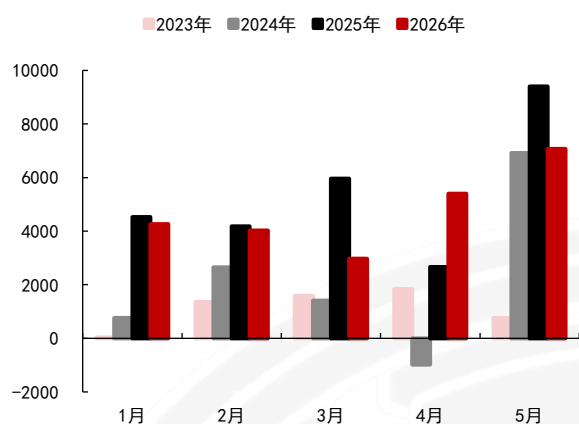

Sources: Wind, CITIC Futures

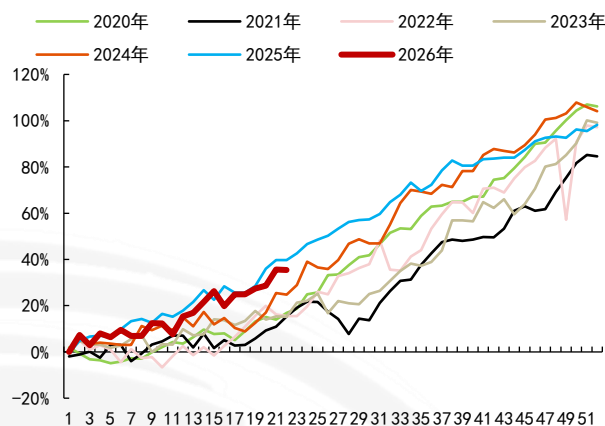

Treasury bond issuance edged slower than last year but remains brisk by historical standards, with RMB 4.32 trillion of net treasury financing outstanding for June–December.

Cumulative net treasury financing hit approximately RMB 2.37 trillion in Jan–May, a YoY drop of RMB 300.4 billion, mainly due to delayed issuance of special treasury bonds for capital injection into central financial institutions this year. The cumulative completion rate stood at 35.48% for Jan–May, versus 39.70% last year, a roughly 4 percentage point slowdown. Even so, issuance volume in the first five months ranks among the fastest since 2020 compared with historical readings.

Breakdown by bond type: Ultra-long-term special treasury bonds recorded cumulative issuance of RMB 368 billion in Jan–May, up a modest RMB 5 billion YoY with minor volume changes, yet the share of 30-year tenors climbed from 58.68% last year to 69.29%. General treasury bonds delivered RMB 2.01 trillion of cumulative net financing, while capital-injection special treasury bonds had not commenced issuance by end-May. Outstanding net treasury financing of RMB 4.32 trillion remains for June–December, consisting of RMB 3.08 trillion general treasury bonds, RMB 932 billion ultra-long-term special treasury bonds and RMB 300 billion capital-injection special treasury bonds, summing to RMB 4.32 trillion in total.

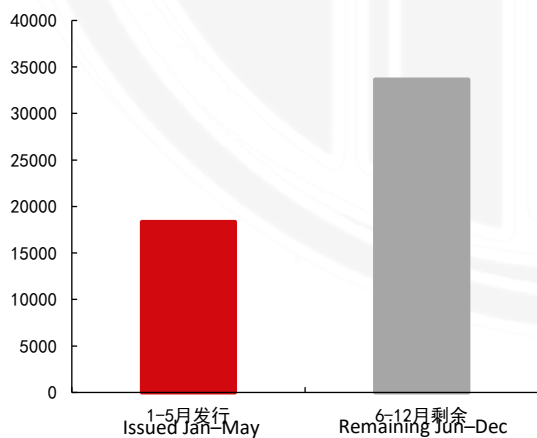

Figure 5: Monthly Net Treasury Bond Financing (RMB 100 mn)

Sources: Wind, CITIC Futures

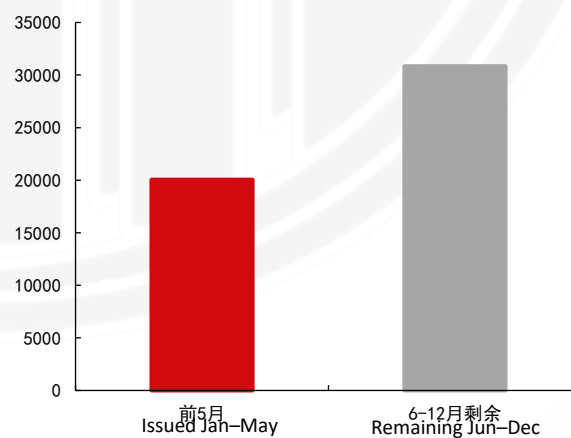

Figure 6: Cumulative Net Treasury Bond Completion Rate (Jan-May)

Sources: Wind, CITIC Futures

In summary, fiscal stimulus was frontloaded in Jan-Feb, yet local fiscal efforts weakened substantially in March-April, dampening overall growth support. Issuance of both new local bonds and refinancing bonds fell behind schedule in the first five months, leaving RMB 3.37 trillion of new local bonds and RMB 578.3 billion of refinancing bonds to be issued from June onward. Treasury bond issuance is slightly slower than last year but relatively fast historically, with RMB 4.32 trillion of net treasury financing remaining for H2, including RMB 3.08 trillion of general treasury bonds. **Ample room exists for existing fiscal policies in H2, making fresh large-scale stimulus unnecessary for the time being.**

2. Faster Rollout of Existing Policies & Accelerated Government Bond Issuance Expected in Q3

Implementation of existing policies is poised to speed up; local bond issuance will pick up in July, and new policy-backed financial instruments will launch at a faster pace in Q3, bringing greater supply-side liquidity shocks. We forecast total net government bond financing of RMB 7.21 trillion in H2: RMB 4.1 trillion in Q3 and RMB 3.11 trillion in Q4, with the peak likely landing in September.

Economic data has stayed soft since March, pointing to accelerated delivery of existing policies in Q3. While high-tech new sectors have maintained solid prosperity this year, traditional industries have cooled marginally since March, dragging down domestic demand indicators recently. **On consumption: retail sales growth has softened starting March**, posting a YoY contraction of -0.6% in May—the first negative reading since 2023. Splitting above-quota retail goods into trade-in and non-trade-in categories reveals slowing goods consumption is not solely driven by trade-in incentives; sales growth of non-trade-in merchandise also declined.

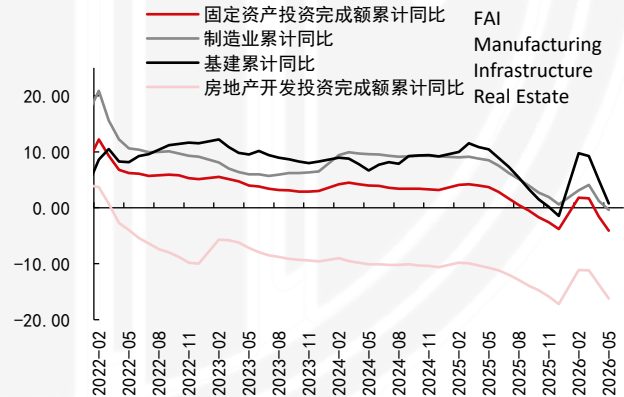

On investment: fixed-asset investment (FAI) growth has weakened marginally since Q2, with cumulative FAI down 4.1% YoY over Jan–May. This partly reflects base effects, and partly stems from fading local fiscal spending momentum since March plus sustained contraction in property investment, which together weigh on headline investment. Against this backdrop, **there is stronger impetus to expedite existing policy rollouts, which will coincide with faster government bond supply in Q3.**

Figure 9: Monthly YoY Growth of Above-Quota Retail Goods Sales (%)

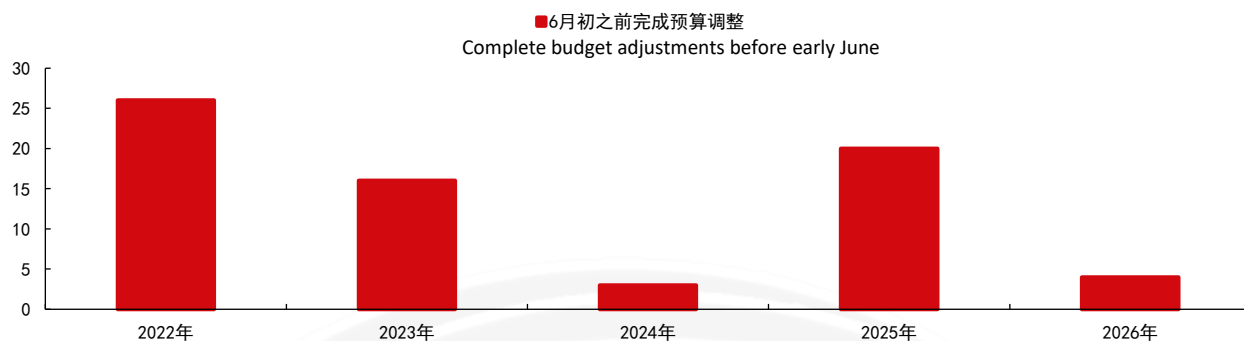

Figure 10: Cumulative YoY Growth of Fixed-Asset Investment (%)

Sources: Wind, CITIC Futures

(1) Local Government Bonds: Projected Net Financing of RMB 2.12 tn in Q3, 1.20 tn in Q4

New local bond issuance may stay muted or edge up slightly in June. As of May 29, merely four provinces completed budget adjustments in May, far fewer than in 2025. The slower budget adjustment timeline signals subdued new local bond supply in June, mirroring 2024 and pointing to heavier supply pressure in Q3. We expect new special-purpose bond issuance to rise to RMB 300 billion in June.

Figure 11: Slower Progress of Local Government Budget Adjustments This Year

Sources: Wind, CITIC Futures

For the second half of the year:

New local bonds: Historically, quarterly peaks of net local bond supply fall in Q2 or Q3, and Q3 is set to be the concentrated issuance window for H2. We assume Q3 new local bond issuance accounts for the three-year average share of 38% of the full-year quota, with the remainder issued in Q4; monthly issuance weights within each quarter follow the three-year average. Under this assumption, new local bond issuance will reach RMB 1.98 trillion in Q3 and RMB 1.06 trillion in Q4.

Refinancing bonds: Around RMB 100 billion of refinancing bonds will be issued in the first week of June, lifting June's total refinancing bond supply to RMB 300 billion. Assuming even monthly distribution of the remaining quota in H2, refinancing bond issuance will hit RMB 139.2 billion each in Q3 and Q4.

Refinancing bonds used to roll over maturing debt have minimal impact on net financing, so we simplify local bond net financing as the sum of new local bonds and refinancing bonds. All told, local bond net financing is forecast at RMB 2.12 trillion in Q3 and RMB 1.20 trillion in Q4.

(2) Treasury Bonds: Projected Net Financing of RMB 2.00 tn in Q3, RMB 1.91 tn in Q4

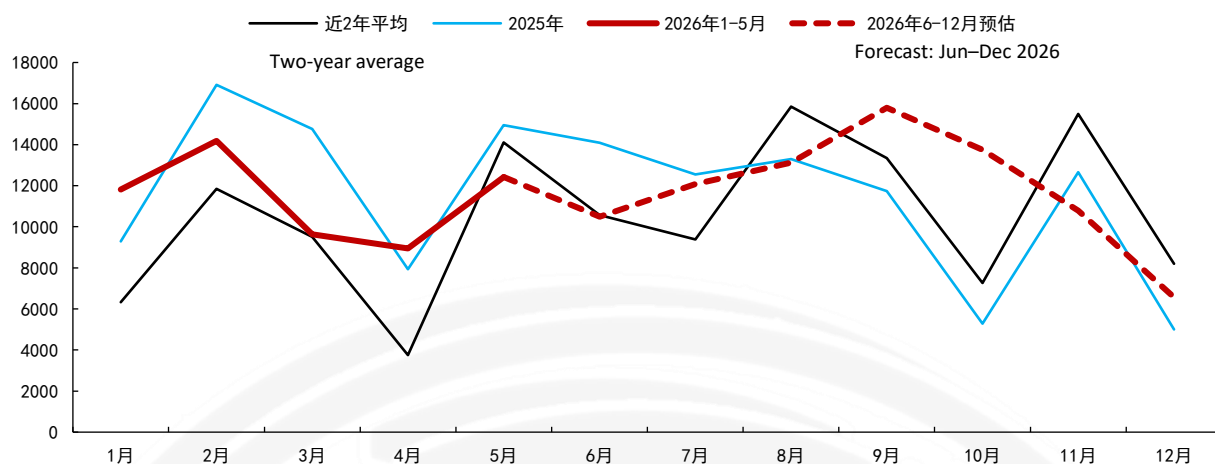

General treasury bonds: RMB 3.08 trillion of net financing remains available for June–December. Since April, 10-year treasury bonds have been issued twice monthly at roughly RMB 90 billion per tranche, a volume we hold constant through year-end. Other key tenors are issued once monthly, with per-tranche size fixed at the May average of RMB 158 billion.

Ultra-long-term special treasury bonds: RMB 932 billion remains to be issued across 17 tranches from June to October, including five 20Y, nine 30Y and three 50Y offerings. Starting July, each 30Y tranche will be reduced to RMB 70 billion.

Under these assumptions, June net treasury financing totals RMB 419.1 billion, with total H2 net treasury financing at RMB 3.91 trillion: RMB 2.00 trillion in Q3 and RMB 1.91 trillion in Q4.

Combining projections for local bonds and treasury bonds, total H2 net government bond financing is estimated at RMB 7.21 trillion, split into RMB 3.31 trillion of local bonds and RMB 3.91 trillion of treasury bonds by net financing volume. Quarterly breakdowns stand at RMB 4.1 trillion (Q3) and RMB 3.11 trillion (Q4), with the supply peak expected in September.

Figure 12: Forecast of Net Government Bond Financing (RMB 100 mn)

Sources: Wind, CITIC Futures

In summary, Fiscal policy delivered frontloaded stimulus in Jan–Feb, yet local fiscal spending momentum slowed markedly in March–April, weakening aggregate growth stabilization. Ample quota remains for existing fiscal tools in H2, removing the urgent need for additional new stimulus. Still, existing policies will be rolled out faster, local bond supply will accelerate in July, and new policy-backed financial instruments will launch more rapidly in Q3. From a supply perspective, slow government bond issuance in the first five months leaves a large stock of pending bonds. Local budget adjustments have also lagged as of end-May, keeping new local bond supply subdued in June and amplifying liquidity disruptions in Q3. We forecast total net government bond financing of RMB 7.21 trillion in H2, comprising RMB 4.1 trillion in Q3 and RMB 3.11 trillion in Q4, with the financing peak likely occurring in September.

Appendix: Chinese Version

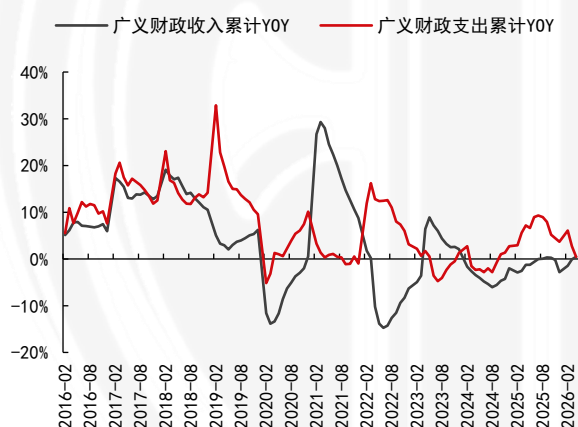

附录：中文版

今年 1-2 月财政虽前置发力，但 3-4 月地方财政发力明显放缓，拖累整体财政稳增长力度。前 5 月政府债发行节奏相对偏慢，下半年存量政策空间仍充足。其中，新增地方债剩余约 3.37 万亿，一般国债净融资剩余约 3.08 万亿，出台增量政策的必要性暂不高。3 月以来内需边际走弱，Q3 预计存量政策可能加快落地，预计 7 月地方债发行提速，Q3 新型政策性金融工具加速落地。Q3 供给扰动或增加。下半年预计政府债净融资规模为 7.21 万亿；其中 Q3、Q4 政府债净融资规模分别为 4.1 万亿、3.11 万亿，高峰可能出现在 9 月。

1. 3 月以来财政力度或有所放缓

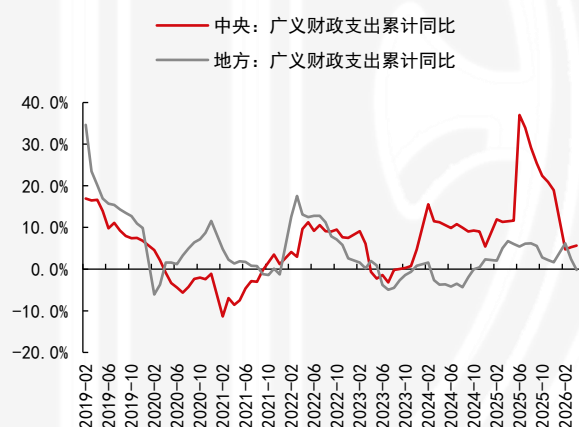

1-2 月财政前置发力，但 3 月以来地方财政发力放缓，拖累财政稳增长力度。前 2 月，广义财政支出增速同比升至 6.07% 的偏高水平。但 3 月以来，财政支出力度边际收敛，前 4 月广义支出累计同比增速回落至 0.44%。分央、地来看，前 4 月中央广义财政支出累计同比增速为 5.64%，而地方广义财政支出累计同比增速降至 -0.20%，地方财政发力放缓拖累整体财政稳增长力度。

图表1：3-4 月广义财政支出增速回落

资料来源：万得，中信期货

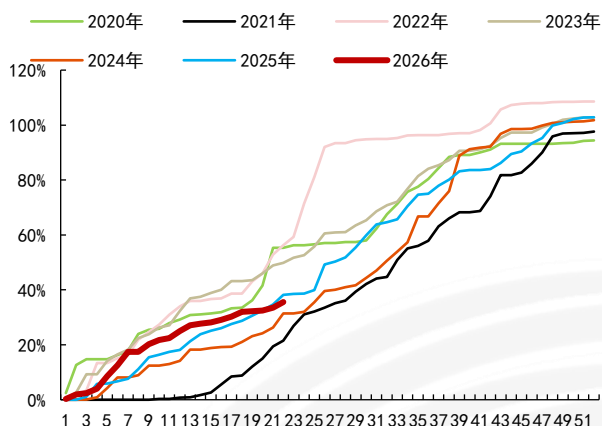

图表2：3-4 月地方财政发力明显放缓

资料来源：万得，中信期货

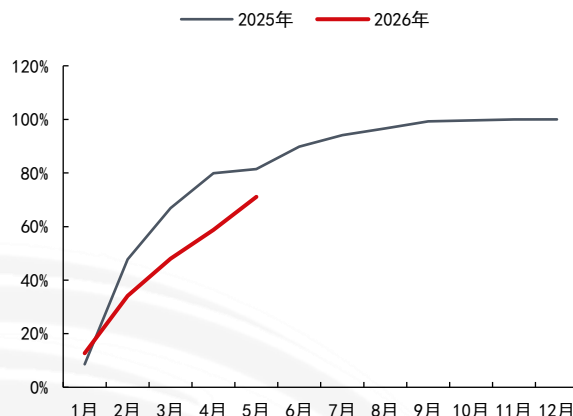

前 5 月地方债发行进度偏慢，6-12 月新增地方债剩余规模约 3.37 万亿、置换债约 5783 亿。前 5 月地方政府发行新增一般债 3396 亿，发行新增专项债 1.50 万亿，新增地方债累计发行 1.83 万亿。新增地方债累计发行进度为 35.56%，发行进度整体慢于去年同期。新增地方债剩余规模约 3.37 万亿。今年置换债发行节奏较去年也偏慢。今年前 5 月累计发行置换债 1.42 万亿，同比减少 2074 亿；今年前 5 月累计发行进度约 71.08%，而去年前 5 月置换债发行进度为 81.46%，今年进度偏慢约 10 个百分点。6-12 月剩余待发置换债规模为 5783 亿。

图表3：前5月新增地方债发行进度偏慢

资料来源：万得，中信期货

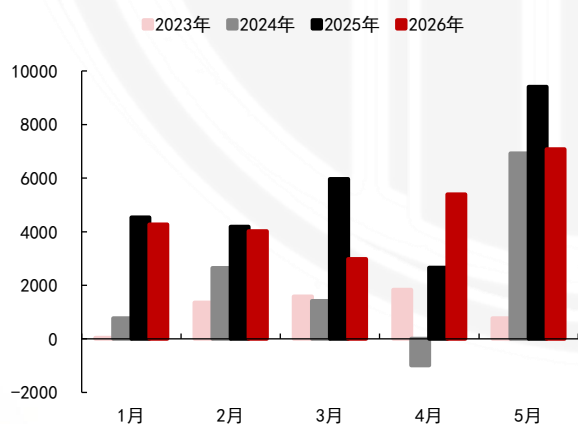

图表4：前5月置换债发行进度也偏慢

资料来源：万得，中信期货

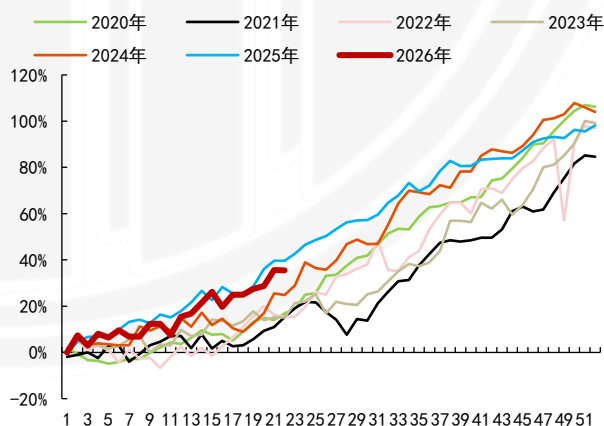

国债发行节奏略慢于去年，但仍处于历史同期偏快水平，6-12月剩余待发国债净融资为4.32万亿。今年前5月国债累计净融资约2.37万亿，同比减少约3004亿，差异与今年中央金融机构注资特别国债发行时间延后有关。前5月国债累计进度为35.48%，去年同期累计进度为39.70%，同比偏慢约4个百分点。尽管今年节奏较去年偏慢，但与历史同期相比，今年发行前5月发行进度仍处于2020年以来的偏快水平。分券种来看：超长期特别国债方面，今年前5月，超长期特别国债累计发行3680亿，同比增加约50亿，规模差异不大，不过期限结构上，30Y占比从去年同期的58.68%提高至69.29%；一般国债累计净融资2.01万亿；注资特别国债截至5月底尚未启动发行。6-12月剩余待发国债净融资为4.32万亿，其中，一般国债、超长期特别国债、注资特别国债规模分别为：3.08万亿、9320亿、3000亿，累计为4.32万亿。

图表5：国债月度净融资规模（亿元）

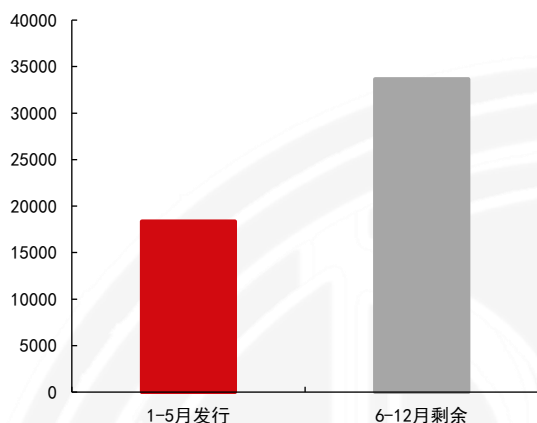

资料来源：万得，中信期货

图表6：前5月国债累计净融资进度

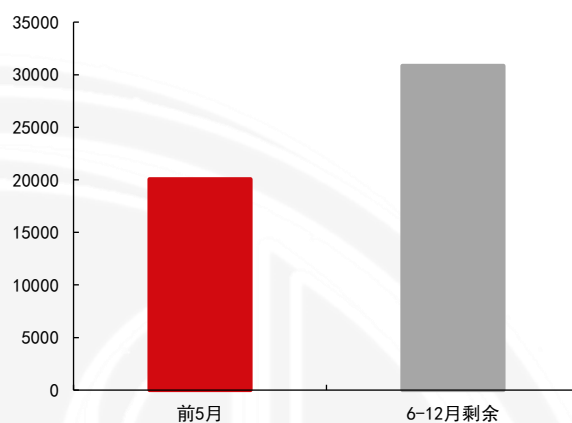

资料来源：万得，中信期货

整体来看，今年 1-2 月财政虽前置发力，但 3-4 月地方财政发力明显放缓，拖累整体财政稳增长力度。前 5 月新增地方债、置换债发行节奏均偏慢，6-12 月剩余新增地方债、置换债规模分别约 3.37 万亿和 5783 亿。国债方面，国债发行节奏略慢于去年，但仍处于历史同期偏快水平，6-12 月剩期待发国债净融资为 4.32 万亿，其中一般国债空间约 3.08 万亿。下半年存量政策空间仍充足，出台增量政策的必要性暂不高。

图表7：新增地方债发行（亿元）

资料来源：万得，中信期货

图表8：一般国债净融资规模（亿元）

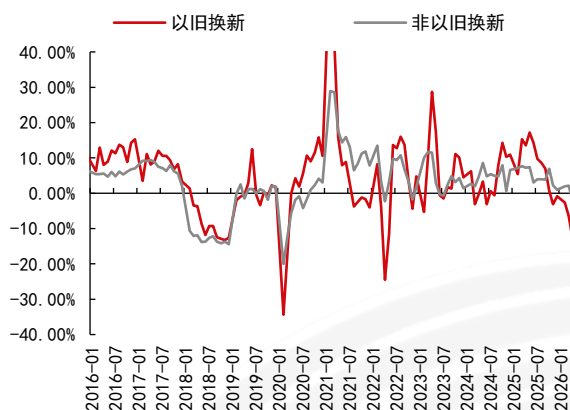

资料来源：万得，中信期货

2. Q3 存量政策落地节奏或加快，政府债发行提速

预计存量政策可能加快落地，预计 7 月地方债发行提速，Q3 新型政策性金融工具加速落地。Q3 供给扰动或增加。下半年预计政府债净融资规模为 7.21 万亿；其中 Q3、Q4 政府债净融资规模分别为 4.1 万亿、3.11 万亿，高峰可能出现在 9 月。

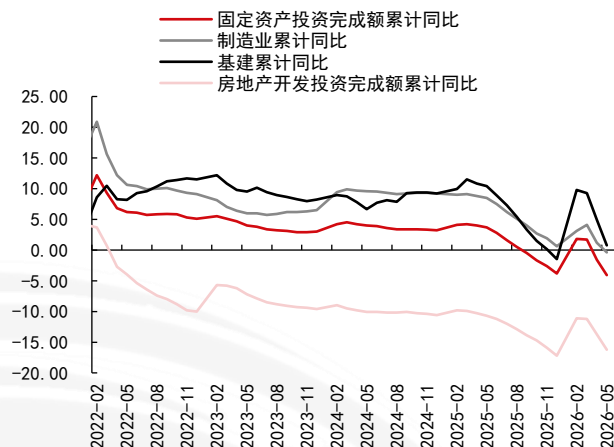

3 月以来基本面数据持续偏弱，预计 Q3 存量政策落地节奏或加快。尽管今年以来新经济景气度整体较高，但传统经济景气度自 3 月以来边际走弱，并在近期带动内需数据回落。消费方面，3 月起社零增速开始回落，5 月社零增速同比增速-0.6%，为 2023 年以来首次同比负增。若将限额以上商品销售额按照以旧换新、非以旧换新的大类区分，可发现，商品消费的降速不仅仅受以旧换新政策影响，非以旧换新商品消费增速也有所回落。投资方面，Q2 以来固定资产投资增速也边际走弱。前 5 月固定资产投资累计同比-4.1%，一方面可能与基期效应有关；另一方面，3 月以来地方财政发力边际减弱，叠加房地产投资增速持续回落，拖累固投增速表现。在此背景下，存量政策加速落地的必要性有所提高。预计存量财政政策在 Q3 落地节奏或将加快，对应 Q3 政府债发行节奏也可能提速。

图表9：社零限额以上商品当月同比（%）

资料来源：万得，中信期货

图表10：固定资产投资累计同比（%）

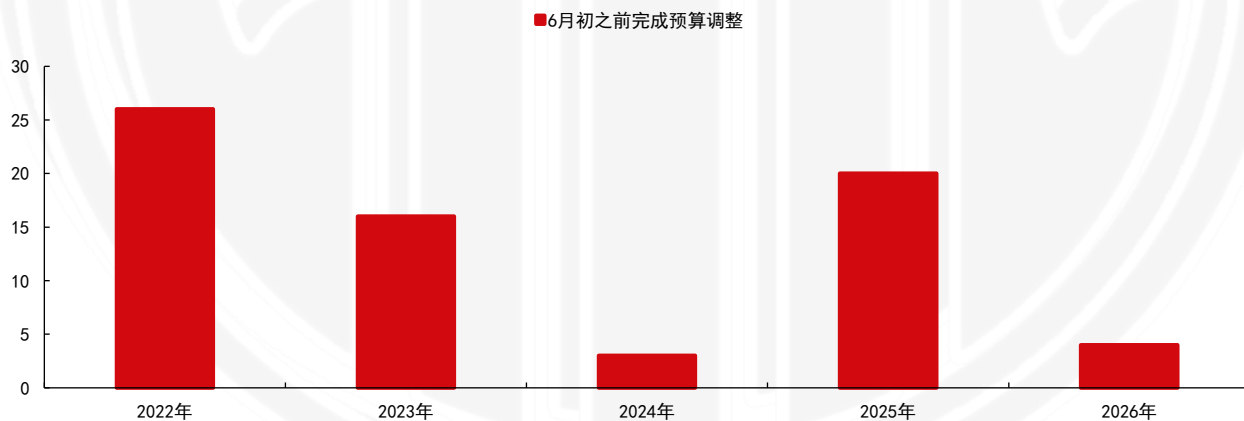

资料来源：万得，中信期货

1、地方债：预计 Q3、Q4 净融资规模分别为 2.12 万亿和 1.20 万亿

6 月预计新增地方债发行规模可能延续偏低或仅小幅增加。从地方政府预算调整进度来看，截至 5 月 29 日，5 月进行预算调整的省份仅有 4 个，与 2025 年相比，今年预算调整节奏整体偏慢，这可能意味着 6 月新增地方债发行规模仍不高，类似 2024 年，则 Q3 地方债供给压力或有所加大。我们预计 6 月新增专项债发行规模增加至 3000 亿。

图表11：今年地方政府预算调整进度偏慢（年）

资料来源：万得，中信期货

下半年来看：

新增地方债方面，从往年经验看，政府债净供给的季度高峰往往出现在 Q2 或 Q3，下半年预计 Q3 为地方债密集发行期。假设 Q3 新增地方债发行规模占全年额度的比例参考近 3 年均值约 38%，剩余部分在 Q4 发行；假设下半年每月发行占全季度比例也参考近 3 年均值，则可得新增地方债在 Q3、Q4 的发行规模分别为 1.98 万亿和 1.06 万亿。

置换债方面，6月首周将发行约1000亿置换债，预计6月置换债发行规模增加至3000亿。假设剩余规模在下半年每月均匀发行，则Q3、Q4置换债发行规模均为1392亿。

由于地方发行再融资债接续存量到期债券对净融资影响相对较小，因此，本处将地方债净融资简化为新增地方债与置换债发行规模。小结来看，预计Q3、Q4地方债净融资规模2.12万亿、1.20万亿。

2、国债：预计Q3、Q4国债净融资规模分别为2.00万亿、1.91万亿。

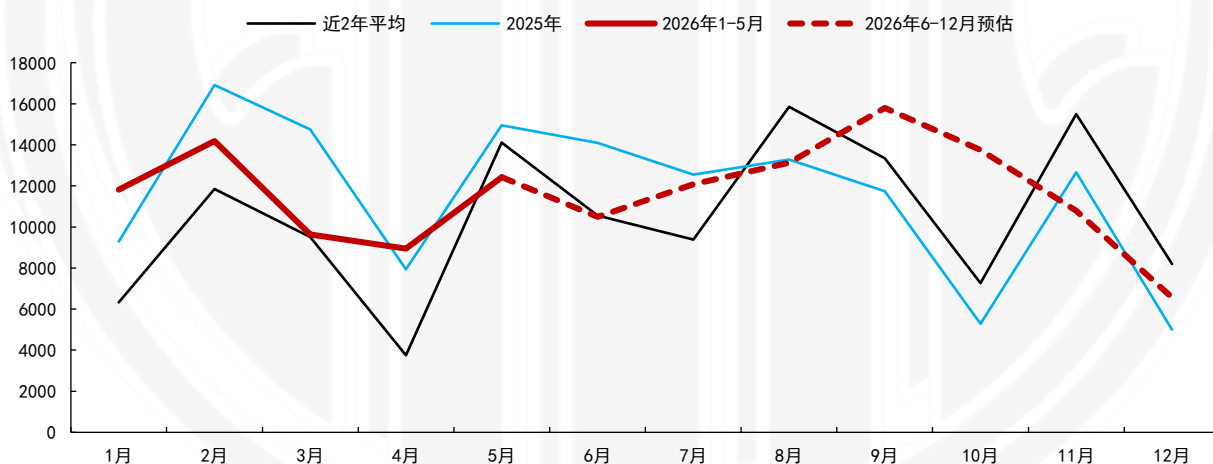

普通国债方面，6-12月普通国债净融资剩余空间约3.08万亿。发行节奏上，10Y国债自4月起单月发行两次，每次规模约900亿，假设6-12月每次规模均为900亿。而其他关键期限单月发行一次，假设其他关键期限国债单次发行规模参考5月均值为1580亿。

超长期特别国债方面，6-10月剩余待发规模为9320亿，待发次数为17次，其中，20Y、30Y、50Y剩余待发次数分别为5次，9次，3次。假设自7月起，30Y单次发行规模降为700亿。

则6月国债净融资为4191亿，下半年国债净融资约3.91万亿，其中，Q3、Q4国债净融资规模分别为2.00万亿、1.91万亿。

综合上述国债及地方债预测，预计下半年政府债净融资约7.21万亿；其中地方债净融资约3.31万亿，国债净融资约3.91万亿。分季度来看，Q3、Q4政府债净融资规模分别为4.1万亿、3.11万亿。政府债净融资高峰可能出现在9月。

图表12：政府债净融资预测（亿元）

资料来源：万得，中信期货

整体上看，今年1-2月财政虽前置发力，但3-4月地方财政发力明显放缓，拖累整体财政稳增长力度。下半年存量空间充足，增量政策出台的必要性暂时不高；但存量政策可能加快落地，预计7月地方债发行提速，Q3新型政策性金融工具加速落地。从供给角度看，前5月政府债发行节奏相对偏慢，使得存量待发规模偏高。而截至5月底，地方预算调整节奏也偏慢，预计6月新增地方债发行规模仍不高，Q3供给扰动或增加。下半年预计政府债净融资规模为7.21万亿；其中Q3、Q4政府债净融资规模分别为4.1万亿、3.11万亿，高峰可能出现在9月。
